#### Johnson Makes Good Sale.

The sale of Durocs and Short-horns made by Mr. Axel F. Johnson, at Osceola, Neb., on February 22d was well attended by breeders and farmers of Nebraska, in spite of a stormy, bad day. It was certainly a snappy, even sale and the work of Colonel Callahan on the block and was ably seconded by liberal bidding around the ring. The top price was \$125, paid for No. 5 in catalog, a splendid sow by Improver II. Jr., she going to the well-known breeder, Mr. E. J. Brown, of Osceola, Neb. Below is a list of those selling at \$50 and over:

Lot.	Name	Price.
1	J. K. Bradley, Surprise, Neb.	\$ 90.00
2	Cottrell & Curtis, Osceola, Neb.	125.00
3	C. A. Curtis, Osceola, Neb.	100.00

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## DIGESTIVE POWER OF COWS AND CALVES.

The fact that there is a considerable difference between the digestive powers of the mature dairy animal and the growing calf is well borne out by observation as well as test. Some work done recently at the Michigan station brought out results along this line that are thoroughly in keeping with general belief.

From a comparative test of feeding whole corn to cows, heifers and calves it was found that where whole corn was fed along with clover hay for roughage there was approximately 23 per cent of the corn that was unmasticated, or not broken up in the process of chewing, by the cows, 11 per cent by the heifers and a trifle over 6 per cent by the calves. With oats the results showed more complete mastication as will be seen by the statement that the proportion of this grain unmasticated by the cows was 12 per cent, by the heifers 5½ per cent, by the calves nearly 3 per cent.

The same amounts by weight of each grain was fed and in the following proportion: Cows, seventy-seven pounds per week; heifers, forty-two pounds per week, and calves, sixteen pounds per week. From these results it will be seen that the amount of oats eaten without being masticated was practically one-half as much as the amount of corn. Arguing from this fact the plan of grinding only the corn where a ration of corn and oats is fed to cows should be a good one, since the cost of grinding this much of the feed should certainly warrant the expense in any case, even for young stock.

The effect of feeding a ration of equal parts of corn and oats was that a still greater amount of the whole grain was unmasticated by the older stock, while with the calves the per cent so passing through the digestive tract was a trifle less than where corn alone was fed. Just why the percentage of unmasticated grain should have been greater in the cows where two grains were fed is not accounted for, though it might be quite probable that the larger particles of food, which was corn in this case, would be in a position during the

process of chewing to prevent the smaller grains from being acted upon. This fact all the more emphasizes the necessity of grinding the harder larger grains in order to secure an evenness in the ration that would induce better mastication.

There is an opinion common that cows derive some of the value of the grain that passes through their digestive tract whole. This is more likely true in the case of animals that are at ease, but in the case of the cow giving a good mess of milk we have a hard working animal. Her ration must be made as easy of digestion as possible. The results secured in this test showed that the grain that was unmasticated and passed through the animal intact was of the same chemical composition as before feeding. From this it would seem that no benefit is derived from grain that passes through the digestive tract unmasticated. It is probably in keeping with practice, too, for a hog will keep in good shape on the droppings where the grain remains intact, while where ground feed is fed there is little desire on the part of swine to pick over the droppings of cows.

It might be interesting here to note that the germination power of the grain passing through the system was affected very markedly, though not entirely destroyed. Of the corn that passed through whole a little over 4 per cent germinated, while of the oats a trifle over 10 per cent grew. The germination test of both grains before feeding was average.

The points to be learned from the above results are that a great deal of grain that is fed whole to the cow passes through her digestive tract unacted upon. Unless it is picked up in the droppings its value has been lost. Moreover, calves masticate whole grain much more thoroughly than older stock. The increased ease with which ground feed is digested should warrant a certain amount of grinding.

## Butter-making on the Farm.

To the Editor of The Homestead.

There is probably no product which nets the farmer more for his labor and investment than butter which has been properly made and marketed. No more labor or trouble is required to make the fancy product than to make "grease," yet "grease" sells at about one-third the price of the first grade butter. When extra dairy butter brings twenty-nine

## TO FARMERS AND DAIRYMEN

It will pay every farmer or every farmer's wife to sit right down and write for Sharples "Business Dairying." This valuable book contains information that can be found in no other book, and will help any dairyman to make his business more profitable. It tells How to Feed, What to Feed, How to Care for Feed, What Foods Produce Greatest Amount of Milk, How to Care for the Dairy Cow in the way to get best results, and the whole book is practical. To get all the good out of your milk you should of course use

## THE SHARPLES TUBULAR CREAM SEPARATOR

It is not only guaranteed to more than pay for itself annually, but the ease with which you can skim, the low can, the self-oiling bearings, the simple Tubular bowl with only one little part inside to wash, the moderate price, are all points you should know about. Send today for the free "Business Dairying" and full information about the Sharples Tubular, giving number of cows you keep. Ask for booklet G. 121

Mrs. J. Renken, Trenton, Ia., says "We cleared \$100.00 in six months off seven cows."

THE SHARPLES SEPARATOR CO.,  
Toronto, Can. WEST CHESTER, PA. Chicago, Ill.

## The Empire proves its claims

CLAIMS are words, proofs are facts. Mere claims have often sold goods. Proofs are a record of dollars made. You, or any one else, don't want the cream separator that *claims* the most. You want dollars from your handling of milk.

Therefore you want the *proved* separator, the dollar-making

## Frictionless Cream Empire Separator

Here are some *facts* that will interest you: The Empire Turns the most easily—is practically frictionless;—Is most easily washed—a few simple parts without a cranny or crevice in them;—

Gets all the cream, and the highest quality of cream at that;—

Is durable—will not get out of order—will cost you practically nothing for repairs.

These facts spell dollars for you, if you give them the opportunity.

## Let Us Prove Them

Send for our new catalogue and proofs. Ask for our free dairy books too. They cost you *nothing*, but will show you where you can make *dollars*.

Empire Cream Separator Co.,  
Bloomfield, N. J. Chicago, Ill.

cents, firsts will be about twenty-six cents, with seconds at about twenty cents. The nine cents difference between extras and seconds is not obtained by any secret process, but by the use of a little more care and common sense in the handling of the butter on its way from the cow to the consumer. Butter is not made at the churn, but from the time it leaves the cow until it reaches the table the making or unmaking process is going on.

To make good butter it is essential that one have good milk, which comes only from healthy cows, kept in clean, well ventilated, well drained barns, fed on clean, sweet feed and with plenty of pure water to drink. The utmost cleanliness should be observed in milking. Milkers, as well as utensils which come in contact with the milk, should be scrupulously clean. Immediately after drawing the milk should be removed from the barn to a clean room where the air is sweet and free from dust. If left in the barn for any length of time it will absorb undesirable odors which will be transmitted to the butter. Decaying vegetables, manure or any ill-smelling refuse should never be found near the milk house, for such odors are readily absorbed by the butter.

The centrifugal system of separation has so often had its advantages set forth that we will not consider them here. Before running through the separator the milk should be strained through a metal gauze. After skimming a 30 to 40 per cent cream it should be cooled to a temperature of 50 degrees or lower, with occasional stirring during the cooling. As it is neither practicable nor convenient to churn oftener than two or three times a week on most farms, this cream must be held at as low a temperature as is possible until churning time. Never mix fresh cream with cream of the previous day until the former has been cooled to the same temperature as the latter. Do not place a tight cover on a can of warm cream, as the gases cannot pass off and will affect the flavor of the butter.

The cream should be ripened or soured previous to churning, as the bacteria which cause the cream to sour are also responsible for the desirable flavor of the butter. Ripened cream also produces a butter of superior keeping quality. Also, less fat is lost in the buttermilk with ripened cream. The day before you wish to churn, the cream can may be removed from the water into which it was placed to cool the cream, and allowed to stand at a temperature of from 50 to 70 degrees until sour. Properly

## Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

## Iowa Dairy Separator

Write today for catalog 25, and let us send you plenty of proof to back up all we say in this advertisement. Separator made in all sizes from 250 to 750 pounds. Invest one cent in a postal card and learn how to save \$100. Do it today.

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

ripened cream has a clean, sour taste and breaks up in chunks when poured. It also has a granular appearance. To secure an even ripening the cream should be stirred at intervals. If cream is over-ripened the flavor of butter will be more pronounced and may become very disagreeable. When this mild acidity is reached the cream should again be placed in the cold water to check the souring process. It can now be held at a low temperature until the following morning when it is ready to

churn. An accurate floating dairy thermometer is necessary in this work, for temperature has great influence upon the quality of the butter. Barrel or swing churns of proper size are convenient for farm work. The common lever pattern butter worker is much more handy and effective than the old bowl and ladle.

The churning temperature will vary between 50 and 58 degrees. As there is a great proportion of hard fats in the butter in winter, the churning temperature must be high or the churning will be needlessly long and tedious. In the summer when the softer fats are in preponderance the churning temperature must be lowered. Fat from cows fed on green feed is of higher color than when fed on dry feed, so the time of year will also govern the amount of coloring to be added. A light straw color is probably most desirable, as there is a growing tendency to use less color in butter. The churn should be stopped and the buttermilk drawn off when the granules are a little larger than wheat kernels. Clear, pure water at about the same temperature as the buttermilk should now be added and the churn revolved a few times. Draw this water off and add an equal amount at about 2 to 4 degrees warmer than the first. The churn should then be revolved until granules are about the size of a hickory nut. This water may then be drawn off and the butter placed upon the worker, ready for salting and working.

Salt is added to the butter to improve the flavor by making it more marked, and at the same time the keeping quality is improved, for salt has germicidal properties. The salt should be fine, white and pure. Coarse, dirty, ill-smelling salt should never be added to butter, as those undesirable characteristics will be transmitted to the finished product. If butter is salted when granules are small, the granules contract, forcing the moisture out, which collects in large drops throughout the mass, producing a leaky appearance. Butter should be worked until salt is evenly distributed and dissolved. Care should be taken not to overwork the butter, for it will then be weak-bodied and salty. If the moisture in the butter is not saturated and the salt is unevenly distributed, mottled butter will be the result. Small white specks in butter are often caused by pieces of hard unchurned cream which have not taken the color. After butter is worked it should be packed at once. If wood tubs are used they should be first soaked in salt brine and then lined with a good grade of parchment, which comes cut to fit the tub. The butter should be firmly packed so there will be no air spaces throughout the mass. When the tub is full the butter may be made smooth with a straight edge or

string and the liner lapped over the butter about one-half inch. The cloth circle is then placed on the top and a handful of wet salt spread over the surface. The cover should then be neatly fastened with the tub tins. If the small earthen jar is used no liner is needed. The package should always be neat and clean.

The best butter would be a poor seller unless the package is neat and of a suitable size. One must cater to the likes and dislikes of his customers if he wishes success. No matter what you like or think best, you will probably find it an expensive proposition to educate the taste of your customers. If for any reason your butter is "off" do not spoil your business by taking it to your customers; better sell it as packing stock at a reduced rate. It will be money to you in the long run. Carefulness, common sense and cleanliness will raise the price of the farm butter, cut off the source of food of the large renovating factories, and insure a goodly profit for the maker.

Herman Horneman.

Story county, Iowa.

#### Sheldon Bros.' Sale.

The Duroc Jersey sow sale of the Messrs. Sheldon Bros. again proved a strong drawing card, and breeders from several different states were present. There was a strong delegation of Illinois breeders there, besides others from Missouri, Iowa, and Kansas. Everything was bought for the low dollar, and while the attendance of breeders was very large, there was an evident disposition to buy for the least possible amount. Among the Illinois breeders present were Messrs. George W. Trone, Rushville; Charles Cooper, Ferris; A. A. McNeill, of McNeill Bros., Bowen; H. B. Griffiths, Bowen; Ed A. Baxter, Pawnee; Mel Kraschel, of the firm of Fred Kraschel & Son, Macon; J. J. McCabe, Hersman; J. H. Norris, Bowen. Thirty-six head sold averaged \$125.14. No. 9 topped the sale at \$450 and went to Messrs. Fred Kraschel & Son, Macon, Ill. She was a daughter of Radiator and was bred to Proud Advance. No. 6 sold for \$377.50 and was purchased by Messrs. M. O. Ruthruff & Son, South Haven, Kan. She was a daughter of Proud Advance and was bred to Ohio Chief II. Below is a complete report of the sale:

Lot.	Price.
1 M. O. Ruthruff & Son, South Haven, Kan. ....	\$180.00
2 Frank Laird, York, Neb. ....	52.50

## What Co-operation Has Done Farmer's Friend Separator Costs You Only \$55 Delivered

WE farmers of Iowa have broken away from the creamery trust and are manufacturing and marketing our own dairy products. During the past eight months, we have forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa.

Now we are saving money in another way—on farm supplies, and our offering of the Farmer's Friend Cream Separator gives you a fair idea of the saving.

This Separator is made for our members, in the best cream separator factory in the world, and we fully guarantee it to be as good as any \$90.00 Standard separator ever made.

Just think of the difference in price, \$35.—Thirty-five dollars just as good as thrown away as far as you are concerned. Thirty-five dollars—not of separator value and efficiency, but of big profits for the manufacturers. It was only by getting nearly 2,000 farmers together, (there are more of us now) that we could force this reduction.

But we have it now, and we want every farmer in this part of the country to know about it. We organized to benefit the farmer and we want to help just as many as we can. Space will not permit us to describe the "Farmer's Friend" fully here. Send for our catalog. We have selected a number of articles on which we are able to offer remarkably low prices. We save you from 20% to 50%. Write today.

FARMER'S CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.

Capacity, 450 to 500 Lbs.

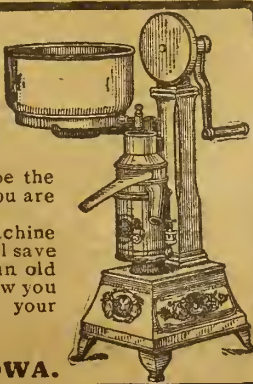

## Yes, Something New! —THE— Monarch Cream Separator

is a step in advance of all others. We guarantee it to be the lightest running and most convenient machine made. If you are needing a separator, why not get one up-to-date?

We have fewer parts to wear out, therefore it is a machine of longer life. It will not only save all your cream, but it will save your strength. Why buy a man-killer? If you are using an old style machine that is wearing you out to run it, we will allow you what we can for it, in order to introduce our machine in your neighborhood.

Write us for free catalogue and state the size of your dairy.

LISLE MFG. CO., Box 39, CLARINDA, IOWA.

## GOOD ADVICE ABOUT CREAM SEPARATORS

Announcement of the Alpena Farm Produce Co. in the Alpena, Mich., Argus, Feb. 13, 1907.

"In reply to inquiries we wish to repeat that the Alpena Farm Produce Co. will not buy cream that is not separated by a cream separator, for the reason they must have pure, clean cream which can be obtained in no other manner. Therefore every patron of the company must have a separator, and, if you have not already procured one, you had better see about it in the very near future. The Produce Co. is very emphatic in its assertion that it does not matter what kind of separator is used, so long as it is a good standard make. Do not buy 'cheap' separators first because some 'mail order' house catalogue says it is the best in the world. The fact is that 'cheap' separators are always the dearest in the end. In the first place they do not skim as closely, and in the next place they will not stand the test of years. If you have a 'cheap' separator, not a standard make, you must not complain if you do not make as much money from your cows as you thought you would. The Produce Co. is handling the DE LAVAL separator because they can safely recommend it as an absolutely reliable machine. If that machine does not prove satisfactory the trouble must then be with the manner in which you care for and feed your cows. Be sure you start with a good machine."

The big creamery concerns which look the country and the world over in reaching separator conclusions are almost invariably users and endorsers of the DE LAVAL machines. Their example and advice is the kind that the inexperienced buyer may safely and wisely follow.

#### Taylor-Morris-Schrotberger Duroc Sale.

Breeders present at the first annual brood sow sale of Messrs. Taylor, Morris and Schrotberger & Sons were well repaid for being there, owing to the fact that the offering was above the ordinary in point of breeding and individuality and prices were not what they should have been. Colonel Reppert opened the sale and sold the entire offering in less than two hours at satisfactory prices. Messrs. F. B. Chester & Son, of Dwight, Ill., topped the sale, paying \$112.50 for a granddaughter of Allison, bred to Archer, one of the best sons of Messrs. Thomas & Hogsett's noted breeding and show boar, Ambition. Mr. J. M. Valentine, of Metamora, Ill., was the contesting bidder. A list of sales of \$25 and over follows:

## VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

## SYMPTOMS AND TREATMENT.

## STRAIGHT PASTERNS.

I have a two-year-old colt that stands a little too straight on his pasterns behind. He is sired by a fast horse and I think he is going to have some speed. What would be the best way to keep his feet trimmed so as to make him set back as much as possible? Any information will be appreciated.

Trimming the hoofs and shoeing will have little effect in off-setting the tendency to straight pasterns which are due to heredity and aggravated by high feeding and too much standing on dry board floors. We would trim the feet to natural proportions with front of hoof about fifty-five degrees of slope, then put on ordinary shoes and turn the colt out daily and feed well on oats, bran, hay, etc. He should occupy a roomy box stall when in stable and its floor by preference should be of earth.

## GREASE.

I have two horses which have what is called "grease heel." Both of them are lame with it. When I first noticed it it did not amount to much, but kept getting worse. I first put on air slack lime and it did no good. I am using white lead now. Several horses in the neighborhood have it also; some of them are so bad that they cannot work. It gets to be a running sore and a bad odor comes from it. Can you tell me what causes it and what to do for it?

The disease is not catching, but is particularly liable to attack horses of heavy draft blood and having coarse hair on legs below knees and hocks. It is induced by filth, failure to dry legs when wet or after washing, standing in stable idle and overfeeding on corn or other grain when idle. It is practically incurable when thoroughly established or so obstinate and difficult to cure that few men care to undertake the work necessary for treatment. This consists first in stopping all grain food if animal is fat and allowing him to live on hay, roots and bran mashes and in summer time on grass alone. In winter season horse should have lots of exercise every day no matter what the weather may be and is not to stand idle a single day. The stable should be kept clean, light and perfectly ventilated. Clip hair from legs and poultice with hot flaxseed meal, mixing in each poultice two or three tablespoonfuls of powdered wood charcoal and two drams of coal tar disinfectant.

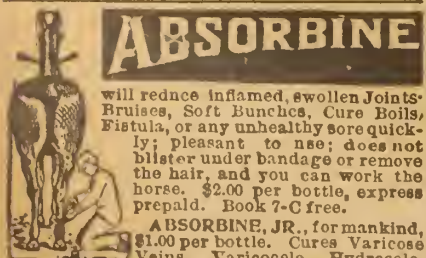

## Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

**Fleming's Spavin Cure (Liquid)** is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

**Fleming's Vest-Pocket Veterinary Adviser** describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write. FLEMING BROS., Chemists, 210 Union Stock Yards, Chicago, Ill.

## ABSORBINE

will reduce inflamed, swollen joints—Bruises, Soft Bunches, Cure Boils, Fistula, or any unhealthy sore quickly; pleasant to use; does not blister under bandage or remove the hair, and you can work the horse. \$2.00 per bottle, express prepaid. Book 7-C free.

**ABSORBINE, JR.**, for marking, \$1.00 per bottle. Cures Varicose Veins, Varicose Hydrocele, Strains, Bruises, stops Pain and Inflammation. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

...CURES...

CLOUSE & STAMM, Chemists,  
228 S. STATE ST., GENESEE, ILL.

"I cured eight horses of fistula with the above remedy."  
Norman H. Bearer, Supervisor of Mason Township, Geneseo, Ill.,  
May 19, 1906.

Renew poultice night and morning until discharge ceases; then wet legs often with a solution of two ounces each of sulphate of zinc and glycerin in a pint of water. Internally give horse half an ounce of Fowler's solution of arsenic night and morning until well; then reduce the medicine gradually until in ten days he is doing without.

## THIN COLT.

I have a colt five months old that has been weaned one month. Since weaning I have been feeding it one pint of oats, one-half pint wheat bran and a measure of stock food twice a day, and the best of alfalfa hay—all it wants. It grows, but is very thin in flesh. I would be pleased to know the proper feed and quantity to feed colt.

Stop feeding stock food and feed the colt all he will take three times daily of a mixture of two parts oats and one part wheat bran adding dried blood meal in small quantities as he will take it. Lessen the amount of alfalfa hay. If you can give clean, sweet skim-milk it would be good for the colt if fed in small quantities three times daily and in it were mixed a little black strap molasses and flaxseed jelly.

## SKIN DISEASE.

Will you please tell me what is the matter and what to do for my pigs? They seemed to be doing nicely and all at once they began to break out in little lumps under the skin about the size of a lima bean. These appeared on their hind legs first and then on their bodies. They are fed on milk from the separator with shorts mixed in and some corn, have a good hay bed to sleep on and run where they please.

This is a simple breaking out induced by unhygienic surroundings and conditions. Cleaning up of the pens, yards and sleeping places is indicated and necessary and should be combined with free use of disinfectants and whitewash. As a cure the pigs should be sprayed with a 1-50 solution of coal tar dip in which flowers of sulphur have been freely mixed. Repeat several times as found necessary.

## STOCKED LEGS.

I have a gray yearling colt whose hind legs are swollen from the ankle to the top of the hock joint. He was fed six ears of corn once a day in the pasture before he was stabled and when stabled three days his legs started to swell and have been swelling since. I fed him a reasonable amount of corn twice a day. I changed the feed to oats, but it is just the same. The swelling does not go down much while exercising in the day time. He eats heartily and seems to feel well.

A corn diet is unsuitable for a growing colt and the blood has become impure and sluggish so that "stocking" took place when colt was kept in stable. Continue feeding oats and add carrots if obtainable. Let him run out doors as much as possible and occupy a roomy box stall when in stable at night. Night and morning for a week give him in his feed a couple of teaspoonfuls of a mixture of equal parts dried sulphate of iron, powdered saltpeter and ground ginger and gentian roots; then skip ten days and repeat at end of that time. Allow free access to rock salt. Avoid feeding hay from low, wet ground.

## CANKER OF MOUTH.

I have a July pig that has lost all of her front upper teeth and part of her lower. They have simply rotted away. She was doing well until about four days ago when she began to act sick. Her mates seem healthy. Please tell me through the columns of your paper what the cause is and if it is contagious; also a remedy.

The disease is due to a germ known

CLEVELAND, OHIO.

as the bacillus necrophorus which is found in filthy feeding yards. At once isolate the diseased pig, or better still, kill and burn it, as there is practically no hope of recovery. Examine mouths and snouts of other pigs and at once dip their heads in a solution of one ounce of permanganate of potash in a gallon of warm water, if you notice anything amiss, and repeat the dipping daily until well. Any ulcers you may find should be thoroughly scraped and then painted with tincture of iodine before use of the dip. Clean up, disinfect and whitewash pig pens and houses. Feed mixed rations and use limewater freely in all food and drink. Corn should not be heavily fed at present.

## Best by Test.

The Combination Oil Cure for Cancer and Tumor has its imitators. Beware of them. Write today to the Originator for his free books. Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

## HAVE YOU SAWED YOUR SUMMER'S WOOD?

If you have not sawed your summer's wood, now is the time to do it. There is no way that a man can put up his summer's wood as easily and cheaply as he can with a folding sawing machine. One man can take this machine into the timber, saw down his trees all alone and saw them up and saw fully as much wood in a day as two men can with a common cross-cut saw. In other words, this machine will save the labor of one man. This machine has been on the market for a great many years and we have carried the advertisement in our columns for years. The machine is giving universal satisfaction wherever it is used and every one of our readers that burns wood or saws timber of any kind should have one. Taking into consideration the saving by the use of this machine it is one of the most economical machines sold. The frame of the machine is made of white ash; the machine is light, weighs only forty-one pounds; is adjustable so that it can be used on rough or level ground; it is furnished with saws of various lengths and saws any size log. We advise our readers to write to the Folding Sawing Machine Company, 158 E. Harrison St., Chicago, Ill., and ask them for a catalog, which shows large illustrations of the machine and gives many testimonials from every state in the union. With this machine, putting up your summer's wood will be a pleasure instead of a burden.

It Heals

#### SUMMARY.

39 head averaged .....\$53.40

### Sellers & Son Make Good Sale.

Messrs. M. A. Sellers & Son, of Huntley, Neb., held their annual brood sow sale on February 26th, and an average of \$35 was made on the entire consignment. The day was very cold and disagreeable and the crowd was not what it should have been on an occasion of this kind. The top price was \$61, paid for No. 18, a daughter of Improver Jr., and going to Mr. D. W. Troutman, of Mascot, Neb. Below is a list of those selling at \$30 and above:

Lot.	Price.
1. Ed Richards, Alma, Neb.....	\$39.00
2. J. C. Walker, Huntley, Neb.....	36.00
3. C. C. Wassen, Wilcox, Neb.....	37.50
6. Ed Richards.....	30.00
7. J. A. Cates, Republican City, Neb.....	37.00

21. R. A. Scott, Alma, Neb.....	30.00
22. Same.....	30.00

### Carey Cameron's Short-horn and Duroc Jersey Sale.

The public sale of Short-horn cattle and Duroc Jersey sows held by Mr. Carey Cameron, at Herman, Neb., on February 25th, proved one of the nicest sales in the state this year. He sold eighteen head of Short-horns and thirty-six head of sows, and it was an offering that he could be proud of. The cattle averaged \$145, the top prices being \$220 each for Rosedale Butterfly 4th and Rosedale Butterfly 5th, two excellent Butterfly heifers, and they were secured by Mr. S. S. Hall, of Pender, Neb. The cows and heifers averaged \$160.12 and the bulls \$131.78. Thirty-six head of sows averaged almost \$65. From the jump off the sale was quick and snappy and those present seemed eager to buy. Nothing was left un-

done by Mr. Cameron and his family to entertain the guests, and he certainly had a splendid crowd. In referring to his offering before the sale we made mention of the fact that buyers would not be disappointed in what he had to offer, and the following report of sales will tell the whole story more forcibly than we can. Col. Geo. P. Bellows cried the sale and he never did better work in his life. Below is a detailed report of the sale:

#### COWS.

Jennie Lind, six years, and b. c., Mike Wilson, Herman, Neb.....	\$210.00
Red Fanny, one year, James Broder-son, Herman, Neb.....	215.00
The Empress, one year, Carl Hansen, Herman, Neb.....	115.00
Roan Lady, two years, Henry Rewe, Herman, Neb.....	210.00
Roseland, two years, A. G. Jensen, Kennard, Neb.....	120.00
Rosedale Butterfly 4th, one year, S. S. Hall, Pender, Neb.....	220.00
Rosedale Butterfly 5th, one year, same.....	220.00
Mollie Totterby, seven years, H. O. Williamson, Herman, Neb.....	100.00
Lassie Lochinvar, two years, W. M. Flanagan.....	115.00
Red Phoebe, one year, Henry Gliss-man, Pender, Neb.....	102.50
Mojeska, four years, Carl Hansen.....	135.00

#### BULLS.

Red Lochinvar, one year, H. Panning, Hooper, Neb.....	\$152.50
Gold Coin, one year, Frederick Pan-ning, Hooper, Neb.....	150.00
Nick Longworth, eleven months, F. F. Peterson, Herman, Neb.....	150.00
Russell Sage, one year, A. G. Jensen, Kennard, Neb.....	150.00
Farmer's Friend, ten months, Henry C. Jensen, Kennard, Neb.....	135.00
Joe Hughes, ten months, Henry Gliss-man, Pender, Neb.....	85.00
Bowser, seven months, Frank Camer-on, Tekamah, Neb.....	100.00

#### SOWS.

1. Carl Hansen, Herman, Neb.....	\$ 52.50
2. W. A. Kirkpatrick, Lincoln, Neb.....	65.00
3. Henry Norenberg, Blair, Neb.....	65.00
4. Edwin Gilberts, Blair, Neb.....	52.50
5. John Skinner, Herman, Neb.....	50.00
6. Same.....	52.00
7. John Bovee, Craig, Neb.....	67.50
9. Henry Rewe, Herman, Neb.....	60.00
8. J. P. Anderson, Kennard, Neb.....	66.00

**BEACON-ITE**  
LONG-LIFE  
ROOFING

**Direct from Mills to You**

**We Pay the Freight**

Beacon-ite is a ready roofing made of the finest long wool fibre thoroughly saturated with a special preparation that makes it absolutely water-tight. Wind, rain, snow or sleet has no effect on it whatever. It will not rust like tin or rot like shingles. It can be applied by anyone to any kind of roof; we furnish all necessary nails and cement. All you need is a hammer. Beacon-ite roofing will save you money in two ways:  
First. By buying direct from the mills you save the jobbers and dealers profits.  
Second. By putting it on yourself you save the expense of hiring a roofer.  
We want to quote you our Beacon-ite prices. You will find them to be about one-half the cost of tin or shingles, and considerably less than any other ready roofings. We want to send you FREE samples of Beacon-ite so that you can compare its quality with others. If you want better, cheaper roofing send for our FREE samples.  
**BEACON-ITE MILLS, 1504 Olive St., ST. LOUIS, MO.**

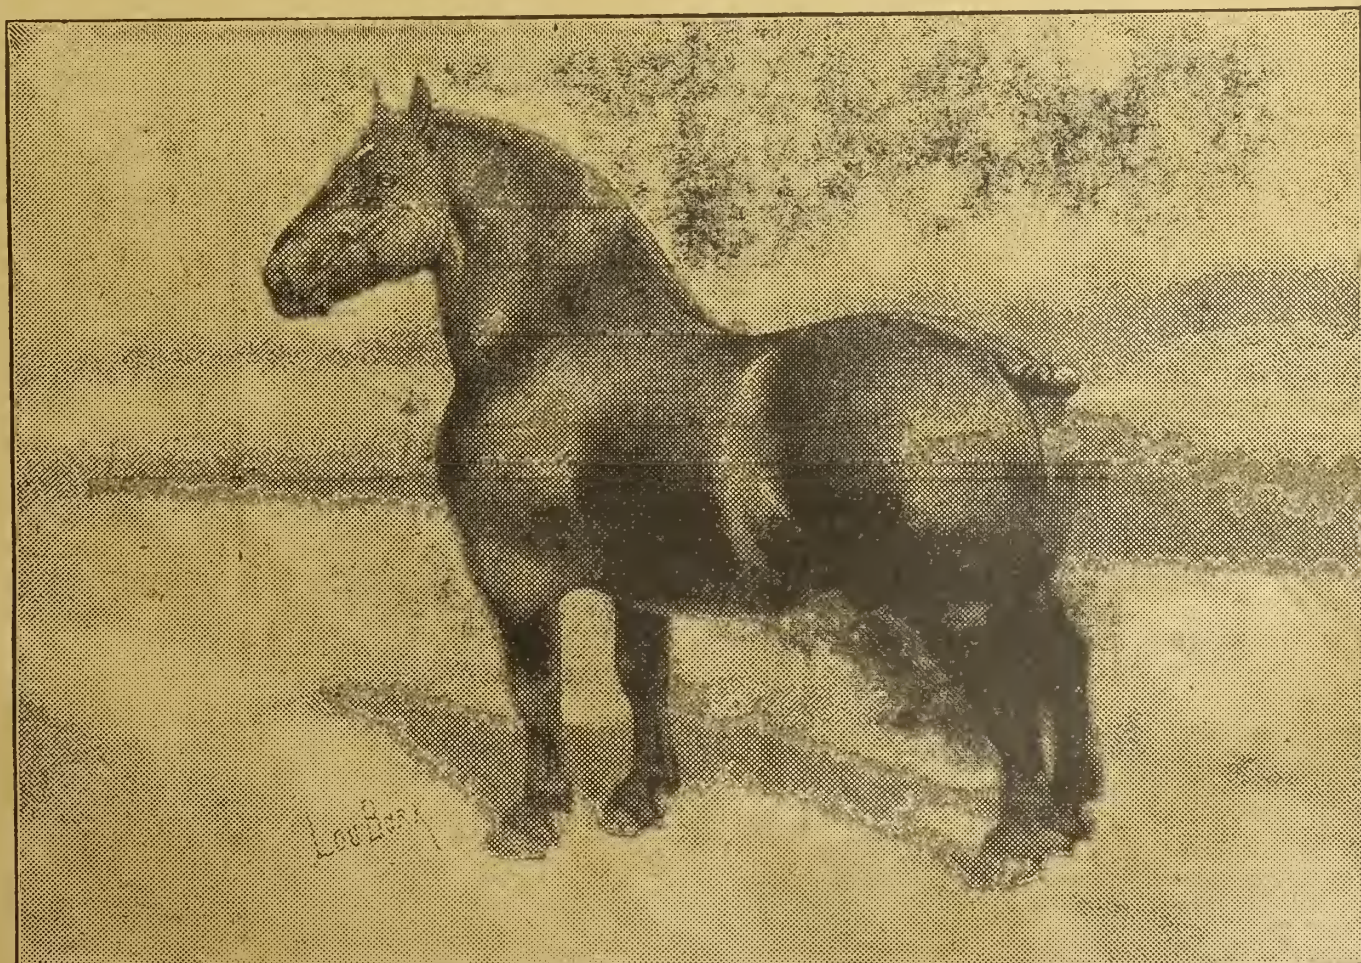

**SOLD ON 3 Months' Trial.**

1907 model gasoline engines, all sizes. Highest class, simple engines made. Three months' trial will prove it. For general information and prices address,

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

## WITH THE EDITOR.

Some people think the president might be better employed than in giving parents advice as to the size of their families and their duty as parents, but surely the most critical critic of President Roosevelt can find no objection to the letter which he sent to the president of the New York State Mothers' Assembly.

The president says:

For one of your topics, how would it do to speak of the place of the father in the home? Now and then people forget that exactly as the mother must help the breadwinner by being a good housewife, so the father in his turn, if he is worth his salt, must in every way back up the mother in helping bring up the children.

After all, the prime duties are elemental, and no amount of cultivation, no amount of business force and sagacity will make the average man a good citizen unless that average man is a good husband and father, and unless he is a successful bread winner, is tender and considerate with his wife and both loving and wise (for to be loving and weak and foolish is utterly ruinous) in dealing with the children.

I think it a crime for the woman to shirk her primary duties, to shrink from being a wife and mother.

Of course the woman should have the same right as the man to train her mind, to better herself, and occasionally a woman can and ought to follow some special vocation in addition to (never in substitution for) her home work.

But just as the highest work for the normal man is work for his wife and children, so the highest work for the normal woman is the work of the home, where, Heaven knows, the work is ample enough.

But I also feel she can do the best work in her home if she has healthy outside interests and occupations in addition, and I most firmly believe that she cannot do her full duty by her husband if she occupies a merely servile attitude toward him and submits to ill treatment, and that she is quite as bad a mother if weak and foolish as if hard and unlovable.

Sound sense marks every word of the foregoing. It deserves a wider public than it is likely to have. Parents all over, not only in America, but in other countries, would do well to "mark, learn and inwardly digest" these words of President Roosevelt. Believing that their perusal cannot fail to make for better marriage relations and better parenthood I gladly relinquish the editorial chair this week in order that our thousands of readers may have the benefit of their president's message.

## HOME AND HOMEMAKING.

## LITTLE HELPS BY THE WAY.

Yes, life is a real and solemn trust,  
And all should strive to fill  
Some niche that's vacant here on earth,  
And hoe some row with a will.

Yes, hoe it clean and keep it bright,  
And seek true worth to know;  
For the ones who make their mark in life  
Are the ones with a row to hoe.

Let those who complain of having to work,  
Undertake to do nothing. If this does not  
Convert them, nothing will.

## INEXPENSIVE SHRUBBERY.

Many farmers are deterred from planting ornamental shrubs and trees by the sup-

posed necessary expense. They have a variety of large and small fruit, but these are a part of the economy of the farm and represent money well invested. Fruit trees and plants are longer in coming to maturity than annual crops, but are just as sure in the end, and the wise farmer is fully aware that apple orchards and strawberry beds pay better interest than county banks.

If the farmer knew how cheaply his grounds could be ornamented there would be fewer unsightly yards in the country. The boys and girls, with a little trouble, could surround the house with beautiful trees and shrubs and clambering vines, and the cost would only be a few days work each year. There is a large variety of trees or shrubs that will not propagate readily from cuttings, and all kinds of vines can be increased almost indefinitely. Insert cuttings in a moist piece of ground in the spring, and give them one or two boings. By the second year they will be large enough to transplant to permanent quarters.

Herbaceous plants, like lilies, phloxes, peonies, irises, yuccas, anemones and hundreds of others, can have their roots divided and subdivided, and the plants will be all the more thrifty for the division. Pruning is the secret of successful shrub growing, and in nearly every locality can be found a fair assortment of shrubs and plants whose owners would be perfectly willing to give away the cuttings of each pruning. Cuttings of desirable shrubs that might not be found in the neighborhood could easily be procured from a nursery at small cost.

I know a young man who has several acres of fine shrubbery, nearly all of which he raised from cuttings procured in the neighborhood. What would have cost him several hundred dollars at a nursery only cost him a few days' labor and some years of waiting. There are dozens of handsome California privet hedges in this vicinity, all raised from cuttings furnished by a gentleman a few miles away, who prunes his hedge three or four times each summer. I have raised thousands of willows, poplars, hydrangeas, altheas, roses, spiraea, and other trees and shrubs, and lost less than 5 per cent of the cuttings. Outside of the saving, there is a fascination in raising one's own shrubbery, and if desirable, one can easily make it a source of no inconsiderable profit. I know small farmers who add a hundred dollars or more each year to their income by growing a small assortment of shrubs for local sale.

## WHEREIN THEY DIFFER.

Little Willie—Say, pa, what is the difference between a statesman and a politician?  
Pa—A statesman, my son, is able to deceive without lying and a politician lies without deceiving.

## EXCITING GAME.

When Bobby's mother returned home she was horrified to find the parlor carpet thick with ashes.

"Gracious, Bobby!" she exclaimed, excitedly. "What has happened? Has there been a fire?"

"No, mamma," replied Bobby, innocently, "you know you said we could play any kind of a game we wanted to, so we played Mount Vesuvius in eruption."

## APRONS.

A good supply of aprons is needed by all housekeepers, both white aprons and work aprons. For the plain white ones, for every day, the five or six-cent bleached muslin, not too heavy, is most satisfactory. These wash easily, and take the starch readily. Make them full and long, with deep hems and strings. A gingham apron to slip over a nice dress is a great convenience, especially on Sunday, when you do not wish to change your dress while getting tea. Get three and a quarter yards of pretty blue and white check; take off a quarter of a yard and cut the rest in two. Tear one of these breadths in two, lengthwise. Run up the seams, with a full piece in the middle, but stop when you get a quarter of a yard from the top on each seam. Trim this opening slantwise, to answer for an arm-size. Hem the bottom of the pinafore, and gather the tops of front and back for the yoke, or bands, which should be an inch wide. Make two other bands a quarter of a yard in length, and doubled, to make an inch in width, and sew the ends to the bands that form

Amatite  
ROOFINGNEEDS  
NO  
PAINT

DO YOU USE A ROOFING THAT  
REQUIRES PAINTING AND COATING?

If so, do you realize that the coating and painting will probably cost as much, if not more, than the first cost of the roof itself?

When you buy a roofing that has to be coated, you must consider the cost of maintenance as well as the first cost. If you do this, you will find that coated roofings cost you just about twice the original cost.

If you try to save money by not coating such roofs they will soon leak and rot away.

The best way out of the difficulty is to buy a roofing that requires no coating, such as Amatite. This Ready Roofing has a special mineral surface which makes painting entirely unnecessary. The first cost of Amatite is the whole cost.

After it is once laid on the roof it costs you nothing to keep up.

Furthermore, the price of Amatite in the first place is less than that of almost any other ready roofing. It is by far the lowest priced of the good ready roofings.

When you get prices don't forget to count in the cost of putting on paint every year, and you will be sure to come back to Amatite as the cheapest and best.

## FREE SAMPLE

Let us send you at once a SAMPLE of AMATITE and a Booklet of information about it. We want you to see how much better it is than the kind that has to be painted.

W. L. DOUGLAS  
\$3.00 AND \$3.50 SHOES

BEST IN THE WORLD

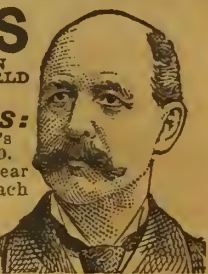

W. L. DOUGLAS \$4.00 GILT EDGE SHOES CANNOT BE EQUALLED AT ANY PRICE.

SHOES FOR EVERYBODY AT ALL PRICES:

Men's Shoes, \$5 to \$1.50. Boys' Shoes, \$3 to \$1.25. Women's Shoes, \$4 to \$1.50. Misses' & Children's Shoes, \$2.25 to \$1.00.

W. L. Douglas shoes are recognized by expert judges of footwear to be the best in style, fit and wear produced in this country. Each part of the shoe and every detail of the making is looked after and watched over by skilled shoemakers, without regard to time or cost. If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better, wear longer, and are of greater value than any other makes.

W. L. Douglas name and price is stamped on the bottom, which protects the wearer against high prices and inferior shoes. Take No Substitute. Sold by the best shoe dealers everywhere. Fast Color Eyelets used exclusively. Catalog mailed free. W. L. DOUGLAS, Brockton, Mass.

the yoke, for the top of the armhole. Finish with a button and button hole. Put a good-sized pocket on the right hand side of the center breadth, and you have an apron at once pretty and most convenient, easy to get on and quick to slip off. Other aprons that are serviceable are those made of table oilcloth, for washing or other sloppy work. These are not very large, and are bound about with braid, machine stitched. Clothespin aprons made of ticking, with the bottom turned up into a wide hem, that answers for a bag to hold the pins while hanging out the clothes, are also a great convenience.

## NOURISHING AND APPETIZING.

Lentil Cutlets—Soak one cupful of dried lentils all night, with one cupful of dried Lima beans. In the morning drain them and add two quarts of water, half an onion and a stalk of celery. Cook them until soft, remove the seasonings and rub through a sieve. Add one cupful of stale bread crumbs, one beaten egg, seasoning to taste, and the juice of half a lemon. Melt one and a half tablespoonsful of butter, add one tablespoonful of flour, and pour on gradually one-third of a cupful of sweet milk. Let the mixture cool until it is smooth and thick, and add it to the lentil mixture; then set it aside to cool. Form into small cutlets, dip in beaten egg, then in powdered cracker crumbs, and fry to a golden brown. Drain and serve with tomato sauce. Peas may be used with this dish.

Deviled Eggs—Boil a half dozen eggs twenty minutes, drop into cold water for five minutes, then carefully remove the shells. Cut in halves with a sharp knife and with the point gently remove the yolks, dropping them into a bowl. Mash and mix them with salt and pepper, a tablespoonful of olive oil (or if you have it, mayonnaise), a teaspoonful of vinegar or made mustard and a little chopped pickle or parsley. There are no hard and fast rules in its seasoning. Mix into soft paste, refill cavities in the eggs, put the two halves of egg together, skewered with wooden toothpicks, and roll each one separately in oiled paper. These are tasty to add to the school lunch box.

Cream Toast—One-half cupful cream, one-half cupful milk, one-half teaspoonful salt, a small lump of butter. Melt the butter and add enough sifted flour to make it stick. Mix the milk, cream and salt and pour slowly over the butter and flour, keeping the mixture smooth by stirring. When thickened, strain and pour over toast. Serve hot.

Date Gems—Separate two eggs; add to the beaten yolks one cupful of milk; pour this onto one and a half cupfuls of entire wheat flour and one tablespoonful of melted butter; beat well. Then add one cupful of chopped dates, two teaspoonfuls of baking powder, stir in one-half cupful of boiled rice

knows a good book when she meets it, but knows how to chat about books in quite delightful fashion:

Not about some of the new copyright books do I feel inclined to talk this pretty morning, but I'll go back a number of years. O yes, I've read a number of the newer books this winter, but there are some of the older ones, the charm of which is not lost by re-reading, and that wholesome old English story, "John Halifax, Gentleman," is one of them. Do not neglect to affix the title, "Gentleman," to the name, for who can follow the boy through manhood and not see at all times the true gentleman gleaming through every trial and circumstance? Take the little ten-year-old famished and poorly-clad lad and go with him on through his apprenticeship in the tan yard, his development into manhood, with its ambitions and desires, his realization of the fond hopes he had cherished and see gleaming through it all and at all times the tender charity for the weak, sympathy for the oppressed and firmness of conviction in what constituted duty. Always with due respect for his superiors in wisdom, but no tolerance for the supremacy of one intelligent human being over another where it in any way resulted in exalting the one and debasing the other because of mere inheritance. The beautiful affection he always felt for the afflicted Phineas drew out the tender side of his nature and its steadfastness. The romance of his life was his love for the worthy Ursula; and while the love making is not depicted with the gush and demonstration so many romances delineate, yet one feels the sincerity of it all, and that its depth can only be measured by life itself. And now we follow John and Ursula on through their home life and the rearing of their little family. Their eldest and a daughter being blind from birth was at first an almost overwhelming sorrow to the devoted parents, but at last it proved a blessing and a benediction to the family. The trials that came to them were very much the same as come to any well-regulated family, but their gentleness and firmness in surmounting the difficulties are well worth emulation. Their lives of kindness and charity to the erring and fallen, without in any way compromising their principles of right or imperiling the welfare of their little brood is highly commendable. We follow them on through their lives of usefulness and harmony till at last we stand beside them in their final and long sleep that knows no waking in this life, then we close the book and feel it is complete. Their life story told, we leave them with the Heavenly Father whom they in their own way served. Just a few words now on another topic. How many of the sisters have thought that by the very assumption of the name Cousin Hardmaster acknowledges the wrongs of the life his pen so forcibly portrays? He observes the shortcomings of those around him and delineates them in such a manner as to call forth champions for the better, truer way of living. In this way he combats the deplored conditions of his observation. O for a glimpse of his home life now.

Come, cousin, doff thy mask,  
And from thy wave-lashed shore  
Upon the troubled waters  
Thine oil of peace now pour.  
The gauntlet's thrown, we breathless wait!  
John Halifax, Gentleman, is a book which has a perpetual and beautiful appeal. I shall be glad if Mrs. Sampson's chat increases the number of its readers.

Cousin Hardmaster is flattered by the interest taken in him, I know, for he is here again today—still with his mask on though. It is so much fun hearing him this way. I am not sure that I want him to put it off just yet, although I sympathize with Mrs. Sampson's clever plea:

No, people don't always show a family resemblance. Take for instance my brother, Vanderself, so named for mother's family. He's a genuine Hardmaster, though you'd hardly believe it. And here's Goodore, no relation to me at all, yet we're often mistaken each for the other. "Such a rough-looking man," the ladies say. By the way, he's married to a niece of mine, daughter to my brother, Vanderself. Van, as we call him for short, has the most angelic disposition in the world. He positively won't quarrel. Even as a little boy at school he would bear all the contumely that could be heaped upon him by the other pupils and never defend himself by a word. It saved him from participation in more than one punishment that he never could be shown to have taken active part in a scrap. Van was too delicate to work on a farm and the question of his future became a subject for anxious deliberation at home. It worried everyone but Van, who, with nice resignation, left the matter entirely in our hands. The only clew to a prediction he ever offered was when as a very small boy he answered every fond inquiry as to his intended vocation by sweetly lisping, "It's going to keep a candy store." That always made us laugh. It did sound so cute. In time, this early hint came to be regarded more in the light of precocious inspiration than as mere juvenile naivete, but at the time of his marriage nothing definite had been decided upon, and he brought his wife home to live with mother. That suited mother, as it gave her a chance to have the young people in training for a while, and she improved the time for the purpose of impressing upon the young woman's mind the deep nature of her obligations to Van. Her advice to him might be condensed into: "Watch your wife and your business will take care of itself." At the end of two years a store building was rented and Vanderself was launched on a mercantile career. At the same time his family was domiciled in three small rooms at the rear of the store. They had been used for store rooms, but mother said that they would do for Nell to keep house in. "Why, yes," Nell said, "they will do for a while, but I do hope that some time we will be able to buy that pretty Summerdale property." Then mother made round eyes and shut her lips tightly and afterward warned my brother she feared that his wife would be extravagant. "No," said he gently, "I think not." Van is so patient. The store was not a success, chiefly, we thought, because his domestic relations were not pleasant. Nell kept on thinking about the Summerdale property and she would harass Van with suggestions concerning his business. "I know," she used to say to him, "that we could make the store pay if you would let me keep the books and help select the goods." That and other insinuations that he was incompetent frequently drove my sensitive brother to his mother for sympathy. "If your wife was any account," mother told him, "she would hustle out and find something to do and not depend on you for everything." When the time came for mother's estate to be divided, Van's share amounted to \$3,000. Nell was ready to spend it, trust her. "Now is your time to get the Summerdale property," she begged. "Two thousand dollars will buy it, and you will have a thousand beside to put into your business. You can advertise your old stock for a remnant sale; that is what you ought to do, and put in an entirely new stock. And O we do need the place so! Think of the girls, quite young ladies, what it would mean to them to have such a home. O Van, please do! Won't you, dear?" And Van with his angelic soul in his mild blue eyes, answered her warily: "Perha-a-ps. I'll see-e-e." Nell knew what that meant. As soon as the money was paid to Van he placed it with a company that was operating a colonization scheme in Porto Rico and offering special inducements through their agent who was at work in Van's locality. I think that's about all. There was much surprise when my niece married Goodore, but she said that her ma hadn't been happy with an angel and she thought she wouldn't want one. She seemed to be suited. O yes! I met Van one day and I said to him carelessly, "How's Porto Rico?" "Well," he answered in his gentle way, "I'd a little rather you didn't say anything about it at the house, but—" "What?" I yelled, "did you lose out?" Said he: "O maybe not; I hear that the government is going to get after those fellows. If it does, I may get my money back." Vanderself is so patient.

"MACBETH" is the sterling mark for lamp-chimneys.

You can't get a poor lamp-chimney with my name on it.

MACBETH lamp-chimneys fit, don't break from heat, and are so shaped that they get the most light from the oil consumed.

All lamp-chimneys break. Mine break only when they are dropped or knocked over.

My Index is free.

Address, MACBETH, Pittsburgh.

OTTO SCHWIEN, Box 24, Davenport, Iowa.

Another man who created a sensation Among Ourselves, one who has been asked for several times, is with us today. I have the pleasure of presenting Minnesota Nicholas:

When I read our editor's comment on my article which appeared in January I prayed the prayer of old King David, "Cleanse thou me from secret faults," for though I trust I am living up to the principles I advocated, I feel the exalting influence of her words in directions where praise is unmerited. And the recent kind words of some members of the circle, for which I thank you all, do not lessen that influence. I am asked what sort of mother I had and how I came to hold my views. Mother was all mother; not highly educated, it is true, which is evidenced by the fact that she was the mother of seven children, and I never heard her complain that she had too many. Nor was she afraid to apply the gad to girls and boys alike for all forms of iniquity. I, being the youngest, not only received her training direct, but had the benefit of a good deal second hand, well applied and well rubbed in. I do not remember that mother ever gave me any special talk on the subject in question, but she got her children into the habit of going to church where I got acquainted with and fell in favor of a number of respectable and high-minded old maids, whose influence needs no further mention. Other than these facts and that I was always naturally on the girls' side, I got my views mainly from observing the sorry mess most of their lives. It had been my intent to write and ask why Illinois Bachelor did not come out and defend himself, for I was loath to see one with his evident good intentions "go way back and sit down." I am glad to see him

AGENTS PORTRAITS 55c, FRAMES 15c, sheets pictures 1c, stereoscopes 25c, views 1c. 30 days credit. Samples & Catalog Free. Consolidated Portrait Co., 290-126 W. Adams St., Chicago.

appear at the close of the tumult and set himself right, and I move to place him free from all charges which accident brought against him, in the king row, where he may enjoy the reading of his books with a clear conscience. Among them I hope he has "Don Quixote," "Natural Law in the Spiritual World" and "The Reveries of a Bachelor."

Minnesota Nicholas will come to us again some day soon to speak about another matter. A third man, an Oklahoma Bachelor, craves the privilege of the floor:

I have been very much interested in the discussion on women's work in the field, young people's relations to each other in a social way and other questions, but most of all I heartily indorse the Illinois Bachelor's opinions about kissing, for a young man who is proud of his character and good name will seldom think of such a thing as kissing or other familiarities unless the young lady he is with acts in such a way as to invite it. Now I expect this will raise a storm, but I have known girls to say, "I don't like to go with such and such a fellow. He is too slow," or "He won't hug a person at all." I think Nebraska Bachelor about right in his plea for equal standards. I know and deplore the fact that both men and women recognize a different standard. I say woman, for a girl will go with almost anything dressed in man's attire, just so he can spend money and is talkative and can joke, but at the same time refuse to recognize her female acquaintance who has been unfortunate, but is possibly worth ten of the man referred to. I would like to say to the young girl just starting out in company, as I told a girl friend not long ago, a man who considers himself a man and is a man doesn't care for the company of the girl who likes to be hugged and kissed.

Does it occur to the friends that there has been something sadly wrong in the training of girls who enjoy promiscuous hugging? What sort of mothers and fathers can they have had? Every woman and every good man likes to think of women as pure and sweet and winsome, but is it not a fact, a fact we must face, that all girls are not of this type? It is not also a fact, a fact we should face, that when girls are bold and unwomanly it is because their fathers and mothers are not what they should be? This thought deserves attention, but there is also another side to the matter. It is suggested in the topic for discussion which Miss Knawill is about to propose:

I have been reading this paper for a few years. I enjoy reading it and think the Home Department is just fine, and would like to send a topic for discussion: "What is a girl's duty to her mother? Should a girl's mother know who she is writing to and what company she is keeping?" Some of our young people have been reading the Home Department for some time and can hardly wait from one week till the next. Some of them think the Illinois Bachelor is all right and others think he is a crank. I think it is a pity more of our boys are not like him.

The question of what a girl's duty is to her mother with regard to her friends and her correspondence opens what should be a fruitful and profitable discussion. I hope we shall hear from both mothers and daughters and it might not be a bad idea to hear from the young men also. Do they like girls who give their confidence to their mothers or do they prefer a girl who "keeps her business to herself?"

We are not through yet with the discussion precipitated by June Bug. Mrs. Violet will speak today for those who object to disparity in age being considered a bar to happy marriage:

I would like to suggest to June Bug that circumstances alter cases, that there are exceptions to all rules, and that indeed there are no hard and fast rules by which we may be governed in marrying or giving in mar-

riage. Nor is any person altogether competent to judge for another in such matters. I, too, speak from experience, as for nine happy years I have been the wife of a man nearly fourteen years my senior. This man has at all times been a kind and loving husband and father, and neither since our marriage nor before did it ever occur to me to think of him as "old." I have yet to be made a "chore girl" of, although I should be ashamed not to lend a hand during thrashing season and other extra busy times, always provided I am able to do so. At times when I have been unable to do all my own work, and hired help was impossible to find for love or money, this same "old" husband has cheerfully washed and churned, mixed bread and even upon occasion washed the dishes or cooked his own breakfast and dressed the baby. I really think, Sister June Bug, that it is the man that counts, and not his age. If one of those girls of yours should meet a man who is suited to her in every other respect, don't try to ruin her happiness for life simply because he happens to be ten or even fifteen years her senior.

One woman marries a man much older than herself, and, missing happiness, attributes it to the fact that her husband is too old for her; another woman marries a man much her senior and, finding happiness concludes that difference in age is a matter of small moment—and there you are. But all the same there are principles involved in this matter, and as discussion is bringing them to the fore discussion is valuable.

Mrs. Thompson, of Herman, Neb., comes to us seeking advice:

I am a reader of the Home Department and being deeply interested in the Among Ourselves column, have concluded to write a few words. I have learned much by reading the letters from the correspondents, and they seem so willing to lend a helping hand that I thought I would ask them for advice as to how it would be best for a lone woman with \$300 and young daughter to make a home for themselves, in order to avoid living with strangers. No doubt there are some among the many readers who are able to give me advice. If they will be so kind they will have my lasting thanks. I am fifty-five years old and my daughter is yet in school. For years I have lived among strangers, but am anxious to have a home, be it ever so humble. The garden city subject seems to mean so much for the homeless. I am much interested in Mrs. Diggs, as I think she is interested in socialism, or in other words, loves to encourage people to live according to the Golden Rule.

Now, friends, lend a hand. Tell Mrs. Thompson what you think she might, should or could do to attain her ambition.

Just another word and then we adjourn. Mrs. Belle Hancock writes that she would be so glad of book talks from mothers who are trying to teach their children to love the good and the pure in all things. Who will respond to her call?

I wish to call the attention of the friends to this week's With the Editor. It is my very earnest hope that every reader of the Home Department will read and read again what is there presented, and that in consequence certain views of President Roosevelt will be the subject of conversation between husbands and wives a very great many.

#### Dressmaking and Millinery, No. 559.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

The ladies' costume illustrated in this number is made up of two designs or patterns, and when these are shown I find it

necessary to call attention to the fact that they are separate patterns that may be used together or separately, but in no case are they sent as one.

It has been mentioned that the Eton jacket will be very popular during the coming season, and many are even now having these nobby garments made up as part of a suit that is to be worn when the season opens. In design these do not vary greatly from season to season, but each may make such variation as will suit her especial need. For instance, if one has worn an Eton one or two seasons since, she should select for this season one that differs from its design as widely as possible, and thereby obtain the "new" effect. The Eton pictured in No. 5456 is one of the most charming, yet it is very simple in construction, the shawl collar and applied box pleats being its chief features, and these are always easy to manage. The garment is of broadcloth in a deep green shade, the collar of white broadcloth, and the trimmings and

[5456—Eton with Applied Box Pleats.]  
[5568—Three-Piece Suit.]

buttons of velvet in a shade darker than the garment cloth. Any fancied variation may be made, and if liked, one material may be used throughout. Pippings may trim collar, cuffs and pleats, as well as the lower edge. Braid may be used for trimming, and one may find a broad, fancy braid that can be substituted for the applied pleats. Eton pattern No. 5456 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure. Give size when ordering.

No. 5568 shows a three-piece skirt that is made of the same material as that used in the jacket described above. This skirt is on the popular circular lines, the narrow front gore being arranged in a panel pleat, the two side gores being joined to it, and meeting at the center back, where they are joined in a seam. The ample sweep that falls in ripples at the foot is an admired feature and one that promises to keep the circular skirt in favor for some time to come. Notice that tiny buttons trim the front panel to some distance below the waistline, these corresponding with the mode of trimming the jacket. When making a circular skirt it is a good idea to leave the bottom unfinished and hang the skirt by the waistband for some time that it may "sag" as much as it is likely to, then shape it again by the pattern and finish the bottom, and for convenience leave the back seam open until all else is done. Any skirt is much more convenient to handle as a "flat" piece. Try it. No. 5568 pattern is cut in sizes for a 22, 24, 26, 28 and 30-inch waist measure. Give size when ordering pattern.

### Isaac a Lover of Peace.

This eldest and sweetest of pastorals keeps on with an ever-augmenting interest. Isaac, the son of promise, is born at Beersheba, his very name (Laughter) signifying the joy with which his advent is greeted. The mother's skeptical laughter is turned into triumphal exultation and joy in God. (Gen. xxi, 4-7.)

The name, according to the story is chosen by the Lord Himself, and is designed to commemorate the unusual circumstances of his birth, and of the gladness it brought. The significance is referred to three times. (Gen. xvii, 17; xviii, 12; xxi, 6.) It is prophetic of the character of the little bearer of it, and more important yet, it suggests the relation in which he stands as the seed of Abraham, the channel of the promised blessing and the type of Him who is pre-eminently the seed, whose birth has put laughter into the hearts of myriads of our race.

With no set purpose, but naturally, this unknown annalist gives us a glimpse of the patriarchal life as he describes the weaning of the child. A feast is made to celebrate even as trivial an event as this. They make merry over the emergence from babyhood. The child is no longer a suckling, but capable of self-sustenance and a measure of independent action.

Then comes the rivalry of Ishmael, the lusty half-brother of the new heir to Abraham's prestige and wealth, and the consequent pitiful expulsion of Hagar, the bond-woman, and her son, the latter destined to become the sire of a rich and powerful race.

The years of Abraham's "princess" are full. Sarah dies in Hebron, and the stricken patriarch mourns and weeps for her sincerely. Over her body, weighted with its aromatic unguents and wrapped in cere-cloth, he bargains for a sepulcher, and weighs out to Ephron the Hittite four hundred shekels of silver as the price.

There is a true and attractive tinge of Orientalism in the selection of a wife for the heir of the promise. Off on this delicate and important errand goes Abraham's trusted head steward, bound by an oath, to choose the bride in the best family of the far-away fatherland, Padan-aram. The narrative is fairly photographic as it minutely describes the preparations, the journey, the meeting of Rebecca at the well, the servant's reception in the home of Bethuel, the telling of his

errand, the present, Rebekah's consent, and the glad homeward journey.

It is the hand of a master that puts the last strokes upon the inimitable picture of an Oriental courtship. No de-nouement could be more natural or true. The contemplative patriarch is a-field, meditating in the twilight, when the caravan bringing his bride arrives. The bride-elect alights, and at the same time, true to custom, shrouds herself in her veil. The trusty servant gives account of his journey and its successful issue. So ends this four-thousand-year-old idyl. Isaac brought her into his mother's tent, and took her, and he loved her, and was comforted after his mother's death.

The very placidity of Isaac's character insure the brevity of the narrative. Happy are the people whose annals are dull! Absence of events argues peace and plenty. In such periods there is the wholesome growth of domesticity, which is the underpinning indispensable to the stability of the political superstructure. Effort to picture Isaac as an effeminate character meets with indifferent success. The life of Isaac is not "the echo of the life of Abraham." His spiritual life is on a higher plane than that of his father. His meekness and gentleness indicate a decisive progress like that of his pure monogamy. His poise is admirable. The King of the Philistines proposes a league with him as with an equal. His quietness, tranquility, and confidence in the Lord have a glorious issue. He will be forever recognized as one of the three immortal progenitors of the Hebrew race.

### Analysis and Key.

1. The eldest pastoral of literature. Continued.
2. Birth of Isaac. Name and significance.
3. Minor incidents. Weaning. Rivalry of Ishmael.
4. Death and burial of Sarah.
5. Selection of Isaac's wife. Head-steward's errand to fatherland. Preparation; journey; meetings; reception; errand disclosed; presents; consent; return.
6. Isaac and Rebekah meet.
7. Placidity of Isaac: short story. Annals dull: happy people. Isaac not effeminate. Advance of Abraham. Monogamy; tranquility; gentleness; confidence.

### The Teacher's Lantern.

The large space given to biography in the Bible is easily justified. Example speaks louder than precept. The men and women of the Scripture are God's working models. They show us ethical and spiritual principles at work.

The Bible is terribly faithful in dealing with its characters. There is no veiling. The lapses of good men and the sins of the wicked are shown for our de-termination and avoidance.

Isaac has been aptly called "the Wordsworth of the Old Testament." He was contemplative and a lover of nature. The pendulum has swung to the opposite extreme from the recluse of the Middle Ages. George Herbert's quaint lines need to be heeded:

Choose some time to be alone.  
Salute thyself; see what thy soul doth wear.

Where Isaac had a tent, there God had an altar. He was reverent and worshipful. Amid those pagans he bore his witness to the unity and spirituality of God, making no graven image. To the Invisible he made his morning and evening prayer and sacrifice. So worshiped he the God of his father Abraham.

Isaac stood for monogamy. In the midst of polygamy he rose to the noblest altitude and exemplified to the wicked and adulterous generation of that far-off age the beauty and divinity of a heaven-owned marriage to one woman.

The key-word to Isaac's character is peace, as the key-word to his father's character is faith.

"Go from us." What Abimelech said

## Cancer Cured at Home

I have so perfected my Mild Combination Treatment that patients may use it at their home with as good results as though it were applied at my offices. I will gladly furnish to every sufferer positive and indisputable proofs that my treatment does cure Cancer. I will furnish ample evidence of my integrity, honesty and financial and professional ability. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—write for my book, "Cancer and Its Cure." It will cost you nothing and will tell you how you can be cured at home. Address,

DR. O. A. JOHNSON, SUITE 371, 1233 GRAND AVE. Kansas City, Mo.

Have you a friend suffering from Cancer? Do them a favor they'll never forget by sending them this ad

to Isaac has been repeatedly said to his descendants. The inveterate opulence of the Jews has often excited jealousy, and led to their banishment. Almost every nation of Europe has treated the Jews harshly. The ghettos in which they were locked at night are still to be seen.

Curious Jew legends cluster around Isaac. It was said that he was an angel incarnate in human form. He was one of the three men in whom there was no evil. He was one of six over whom death had no power. He was instructed in Divine wisdom by Shem. He instituted the ordinance of evening prayer, as Abraham did morning prayer, and Jacob night prayer. All of which illustrates the commonly trivial character of ecclesiastical traditions.

In an age, the predominant characteristic of which is violence, the constancy, depth, and tenderness of Isaac's affections shine with peculiar luster. He is the lily on the dung-hill.

His life, judged by worldly standards, might seem inactive, ignoble, and unfruitful, but the guileless years, prayers, gracious acts, and daily thank-offerings of pastoral life are not to be so esteemed, although they make no show in history.

### Robert Burgess & Son's Horse Sale.

The first sale of pure-bred Percherons, Belgians, French draft, Shire, Hackney and German coach horses held by Messrs. Robert Burgess & Son, of Wenona, Ill., and Wichita, Kan., at the new live stock pavilion, at Wichita, February 22d, was a record breaker. The consignment consisted mostly of imported horses which brought fancy prices. Buyers from every state in the union were present and the bidding was fast. It is the intention of Messrs. Burgess & Son to hold a public sale at Wichita each year. Another consignment of horses is being shipped to the Wichita branch barn to take the place of those sold, and will be in charge of the well-known horsemen, Messrs. Roseberry and Coons, who will take pleasure in showing you something fine in horse flesh. At Wenona, Ill., you will at all times also find a consignment and we are sure that these gentlemen can suit you with a pure-bred horse at either place. Messrs. Chapuet Bros., of Aurora, Kan., topped the sale, paying \$2,425 for Hemington Prime Minister, a three-year-old Shire by First Lord, out of Hemington Ruby. The work of Colonel Brady, Snyder, Sparks and Berger was excellent. Below you will find a complete list of sales:

## Try Our Buffalo Calf Shoes For Longest Wear

For comfort? Yes. But first, last and always you will find with their "comfort" that our "Buffalo Calf" Shoes wear. Try a pair. Ask your dealer. Most dealers know and carry "Buffalo Calf" Shoes because they give the greatest satisfaction for General Durability. To interest and satisfy you in advance, we will mail you a sample "Buffalo Calf" leather tag cut in the above shape. Just ask us to on a postal card. Then test the leather to see how strong it is. Try to tear it. Bend it in your fingers and see how flexible it is. Then you'll want to wear a pair of our "Buffalo Calf" Shoes to prove their long and comfortable service and how much better made they are. They are the only practical work shoes that are good shaped enough for every-day wear—and they wear longest. Speak to your dealer about "Buffalo Calf" Shoes or write us direct. We'll show you.

Bentley & Olmsted Co.

"The Western People"

Des Moines, Iowa.

## ADVERTISING NOTES.

Mr. H. D. Wilkinson, of Mitchellville, Iowa, is offering seed corn of the following varieties for sale: Funk's Large Yellow Dent and Reid's Yellow Dent. Write him for prices and further information. See advertisement on page 12.

The W. F. Smith Realty Company, of Kearney, Neb., have issued a new list of central and western Nebraska lands that they have for sale. Their advertisement appears on page 31 of this issue. If you want to purchase or sell land, write them full particulars.

Mr. Thomas Duke, of Sheffield, Ill., is offering the Northern Star potato for sale on page 10 of this issue of The Homestead. This is a prolific producer, matures in the middle of the season and is a smooth potato of good size. The price at which it can be obtained from Mr. Duke is named in his advertisement.

Mr. Arthur Washburn, of Coal Valley, Ill., writes: "I used Mr. J. F. Delany's Seed Corn Sorter last year and I am convinced that I raised from ten to fifteen bushels to the acre more corn, because I had a uniform stand. I am well pleased with the sorter and I think no up-to-date farmer ought to be without one." See advertisement on page 10.

We desire to call the attention of our readers to the advertisement of Messrs. J. B. Armstrong & Son, of Shenandoah, Iowa, that appears on page 10. At present they have on hand a very choice grade of seed corn, both in the ear and shelled. They will be very glad to quote prices on same and answer any inquiries. Besides corn, they carry a full line of grain, grass and vegetable seeds. Write them for catalog.

There is offered for sale in an advertisement on page 23 of this issue, the address of which is "D," Homestead Company, Des Moines, Iowa, a good clean stock of hardware and furniture. This stock is located in a good Iowa town where there is no competition. Any reader of The Homestead desiring to purchase should read the advertisement and address as above.

There is offered for rent in an advertisement that appears on page 30 of this issue of The Homestead, the address of which is Box 81, Independence, Iowa, a 246-acre farm located in Henry county, Missouri. There is also offered for rent, in the same advertisement, a 640-acre farm located in Wilkin county, Minnesota. For further particulars see the advertisement and address the advertiser.

Mr. John Kern, of La Bonte, Wyoming, has a stock ranch which he is offering for sale in his advertisement that appears on page 30 of this issue. The ranch contains 760 acres of deeded land, 225 acres of which is irrigated. There are 500 head of cattle, ten horses and implements on the ranch. The improvements are a good six-room house, barn, granary, shop, machinery house, sheds, corrals, etc. For further particulars read the advertisement and address the owner, Mr. Kern.

Sunny southern Alberta, Canada, is particularly favored in the way of markets and transportation facilities, Calgary having a large packing house whose demands are greater than the supply. There is a large line of elevators with present capacity of 1,120,000 bushels of grain that will within the year have been increased to 5,000,000 bushels. The O. W. Kerr Company, of Minneapolis, Minn., have large tracts of land in this district. Write them for booklet and maps. See advertisement on page 30.

There are in almost every line of industry in this country a few large companies whose product is recognized universally as superior in quality to similar goods of other makes. The Elkhart Carriage & Harness Mfg. Co., of Elkhart, Ind., in the carriage industry represent one of these quality manufacturers. They have, during the past thirty-four years of their existence, built up the largest direct-to-the-consumer carriage and harness business in the world. They make over 200 styles of vehicles and sixty-five styles of harness. Their large cata-

## BEFORE YOU BUY A MANURE SPREADER

SEE that its frame and sills are made of oak; that it has a ball and socket joint on front axle to prevent racking and twisting and steel braces and steel truss rods to guard against warping and sagging. See that the apron does not run backward and forward on hilly ground but insist on a positive and continuous apron drive.

"A boy can run it"

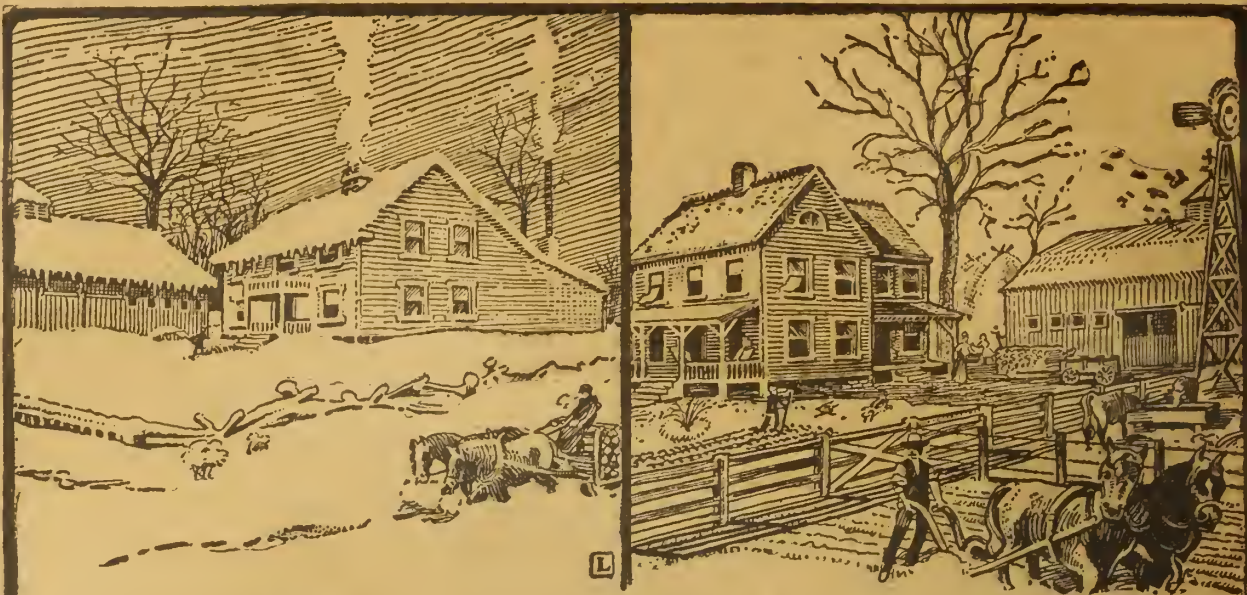

See that it is practically automatic and so simple that any boy who can drive a team can run it as well as any man and control its every operation without leaving the seat. The

### Appleton Manure Spreader

has all these improved features and many others equally important. Write to-day for free catalogue and special prices and terms.

APPLETON MANUFACTURING CO.  
69 Fargo Street, Batavia, Ill., U. S. A.

## Where would you rather be?

In the North or East hugging a stove to keep warm, or living a free, comfortable, out-of-door life in the Southwest? The farmer in the Southwest is enjoying his winter. He hardly ever sees snow and "a freeze" is almost unknown to him. He is able to work out-of-doors all the year and it is not uncommon for him to raise two or three crops a year. Five or six cuttings of alfalfa is the expected thing and it seldom fails.

He does not know what it is to build expensive shelter for the protection of his stock in winter and as for long feeding periods he is spared that expense.

When you stop to think that he has all of these advantages, and besides has only paid a fifth or a tenth as much for his land as you paid for yours and can raise 30 bushels of wheat, 50 bushels of corn or 90 bushels of oats to the acre, don't you think he has all the best of you?

He has good markets and usually gets better prices for all he raises than you get. Schools and churches are good and convenient. The climate is healthful and pleasant and altogether the Southwestern farmer is prosperous and contented.

Why don't you move to the Southwest? You can own a big farm there for what a small one costs in your state. A few years hence, this low-priced farm will be a high-priced farm in a highly prosperous community.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines

1413 La Salle Street Station, Chicago

or

1413 Frisco Building, St. Louis.

log showing complete line is sent free upon request. See advertisement on page 17.

The Springtime issue of The Separator News, a big semi-annual publication of the Sharples Separator Company, of West Chester, Pa., is now being sent to readers. The News consists of six pages, standard newspaper size, illustrated in colors, and is packed full of facts and information about Tubular separators and the dairy business—a big feature being the testimony of Tubular users. The News circulation for the present issue is 600,000 copies, sent all over the United States wherever dairymen live, and the mailing out of which keeps a big force of people busily engaged for a month. A postal request, mentioning The Homestead, addressed to the Sharples Separator Company, West Chester, Pa., will bring The News to the homes of those interested within the United States. Free.

THE FIFTH WHEEL OF THE SPREADER is an important part of the machine. It should be made oscillating so when one wheel drops into a deep furrow the body of the machine carrying the machinery will be carried level, not cramped out of shape. The fifth wheel on the Great Western Spreader is of the oscillating pattern, sixteen inches in diameter.

### CORN, STOCK AND DAIRY LANDS.

The opportunity to secure some of the lands that are listed in another column should not last long. In Faulk and adjoining counties in South Dakota are some choice dairy lands now being offered for from \$15 to \$25 per acre on reasonable terms. Any one wish to know more regarding these farms or others in Minnesota and Iowa should write to the E. M. Kleron Land Company, of Minneapolis, Minn. See their advertisement on page 31.

### PAIRS OF STOCK FOOD GIVEN AWAY.

To prove beyond all doubt to every intelligent stock raiser the value of Wilbur's Stock Food, the Wilbur Stock Food Company, 330 Huron St., Milwaukee, Wis., are making a very interesting offer on page 34 of this issue. They propose to demonstrate to every stock feeder that they have one of the best stock foods as a conditioner and feed saver that is on the market. They stand ready to give a full-sized twenty-five-pound pair to every reader of this paper who will write them a letter and answer a few questions. Now, it will only take you a minute or two to write to this firm, and without a doubt you will be the gainer in the end. At this time of the year there is a necessity of feeding some kind of a conditioner and a good stock food fills the bill as well as any preparation that can

**STEEL ROOFING**  
PER 100 SQUARE FEET  
**\$1.50**

FIRE  
WATER AND  
LIGHTNING PROOF

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not rot, rust, or burn. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 ins. wide and 24 ins. long. Our price on the corrugated, like illustration, sheets 23 ins. wide x 24 ins. long, \$1.75. At 25¢ per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square, \$2.00. Fine Steel Beaded Ceiling, per square, \$2.00. Can also furnish standing seam or "V" crimped Roofing. **WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO** except Okla., Tex. and Ind. Ter. Quotations to other points on application.

Satisfaction guaranteed or money refunded. We will send this roofing to anyone answering this ad C. O. D., with privilege of examination if you will send us 25% of the amount of your order in cash; balance to be paid after material reaches your station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. WE 600. Lowest prices on Roofing, Eave Trough, Wire, Pipe, Fencing, Plumblings, Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at Sheriff's and receiver's sales.

**CHICAGO HOUSE WRECKING CO., 35TH AND IRON STS., CHICAGO**

be secured. If you are interested in this proposition just turn to the advertisement and write these people a letter. When so doing kindly mention this paper.

### DO YOU WANT A FARM IN TEXAS?

If you want to buy good land in the Panhandle of Texas write Messrs. Boyer, Peterson & Co., Gumbel Bldg., Kansas City, Mo. This firm have some splendid land at \$10 and \$15 an acre in Oldham county, Texas, in the shallow water belt. The firm are reliable and will sell this land at the best rock prices quoted above. They invite Homestead readers to visit their office when in Kansas City. See their advertisement on page 31 of this issue.

### STRONG, HEALTHY HORSES.

It requires a little extra attention at this season of the year to keep the horses in strong, healthy condition. The operations of the farm are so dependent on this animal that it is absolutely essential that his usefulness be maximum. Keep his blood in good shape and he will escape many of the petty influenzas and distempers that are common among ill-cared-for beasts. A stock tonic may be given with good results. The "Prussian" stands high in the estimation of horsemen. On page 28 will be found their announcement which would be well for you to

consult. In writing inquiries address the Prussian Remedy Company, St. Paul, Minn. Kindly note that you saw their advertisement in The Homestead.

### IT DRAWS LIKE A MAGNET.

Everyone knows how a magnet draws a piece of steel to its surface. If you knew a proposition that would draw business like a magnet draws steel you undoubtedly would think it worth investigating, would you not? On page 30 will be found a proposition that should interest those looking for a good profitable business in the line of real estate. If you are interested in further particulars write the National Co-Operative Realty Company, and address them at 957, Chicago, Ill.

### A BUSHEL OF FRUIT FROM EVERY TREE

This might be a big yield or a small yield depending on the age of the tree. However in this case it happens to be a young tree. The "Minnetonka," one of the latest triumphs of apple culture, is a guaranteed apple. To get you interested in this tree Messrs. L. L. May & Co., of St. Paul, Minn., leading nurserymen, want to send you one of these trees free for trial purposes. This is only one of the many good propositions which they are offering, and if you will drop a line to this company for their grand book

they will tell you all about this offer they are making. This is one of the most northern nurseries in America and has the name of handling very hardy plants and trees. Kindly refer to their advertisement on page 11 and mention The Homestead when you write.

#### FACTS ABOUT MONTANA.

"Facts About Montana" is the title of a beautifully-illustrated souvenir edition describing the wonderful resources of that state. You will be surprised to know what a rich territory is embraced in the boundaries of Montana. This state may hold great opportunities for you. The time to investigate is right now before any more years slip over your head. A request will bring the booklet, as offered on page 30 of this paper. Address George E. Mushbach, Red Lodge, Carbon county, Montana.

#### NORTHERN GROWN SEED CORN.

On page 12 of this week's issue will be found the seed corn advertisement of the Gateway Nursery Company, of LeMars, Iowa, who are offering the very best varieties of northern-grown seed corn. This is sold under the Holden test and is a new departure in the seed corn business. They also have all kinds of nursery stock and have issued a very neat descriptive catalog of hardy fruit and ornamental trees. Write for their catalogs of both seed corn and hardy fruits, which will be sent free to all readers of The Homestead.

#### FREE SAMPLES OF CONGO.

Don't take whatever roofing the nearest dealer works off on you. Investigate carefully and save yourself trouble for many years. Write for a sample of Congo Roofing; the manufacturers will send one free. See how strong it is, how well made, how good and durable its materials are. It is called "The Neverleak Roof," a daring name, but it earns it and justifies its reputation for staying tight. See advertisement on page 25 and write for that sample before the offer is withdrawn. Address the Buchanan-Foster Company, Chestnut St., Philadelphia, Pa.

#### VAUGHAN'S SEEDS.

Vaughan's seeds have planted many a garden that has brought joy and satisfaction to the man with the hoe and the woman with the paring knife. It pays to plant only reliable seed. Vaughan's seeds have made a name for themselves as a reliable seed house should covet. In our columns this week you will find an announcement that will certainly be of interest to you if you own a garden. They tell you the kind of seeds you want for profit. If you have not yet secured a copy of this company's spring seed catalog do so at once. Address Vaughan's Seed Store, Chicago, Ill. See page 12 for their "Hoodoo" melon.

#### BROME GRASS SEED FOR SALE.

Mr. G. W. Schwab, of Clay Center, Neb., wishes to announce to the readers of The Homestead that he has 200 bushels of brome grass seed for sale at a reasonable figure. Parties wishing something to increase the value of their pastures and make a good hay crop should experiment with a small field of brome grass. Government reports have proven that it makes six times as much pasture as blue grass and does it better, and if brome grass is taken alone it makes a better hay than timothy. For pasture it is big enough a month earlier than blue grass, keeps good through the entire season and late in the winter. April, May and June are

*"I had a colt cut on barbed wire fence - my sheep were alive with ticks"*

"I mixed one part Dipolene with one part sweet oil and the colt did well. The sheep I bought and they were alive with ticks. I dipped them in Dipolene and could not find a live tick on them soon after. One of them was full of maggots. I dipped it twice and that ended the maggots. Dipolene certainly gives excellent satisfaction. I use it for pretty nearly everything and would not be without it. I don't think a man that has any stock around him can afford to be without it."

Cushing, Ia. C. B. DANIELS.

Read the last two sentences of this letter again.

He uses Dipolene for "pretty nearly everything"—that means Dipolene is more than a dip—it's a remedy that has a wide range of usefulness on the farm—it's something above the ordinary.

That's why he says "no man with stock can afford to be without it"—and we just want the privilege of convincing you that Dipolene is one of the best friends the farmer and stockman can have at hand.

Dipolene is a pure coal tar preparation for the cure and prevention of disease among farm stock and also for ridding them of all animal pests.

When we say pure—we guarantee it. If you'd keep it 20 years it would be just as clear, free from sediment and as effective as the day it was purchased. Its purity is proof of its quality—there's none "just as good."

It's non-poisonous—that means there's no danger in its general use even if stock take it internally.

What it is good for—"nearly everything" as Mr. Daniels says and he said it from experience.

It is especially good for Scab, Mange, Eczema, etc., it kills lice on hogs, poultry and cattle, sheep ticks, maggots, fleas, mites, etc., and does it in a minute. It works so quick that it has been termed the "one minute stock dip."

### DIPOLENE

THE ONE MINUTE STOCK DIP

Its greatest value is found in its preventive qualities because it no doubt has saved hundreds of thousands of dollars for farmers and stock raisers by preventing the spreading of contagious diseases.

Disease can't get a foothold where Dipolene is used. A few cents' worth occasionally sprinkled in the pens, troughs, sheds, barns, etc., provides the best safeguard and insurance against disease a farmer can procure.

Why take chances? You can't tell when disease is going to break out in your hogs, sheep or cattle.

You can stop it—you can prevent it with Dipolene.

Suppose you send for a can of Dipolene on our free trial offer, and be prepared. You've nothing to risk in doing so—we take all that—here's the offer that per-

mits you to test Dipolene at our expense if it is not what we claim.

#### 30 DAYS FREE TRIAL OFFER

Buy a can of Dipolene from your dealer. If he does not handle it then send to us direct—we pay the freight. Try it 30 days and if not as represented, send it back at our expense. All dealers have authority to make this liberal offer. Accept no substitute—there's none "just as good."

Isn't that fair? Let us send you our "Budget of Real Letters" telling of the experiences of many more users like Mr. Daniels for many other diseases.

If you need a tank our Improved Dipping Tank will give you more service and value than you can get for same money.

Made of No. 20 galvanized steel and so constructed as to prevent drowning. See round back. Ordinary tanks have square back—see dotted line. Animal slides in—can't fall in or turn over. Equipped with ladder. A durable and most satisfactory tank. Sold by dealers or sent direct, freight paid.

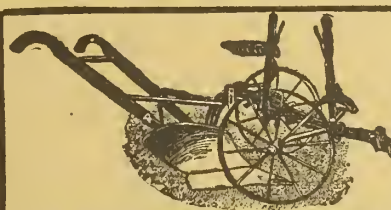

MARSHALL OIL CO.,  
Dept. D3,  
Marshalltown, Ia.

the best months to sow it, as there is danger of wind drifting it if sown too early. For hay cut when in bloom.

#### POTATO BUGS ARE COMING.

That is one thing you do not have power to stop—the coming of potato bugs. The only way that this pest can be handled is after they have made their appearance. Then plan a reception for them. Plan a good, hot one, for what is worth doing at all along this line is worth doing well. The potato bug is just fool enough to eat everything that is green simply because green leaves are good. He has a special preference for the Paris green solution when it comes from an Aspinwall sprayer. We know you will want to know more of this sprayer, so we are going to inform you that it is only one of the many machines used in potato culture that are made by the Aspinwall Manufacturing Company, of Jackson, Mich. If you are intending to purchase anything in the line of potato cutters, planters, sprayers, diggers,

THE BANNER PLOW COMPANY,

### THE BANNER RIDING ATTACHMENT.

This SAME attachment can be clamped to any right or left-hand, wood or steel beam, walking plow, lister, sod breaker, middle blaster or harrow that is made. ONLY \$15.00 from your dealer or delivered by us to your station. WE WANT AGENTS. Write us for terms, territory and full description.

COFFEYVILLE, KANSAS

etc., you should have their catalog. Kindly mention The Homestead when writing for it. See page 11 for further details.

#### A VALUABLE BUGGY BOOK FREE.

Mr. H. C. Phelps, president of the Ohio Carriage Manufacturing Company, Station 31, Cincinnati, Ohio, who is the originator of the famous free trial plan of selling buggies from factory to consumer and who is doing the largest business of this kind today, has just published a remarkable buggy book, giving the facts of buggy making as never before placed before the public. He has sent out over 150,000 of these valuable books to interested buggy buyers throughout the United States, and would be glad to send you one free if you are interested and wish to learn something about how buggies are made. (Write Mr. Phelps for one of his famous books today on a postal card and you will receive it free by return mail. Write him at the above address.)

#### NURSERY STOCK ON ITS OWN MERIT.

For thirty-five years the Des Moines Nursery Company have been selling their product to a wide patronage that has increased from year to year. It has always been the policy of this company to sell their stock purely on its own merits. Any firm that is willing to be judged in this manner by its patrons must certainly sell reliable goods. Their list of stock for the coming season embraces all the leading varieties of large and small fruits, as well as ornamental trees and small stock. Their new illustrated and descriptive catalog will be sent for the asking. They also desire good, reliable salesmen to represent them. Here are two good opportunities. If you are interested in either write the Des Moines Nursery Company, Des Moines, Iowa. On page 11 will be found further particulars.

#### PEERLESS CREAM SEPARATORS.

The farmer of today is confronted with many important questions concerning the preparation of soil for seed, the sorting and testing of seed, etc., but there is still a greater question, and one that is of vast importance—skimming the milk. Many devices have been given to the farmer, but at last the question is solved in the up-to-date Peerless Cream Separator, which is manufactured by the Waterloo Cream Separator Company, of Waterloo, Iowa. It is simply constructed and is a beauty, too. It has the only combination hollow and disk bowl made, putting the milk through two operations before it is completed, therefore the skimming is complete. The Peerless bowl is one of the wonderful inventions of the age. It is made with corrugated disks, of heavy sheet steel. These features give it the greatest skimming capacity possible. A farmer in eastern Iowa gave the Peerless Separator a severe test. He skimmed the first day 754 pounds of milk with a Peerless and secured seventy-nine pounds of cream with a test of 36 1/2 per cent. The second day he used what he considered the best standard make and skimmed 771 pounds of milk, getting seventy-three pounds of cream with a test of 35 1/2 per cent. From these figures one can see that with a Peerless he skimmed seventeen pounds less milk, secured six pounds more cream which tested 1 per cent higher. As near as can be figured, with

### THE HAWKEYE Grain Grader and Cleaner

BUILT EXPRESSLY FOR FARMERS

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.  
It will clean and grade seed wheat.  
It will clean and grade seed oats.  
It will separate oats from wheat.  
It will separate timothy from clover.  
In short, it will do any work required of a fanning mill and grade seed grains besides.  
If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by

PARSONS HAWKEYE MFG. COMPANY,  
NEWTON, IOWA.

present prices for butter fat, this means a saving of over \$1 per day by using the Peerless. Why not try one yourself? If you do nothing more, write today for their special catalog No. 9 and allow them to give you the many other strong features of their separators. It might be well to mention this paper. See advertisement on page 5 of this issue.

#### HOLLAND ENGINES.

We wish to call the attention of our readers to the Holland Engine Company, of Cedar Rapids, Iowa, whose advertisement appears on page 21. Their engines are built from two to twenty horse power, water cooled and of the single cylinder style. The engine is simple in construction as it is possible for a gasoline engine to be, while it is made of the very best material that can be secured. All working parts are cut in steel and run immersed in a bath of oil. A single revolution of the wheel is sufficient to start the engine and when once in motion its speed can easily be governed by an exceedingly simple device of the company's own patent. The motion of the engine is perfectly steady, making the engine more desirable than most engines for running cream separators. The company will furnish its patrons, free of

**Linofelt**  
It Keeps Your House Warm

### You Can Build Your House But Once

A little false economy in selection of materials will mean big losses in the years that follow.

**LINO FELT**

keeps the heat in, and saves 40% of your fuel cost.

By actual test, 44 per cent. more heat passed through walls where building paper was used than through walls of similar construction using Linofelt.

Linofelt is a blanket of degummed Flax Fibre quilted between two sheets of rosin-sized paper.

It is clean, antiseptic, odorless and vermin proof.

To cover your house from foundation to ridge-pole with Linofelt will cost only a trifle when compared with the saving and comfort it will bring as long as your house stands.

If you are planning to build, by all means investigate the merits of Linofelt.

Send for booklets and reports of scientific tests.

Just the thing, too, for Barns, Poultry Houses, etc.

Union Fibre Company  
16 Harvester Ave.  
Winona, Minn.

cost, a solution that renders the engine proof to freezing. Write the Holland Engine Company, Dept. O., Cedar Rapids, Iowa, for their catalog and novel plan of giving the farmer the engine on three months' trial. Mention this paper.

#### WHEN THE FLOWERS ARE ALL DEAD.

Not every home can have flowers in their natural state the year round. Many are the sorrows that have come to those who try to keep green plants throughout the winter. As a rule they are frozen when at the height of their beauty. There are flowers, however, that are unharmed by the coldest and most unfavorable kind of weather. They are the next best thing to the real green live plant. They are the reproduction on canvas or paper. A most realistic picture of a magnificent bouquet of flowers is now being given away by the Mothers' Magazine, of Elgin, Ill. The picture is 16x20 inches and has a gold border. For ten cents in stamps the above magazine people will send you the bouquet and a three months' subscription to their illustrated family paper. Kindly turn to page 17 for further details regarding this offer.

#### A RELIABLE SHOE.

There is a certain shoe on the market today to which is attached a small piece of buffalo calf leather cut in the form of a wild buffalo. The leather is the same that is used in making the shoe. To every pair of shoes one of these tags is attached, and there is a very interesting test connected with the scheme. The company that make these shoes claim that the leather is so good that it is impossible for you to tear this miniature buffalo with your fingers. If you are interested in buying a shoe that will stand lots of usage and rough work you should investigate the buffalo calf shoe. They are of good shape and look well for every-day wear, besides they are comfortable. Can you find better value in any other shoe? Ask your dealer for them or write direct to the Bentley & Olmsted Co., Des Moines, Iowa. On page 25 will be found more regarding these shoes.

#### ARE YOU INTERESTED IN PAINT?

It is ten to one you will do some painting this spring. You will want some good paint, not the ordinary low-grade stuff that after it has been on two months gives you the blues every time you look at it, but you want a high standard paint like the Lowe Bros. Company, 450 and 456 Third St., Dayton, Ohio, manufacture. See advertisement on page 17. These well-known paint and varnish makers have a very neat little handbook on the paint subject which tells you how to select paints, how to prepare surfaces for painting, how to choose brushes, and all the other necessary knowledge that you should know in order to do a good job. This booklet will be mailed free if you write for it and ask for "Paint and Painting." Here is a good opportunity to get some good pointers, and at the same time acquaint yourself with some of the best paint that is on the market. When writing kindly mention The Homestead.

#### SHUMWAY'S 1907 CATALOG.

We have recently been favored with a copy of this new catalog and in looking over its pages we find that the prices for seeds are practically as low as last year, with one exception, that of onion seed. The usual average yield to the acre of this seed has been 300 pounds. The crop last year averaged only about 100 pounds to the acre, owing to very unfavorable conditions. In writing up the introduction for the catalog this firm state that their supply is not large, as they aim to keep a high standard of quality. They furthermore quote prices that are very reasonable indeed, considering the fact that they claim all their stock is of the new crop. It is a very poor plan to wait until the last thing before you order your spring and summer supply of seeds. Every seed house now has splendid facilities for handling and filling orders, and yet when hundreds and thousands of orders come in daily it requires nothing but the best of management to turn the work over. The spring rush generally comes just about the time everyone is the most anxious to secure their seeds. Now is the time to send and avoid this rush. The catalog is complete in every detail and contains a full assortment of all the most reliable vegetables grown on the corn-belt farms. The new varieties, wherever they have been found to be of

# Don't Delay A Minute!

## Write today for prices and terms of the Celebrated Detroit Tongueless Disc Harrow

That's the only sure way you have of getting one for your Spring work. I will send you my Free Disc Catalogue, which fully describes this Harrow, and will quote you direct prices delivered at your station.

If you accept my proposition and order at once, I can probably supply you with a Detroit Tongueless Disc—but if you delay in getting in touch with me NOW on this Harrow for 1907—it may be impossible for me to fill your order when it comes—and I'll tell you why.

We have a big factory and are working every available man on these

Discs, but the best we can hope to do is to turn out about twice the number we did last year.

Now here we are way in advance of the Spring season, and yet nearly half of our factory output on this Disc is sold—and orders are simply pouring in every day.

The present indications are that long before the frost is out of the ground I will have sold every Harrow we can possibly make this season. THAT'S the reason why I say DON'T DELAY A MINUTE in writing me for catalogue and prices.

## The Detroit Tongueless Transport Truck Disc Harrow

Sold On 30 Days' Free Trial—All Freight Allowed—For Cash Or On Time

Is the greatest selling implement of the age.

There are reasons for this—several of them. First—the TONGUELESS idea meets with the approval of every thinking farmer—he wonders why it wasn't thought of before.

Using a Forward Truck and doing away with the Tongue saves the horses' necks—does away with all side draft—crowding of the team on turns—and permits a steady, even pull by both horses straight ahead all the time.

Don't think of jamming up your team just at the time you need them most, with an old style Tongue Disc.

The DETROIT is the only Disc Harrow built on correct principles. Every part of the very best quality—ball bearings take the end thrust—double levers make it easy to handle—steel scrapers set by hand or foot.

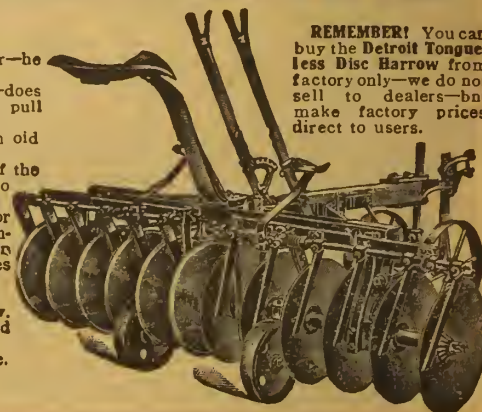

See the TRANSPORT TRUCKS at the rear? This is a new patented invention for 1907—and it's found only on the DETROIT. By attaching, in a moment's time, the entire Disc Harrow can be raised from the ground on front and back truck—and driven over rough roads from house to field or from farm to farm, without the Disc edges touching the ground. No dulling of the Discs in transportation.

Strong Foot-brake makes driving down hill perfectly safe.

Space in this advertisement won't permit telling any more about this Harrow. You should send AT ONCE for my Big, Free Catalogue, giving full descriptions, and get my special price to you direct.

Let me say again DON'T DELAY A MINUTE. Write for catalogue and direct price.

W. W. Collier, Gen'l Mgr., American Harrow Co.,  
148 Hastings St., Detroit, Mich.

REMEMBER! You can buy the Detroit Tongueless Disc Harrow from factory only—we do not sell to dealers—but make factory prices direct to users.

merit, have been added. The collection of flower seeds is also wide and contains all the standard and new varieties of household and outdoor plants. If you are interested in a good seed catalog write for Shumway's Address your inquiry to Mr. R. H. Shumway, Rockford, Ill. Kindly mention The Homestead in your inquiry.

#### THE HOOVER POTATO DIGGER.

The manufacturer who would furnish to potato growers the best digger, must build it upon the actual experience of a potato man. It can be said of the famous Hoover Digger that it grows directly out of the experience of Mr. I. W. Hoover, president of the Hoover-Prout Company. He was a large potato grower in northern Ohio, and had been for twenty years, before he perfected his digger. He invented it originally for his own use. Today it is in use by potato growers all over the country. There have been vast improvements in the Hoover Digger in later years. In 1905, the twenty-two-inch elevator, with its large separating surface, was brought out. This improvement, together with its lighter draft, placed the Hoover in the very front rank of diggers. The manufacturers have made it a strong, durable machine, one that growers do not hesitate to put to work in any kind of soil. It can be depended upon to get all the potatoes, and a point that everybody appreciates is that it delivers them in fine shape, clean and uncut, in straight rows on top of the ground, where they are easy to pick up. If you are in need of a digger, don't place your order until you

have written to the Hoover-Prout Company, Avery, Ohio, for their catalog and learned the merits of the Hoover Digger. See advertisement on page 12.

#### EVERY HOG RAISER SHOULD HAVE A HOG FEEDER.

To give every pig a fair show at the feeding trough is worth a great amount to any hog raiser, as there are strong, thrifty pigs in every lot that get more than their share at the expense of the weaker and younger pigs, causing runts where if these weaker pigs were given a fair show they would make great gains. A feeder that will give every pig a place and a fair show is manufactured

by Mr. C. A. Wright, of Rosendale, Mo., the Duroc Jersey breeders. For something over two years these Wright feeders have been on the market and they are today indorsed by more hog men, sheep raisers and feeders of

various kinds of stock than any feeder on the market. Strong testimonials from the experiment stations are found among the long list of testimonials shown by Mr. Wright. It not only saves the feed and gives to each pig a place to eat, but makes the feeder's work more pleasant and easier, as the pig does not climb over one while feeding. The writer has seen hundreds of these feeders in use and has yet to find the first user who is not satisfied and who would go back to the old sixteen-foot V-shape trough where slop is poured in one end to be devoured by the stronger hogs. Mr. Wright last year set a price of \$10, freight prepaid to buyer's station, and did not expect to be able to furnish feeders at that price this year, as the price of all materials advanced so rapidly that it looked like a losing proposition. Through his lumber dealer Mr. Wright has been able to make a favorable contract for lumber up to April 1, 1907, and will during the month of March fill all orders at the old price, \$10, freight prepaid to your station. You buy a feeder and farm right at \$10 and this gives you plans and privilege of making as many feeders as are necessary for your own use. The farm right does not limit you to pig feeders; you can make calf, sheep and chicken feeders under this farm right. Order now, as after April 1st Mr. Wright will have to raise the price or cut out paying freight. See page 17 for advertisement and kindly mention this paper when writing Mr. WRIGHT.

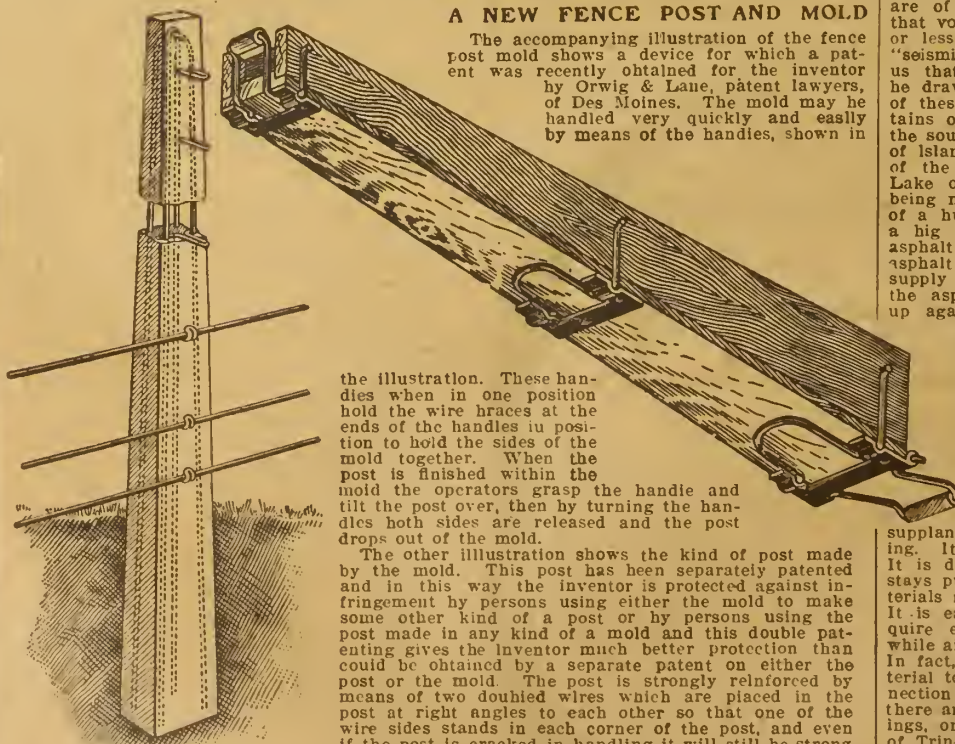

#### HUTTIG RUBBER ROOFING COMPANY.

The recent earthquake at Jamaica was not an occasion for surprise among scientific men who have known all islands of this region are of volcanic origin. Scientists consider that volcanic land is always subject to more or less earthquakes or, as they call them, "seismic disturbances." These scientists tell us that if the waters of the ocean would be drawn away it would be seen that most of these islands were merely tops of mountains or volcanoes. It is, indeed, along the southern extremity of this Atlantic group of islands that the greatest volcanic wonder of the world is located. This is Asphalt Lake of the Island of Trinidad, this lake being nothing more or less than the crater of a huge volcano. It has been likened to a big kettle in which nature is preparing asphalt for the use of mankind. Tons of asphalt are taken away every year, but the supply never grows less. The place where the asphalt has been taken out soon fills up again with new asphalt. It would be interesting if the scientists could find out how asphalt is formed, what intense degrees of heat it undergoes, ridding it of all impurities by consuming them. Only the asphalt itself withstands these secret processes of nature and it comes out pure and almost ready to use. Asphalt has been used for years for paving, for which it is unexcelled. In comparatively recent time it has been demonstrated to be superior to any other material for roofing and is fast

supplanting the scores of other kinds of roofing. It is fire resisting, where wood is not. It is durable, while tin and iron rust. It stays put, while tar and similar roofing materials run in hot weather and crack in cold. It is easily put on, while slate or tile require expert workmen. It is inexpensive, while all other good roofings are high priced. In fact, it comes nearest of any known material to form the perfect roof. In this connection it is well to remember that while there are a number of so-called asphalt roofings, only that which comes from the Island of Trinidad can truly be said to be asphalt. The others are various kinds of compositions which soon deteriorate. Trinidad asphalt can always be relied upon. So well known is this fact among engineers that in cities where asphalt is used for street paving the engineering departments generally specify Lake Trinidad asphalt and will accept no other. Huttig Rubber Roofing, which hundreds of our readers are using, and more will use when they become acquainted with its merits, is made of genuine Trinidad asphalt and long-fibered felt. The felt is heavily saturated with asphalt under pres-

#### A NEW FENCE POST AND MOLD

The accompanying illustration of the fence post mold shows a device for which a patent was recently obtained for the inventor by Orwig & Lane, patent lawyers, of Des Moines. The mold may be handled very quickly and easily by means of the handles, shown in

the illustration. These handles when in one position hold the wire braces at the ends of the handles in position to hold the sides of the mold together. When the post is finished within the mold the operators grasp the handle and tilt the post over, then by turning the handles both sides are released and the post drops out of the mold.

The other illustration shows the kind of post made by the mold. This post has been separately patented and in this way the inventor is protected against infringement by persons using either the mold to make some other kind of a post or by persons using the post made in any kind of a mold and this double patenting gives the inventor much better protection than could be obtained by a separate patent on either the post or the mold. The post is strongly reinforced by means of two doubled wires which are placed in the post at right angles to each other so that one of the wire sides stands in each corner of the post, and even if the post is cracked in handling, it will still be strong and durable. The inventor also has obtained claims

on the device for connecting fence wires with the post. He uses metal loops made of soft wire, the inner end of which is placed within the post and is locked over the post reinforcing wires, thus firmly holding the staples or wire loops to the post. When the post is first made, these loops first stick straight out from it and then the operator may attach to the post either fence wires or wooden rails, and he may firmly connect these with the post by bending the soft wire loops over the fence wires or rails. If at any time it is desired to reloops are simply straightened out and the case the fence wires or rails, the soft wire may be ready to attach to new fence wires or rails. A large number of these posts have already been manufactured and put in use in Iowa.

For further information in regard to these patents address, Orwig & Lane, whose advertisement is found on page 8 of this issue of The Homestead.

### Health for the Horse

Loosen up his hide and his intestinal system, purify his blood, drive out the worms, give him an appetite and power to digest and get the full value of all his feed. You can do all this by the systematic use of

## PRUSSIAN STOCK TONIC

and have your horses strong, healthy and high strung. Mix with feed. Only a small quantity required. 1200 feeds in the big pail. Price only \$3.50 prepaid. Ask your dealer for the standard remedies.

Prussian Spavin Cure.  
Prussian Heave Powders.  
Prussian Worm Powders.

Write us what stock you own and we will send you our Stockman's Hand Book Free. Write today.

**PRUSSIAN REMEDY CO.**  
St. Paul, Minn.

sure until every fiber is thoroughly coated, then a layer of asphalt is used for an outer coating on each side of the felt. This excludes the air and protects every particle of the felt. The roofing is thus rendered absolutely proof against climatic conditions and its power to resist sun and rain, heat and cold and wind is preserved. In its method of construction, there is no right or wrong side and it can be laid either side up and it will not dry out, crack or break in cold weather or soften so as to run in hot weather. The Huttig Manufacturing Company, of Muscatine, Iowa, has a most interesting book, giving many interesting facts regarding their roofing and other roofings, and also some instructive data on asphalt, which they would be pleased to send our readers. A postal card request sent to their office at Muscatine, Iowa, will be sufficient. See advertisement on page 9.

#### PAINTING TIME DRAWS NEAR.

It's only a hop, skip and a jump, till springtime now; the time when you want to be cleaning up the yard, trimming up the trees and giving the house a new coat of paint. What kind of paint to buy, that's the question. Mr. O. L. Chase, the paint man of St. Louis, has about as liberal a selling offer on his made-to-order paint that we have ever seen. He advertises to make fresh paint to order, dating each can the day it's made, and he sells it under a \$100 cash guarantee as to purity and freshness. He also gives two full gallons of the paint free, to try. Such an offer as this makes one believe that Chase must be making pretty good paint or he would not dare to sell it on this plan. He issues a fine paint book, showing big, handsome color cards, and before you decide to buy, we believe you ought to write for this book. It will give you some mighty interesting paint information. The address is O. L. Chase, the Paint Man, Dept. 27, St. Louis, Mo. See advertisement on page 33.

#### LARGER CROPS AND HIGHER PRICES.

There is a very large amount of poor grain grown throughout the corn belt. Poor cultivation and thin soil are occasionally reasons for this fact, but it can be more often placed to the credit of poor seed. Too few people realize the importance of planting and sowing clean seed. Anyone who has traveled throughout the corn belt will be more than surprised to note the number of fields which show a large per cent of the different field weeds that are common in grain fields. It is actually surprising how soon, by sowing clean seed, the acreage of weeds on a farm can be reduced. Not many years ago it was possible to see grain fields throughout the corn belt that were literally grown to mustard. In some localities this weed became so common that something had to be done if crops were to be grown. The same fields now may be seen showing but very little of these obnoxious weeds. What is the reason? Farmers have purchased good fanning mills; they have planted nothing but clean seed. It must not be thought that clean seed is the only result of the use of a fanning mill. A good fanning mill removes a great many poor seeds. Practically speaking, fanning the grain is nothing more or less than a sort of artificial selection. Careful farmers pay a great deal of attention to the selection of their seed corn. Is there any reason that just as good attention should not be paid to the selection of the seed oats, wheat or any other small grain? There should be three processes in the cleaning of grain. The first is the scalping process which removes chaff, sticks and other coarse stuff; the second is the cleaning process which takes out small kernels and weed seeds, and the last is the screening process which removes every possible sign of dirt and weed seed. Perhaps no other fanning mill embodies these three processes so well in its manipulation as the New Superior. Right now is the time to clean your seed for spring sowing. If you are anxious to increase your profits, and the looks of your fields as well, you should by all

means send a postal for some very valuable information on this subject to the J. L. Owens Company, 614 Superior St., S. E., Minneapolis, Minn.

#### THE OLD RELIABLE DOUGLAS SHOE.

Everybody knows the W. L. Douglas shoe. It is a shoe of world-wide fame. Probably your father wore the Douglas long before you knew anything about footwear. Established in 1876, this company has kept working away steadily to make a better shoe for their customers. It is certain that any shoe manufacturing company could never keep in the business this long a period without having kept improving their product. Their shoes have ever been recognized by judges of footwear to be the best in style, fit and wear that could be produced for the price that they are sold. It is only for the reason that the Douglas Shoe Company sell more men's \$3.50 shoes than any other firm in the world that they are able to sell their goods at such prices. On every shoe which comes from this factory you will find the name W. L. Douglas, and price, stamped on the bottom of the shoe. If you have ever tried a Douglas you will want nothing better. Sold everywhere. Catalog matter for the asking. Refer to page 22 for further information.

#### HOW TO GET MORE CORN.

If you want a new illustrated book entitled "More Corn to the Acre"—the best thing ever published on corn because it is a practical field book—just write to the address below and send twenty-five cents in coin or stamps for six months' trial subscription to "Farm and Stock," the only illustrated farm paper which makes a specialty of corn and live stock. When you subscribe to "Farm and Stock" you also have the benefit of their "Corn Growers' School" which shows you how to easily increase your yield ten bushels or more to the acre on corn. Some of the leading chapters in this free corn book are "History of Corn," "Anatomy of the Corn Plant," "Races of Corn," "Good Seed Equals a Good Stand," "Seed Bed Preparation," "Selecting Seed Corn," "Kinds of Cultivation," "Corn Machinery," "Corn Judging," and "How to Increase the Yield." We believe that any one of our readers will feel very well repaid for all they will get for twenty-five cents if they send it to "Farm and Stock," Box 119, St. Joseph, Mo. See advertisement on page 12.

#### WONDERFUL COBALT CLAIMS.

Mr. W. V. Coons, of Cleveland, Ohio, president of Messrs. W. V. Coons & Co., bankers of that city, although a comparatively young man in years, has made a wonderful record for himself as a financier, having built up a large fortune for himself and his company and made a vast amount of money for his associates in the many enterprises in which he has been engaged. Mr. Coons is a native of the state of Ohio, his early boyhood having been spent in Findlay, where he went to school and practiced law for years. Early in life Mr. Coons developed a marked ability for organizing and successfully managing large enterprises, his first achievement of note being the purchase of the gas works of his own city, which were afterwards sold to a syndicate at a large profit. Since that time he has been an extensive operator in electric railroads, electric light plants, and in high-grade legitimate oil industries in the Indiana and Ohio districts. He recently made the sale of The Producers' Company, a large independent concern, second only in size to the Standard Oil Company, to a Boston syndicate for an enormous sum of money. After disposing of his oil interests, Mr. Coons began to look around for other large investments, and at this time his attention was called to the Cobalt district of Canada. After making several trips to Cobalt and taking with him a corps of expert mining engineers, Mr. Coons decided to purchase a large tract of the mineral ground in the heart of the Cobalt district, and adjoining some of the richest producing

## A Coat of Paint Will Tone Up the Whole Farm System

It is surprising to find out in how many places about the farm a coat of Pure White Lead Paint will work improvement. House, barns, outbuildings, fences, wagons and implements are made not only to look better, but to be worth more by painting them with Pure White Lead Paint.

Pure White Lead and Linseed Oil paint gives a durable, tough, elastic coat that does not crack or scale off.

To be absolutely sure of the quality, purity and genuineness of your paint, buy only White Lead which has the Dutch Boy trade mark on the side of the keg.

### Send for Book

"A Talk on Paint," gives valuable information on the paint subject. Sent free upon request.

#### NATIONAL LEAD COMPANY

In whichever of the following cities is nearest you:

New York, Boston, Buffalo, Cleveland, Cincinnati, Chicago, St. Louis, Philadelphia (John T. Lewis & Bros. Co.), Pittsburgh (National Lead & Oil Co.)

All lead packed in 1907 bears this mark.

# Increase Your Corn Crop

THIS BOOK FREE  
Will You Write Me a Postal for a 50c Corn Book?

Do it NOW—while they last.

The book is from the pen of Professor A. D. Shamel of the Illinois Experiment Station—recognized everywhere as "the man who knows"—about corn.

It's full of photographic illustrations, and explains fully about selection—modern corn breeding and cultural methods.

The American Corn Expert, Professor Holden, demonstrates his Seed-Testing Machine on page 17 of this book. The book should be in the hands of every up-to-date corn-raising farmer—it will help him double his corn crop.

All I ask you for this 50c Book

is that you will give, on a postal, the names and addresses of three of your farmer neighbors whom you understand will be in the market for a riding plow this season. It will take only a few minutes of your time, and a postal, and I will send you the book prepaid by return mail.

See that little girl lift her father with one foot?

He weighs 196 lbs., and she is only 6 years old—yet she can lift him with only one foot.

WHY—and what does the "WHY" mean to you?

Simply this—it means that the Emerson Foot Lift Plows are the easiest handled in the field of any plow made.—FOOT-CONTROL ALWAYS—in or out of the hardest soil. Manage the Plow with your Feet—your Horses with your Hands.

The name EMERSON means easiest to handle—lightest draft—and most durable.

Every EMERSON Gang Plow is equipped with 2000-

mile magazine box and axle. When you buy an

EMERSON you buy for a lifetime, not for a few

years, because an EMERSON will last as long as

you live. I will send you, FREE, our Implement

Literature, and the Corn Book if you act promptly

and write the postal TODAY. I gave away

100,000 of these books—then the supply ran out.

They went like wildfire. I've only a limited

number this year, so don't wait till they're all

gone.

Putting off may mean I won't have a single

copy to send to you.

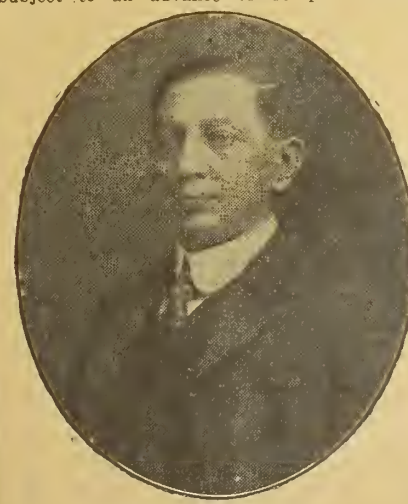

Write TODAY—Now—while you think of it.

HOW TO GROW CORN

W. V. Coons, President, W. V. Coons & Co., Bankers, Cleveland, Ohio.

price on February 20th. This block of stock was over-subscribed, and on February 20th the price went to thirty-five cents a share. Another small block of stock is now being offered at thirty-five cents a share, and on April 25th the price will again advance, to fifty cents a share. It is reasonable to believe that Mr. Coons, with his vast amount of experience and his unquestioned ability, is certain of large returns on the Cobalt Mutual Mines Company, or he would not invest such a large sum of his own money in the enterprise. We have looked up the record of Mr. Coons and find that he is rated as a wealthy man by the commercial agencies, with the highest grade of credit, and we see no reason why, under Mr. Coons' careful management the Cobalt Mutual Mines Company, having the vast property it does

mines of this wonderful silver camp. He secured 560 acres (the second largest holdings in the entire district) and returned to Cleveland to organize the Cobalt Mutual Mines Company. Heretofore, in all of his large enterprises, Mr. Coons has never offered any of his stock for public sale, as it has always been taken up by his friends and business associates, but in his Cobalt operations he decided to offer the Cobalt Mutual Mines Company's stock for public subscription, believing that the possibilities of Cobalt Mutual were so vast that the public could well be taken into the enterprise with an assurance of big profits from mining Cobalt on a large scale. A limited block of "Cobalt Mutual" stock was offered on January 20th at twenty-five cents a share, subject to an advance of 40 per cent in

in such a rich mineral district as Cobalt, should not yield splendid returns to its stockholders. It should be an excellent opportunity for anyone who has a little money to invest and to those of our readers who are interested in this enterprise, we suggest that they write to Mr. Coons direct. He will supply special reports on the Cobalt Mutual Mines Company and give full information in regard to the property. Mr. Coons' address is, W. V. Coons, president W. V. Coons & Co., bankers, Bond Dept. A6, Williamson Bldg., Cleveland, Ohio.

#### A NEW TOMATO.

At the Great Royal Agricultural Show of England there was exhibited a plant of a new variety of tomato called the "Golden Nugget," which attracted the attention of probably hundreds of thousands of persons by its vigorous growth, beautiful shape and color, and immense productiveness, there being about seventy-five full-sized fruits on a single plant growing in a seven-inch flower pot. A Des Moines seed dealer, who was present, at once made arrangements to introduce it in America. When grown in the open ground here, it astonished everyone by producing 150 to 200 fine-shaped, golden yellow fruits of unusually fine flavor, different from and superior to any other variety, especially for eating from the hand. Prizes amounting to \$25 are offered this year by the introducers, for the largest number of tomatoes grown on one plant. We have just made arrangement with the introducers to send a prize competitor's packet of twenty-five seeds of the Golden Nugget tomato

free to any of our readers who desire it, provided they mention this paper in their request. Write direct to the Iowa Seed Company, of Des Moines, Iowa, enclosing a two-cent stamp to partially pay the postage on the seed and a copy of their catalog, which describes also many other desirable novelties.

# PILES

## FISTULA--NO MONEY TILL CURED

John Harkness, Prop. Cash Department Store, Ottawa, Kan. Writes March 24, 1904: "It is a pleasure to recommend your treatment for Piles. I had been afflicted more or less for nineteen years, and now after being cured, I am not only satisfied, but grateful."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. Address either our St. Louis office or

Town..... State.....

### IN THE GREAT SOUTHWEST.

The outlook for the Texas onion crop is very good indeed, since exceedingly dry weather so far has given growers an opportunity to follow their farming on irrigated lands without delay. The open winter has made the planting two or three weeks earlier, though the acreage is not any larger than last season.

Despite the sensational exposure made in the famous book, "The Jungles," the British war office has just ratified a contract with Armour & Co., of Chicago, for \$5,000,000 worth of canned beef to be used in the army.

Hutchinson, Kan., had a regular Fourth of July demonstration to celebrate its first illumination by gas. It is quite probable that people will be burning gas in Hutchinson stoves and ranges before long.

After amending the two-cent-a-mile passenger railroad rate bill the Missouri legislature has passed it in both branches and it has gone to the governor. The bill affects all railroads in the state except independent lines of less than forty-five miles, which may charge four cents per mile.

Kansas water works and sewerage systems are under investigation by the geological survey of the state. The investigation will last about two years, at the end of which time the results will be published. It is stated that the sanitary conditions of Kansas towns are in very good condition generally.

The municipal corporations' committee of Oklahoma recently filed its report at Guthrie, which provides that all cities of more than 3,500 inhabitants may frame their own charters under the limitations of statute law and constitution. The power of initiative and referendum is reserved to all cities. The granting of franchises for the construction, purchase, sale or lease of any public works must always be approved by the vote of the people.

A great many western sheep feeders are cashing in their holdings. The principal reason seems to be the fact that hay is scarce and high priced in the feeding sections. In various parts of Nebraska and the West good prairie hay sells all the way from \$8 to \$15 per ton. It is probable that there will be a shortage of sheep on the market about grass time.

It is rumored that owing to a great scarcity of wheat all over the country the flour mills in the republic of Mexico are being closed down. A movement made recently to reduce the duty on Amer-

ican wheat has been brought before the governor. Last year there was a similar scarcity and the duty was removed, with the result that great quantities of American wheat were imported into that country. The consumption of white bread by the Mexican people has greatly increased of late.

An offer to aid the small-pox stricken legislators at Jefferson City was sent to Governor Folk by the acting president of the Missouri State Nurses' Association, which has a membership of 386 and is represented in different parts of the state.

### Advantages of Pitless Scales.

The American Farmer doesn't like unnecessary work, and digging a hole to set a pair of scales into has always seemed to him like unnecessary work. Probably that is one reason why the Knodig Pitless Scales have met with such widespread favor in the few years they have been on the market, while of course there are others.

A pair of scales is an absolute necessity on a farm. It is the only way that a farmer knows that he is getting what he ought to get for his season's work. A lot of sheep or hogs that he has specially fitted for market frequently will not bring him as much money as he thinks they ought to bring, and if he has not weighed them on his own scales naturally he suspects that he has not been given full weight.

For some reason or other the man in the city who owns a pair of scales and who does the buying is more or less an object of suspicion and perhaps naturally so because the average man has no way of checking his figures. If he wants to give short weight he can do so with absolutely no chance of its being found out. The farmer is the only producer in the world who disposes of his products without knowing exactly what quantities he is selling.

The Knodig Pitless Scale offers a proposition that enables a farmer to tend to this important business end of his vocation.

As the name implies there is no pit to be dug to set the scale in. This feature means even more than this because the construction of this scale is such that dirt cannot collect underneath the platform or water or ice get into the bearings.

The Knodig Scale is sent out on 30 days' approval direct from the factory. The buyers of this scale deal first hand with the manufacturers and they are guaranteed a saving of all middlemen's profits. The manufacturers of the Knodig take the position that a pair of scales does not get more valuable just because it passes through the hands of several dealers. If it is worth \$..... when it leaves the factory that is all it is ever worth and all that any buyer should be asked to pay. This is the Knodig theory and the Knodig

## Examine Fence Carefully

before you buy it and see whether the stays are made of whole wire or short pieces. It makes a big difference in the strength of the fence and as the whole wire fence costs you no more, and is fully twice as strong, why buy the other? Our stay wire is continuous—one piece running continuously up and down across the fence without an end for many rods. Thus we preserve and utilize all the strength and service there is in the wire, fully half of which is wasted in cut stay fences—sacrificed to convenience and speed in manufacture. Our method of weaving is a little slower and costs us a trifle more, but it's worth while—it's the only correct way of weaving a fence.

**30 days approval.** But why argue and hesitate? Let us ship you what fence, etc. you need on 30 days approval. We want you to examine and test it. We want to show you the difference between ours—the best made fence on earth, and the other fences that are being offered to you. During the 30 days you can test it thoroughly. You can put up a part of it or all of it and turn your stock against it. Give it any kind of a test you wish. After examining it and comparing its construction with others we will gladly let you be the judge. If you don't like it, send the whole business back and it won't cost you a cent as we will pay freight both ways and refund every cent you paid. 17 years experience with this kind of fence gives us the confidence to make this offer.

We prepay freight to any steam railroad station in the United States on 40 rods or more and guarantee the safe delivery of your shipment. Our free Fence Book tells all about Advance Fence. Let us send it to you with freight paid prices on our line.

**Advance  
Fence Co.,**

34 Old St., Peoria, Ill.

## LANDS AND HOMES FOR SALE

### Last Chance to Buy Cheap Land.

#### PROVIDE FOR THE RAINY DAY.

For the rainy day will come—sooner or later—and the man who is wise and has the interests of his family at heart will buy land, for land is sure, stable, and will always make the wife and the boys and girls a good living. You say where? We answer—in the

### FAMOUS FALFURRIAS DISTRICT

**FALFURRIAS, TEXAS.**  
Shipped the earliest vegetables: Bermuda Onions, Watermelons and Cotton in the U. S. It is 1,000 miles nearer the consuming markets than California. The soils are rich, sandy loam, alluvial deposits of some pre-historic water course, underlaid by red, sandy clay, with unusual capacity for holding moisture, and in itself, rich in plant food. **Rainfall.** The U. S. Weather Report states an average rainfall of 26 inches for the last 20 years. The last few years since lands have been cultivated, the rainfall has been 30 inches, sufficient to raise all crops, without irrigation. Artesian water, at 500 to 750 feet, either flowing wells of good capacity, or on higher land rising to about 10 feet of surface, making it an ideal pumping plant through windmills or gasoline engines. **Products of all kinds as Corn, Cotton, Forage, Alfalfa, Vegetables,** have been raised successfully and profitably for years. Fruits, such as Oranges, Lemons, Olives, Dates, Grapes, Peaches and Plums are making rapid growth. **The Climate is Semi-Arid,** no excessive rainfall, no malaria. Dry air, cooled by constant gulf breezes; cool nights, no storms. Ideal climate, good for lung trouble, asthma and catarrh.

### In The Gulf Coast Country of Texas.

Where the farmers are now making from \$50 to \$300 per acre per year from their crops; where we have artesian wells; where land has doubled in value in twelve months; where new towns and new railroads are being built; but don't wait—you know how land has increased in value in your own country—buy in the Falfurrias district; get near these new towns and your land will grow in value as the town grows. Land is selling now at

**\$15 PER ACRE.**

Come and see our modern and progressive town; speak to our satisfied farmers. We have churches of various denominations, the best schools, good society and a happy, prosperous and enterprising community. Do you wish to know more about this wonderful Falfurrias country, the land of Heart's Delight, of Sunshine and Big Crops.

**STOCK Ranch For Sale**—Splendid stock ranch near S. C. & N. W. in Converse Co., Wyo. 760 A. deeded land, 225 A. irrigated; 500 head mixed cattle, 10 horses, implements, etc.; good 6-room house, barn, granary, shop, machinery house, sheds, corrals, etc. Abundance of timber for domestic use on place. For particulars address owner, John Kern, La Boute, Wyo.

**TO RENT:** 246 acres, 2 miles from Ulrich, Henry improvements, cash or share rent. 640 acres Willip county, Minnesota, fair improvements, one-half in cultivation, cash or grain rent. Box 31, Independence, Iowa.

# LANDS AND HOMES FOR SALE

## Government Land.

1,000,000 Acres Soon Open.

TWO Indian Reservations and four U. S. Government Irrigated districts soon to be thrown open in Washington, Oregon and Idaho—over 1,000,000 acres in all. These lands are valuable for agriculture, fruit raising, stock raising and dairying. The climate is unexcelled. President Roosevelt in a speech in Seattle three years ago said that if he were twenty years younger he would settle in Washington. The western states contain the last of the government lands and when new districts are thrown open the best land is soon taken. I have prepared maps and descriptive booklet of the resources, etc., of these Reservations and Irrigated lands, containing also statement of the laws for taking up lands and water rights which I will mail postpaid on receipt of price, \$2.00. Address,

**JOS. MCCARTHY,**  
Hyde Bldg., Spokane, Wash.  
References: Fidelity National Bank, Spokane, Wash.; Floyd L. Daggett, Mayor of Spokane, Wash.

## MILD WINTER

Protected by great hills and warmed by almost perpetual sunshine, Lewiston-Clarkston Basin has the ideal climate for profit and comfort. No blizzards. No cyclones. No floods. No malaria. No consumption. No asthma. No serious thunderstorms. At the head of river navigation from Pacific ocean, Lewiston-Clarkston [pop. 12,000] is the commercial and transportation center for an immensely productive fruit, grain, timber & mining territory. Write today for detailed and authentic information about new fruit and wine lands just being brought under irrigation, within mile of city limits. Tracts close to and same lake-bed soils fruit lands now paying \$250 to \$1000 per acre. Easy terms. Land pays for itself while orchard is growing. Why live amid dreary surroundings, far from neighbors, when a few acres in delightful Lewiston-Clarkston make you independent and prosperous, with all advantages of fine schools, churches, libraries, daily papers, neighborly city activity? Address **DEVELOPMENT LEAGUE**, at EITHER LEWISTON, IDAHO OR CLARKSTON, WASH. Send list of neighbors who may move west. Write names and addresses very plainly and kindly mention this paper.

**LEWISTON-CLARKSTON**  
IDAHO WASHINGTON  
"The Gateway of the Pacific Northwest"

## Are You Texas Bound?

If you are and have lived and farmed in Iowa or her neighboring state, you should go to Oldham county, for you can farm in the good old home fashion there, raise good big crops and feed stock. We have 25,000 square miles of mostly good black soil farm lands in the Shallow Water Belt of the Panhandle, just west of Amarillo. You can buy a good farm here at \$10 an acre or a better one for \$15 per acre. Write us for literature and come and see us when in Kansas City. Excursion March 19th, leaving Kansas City March 20th.

**BOYER, PETERSON & CO.,**  
408-410 Gumbel Bldg., 8th and Walnut Sts.,  
Kansas City, Missouri  
(Five minutes' ride from Union Depot.)

## THE MILD CLIMATE IN VIRGINIA

OFFERS SPLENDID opportunities for farming, stock raising, fruit growing and general farming. Winters are mild and short. Climate healthful. Markets near. Lands are advancing. Write for information to

**G. W. KOINER,**  
Commissioner of Agriculture,  
RICHMOND, VIRGINIA

**FOR SALE OR EXCHANGE:** 240 acre eastern Texas peach and pear orchard, located within 2 miles of growing city of 18,000 population. The owner will sell on easy terms or will exchange for northern farm or city property. Northern Iowa Land Co., Independence, Iowa.

## LAND ADVERTISING.

FOR additional advertisements of farms, farm lands, etc., see department of CLASSIFIED ADVERTISING elsewhere in this paper. It will pay you, if looking for bargains, to look over the advertisements to be found there.

**IOWA FARMS:** Send for our new illustrated list of improved Iowa farms. This is the finest list we have ever issued, gives full descriptions with good pictures. Also offers some good places for exchange and rent. Northern Iowa Land Co., Independence, Iowa.

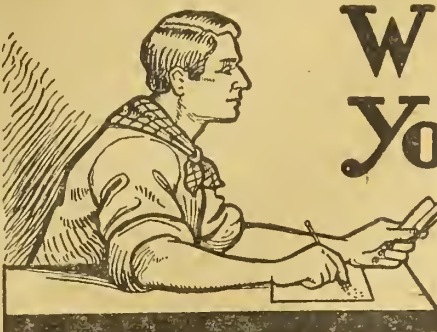

**Homeseeker, be careful.** Locate right. Investigate our famous Artesian Valley. Sure crops, matchless climate. Let us write you. Miller & James, Mende, Kansas.

**TO EXCHANGE:** Good 10-room residence, three acres of land, good flour and feed mill, in central Iowa, county seat town of 3,000 population. Exchange for land, city property or merchandise. Box 148, Independence, Iowa.

**Missouri Farms.** Write for State Map, Booklet and Weather Report. Sent Free. **BAZEL J. MEIK,** Chillicothe, Missouri.

**TO EXCHANGE:** Good 640-acre farm in Wilkin county, Minn.; 468 acres in Dunn county, Wis., both improved. Want smaller farm, livestock or city property. Box 151, Independence, Iowa.

**TO EXCHANGE:** Have a good improved farm, well located, to exchange for registered cattle or stallions. Write giving description and prices. Box 81, Independence, Iowa.

## What do Your Crops Cost?

IT IS not what your crop brings on the market so much as what it costs you to raise it that counts in farming.

If you are farming on high-priced land under the most trying difficulties—if your soil has begun to fail, and your crops are not so large as they used to be—if it takes so much high-priced help to produce and harvest your crops that there is no profit left, you are not making much money farming.

Why don't you sell out at the high prices you can now realize and invest your cash in land where you can get five or ten times as many acres for the money, of better, newer soil than that you own at present?

When you bought the farm you now own, it was cheap—the rise in land values made you rich. Why not do that same thing over again?

In Southern Alberta, Canada, is to be found as rich land as there is anywhere. It will raise anything that your land will raise, with possibly one or two exceptions. It is the greatest live stock country on earth, and the markets are just as good as the markets you now patronize.

In this new country you can raise crops at a small percentage of what it now costs you to raise them, because climatic conditions are such that one man can attend as many acres as in your country, and each acre will produce from two to four times the quantity one of your acres will produce if you are farming without irrigation.

On the vast irrigated tracts of Alberta you can find a farm that will just suit you, and you can rest assured that if you farm it fifty years you will never have a crop failure. No waiting for rain—no chance at all to take—just a certain, sure crop every time you put seed in the ground, and a bigger crop than you can hope to raise on unirrigated ground.

If you are interested in very fertile land, at low prices, with a certain harvest every year, we can sell it to you on terms that are so easy there is no excuse for any man being without a farm.

Write us for full particulars, and let us tell you how to see Alberta and this land at very little cost for the trip—let us tell you how to become independent in two years.

**Canadian Pacific Irrigation Colonization Company, Limited,**  
71 Ninth Avenue, West, CALGARY, ALTA., CANADA.  
Sales Department, Canadian Pacific Railway, Irrigated Lands.

**DO YOU KNOW THAT UNCLE SAM PRODUCES 80% OF THE WORLD'S SUPPLY OF CORN? DO YOU KNOW THAT YOU CAN BUY GOOD CORN LAND CHEAPER TO-DAY IN SOUTH DAKOTA THAN ANY OTHER CORN PRODUCING STATE IN UNCLE SAM'S DOMAIN?**

**FARMERS! INVESTORS! STOCKMEN.**

Before buying lands investigate South-Eastern South Dakota, where good lands may be obtained at \$8.00 per acre and up, according to location and improvements. We are 175 miles south of the southern boundary line of North Dakota and east of the 99th Meridian W. Longitude, where climatic conditions and rain fall are both favorable to the profitable production of Corn, Red Clover and Small Grains. Our soil is a Black Vegetable Mould 24 to 36 inches deep (Mississippi valley formation), with a clay sub-soil.—Write us today for descriptive literature, crop reports (issued by the State), and big land list.

**320 ACRES—** Fine stock farm, highly improved \$30.00 per acre. This is a bargain. Write for terms. **C. Williamson, Sylvia, Reno Co., Kansas.**

## LIVE STOCK SALES

## Combination Duroc Sale at David City.

The combination sale of Duroc bred sows held at David City, Neb., on February 23d was a very good one. The consignors were Messrs. Henry Bock, Joe Hilger and M. Thima, all of David City. There was a good attendance of farmers and present present, but most of the stuff stayed in that vicinity. Everything was in the best of condition and the best of results is looked for from this great bunch of sows. Below is a list of those selling for \$35 and over:

Lot.	Price.
1. W. H. McGarvey, Ulysses, Neb.	\$53.00
2. W. G. Unitt, Seward, Neb.	40.00
3. J. C. Clase, Octavia, Neb.	41.00
4. S. P. Briggs, Seward, Neb.	45.00
5. H. Sims, David City, Neb.	44.00
6. J. S. Regens, Gibbon, Neb.	38.00
7. W. H. Burkett, David City, Neb.	40.00
8. J. S. Regens	38.00
9. J. E. Rowe, Stockham, Neb.	49.00
10. S. P. Briggs	52.00
23. Fred Blek, David City, Neb.	45.00
24. W. J. Anderson, David City, Neb.	52.00
25. John Harvey, David City, Neb.	41.00
26. W. H. Burkett	44.00
30. B. H. Eiting	40.00
35. V. Hilger	37.00
37. D. H. Eiting, David City, Neb.	39.00
41. Geo. Davis, Milford, Neb.	56.00
42. F. Wallia, Linwood, Neb.	40.00
45. J. E. Trumble, David City, Neb.	41.00
46. Same	41.00
47. J. E. Rowe	50.00
48. S. P. Briggs	50.00
49. Fred Bock, David City, Neb.	57.50
50. Same	45.00
51. Frank Wallia, David City, Neb.	42.00
52. W. E. Ball, David City, Neb.	37.50

## Perfection Chief Stock Co.'s Durocs Sell Well.

The sale of Duroc Jersey bred sows held at Maryville, Mo., on February 25th, by the Perfection Chief Stock Company, of Maryville, Mo., was a success from start to finish. Many breeders stayed over Sunday from the Murphy sale and many new arrivals on Sunday and Monday morning swelled the crowd of visiting breeders to about forty. Farmers in the vicinity of Maryville turned out in goodly numbers and on forty-six head of sows an average of \$76.63 was made. Illinois, Iowa, Missouri, Kansas and Nebraska parties were among the buyers. Mr. R. J. Harding, of Macedonia, Iowa, topped the sale, taking Lot 33a, a sister in blood to W. L. A.'s Choice Goods, at \$340. Colonels Duncan, McGowan and Manifold conducted the sale. Following is a list of all sales over \$30:

Lot.	Price.
1. E. A. Buck, Savannah, Mo.	\$ 60.00
2. H. L. Beam, Hopkins, Mo.	57.50
3. Mr. Rodenbough, Macedonia, Ia.	67.50
4. L. H. Roberts, Paton, Iowa.	335.00
5. M. W. Smalley, Blockton, Iowa.	65.00
6. H. M. Moore, Orient, Iowa.	130.00
7. White & Dewey, Shannon City, Iowa.	160.00
8. Wm. Woodburn, Orrisburg, Mo.	50.00
9. A. B. Gordon, Tarkio, Mo.	40.00
10. White & Dewey	160.00
11. W. A. Rankin, Carson, Iowa.	120.00
12. Jno. M. Morrison, College View, Neb.	115.00
13. H. L. Beam, Hopkins, Mo.	35.00
14. Mr. Johnson, Maryville, Mo.	32.00
15. Mr. Whitten, Hopkins, Mo.	37.00
16.	40.00
17. W. T. Jones, Independence, Mo.	52.50
18. McNeal Bros., Bowen, Ill.	157.50
19. G. W. Trone, Rushville, Ill.	95.00
20. J. B. Bonewith, Maryville, Mo.	39.00
21. Secksmith & Strong, Orient, Ia.	110.00

## A Common-Sense Talk On Manure Spreaders

THERE'S no doubt that the right kind of manure spreader is a good thing for you to have. It is probably true that there is no other farm machine that, if rightly chosen, is as valuable to the farmer. If manure is spread properly and at the right time, its money value far exceeds what you're apt to think.

But when you buy a manure spreader have a care. There are many of them on the market, and many with various "special features"—fancy affairs that do them more harm than good.

When you buy a spreader look out for these things—and avoid them. What is chiefly to be desired is *strength and simplicity of construction*.

Strength is essential because a manure spreader has to carry a heavy load and the rear end—the machine end—has hard work to do.

Simplicity of construction lessens the chance of the machine getting out of order and gives *light draft*. You know there are a good many manure spreaders that don't get out of the shed after the first year. They make too much trouble and cause too much delay.

## I. H. C. Corn King and Cloverleaf Spreaders

are strong and simple. The frame is carefully-selected, well-seasoned lumber, and is strengthened by heavy cross sills and truss rods. They have steel wheels with staggered spokes, and both hind wheels have clutches. The box is made of selected stock and is securely fastened to the frame by heavy steel cleats. Corners are re-enforced with steel plates. Everything is of the very best.

Both of the rear wheels are drivers, and insure plenty of power. A large sprocket with heavy chain drive transmits the power to the cylinder. The cylinder is large and strong, and the square teeth (extra long) are made of the best high carbon steel.

The power for driving the apron is applied on both sides, giving an even movement and making binding impossible. The rollers are attached to the under side of the slats instead of to the frame.

The vibrating rake is a most important feature, and is found only on Corn King and Cloverleaf spreaders. It levels the load and brings the manure squarely up to the cylinder—a thing which is absolutely essential to

proper spreading. The teeth on the vibrating rake are held in place by coiled steel springs so they never break but adjust themselves to the size of the load.

And as a result of simple construction, the operation is simple. Any one who can drive a wagon can operate an I. H. C. spreader, for one lever does it all. There are ten feeds, ranging from ten to thirty loads per acre. The apron stops of its own accord when the load is all fed out. By reversing the lever it returns and again stops when back in position. No need to watch it at all.

These are some of the reasons why you should investigate I. H. C. Corn King and Cloverleaf spreaders before you buy. There are many other good points about them that are explained in our catalogues. There are two kinds—Cloverleaf, an Endless Apron machine, and Corn King, a Return Apron machine; each made in three sizes.

Call on the Local Agent or write for catalogues.

INTERNATIONAL HARVESTER COMPANY OF AMERICA, Chicago, U. S. A.  
(INCORPORATED)

## OUR RED LETTER Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

### THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date ..... 190..

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaker, as per your special offer to Homestead readers.

## A Good Hereford Sale at Kansas City February 27th and 28th.

The sale of Hereford cattle held at the fine stock pavilion at Kansas City, Mo., on February 27th and 28th, under the management of Mr. C. R. Thomas, secretary of the Hereford association, may well be classed among the successful sales. High prices were not paid, but on the whole fair prices were realized. At the opening bidding was slow and an undue amount of conservatism was shown, even though there was fever a better time to get in on good cattle than now. Few, if any, better crowds have been seen at any cattle sale this winter, and from all indications now is the time to buy, as the interest displayed is surely the forerunner of better prices for pure-bred cattle. The cattle were in nice condition and the entire offering might be classed as good. The better lots went freely and at good figures. The top price of the sale was \$550, paid by Mr. F. H. Stannard, of Ottawa, Kan., for the yearling bull, Homeseeker, of Messrs. Gudgeon & Simpson's consignment, Mr. J. E. Summers, of Clifton Hill, Mo., being the contesting bidder. The top on females was \$285, paid by Mr. S. J. Gabbert, of Dearborn, Mo., for Capitola 29th, one of Messrs. Gudgeon & Simpson's consignment. Quite a few lots sold around the \$200 mark. Following is a list of sales of \$100 and over and the summary:

## BULLS.

Monogram, J. A. Carpenter, Carbondale, Mo.	\$100
Homeseeker, F. H. Stannard, Ottawa, Kan.	550
Beau Manson, J. E. Summers, Clifton Hill, Mo.	195
Bright Lad, Jno. Gosling, Kansas City, Mo.	125
Othello, J. E. Rakc, Richland, Kan.	185
Tacitus, C. W. Armour, Kansas City, Mo.	155
Printer 2d, Jno. Gosling	150
Handsome Harry, J. C. Riddell, Rossville, Mo.	130
Protocol 9th, Jno. Gosling	160
Protocol 11th, same	140
Tom, Norman Ochsner & Co., Madison, Neb.	100
Protocol 10th, J. G. Green, Eldorado, Kan.	200
Beau Delaware, Scott & March, Belton, Mo.	200
Dandy Andrew, Noah Willis, Platt City, Mo.	355
Beau Cherry Boy, J. E. Rakc	100
Keep On 61st, W. A. Howard, Comisky, Kan.	135
Hazford Brummel, L. Goodwin, Pleasant Hill, Mo.	155

## FEMALES.

Lady Corrector, A. L. Miller, Platte City, Mo.	170
Bianca, J. A. Carpenter	170
Priscilla 10th, Est. W. W. Guthrie, Atchison, Kan.	250
Pauline, Ed Rice, Vine, Kan.	180
Germania, J. A. Carpenter	155
Dollie Brown, Ed Rice	105
Miss Catherine 6th, S. J. Gabbert, Dearborn, Mo.	270
Bright Lass 18th, Wallace & Ragsdale, Kingsville, Mo.	225
Leola, Est. W. W. Guthrie	165

Buttercup, G. K. Cogswell, Castleton, Kan.	100
Capitola 29th, S. J. Gabbert	285
Dollie 8th, Est. W. W. Guthrie	275
Norma, Ed Rice	120
Bonny Lucy 5th, Est. W. W. Guthrie	175
Blauche 36th, Ed C. Weeks, Eldon, Mo.	225

## SUMMARY.

52 bulls	\$5,875; average	\$112.98
35 females	4,070; average	116.29
87 head	9,945; average	114.31

## Lyndale Poland China Sale.

The sale of Poland China hogs held by Mr. A. F. Graves, of King City, Mo., on February 28th, was well attended by Mr. Graves' neighbors from nearby points. Were it not for the thoughtfulness of Mr. Graves for the comfort of his guests the day would have made selling almost an impossibility, as it rained almost continually from lunch time until well into the night. It was so dark in the tent that the hogs showed to very poor advantage, yet on the entire offering of fifty head an average of \$36.71 was made. Many gilts were bred late and did not bring

their worth. Col. Geo. P. Bellows did the selling and was assisted in the ring by Colonels Klaas and Zaun. Following is a list of all sales:

Lot.	Price.
1. Mr. Burkleser, King City, Mo.	\$42.00
2. Clem Oriel, King City, Mo.	31.00
3.	49.00
4.	50.00
5.	34.00
6. W. N. Pence, King City, Mo.	40.00
7.	30.00
8.	42.00
Sub. S. S. Turner, King City, Mo.	32.50
10.	37.00
11. E. E. Carver, Guilford, Mo.	26.00
12. C. E. Teuan, New Hampton, Mo.	55.00
13.	36.00
14. E. D. Criswell, King City, Mo.	24.00
15. W. W. Oliver, Guilford, Mo.	26.00
16. C. D. Mann, Stanberry, Mo.	28.00
17. W. W. Oliver	17.50
18.	38.00
19. L. F. Wheatly, King City, Mo.	33.00
20.	25.00
21. H. Bertrand, King City, Mo.	31.00
22.	26.00
23. J. A. Stevenson, Mt. Ayr, Iowa.	66.00

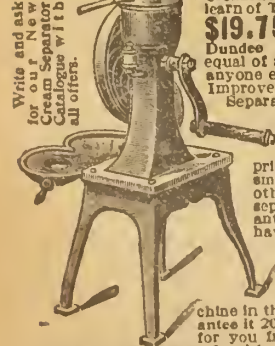

## SEPARATOR FREE

FOR A 75 TWO MONTHS TRIAL

WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have received the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER.

\$19.75 buys our wonderful 1907 model Dundee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dundee is guaranteed the best separator made, regardless of name or price, and is sold at a small part of the price others ask for high grade separators; and we guarantee our Economy to have greater capacity, to skim closer, skim colder milk, run easier and not get out of order; wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you from the day you receive it, and will always furnish you any needed repair or part in this year to come, promptly and on a few days' notice.

PRICES NOW GREATLY REDUCED. OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a postal and say, "Send me your New Cream Separator Catalogue and all your new offers," and our great 1907 cream separator proposition will go to you by return mail, free and postpaid. We have two big cream separators, free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save), at a lower price than you ever thought possible. If you buy from us you get our free Front Shading Certificate and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address: SEARS ROEBUCK & CO., CHICAGO

## J. C. Bailey's Sale.

Everything passed off smoothly at Marshalltown, Iowa, where Mr. J. C. Bailey disposed of a very representative offering of Poland sows and gilts. Prices read very well indeed, especially in view of the fact that only a few head of mature stock was listed. An average of \$49 was secured and from the attached list of buyers it will be seen that a goodly number came from a distance:

Lot.	Buyer	Price.
19	Muckler & Son, Toledo, Iowa	\$60.00
11	W. F. Baker, State Center, Ia.	47.00
9	John G. Sheldon, Eldora, Iowa	40.00
12	W. Garhart, Eldora, Iowa	50.00
10	John W. Walton, Eldora, Iowa	40.00
	F. H. Houghton, Marshalltown, Iowa	41.00

29	John W. Walton, Eldora, Iowa	35.00
21	High Andrews, New Providence, Iowa	36.00

## The Lincoln, Neb., Stallion Sale.

The Watson, Woods Bros. & Kelly Co., well-known importers of draft stallions at Lincoln, Neb., held their sale as announced in our columns for February 26th and 27th. The attendance was large, though many of those who were after stallions hesitated to bid. After about half of the offering was sold the request was made by buyers that the remainder be sold privately. This seemed quite out of the ordinary. However, the desire was generously granted and before the day closed the complete offering was closed out at private sale, every man going home well satisfied with his purchase. The attached list shows the buyers and prices. The merit of the offering was above reproach and the fact was general comment, though many of the buyers desired more time in which to make a bargain than was afforded in the sale ring:

Buyer	Price.
Coureur, Percheron, J. R. Maynes, Henderson, Iowa	\$1,300
Charmant, Percheron, Jacob Ridiger, Jr., Sutton, Neb.	1,400
Gringalet, Percheron, Chas. Williams, Sr., Cedar Bluffs, Neb.	1,600

Raglan II., Shire, Best Bros., Shelby, Iowa	1,230
Michel, Percheron, Mathias Schmitt,	

## CANCER OF THE BREAST CURED

How Mrs. S. J. Mangan's Life was Saved

STERLING, ILL., Nov. 28th, 1906.

DR. L. T. LEACH, Indianapolis, Ind.

Dear Sir:—I am very much pleased over the marvelous cure you have performed on me with your home treatment, CANCEROL. The cancer on my breast all came out in about three months time and healed up nicely without any trouble. I was up and dressed all the time. It is about three months since it healed. I am telling my friends what "CANCEROL" has done for me, and I hope they may have the same faith in it that I have. Thanking you for your kind and generous treatment, I remain,

Yours with a grateful heart,  
SOPHIA J. MANGAN.

CANCEROL has proved its merits in the treatment of cancer. It is not in an experimental stage. Records of undisputed cures of cancer in nearly every part of the body are contained in Dr. Leach's new 100 page book. This book also tells the cause of cancer and instructs in the care of the patient; tells what to do in case of bleeding, pain, odor, etc. A valuable guide in the treatment of any case. A copy of this valuable BOOK FREE TO THOSE INTERESTED.

Address, DR. L. T. LEACH, INDIANAPOLIS, IND.

O.K. Chase  
St. Louis, Mo.

Ingredients were bought and mixed by the painter. Ready-mixed paint settles on the shelves, forming a sediment at the bottom of the can. The chemical action in ready-mixed paint, when standing in oil, eats the life out of the oil. The oil is the very life of all paints.

Paint made by the painter cannot be properly made on account of lack of the heavy mixing machine.

My paint is *unlike* any other paint in the world. It is ready to use, but not ready-mixed.

My paint is made to order after each order is received, packed in hermetically sealed cans with the very day it is made stamped on each can by my factory inspector.

## The Staples Sale.

The Duroc Jersey brood sow sale of Messrs. W. A. Staples & Son, at Glidden, Iowa, on February 25th, brought out a good crowd of farmers and breeders, and an average of \$64 was made. Mr. Lee Hopper, of Neola, Iowa, topped the sale on a Tientsin sow at \$152.50. Colonel Luther cried the sale. Below is a report of same:

Lot.	Buyer	Price.
1.	Roy E. West, Churdan, Iowa	\$130.00
2.	G. E. Everts & Sons, Audubon, Iowa	102.50
3.	Dr. J. A. Downs, Glidden, Iowa	77.50

## The Seckman &amp; Allen Duroc Sale.

Breeders who were present at the brood sow sale of Messrs. Seckman & Allen, at Mt. Sterling, Ill., on February 27th, were given an opportunity to secure some of the best stock offered for sale this year at bargain prices. A large crowd of farmers were present and their support of the sale was certainly a high compliment to the consignors. Mr. J. S. Teale topped the sale, paying \$125 for a daughter of Tip Top Notcher bred to Masterpiece Chief, one of the best sons of Model Chief. Mr. Seckman made one of the best sales of 1906, and while many of the offering were of late farrow and were bred for April and May litters, they would have

## I Am the Paint Man

2 Full Gallons Free to Try—6 Months Time to Pay

I Guarantee Freight Charges.

I ship my thick pigment, which has double strength, freshly ground, in separate cans, and in another can, I ship the pure, old process Linseed Oil—the kind you used to buy years ago. Any child can stir them together.

I sell my paint direct from my factory to user you pay no dealer or middleman profits.

## My \$100.00 Cash Guarantee

I guarantee, under \$100 Cash Forfeit, that the paint I am offering you does not contain water, benzine, whitening, or barytes—and that my Oil is pure, old-fashioned linseed oil and contains absolutely no foreign substance whatever.

I guarantee the freight on six gallons or over. My paint is so good that I make this wonderfully fair test offer:

When you receive your shipment of paint, you can use two full gallons—that will cover 600 square feet of wall—two coats.

If, after you have used that much of my paint, you are not perfectly satisfied with it in

every detail, you can return the remainder of your order and the two gallons will not cost you one penny.

No other paint manufacturer ever made such a liberal offer.

It is because I manufacture the finest paint, put up in the best way, that I can make this offer.

I go even further. I sell all of my paint on six months' time, if desired.

This gives you an opportunity to paint your buildings when they need it, and pay for the paint at your convenience.

Back of my paint stands my Eight-Year officially signed, iron-clad Guarantee.

For further particulars regarding my plan of selling, and complete color card of all colors, send a postal to O. L. Chase, St. Louis, Mo. I will send my paint book—the most complete book of its kind ever published—absolutely free. Also my instruction book entitled "This Little Book Tells How to Paint" and copy of my 8-year guarantee.

O. L. CHASE, The Paint Man.  
Dept. 27 St. Louis, Mo.

#### The Deal-Schweizer-Norton Duroc Sale.

A large local crowd was present at the third annual Duroc sale of Messrs. E. H. Deal & Son, Fred Schweizer and J. G. Norton, all of Elwood, Ill. These gentlemen have all been liberal buyers of best breeders and the tops of the sale should have brought more money. The prices received were not in keeping with the quality and breeding of the stock offered. One feature of the sale which was clearly evident to all those present was the uniform prices received for the entire lot, an average of prac-

#### T. H. Isaac's Duroc Sale.

The Duroc Jersey sale of Mr. T. H. Isaac was held, as advertised, at Red Oak, Iowa, on February 8th. The forty-seven head averaged \$35.52, the top price being \$100, paid by Mr. R. J. Harding, of Macedonia. Prices ran uniformly throughout, not a single individual dropping below the \$25 mark. Among the buyers were: Grant White, Afton; S. W. Swanson, Stanton; G. A. Peterson, Stanton; McClellan & Pfander, Clarinda; W. A. Rankin, Carroll; W. M. Ritchie, Bronson; J. A. Visted, Red Oak; Chas. Barton, Red Oak; Frank Swanson, Red Oak; C. J. Naurte, Red Oak; W. J. Dean, Griswold; John Winn, Red Oak; Henry Ebert, Red Oak; Aug. C. Johnson, Stanton; Louis Edwards, Omaha; L. C. Peterson, Stanton; Edw. Veseen, Red Oak; Wallace Larson, Red Oak; Thos. Stover, Red Oak; Secksmith & Strong, Orient; J. L. Edwards, Red Oak; David Owens, Red Oak; A. C. Mainquist, Red Oak; John Smith, Red Oak; R. E. Gilmore, Red Oak; O. E. Kikendall, Red Oak.

#### Bassett's Poland Sale.

Mr. N. C. Bassett, one of the strong supporters of Poland in central Iowa, made a very successful sale of fifty head of mature sows and gilts at his farm near Farlin, Iowa, February 20th. The top of the sale was \$61, made by Mr. G. M. Vader, of Churdan, Iowa, on No. 8, a sow bred to the great young herd boat, Keep On 2d. Prices ruled steady from start to finish, though some late-bred sows reduced the average somewhat. Col. H. S. Duncan cried the sale and made the following prices to the satisfaction of all concerned:

Lot.	Price.
1. A. P. Fourmaster, Churdan, Ia.	\$42.00
2. G. M. Vader, Churdan, Iowa....	49.00
3. J. Monahan, Churdan, Iowa....	42.00
4. Same .....	41.00
5. S. D. Judy, Jefferson, Iowa....	35.00
6. A. P. Fourmaster .....	32.50

substantial progress than Mr. Marts, this progress being based on two things, namely, the use of the very best blood obtainable, and secondly, the sensible employment of good feed. Full value was received by every man who made a purchase. Messrs. Johnston Bros., of Brooklyn, Iowa, paid the top price of the sale, \$175, for No. 1 in the catalog. Some half dozen individuals were bid above the \$100 mark, but, as will be noticed by an examination of the following list, prices were uniformly good, rather than sensational. The buyers and prices paid were:

Lot.	Price.
1. Johnston Bros., Brooklyn, Iowa..	\$175.00
2. G. W. Gugsly, Sheldahl, Iowa....	120.00
3. John Morrison, Ankeny, Iowa....	105.00

#### White & Dewey Sow Sale.

One of the greatest Duroc Jersey sow sales ever held in southern Iowa was that of Messrs. White & Dewey at their farm near Shannon City, Iowa, on February 20th. The fact that five sows in this sale were bred to the old dead hero, Proud Advance, and a number of his daughters were to be sold, proved an attraction to breeders from several different states. Most of the breeders from the Sheldon Bros. sale the day before held over for this sale, and with the addition of the newcomers, it made a most representative gathering. All the Illinois boys held over from the Sheldon sale and were good hidders and good buyers. Forty head cataloged, sold at an average of

#### Carl Hansen's Sow Sale.

The first annual Duroc Jersey sow sale of Mr. Carl Hansen, at Herman, Neb., was well attended and an average of \$47.60 was made on thirty-seven heads. Considering it was his first sale it was a grand success. The offering was in nice shape and a good crowd was on hand ready to buy. Colonel Bellows was on the block and sold the entire lot in fifty-eight minutes. Below is a report of those selling for \$35 and over:

Lot.	Price.
1. L. Ackerman, Herman, Neb....	\$45.00
2. J. R. Hastings, Arlington, Neb....	42.50
3. H. P. Hansen, Rosalia, Neb....	50.00

#### H. E. Watson's Duroc Sale.

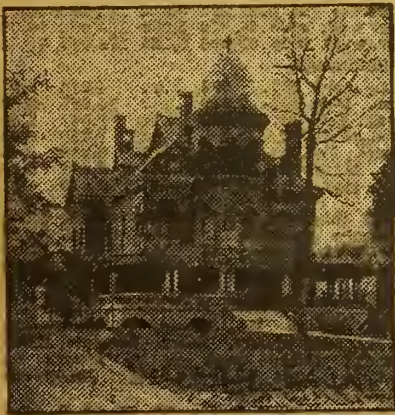

On Saturday, February 23d, Mr. H. E. Watson, of Edinburg, Ind., sold thirty-four head of Duroc Jerseys for the highest average ever made in Indiana, \$90.60. There were no sensational prices paid, but the offering was one of the most uniform the writer has seen this year. Messrs. S. E. Morton & Co., of Camden, Ohio, topped the sale, paying \$300 for a spring gilt by John's Ohio Chief, a good son of Ohio Chief, and bred to High Chief, one of the most noted Duroc boars of the state of Indiana. Mr. Thos. Johnson, of Columbus, Ohio, secured a very good gilt in a daughter of John's Ohio Chief and bred to Col. Scott. Colonel Vinnedge conducted the selling and was ably assisted by Colonel Iglehart. A list of sales follows:

Lot.		Price.
1.	S. R. Quick & Sons, Gosport, Ind.	\$122.50
2.	T. B. Johnson & Son, Mooresville, Ind.	151.00

### Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned In Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

#### Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell you sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5410, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are all day, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

#### SUMMARY.

34 head ... \$3,081.50; average ... \$90.60  
Eight September boar pigs sired by High Chief were sold at bargain prices, considering quality and breeding.

#### The Gleeson Short-horn Sale.

The administrator's sale of the late Patrick Gleeson was held at Oakland, Neb., on February 28th, and it proved one of the good sales of the season. The cattle were only in fair flesh, having been taken up from the pasture. The Queen of Beauty cow, Missouri Queen, a four-year-old, bred to the champion, Choice Goods, topped the sale at \$385 and was purchased by Mr. Edward Gleeson, the sons reserving the right to bid on some of the cattle. The bidding was splendid from start to finish and some good prices were received. The bull demoad was very strong and anything old enough brought \$100 and over. The sixty head averaged \$109.84. Everything considered, it was one of the best sales ever held in Nebraska. Colonel Woods cried the sale and disposed of the entire offering in three hours. Below is a list of those selling for \$100 and over:

Orange Queen 4th, eight years, James Gleeson, Oakland, Neb.	\$170
Riverside Orange Blossom, two years, John Anderson, Oakland, Neb.	140
The Queen, two years, H. P. Galliger, West Point, Neb.	150
Missouri Queen, four years, Ed Gleeson, Oakland, Neb.	385
Florence Knightly, six years, Ben Peek, Blair, Neb.	170
Clover Crest, one year, Ed Gleeson	140
Walnut Grove Craggs, four years, A. C. Gleeson	135
Goodness of Walnut Grove, four years, Robt. Widdle, Genoa, Neb.	100
Goodness of Logan 3d, seven years, same	175
Fern Leaf, three years, John Lofgren, West Point, Neb.	155
Champion of Evergreen Farm, eight years, Robt. Widdle	200
Clara B., twelve years, Andrew Gleeson	130
Walnut Hill Miss Wiley 2d, six years, Martin Hansen, Gordon, Neb.	100
Rustic Lady, two years, Ike Melette, Craig, Neb.	115
Erlene, four years, A. C. Gleeson	125
Jessamine Lass, nine years, H. G. Clark, Craig, Neb.	100
Oxford Grand Duchess 10th, five years, Wm. Keller, West Point, Neb.	110
Wild Eyes Duchess 10th, four years, Ed Gleeson	170
March Queen, two years, H. G. Clark	120
Florella, three years, John Lofgren	105
Scottish Zephyr 2d, six years, Robt. Widdle	225
Myrtle Vine 4th, eight years, James Gleeson	110

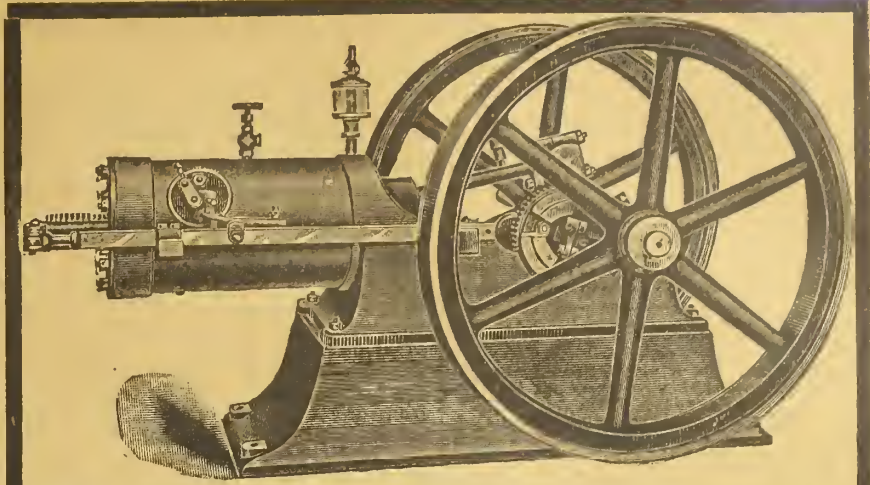

#### BULLS.

Count Waterloo 151016, seven years, Martin Hansen, Gordon, Neb.	175
Clover Lawn Sultan 254376, A. C. Gleeson, Oakland, Neb.	200

Major Carlock 257542, one year, Roy Ullstrom, Memphis, Neb.	140
Indicator 370905, one year, J. N. Nelson, Oakland, Neb.	125

#### Poush's Sow Sale.

The Duroc Jersey sow sale of Mr. A. E. Poush, at Chariton, Iowa, on February 18th, was well attended by both farmers and breeders and everything sold at satisfactory prices. Seven Proud Advance sows cataloged, averaged \$121.25. The top was \$175, for a daughter of Proud Advance bred to Savannah Belle's Chief and she went to Messrs. Fred Kraschel & Son, of Macon, Ill. The entire offering averaged \$67.30. A number of the best Illinois breeders were present and were good bidders. Col. F. F. Luther cried the sale. Below is a report of the same:

Lot.		Price.
1.	O. S. Gilbert, Conrad, Iowa.	\$170.00
2.	W. M. Householder, Chariton, Iowa.	52.50

#### W. J. Crow's Poland Sale.

Mr. W. J. Crow, of Webb, Iowa, a breeder of the big Polands in the northwestern part of the state sold forty-five head of sows and gilts to a very appreciative crowd of local buyers and many from a distance. Mr. William Meeker, of Spencer, Iowa, made the high bid and took number 294 for \$87.50. The lowest price was \$40, so it will be seen that the prices ruled steady indeed. Mr. Crow has the type of hog with a deal of stretch and bone and those looking for a good boar should keep their eyes open for his boar sale announcements next fall. The appended list shows the run of prices, of those selling at \$50 or over:

Lot.		Price.

#### SUMMARY.

45 sows ... \$2,614.00; average ... \$57.10

#### F. M. Erschen's Duroc Sale.

One of the best buyers of Durocs this year was Mr. F. M. Erschen, of Odell, Ill., but the breeders were slow to appreciate his sale held on February 21st. Bargains were secured by those present. Messrs. Deal & Schweizer, of Elwood, Ill., topped the sale, paying \$97.50 for a daughter of Kan't Be Beat, bred to W. & F.'s Col., one of the good sons of C. E.'s Col. Mr. H. E. Browning was the contesting bidder. Colonels Reppert & McGowan conducted the sale in their usual good way and worked hard to secure fair prices for stock offered. An average of \$30 was made on forty head. A partial list of sales follows:

Lot.		Price.
1.	Joe Legner, Odell, Ill.	\$30.00
2.	J. M. & W. T. Gatton, Springfield, Ill.	35.00
6.	Jas. Murphy, Odell, Ill.	27.50

43.	Jas. McCabe, Hersman, Ill.	30.00

#### W. A. Foster's Duroc Jersey Sow Sale.

Mr. W. A. Foster made a record-breaking sale from the standpoint of time, February 15th, at Greenfield, Iowa. In just one hour from the time of starting the sale, Col. H. S. Duncan sold thirty-seven head of Duroc Jersey sows making an average of \$31. A number of late bred stuff reduced the average materially; however, the offering made a good impression and the top price was \$75, paid by Messrs. Sexsmith & Strong, for a Crimson Wonder I Am gilt. The two latter sisters sold for \$50 and \$47.50, respectively:

Lot.		Price.
1	Sexsmith & Strong, Greenfield, Iowa	\$ 75.00
0	C. W. Mathes, Bridgewater, Ia.	50.00
00	E. D. Harris, Fontanelle, Iowa.	47.50
2	C. W. Mathes .....	31.00

36	Same .....	37.00
37	C. W. Mathes .....	49.00

## M. A. McWilliams' Duroc Sale.

On February 22d a very splendid offering of breeding sows and gilts were put through the ring at the Sunnyside Farm. A cold and disagreeable day cut the home attendance down some. However, there was a good gathering of breeders and they were there for business, as a perusal of the list of purchasers will show. A very commendable feature was the absence of any booming. The top price was paid by Mr. J. A. Downs for Sunnyside Beauty. Colonel Lookingbill demonstrated good ability on the block and secured an average that crowded the \$40 mark.

Lot.		Price.
1.	A. M. Justice, Denison, Iowa...	\$46.00
2.	S. O. Larson, Stratford, Iowa...	33.00
3.	John Wilkins, Correctionville, Ia.	40.00

## Sanstead Makes \$51 Average.

The sale of Duroc Jersey bred sows made by Mr. Wm. Sanstead, at Holdrege, Neb., on February 25th, was very successful considering the fact that this was the first sale ever made by this young breeder. A good crowd of breeders and farmers were present and the best stuff in the sale was snapped up at good prices. Messrs. A. A. & Geo. Karschner, of Wilcox, Neb., topped the sale, paying \$325 for a granddaughter of Van's Perfection, that is surely one of the good sows sold this year. Mr. Sanstead has been a buyer of some of the best stuff sold anywhere this year and a bright future is expected for this young breeder in this business. Below is a list of those selling above \$40:

Lot.		Price.
0.	A. A. & Geo. Karschner, Wilcox, Neb.	\$325.00
1.	Hopkins Bros., Atlanta, Neb.	115.00
2.	H. L. Staat, Holdrege, Neb.	65.00
3.	Same .....	52.50
4.	Same .....	67.50
5.	E. C. Gwinner .....	70.00
10.	A. W. Pioreen, Funk, Neb.	42.00

## Revised Version of B. W. Hale's Sale Report.

Our attention is called to the fact that in making up the list of buyers at the Duroc Jersey sale of Mr. B. W. Hale, of Laddonia, Mo., February 14th, we misplaced the honor of topping the sale and should have given it to Dr. J. Jay Boyd, of Reeds, Mo., who paid \$115 for No. 2, a sow sired by the famous Buddy K. IV.

He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

## Something About Breeds.

To the Editor of The Homestead:

In sheep as well as in all other classes of live stock there is found a good many different breeds. These breeds have been developed because of certain peculiar environments found in the home regions of the breeds, each region differing enough from the others to demand a type of animal suited to the local conditions. But while there have been a good many breeds developed, each distinct from the other, we find that mutton breeds can be separated into three general groups, each group being comprised of several breeds. This classification may be made from two different standpoints, the length of wool or the topography of the country which was the original home of the breed. We shall in this article consider only the latter according to which the breeds are classed as Lowland, Highland and Down breeds.

It may be well to state here that practically all the mutton breeds, with one or two exceptions, originated in England. The Lowland breeds include the Lincolns, Liecesters and Cotswolds, while the Down breeds are Shropshires, Hampshires, Suffolks, Oxfords, Southdowns and Dorset Horn, and the Black-faced Highlands and Cheviots represent the Highland breeds. Sometimes the Cheviot is included with the Down breeds rather than the Highland.

Now the importance of knowing something of the origin of a breed and to what class it belongs is that it helps the farmer to choose a breed adapted to his location. The Highland breed is the ruggedest type and will stand more exposure and rustling for feed, as such is the character of their natural environment. The Down breeds are native to the hill countries. In England the hills are called downs, the more rolling tracts as distinguished from the low-lying richer districts. It is in the latter where the greater abundance of feed was found that the larger, long-wooled breeds developed. In general, the Down breeds meet corn-belt conditions better than any other class; but we would advise anyone starting to keep good sheep, especially pure-bred stuff, to become familiar enough with the breed's history to know if it is best suited to his conditions, and also to determine the needs and requirements of that particular breed.

Story county, Iowa.

Ellis Rail.

## The Early Lamb at Birth.

To the Editor of The Homestead:

The critical time in the life of the early lamb is the time immediately following birth up until it gets its first milk. So it is very important that you be about just at this time to see that the lamb passes this crisis successfully. Ordinarily sheep require a minimum amount of care, but eternal watchfulness is the price of raising a good lamb crop. Shelter is necessary for the ewes, for chilling winds are death warrants to the newly born lamb, and these warrants are difficult of reversal. Provide a good warm shed or portion of the barn, from which all cold drafts are effectually stopped, but do not neglect proper ventilation. A shed with a partial opening to the south is very good if entirely tight elsewhere. A good scheme for temporary use is to bank up the sheds on the north and west with straw. A scant framework of old boards set up about the straw will serve to keep it in place.

It is scarcely needful to say that perfectly dry conditions inside the shed are imperative. The ewes should be restricted to the shed at night to prevent any restless one from going outside to lamb. If you will be sure of no loss the ewes should be visited hourly night and day. A longer time may be too late. When a lamb is first dropped it is best to leave it to the ewe's attention for a time. If she licks it clean and it is soon able to rise and find the teat, you may safely leave it; but if the ewe is restless and does not give the lamb her attention, you had best take it in hand soon. Wipe it dry with a brisk motion, using a dry, rough cloth, and then give it to the ewe. It may take lots of patience and much effort

perhaps at first, but if you haven't patience you've little business with sheep. Perseverance will win and save the lamb.

If the mother is unmanageable, take the lamb to some old ewe that is quiet and start the lamb on her. If it is too weak to suck, milk a little down its throat. You may utilize the old cow for the same purpose, though only a small amount of cow's milk should be given as some sheepmen have experienced some trouble in this. The writer has tried it often without any trouble. The main things are to get the lamb dry, get some milk into it soon, and protect it from the cold winds for a few hours. Close and prompt attention will produce the right results.

## The Ewe After Lambing.

To the Editor of The Homestead:

The care of the ewe immediately following parturition, and the few weeks following is of much importance both to the ewe and the lamb. It is much the best method to separate the ewe with a young lamb from the rest of the flock for a time, though with many this is not always practicable. It should be made possible, however, to keep the ewes with lambs apart from those still to lamb. Comfortable shelter from cold and storms, particularly the latter, are of course necessary; but perhaps the feed of the ewe is most important now.

Sheep are ruminants and not naturally accustomed to concentrated feeds, such as grain, while they also have delicate digestive organs. Both the facts need to be remembered in feeding the ewe at this time. First of all, do not change the feed abruptly. If she has been having plenty of clover or alfalfa hay, and corn stover with a little grain, this may be continued right along. After a day or two begin feeding wheat bran, increasing it gradually for a week. By this time the lamb will be old enough to require considerable milk and the ewe may now be brought to full milk flow. Some breeders recommend beginning with chopped corn or barley and a little oil meal mixed with the bran after the first week, increasing the amount fed, gradually, until a pound per day is given. The proportions for mixing are one hundred pounds chopped corn, one hundred pounds bran, and twenty pounds oil meal. This will be a very good ration for farmers who have no oats, though oats may be substituted nicely for at least half the corn. Roots and some corn silage may be fed, too, though silage should not be fed without the grain and good hay. The hay should be clover or alfalfa. Plenty of pure water, together with such grain and roughage, should maintain the ewe nicely and enable her to furnish an abundance of milk for her offspring.

## Cough and Its Causes.

To the Editor of The Homestead:

One of your subscribers writes:

What is the cause of sheep getting a cough, and what must I do to cure them?

There are several ailments of sheep which will cause the animal to cough more or less. These diseases principally affect the breathing organs of the animal—lungs, bronchial tubes, trachea, and pleurisy or inflammation of the pleura is also accompanied by a cough. The most common cause of coughing is probably a mild form of bronchitis, which is an inflammation of the larger bronchial tubes. Stewart describes it as akin to sore throat carried much farther down. It is generally caused by exposure to cold rains after warm weather, or very sudden changes in the weather may cause it. The same things may cause a catarrh or cold in the head which will produce coughing. The sheep should be sufficiently protected from changeable weather and a warm linseed mash fed a few times will be beneficial. Some authorities also recommend a few doses of a mixture of sweet spirits of niter, tincture of aconite, and chlorate of potash fed in a gruel. Sometimes the irritation of the bronchial tubes is caused by parasitic worms known as "Strongylus filaria." In this case it is difficult to eradicate the cough. Liberal feeding, with the addition of condition powder made up of iron sulphate, gentian and common salt, will be the best plan to pursue.

Kansas City, Mo., March 2.—Cattle—Receipts, 600; nominal. Hogs—Receipts, 2,500; 5@7½c lower; top, \$6.95; bulk, \$6.85 to \$6.90. Sheep—Receipts, 200; nominal.

## HAY.

Messrs. Freeman Bros. & Co., commission merchants, of Chicago, Ill., write:

Timothy—Market firm and well maintained, owing to small arrivals. Rain all day prevented much business, but offerings are meager and everything indicates that favorable market awaits the early arrivals. In spite of embargoes considerable hay is filtering through somehow or some way, for were these "embargoes" at right, hay would necessarily sell much higher. Choice and fancy, \$17@18; No. 1, \$16@17; No. 2, \$15@15.50; No. 3, \$13@14.

Prairie—Choice Kansas, Indian Territory, \$13.50@14; No. 1, \$13@13.50; Minnesota, Nebraska, Iowa, \$11@12; Illinois, Indiana, Wisconsin, \$9@10; packing, \$7.50@8.

Straw—Market substantially bare and the little arriving finding quick sale at good prices. Sound, bright straw is wanted and meets a firm and strong market. Choice rye straw, \$9.50; good, \$9; wheat and oat, \$7.50.

## CHEAP RATES TO THE PACIFIC COAST.

Commencing March 1st and continuing until April 30th the Iowa Central Railway will have on sale reduced one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los Angeles and San Francisco are run via Kansas City and the popular Santa Fe System. Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## IN AND AROUND WISCONSIN.

In a sixty-day test just completed under the supervision of the state experiment station a Holstein-Friesian cow owned by W. J. Gillette, has broken the world's butter record by forty pounds. The official test shows 5326.7 pounds of milk and 260.5 pounds of butter. The test was commenced on the fifth day of the lactation period. The best day's yield of milk was 106 pounds and of butter 5.74 pounds.

Chicago's greatest soap maker, James A. Kirk, died last week at his home on Pine Lake near Hartland. This was his country home and it was built at a cost of \$250,000.

Sparks from a steam engine used in operating a feed cutter started a fire that destroyed \$3,500 worth of farm buildings on the farm of Anton Novoy, Kellnersville, Wis.

Two Indians, camping on a branch of the Chippewa near Eau Claire, started out on the war path after having filled up with fire water. They nearly killed a squaw, but were taken into custody before doing any further depredations.

It is rumored that the Western Hay Tool Company, of Ottumwa, Iowa, is to be moved to some Wisconsin city, possibly LaCrosse. The interests of this company have been purchased by the LaCrosse Plow Company and others.

Floods caused by the rising of the river are working havoc in southeastern Minnesota. Hundreds of tons of hay stored on bottom lands have been ruined, and farmers are moving their stock to places of safety. All roads in the valley are inundated and rural mail carriers have ceased to deliver mail.

Minnesota and Wisconsin lumber camps are short on oats for feed. The situation in oats throughout the North and West has not been so strong in years, and it is probable that a large acreage will be put in this spring.

According to official reports filed with the county auditor the last expedition sent out to capture Dietz, "the outlaw of Cameron Dam," in July, 1906, cost the county nearly \$1,500. The sheriff's expenses in traveling and getting the men who accompanied him made up over half of that amount.

It is reported that certain large railway systems passing through the state have decided to abandon improvements in the line of extensions into new territory. Railroad promoters believe that the present high tide of prosperity will not continue much longer, and they think that it is a good time to be prudent in their ventures.

At a recent meeting of the Wisconsin Consumers' League Convention it was commonly stated that Wisconsin is far ahead of other states in the enforce-

ment of its child labor laws and in stamping out the evils of child labor, sweat shops and unsanitary tenement conditions. The need of local pure food committees was especially recommended, as it was contended that the recent scarlet fever epidemic at Chicago was largely due to the infection from Wisconsin milk depots.

Racine farmers and good roads people are seriously agitated over a question of road making. The question under discussion is whether or not the Good Roads association can force the authorities of Mt. Pleasant township to submit to a vote of the electors the question of macadamizing sixteen miles of its highways, at a cost of \$96,000. It is claimed by some that if the town was bonded for the amount it would result in the confiscation of certain farm lands.

The Southeastern Minnesota and Wisconsin Bee Keepers' Association recently held a very interesting meeting at Winona, Minn. A good program was rendered, including an address by President W. K. Bates. The scarcity of the output of honey during the last two years, it is claimed, was due to wet seasons.

A very enthusiastic meeting of Southern Wisconsin Cheese Makers was held at Monroe last week. A number of very stirring addresses were given and the prospects for the cheese factory discussed by different members. President Luchsinger delivered his annual address in which he laid particular stress on the necessity for a good strong association. The session was one of the most largely attended and successful in the history of the association.

"Rural Highways of Wisconsin" is the title of Bulletin 18 just issued by the Wisconsin Geological and Natural History Survey. The treatise deals with the subject of building and maintaining rural roads and is very thorough in every part. Every farmer interested in the road problem may obtain a copy by sending ten cents to the Wisconsin Geological and Natural History Survey, Madison, Wis.

## MEASURING HAY.

The following communication has been received from Mr. George E. Barkdoll, Jr., of Benton county, Iowa:

I notice that one of your subscribers asks for a rule to measure hay. Here is mine: First find the distance from the ground on one side up over the stack to the ground on the other side, then measure the width of the stack at the base. Now add these two numbers together and divide by four, and the result will be the number of square feet in the end. Square this number, or, in other words, multiply the number by itself, and then multiply the result by the length of the whole stack. This gives you your answer in cubic feet, then divide by 512, which is the number of cubic feet in a ton. Where the stack is very high or when it is well packed in a barn, divide in the last instance by 343, because that number of feet will make a ton.

A number of other subscribers have submitted practically the same rule,

COMBINATION  
POLAND CHINA SALE

J. T. Elerbeck and C. A. Lewis will hold a combination sale at the farm of J. T. Elerbeck, two miles south and one-half mile east of

**Beatrice, Neb., Thursday, March 14, '07**

## 30---BRED SOWS AND GILTS---30

From two of the leading herds in the State of Nebraska. We have spared neither time nor money to make this by far the best offering we have ever put before the public.

**GUARANTEE.** All of these sows are guaranteed to be safe in pig and if not so we will rebreed free of charge to either herd boar out of the herd from which it has been purchased.

All hogs sold to be shipped will be crated and delivered to express company free of charge.

**TERMS.** Cash or bankable notes. Entertainment: Breeders will be entertained at the Butler Hotel.

Sale to begin at 1 o'clock p. m. Free lunch at noon. We want you to attend this sale in person if possible. If you cannot attend, send your bids in our care to our auctioneers or newspaper representatives.

## J. T. ELERBECK &amp; C. A. LEWIS

Auctioneers: { COL. WARREN IRVIN, GEO. HILL, PRICE YOUNG,  
COL. JAMES LEARY. Clerk of Sale. Shipping Clerk.

though there is a little difference of opinion as to the number of cubic feet in a ton. A subscriber from Lamoni, Iowa, says that on the average it requires 422 cubic feet to make a ton of hay.

In the case of well settled hay a seven-foot cube—that is, seven feet each way—will make a ton; if it is partly settled, seven and a half feet, and if newly put in the stack or mow it will generally require an eight-foot cube to make a ton, which would be 512 cubic feet.

## The Elerbeck-Lewis Poland Sale.

Special attention is directed to the combination Poland China sale of Mr. J. T. Elerbeck and Mr. C. Lewis, which will be held at the farm of the former, two miles south of Beatrice, Neb., on Thursday, March 14th. On that date thirty bred sows and gilts from these two great herds will be offered. Neither time nor money has been spared in the building up of these herds, and we believe that the occasion is one to attract the attention of Poland breeders throughout the entire corn belt. Every sow in the sale is guaranteed to be safe in pig and if not, she will be rebred free of charge to the herd boar of the herd from which she has come. The two herds represented in this sale have not been built up in a day, but have resulted from years of skillful breeding and feeding. The individuals offered have scale and quality and they have the breeding that is as good as the very best. The sale date is close at hand and catalog should be applied for at once. Bids may be sent to either of the proprietors or to the auctioneers, Colonels Warren Irvin and Jas. Leary, in care of either Mr. Elerbeck or Mr. Lewis.

## The W. W. Wheeler Poland Sale.

The W. W. Wheeler sale of Mastodon Poland Chinas held at Harlan, Iowa, February 27th, attracted breeders from Iowa, Illinois, Missouri, Kansas and Nebraska. In addition to the large number of breeders present, there were 416 mail bids. The sale pavilion at Harlan was taxed to the

limit of its capacity and every man present was there to get some of the Wheeler kind. The top of the sale was \$262.50 and the average on the total number sold was \$92.71. Prof. C. F. Curtiss, of the agricultural college, Ames, Iowa, secured Lot 12 for the college herd. Mr. Wm. Lentz, of Ankeny, Iowa, took the top-priced sow, Corwin's Beauty, a daughter of Empire Chief, while Messrs. Schain & Keep, of Atlantic, Iowa, paid \$250 for Lot 8 and \$180 for Lot 18. Men who believe in the raising of the big Poland Chinas could be heard on every hand to say that Mr. Wheeler's offering was one of the most remarkable, considering the combination of size and quality, that has ever been made in the state. Colonel Duncan did the selling, and his part in this successful event was performed with credit to himself and with great satisfaction to buyers as well as to Mr. Wheeler. The following is a list of the sales made:

Lot.	Price.
1 Countess 250948, Wm. McKeever, Hubbell, Neb. ....	\$115.00

**FIELD NOTES.**  
Mr. E. R. Silliman, of Colo, Iowa, announces a combination sale of Short-horns at the fair grounds at Nevada, Iowa, on April 11th.  
On April 30th Messrs. M. T. Conner, of Auburn, Neb., and S. Cochran, of South Auburn, Neb., will hold a public sale of Short-horn cattle at Auburn.  
A public sale of Aberdeen Angus cattle is announced to take place on April 3d by Messrs. T. A. Stevenson and S. G. Smith, of Shannon City, Iowa.  
Mr. W. A. Forsythe, of Greenwood, Mo., one of Missouri's progressive and reliable breeders of Short-horns, claims May 31st for a sale of Short-horns. The sale is to be held at his farm near Greenwood, Mo.  
The English Shire stallion, Mark 5696, sire Park Hero II., dam Silk and Satin by Marshland Active, is offered for sale by Mr. Fred Galliers, of Albia, Iowa, in an advertisement that appears on this page of The Homestead.  
Messrs. A. M. Avery & Sons, of Mason City, Iowa, are offering Short-horn bulls, bred Duroc Jersey gilts and Reid's Yellow Dent seed corn for sale in their advertisement that appears on page 41 of this issue of The Homestead.  
Mr. John Schmieder, of Remsen, Iowa, is offering some first-class Poland China brood sows, ready to farrow in a short time, for \$30 apiece. They are all right and you can depend on Mr. Schmieder as one of the breeders who will send you a good sow. Write him about these.  
Mr. John T. Graham, of Prairie City, Iowa, is offering the stallion, Sumner G. 32362, for sale in his advertisement on this page of this issue. This horse is a good individual, a sure breeder of good colts and will be sold cheap or will be exchanged for other live stock. For further information write Mr. Graham at the above address.  
Messrs. Rhea Bros., of Arlington, Neb., are offering a grand lot of Percheron stallions and mares for sale and at the most reasonable prices. If any of our readers want stallions or mares it will surely pay them to go and see the boys and their horses. They do their own selling and buying, and consequently can make a price on these that will defy competition.  
Suffolk fillies, and some corking good ones, are offered for sale by Messrs. Peter Hopley & Sons, of Lewis, Iowa. They also have some high-class Percheron, Shire, Belgain and German coach stallions for sale. They will take pleasure in showing you their horses and they will sell you as good bargains as you can get anywhere. They have stallions now in their barns that will weigh considerably over a ton. If you want that kind

pay them a visit and see what they are offering for sale.

Polled Durham bulls are offered for sale by the reliable firm of Messrs. James Wilson & Son, of Avoca, Iowa.

Mr. L. B. Converse, of Maryville, Mo., announces that he will hold a public sale of Short-horn cattle on October 16th. Sale to be held at South Omaha, Neb.

Messrs. L. H. Roberts & Son, of Paton, Iowa, write that they are all closed out of Duroc Jersey boars and sows. Their advertisement appears on page 43 of this issue.

Mr. W. E. Cutler, of Corydon, Iowa, has chosen June 8, 1907, as the date for a Short-horn sale. Mr. Cutler is well known as a breeder in southern Iowa, and we are certain that our readers will await future announcements of his sale with a great deal of pleasure and interest.

Mr. F. A. Kruse, of Waco, Neb., a well-known breeder of Duroc Jersey swine, reports to The Homestead that he is all sold out for this season, but that he wishes us to advise his fellow breeders that he will be with them again this next season with a fine line of Duroc Jerseys.

Mr. M. D. Yard, of Crawfordville, Iowa, in his advertisement that appears on page 43 of this issue, is offering some finely-bred Scotch Short-horn bulls for sale. He writes: "My herd is doing well on ordinary treatment, being fed mostly from the production of southeastern Iowa farms. They are nev-

## HOMESTEAD CARD NEXT THING TO A PUBLIC SALE.

BROUGHT BETTER RESULTS THAN ALL THE OTHER ADVERTISING MEDIUMS PUT TOGETHER.

Messrs. G. W. Way & Son, New Sharon, Iowa, proprietors of Oak Grove Stock Farm, breeders of registered Herefords and also of Chester White hogs, write under date of Feb. 26:

"Enclosed please find check in payment for our advertisement. Please let us know when our contract expires and how much space is left under it, as we do not want to let the advertisement stop. The Homestead has done us more good than all the other papers we have advertised in put together. It is the next thing to a public sale the way the people roll in here in answer to our ad in your paper."

er pampered and always have outdoor exercise and nearly always give good account of themselves in after years in usefulness. The bulls I am offering are a good, useful lot, and I confidently recommend them."

Mr. W. J. S. Taylor, of Homestead, Iowa, has four good Duroc males and five gilts yet for sale. They are out of a granddaughter of old Orion and the sire is a grandson of Orion. They are bred to Prond Advance 2d, a good son of Prond Advance. They will be priced worth the money. See advertisement on page 43.

A number of good Aberdeen Angus bulls are offered for sale by Messrs. R. Wilkinson & Son, of Mitchellville, Iowa, in their advertisement that appears on page 43 of this issue of The Homestead. These bulls are from fashionable families, Queen Mother, Erica and Drumin Lucy. They range in age from six months to two years.

Mr. W. A. Johnston, of Prairie City, Iowa, is offering King William 12782, registered French draft stallion, for sale in his advertisement that appears on this page of this issue of The Homestead. King William was foaled in June, 1899, and now weighs 1,800 pounds. Mr. Johnston also has some Scotch-topped bulls for which he is anxious to find purchasers.

Messrs. J. Z. Schueider & Son, of Letts, Iowa, have ten blocky Short-horn and Polled Durham bulls for sale as per advertisement on page 43 of this issue. These bulls range in age from six to twenty months and are sired by Orange Bud 35864 and Athenian Prince 1773. Messrs. Schneider & Son will make prices right in order to dispose of these animals quickly.

Messrs. McKeever Bros., breeders of Short-horn cattle, of Farley, Iowa, write: "We wish to report the sale of one of our best young bulls to Mr. Thomas Connell, of Farley, Iowa. We sold Mr. Connell a bull three years ago that proved a very satisfactory investment to him and we are confident the young bull we sold him last week will develop into a grand good one. We have seven bulls left, or serviceable age, and at the prices we are asking for them we are sure any man that wants a good bull will buy one from us if he will only come and look them over. Their sire weighs 2,400 pounds and is one of the best Cruickshank bulls to be found anywhere."

Mr. C. F. Shaffer, the old reliable breeder of Poland China hogs and Short-horn cattle, of Wellman, Iowa, writes that his Short-horn cattle and Poland China swine are coming through the winter in fine shape, and young calves are beginning to put in their appearance from such noted bulls as Scotland's Pride and Laurel Knight. Mr. Shaffer at present is offering eight head of young bulls for sale from eight to twelve months old. They are of the low-down, beefy, blocky kind, all deep reds in color. He is also offering a choice bunch of heifers of same ages. In Poland China trade has been brisk, having made sales recently of male pigs to Mr. Will Koenig, Washington, Iowa, and Mr. J. W. Greenwood, of Nixa, Iowa; fall male pigs to Mr. Cris Raub, Wellman, Iowa; Mr. Chas. Rickey, Wellman, Iowa; Mr. J. W. Lomax, Abingdon, Ill.; Mr. C. G. Smith, Victor, Iowa; Mr. Harry Kirschner, Barrington, Ill., and Mr. Phillip Rothenstein, Drakesville, Iowa; two bred gilts to Mr. Albert Von Bergen, of York, Neb., and one bred gilt to Mr. W. R. Smith, of Algonquin, Ill. He has 100 fall pigs bred to six months old, the best lot he ever had. He is selling these pigs at farmers' prices in order to make room for his spring crop of pigs. They have nice, fine black coats of hair, are of good length, heavy bone, broad, wide backs, well hammed down

## TOO LATE TO CLASSIFY.

## SUCCESSFUL WITH BONE SPAIN.

Mr. W. A. Wallace, of New Boston, Mo., writes the Lawrence-Williams Company, of Cleveland, Ohio, under date of Jan. 28, 1905, as follows: "I think that your Gombault's Caustic Balm is the best I ever used. I cured a bone spavin on a mare of mine over a year ago and she has not been lame since, and there is no scar or blemish. I am using it now on a caloused lump. I think it is doing good." See advertisement on page 20.

## A FARMER INVESTIGATES THE FALFURRIAS DISTRICT OF THE GULF COAST COUNTRY—READ HIS REPORT ABOUT IT.

No doubt many of our readers have been watching with interest the articles and advertisements, which have appeared in recent issues regarding the Falfurrias district of the gulf coast country of Texas. The Falfurrias country certainly ought to interest the northern farmer who wishes to better his condition. The facts are, however, that it is very hard for the farmer who has not investigated this wonderful country to believe the statements about the immense profits which are being made by the farmers of the Falfurrias district. Nevertheless these statements are absolutely true, and those who visit the country find it so. Below we reproduce a letter from Mr. C. A. Sarver, of Garland, Wyo., who was sent from Wyoming to investigate the Falfurrias lands for a number of farmers who wished to move to a country where the climate was better and where more money could be made from their land. Mr. Sarver writes as follows: "Garland, Wyo., Feb. 21, 1907. Mr. G. R. Spielhagen, Kansas City, Mo. Dear Sir:—I arrived in Kansas City at 1:30 Sunday morning and left at about 10 o'clock, so as it was Sunday I could not get to see you and was very anxious to get home. I liked the Falfurrias country very much, so much that I am preparing to move to that country as soon as I can. I could not buy land at Falfurrias as close in as I wished, but think there will be good opportunities at some other point in the near future, probably not far from there. I found everything just as represented and have so told my friends here, and have been the means of starting several had cases of Texas fever. How did you get the rate question adjusted from Broken Bow? Did they allow me any rebate, or is it to be \$32.85? I want to know so I can tell the people here just what it will cost them, as it makes rather an expensive trip for some, at best. Your people at Falfurrias surely treated me fine, and I can have nothing but praise for the immigration company. Hoping that I may hear from you soon, I will close with best wishes, C. A. Sarver." In order to still further verify the statements made by the Falfurrias Immigration Company, we give below a list of names of people who have been to Falfurrias, and readers of this paper are at liberty to write them and ask their opinion: Col. W. Scott, Larned, Kan.; J. A. Koch, Knobsnoer, Mo.; I. R. G. Moore, Washington, Mo.; R. E. Keseler, Ilerman, Mo.; Dr. S. R. Jones, Turon, Kan.; W. W. Zimmerman, Chandler, Okla.; Dr. A. A. Sharp, Larned, Kan.; J. B. Frickey, York, Neb.; Chas. O. Cheevers, Burden, Kan. What more is needed to convince anyone that the statements made about Falfurrias are true. In addition to this the Falfurrias Immigration Company have offered \$1,000 forfeit to anyone who will find a false representation in their literature. They must be telling the truth. The advertisement of the Falfurrias Immigration Company will be found in this issue on page 30. Write them at Kansas City, Mo., and ask for their free maps and literature.

## BANNER'S VICTOR FOR SALE.

On page 43 of this week's Homestead will be found the advertisement of Mr. C. R.

## FENCE.

We suggest to our readers before buying their fence they look into the proposition of the Advance Fence Company, 34 Old St., Peoria, Ill., whose advertisement appears on page 30. They set forth some very strong arguments in favor of their make of fence. It certainly seems plausible that a fence made on a process by which the wires are not cut must be stronger and more serviceable than one in which the wires are cut in the process of manufacture. Their offer to ship the fence on thirty days' approval is also of a nature to inspire confidence. It is self-evident that none but a high-grade article could be sold on such a basis. We have known the Advance Fence Company for a long time and can assure our readers that any proposition made by them is made in good faith, and will be carried out religiously. Write them today before you forget it.

## FARMERS' TELEPHONES PROTECTED—A SPECIAL OFFER.

Ashby's "No Risk" lightning arrester protects the telephone. Farmers should write the W. E. Ashby Telephone Cut Out Company, of Chariton, Iowa, for the booklet on protecting telephones from lightning, and a special proposition whereby they can get the famous "No Risk" telephone cut out and lightning arrester, free. The "No Risk" lightning arrester goes on the outside of the house. It is operated from the inside by a rubber button, and a guarantee is made by the Ashby Company warranting the telephone against lightning, if the device is put up and operated according to directions. When desired, as in case of storm, the "No Risk" disconnects the telephone from the line wire, leaving the line wire free and clear—in fact, making it operate better—but the "No Risk" grounds your individual telephone, absolutely barring the lightning on the outside of the building. Thousands of people are using the "No Risk" Telephone Cut Out, and every reader of this paper should write for the booklet and free proposition today. The price of this wonderful device is \$2. See advertisement on page 9.

## A SPECIAL OFFER TO EVERY READER.

The tremendous increase in the price of lumber in the last few years has made shingles entirely out of the question on most farm buildings. In order that every reader of this paper may become familiar with a roofing which is very much better than shingles and is rapidly taking their place, the Barrett Manufacturing Company, who are the largest manufacturers of roofing in the world, have offered to send free a sample of their Amatite Roofing to every reader of this paper. The feature of this roofing is a real mineral surface on top, which not only makes coating and painting unnecessary, but is a splendid fire-retardant. Of course, every farmer will appreciate the fact that by doing away with painting and coating it will save time, money and at the same time will make repairs unnecessary. We suggest that every reader write at once for a free sample and illustrated booklet. Few things are more important to the farmer than a good, tight roof, as a leaky one is an abomination and is apt to cause losses and sickness. The request for sample should be addressed to the Barrett Manufacturing

# MY COMPLETE HERD OF Aberdeen Angus Cows, Heifers & Bulls

Will be sold on my Farm 6 miles north of Grinnell, Iowa, March 15, 1907.

Fifty-five Head in all consisting of excellent individuals of the Mayflower, Waterside Bessie and Boghead Rose families, got by such noted sires as Black Knight of Estell Second, Jack of Cottage Grove Second by Blackbird King, Heir Laddie by Longbranch Heather Lad 4th and also Toledo Innocence.

**46 COWS AND HEIFERS** consisting of fourteen choice yearlings, six two-year-olds and cows mostly ranging from three to six years. A goodly number with calves at foot got by herd bull, Clark Niger 50363. All old enough and not with calves at foot are bred to Lou Dillou R. **NINE BULLS**, including the herd bull and young bulls from nine to eighteen months, and got by Toledo Innocence. Promising youngsters. This offering is in excellent shape. Prospective show stuff, though nothing in heavy flesh. All our stock has been kept growing. There is nothing that need go at a sacrifice on account of its individual merit. Send for catalog and accept our hospitality sale day. Twenty-two grade Percheron mares will be sold at 10 o'clock a. m. Also the first twelve volumes of the Angus herd books.

Cols. Igo, Henss and McIlraith, Auctioneers.

**E. T. RICKARD, PROP.,**

**GRINNELL, IOWA.**

Warren, of Glenwood, Iowa, who offers to sell his splendid two-year-old Short-horn bull, Banner's Victor 242584. This is the roan bull that he showed at the Iowa State Fair last year and won second prize in the Iowa special class. He is a grandson of old Cumberland, is a bull of great substance and we can recommend him to anyone wanting a herd bull. His half-brother won third at the International in 1906. He is a splendid individual and a good bull in every way. Write Mr. Warren, or better yet, go and see the bull.

## FLOUR CITY GAS-ENGINES.

One of the old and reliable companies manufacturing gasoline engines presents its advertisement on page 34 of this issue of The Homestead. This company have advertised a staple line in our columns every season for more than twenty years. The satisfaction which their various engines give is so general as to need little comment. Their catalog for the present season comprises the most useful and economical designs. In the construction of their product only the best material is used and every engine is thoroughly tested before it leaves the factory. A liberal warranty is given to each purchaser and every effort is made to give him the best value for his money. The combustion principle applied in Flour City engines is such that the cost of fuel is much less than that of the average engine. Engines are manufactured in all designs of stationary, portable and traction. If you are contemplating the purchase of anything in the gas engine line we can most highly recommend this line of goods. For catalog and prices write the Kinnard-Haines Company, 824-44 Avenue N., Minneapolis, Minn., and mention The Homestead.

## PUBLIC SALE OF PERCHERON STALLIONS AND POLLED DURHAM BULLS.

On March 14th at Carroll, Neb., will occur the first annual sale of imported and home bred Percheron stallions, made by the firm of Billeter, Burress & Billeter. There will be six imported stallions in the sale from four to six years old and will weigh from 1,850 to 2,100 pounds. One of the best horses in the sale is Perron. He is an imported horse; a coal black, and will weigh over a ton. Here is a stallion that will please anyone wanting a big horse, with plenty of bone, and will make a great stallion. Another good one is a horse called Mazagram. He is a five-year-old and will weigh close to a ton. He is a black in color, and a horse of good style and action. They also sell a dark steel gray called Polo. He is a well turned horse and will please those who are looking for lots of quality. The other three imported horses are on a par with these and are all black in color. They are selling some good yearling stallions, and these are all home bred. Three of these will weigh 1,400 and better and are the making of good horses. Anyone wanting an imported or a home bred Percheron stallion should go to this sale. They are also selling five very choice registered Polled Durham bulls in the sale, from ten to seventeen months old. These bulls are well bred and have been well

cared for, and therefore in good condition. If you want one of these you had better make up your mind to attend the sale. Write for catalog and mention this paper.

## SHROPSHIRE ANNOUNCEMENT.

Messrs. Chandler Bros., of Kellerton, Iowa, who are so well and favorably known to sheep breeders, are making an announcement on page 36 regarding their flock, that should be very good reading for sheep breeders. Past experience has proved to the hundreds of customers who have made purchases from this flock that in it are to be found the best selections in the country. In a recent letter these breeders write: "We now offer a fine lot of big, strong ram and ewe lambs, coming yearlings, and they are the right sort to make money for whoever gets them. Nearly all are sired by champion imported rams weighing around 275 to 300 pounds each. The ewes are good property to found a young flock and the rams will make great sires this fall. We wish to especially call the attention of your readers to the fact that, as is our usual custom, a member of our firm will spend the summer in England and Scotland to select the best Shropshires over there for our customers and ourselves. Your readers know how extra well our last season's importation was liked, and how our sheep were leading winners at the largest state fairs and at the International. The breeding sheep imported also gave extreme satisfaction, and we would be pleased to correspond with all your readers who are trying to improve their flocks. We shall import a large number and the first cost as well as the expense will be the very lowest. It is our aim to give all our customers the best selection and at the lowest possible price, and our success in the past is assurance of our good business principles. We can interest all your readers who are interested in Shropshires and the advancement of the breed in America." Mention The Homestead when you write.

## DISSOLUTION OF THE MORRISON HERD.

The most important Duroc Jersey sale to be held yet this season will be that of Mr. John M. Morrison at College View, Neb., on March 15th. This noted herd is to be dissolved at public sale and will include the half interest in the noted boar, Kan't Be Beat, together with all their brood sows, many of which have been noted prize winners. In laying the foundation for this great herd the senior member of this firm has spared neither time nor money, and has therefore bought the very best that the breed affords. The most of the sows to be sold, and especially many of the best of them will be bred to Kan't Be Beat. Some of these sows will have pigs before sale day, and some will farrow shortly after. The great sow Alix II., bred to Kan't Be Beat for April farrow will be included, and she is today one of the greatest sows of the breed. Her record in the show ring will entitle her to a place in the hearts of the lover of Duroc Jerseys, and the man who buys her will secure one of the greatest sows of the breed. Seven daughters of the great Ohio Chief will be sold in this sale, also the great sows, Van's Lady, first prize yearling sow at the Nebraska State Fair in 1904; Miss Bob, dam of Dan Patch, third

## Joint Breeders' Sale of Scotch and Scotch-Topped Short-horn Cattle

to be held at . .

**Wayne, Neb., Wednesday, March 13, 1907**  
**40 head, 20 Cows and Heifers, 20 Bulls**

from the herds of A. B. Clark and W. M. Lessman.

This offering is the pick of our two herds. The cows are mostly of the *milking* strains and are good individuals. The bulls are a grand lot. Never has a better lot been sold in northern Nebraska. Included will be the great Cruickshank bull, SCOTCH FASHION 135959. He is a son of Imp. King James 120945 and out of a daughter of Imp. Northern Light. If anyone wants a herd bull, here is one that is strictly all right. FAME'S HERO is another good one. He is a son of Imp. Fame 222065 and out of a daughter of Imp. Nonpareil. The bull offering is particularly strong. The offering throughout is a most excellent one. Write at once for catalog. Address,

Cols. Cunningham, Dennis and Walker, Auctioneers.

A. B. Clark, W. M. Lessman, Wayne, Neb.

## THIRD COMBINATION SALE OF

## Short-horn Cattle

**AT UNION, IOWA, ON THURSDAY, MARCH 21ST**

At Mason's heated and seated sale pavilion, at 12:30 P. M. sharp. No postponement on account of weather.

**75 CATTLE** 45 Cows and Heifers, 15 calves, 15 Bulls of serviceable age. Four cows are straight Scotch. Many are fine milkers. All females are bred to Scotch bulls. The bull offering is a good one; three are straight Scotch—reds and roans. No better opportunity to buy good, useful cattle will be found in Iowa this year. Consignors: A. H. Brett, Mason City; Henry Schwarck, Eldora; C. R. Stubbs, Conrad; Jacob Kinzer, Bangor; F. G. Houghton, Albion; Henry Sheller, Eldora; A. P. Mason & Sons, Union; F. T. Clappitt, New Providence. Usual terms. Free lunch at 12 o'clock. Send for catalog.

**A. P. MASON, MGR., - UNION, IOWA.**

Cols. Mason, Graham, Menzie, Houghton, Auctioneers.

W. H. Eno and others will sell Short-horns at Sheffield, Ia., March 20th. You can attend both sales.

prize boar at St. Louis, also the dam of the great sow, Morrison's Peach, that topped the world's record sale of 1906; Ida M., Parnell B., Victor's Banner, and, in fact, everything in their herd. Nothing is reserved. The sale was brought about by the desire of the sons to retire from the breeding business and the public sale was therefore decided upon. It is seldom that such an opportunity is offered like this to buy breeding stock. There are animals in this sale that they have never thought of selling, and were it not for this dissolution of the firm, would never be put up at auction. While we could go on indefinitely about this offering, we would rather that our readers send for a catalog and then go to the sale. If you cannot do that, then send a bid to Mr. M. T. White, Homestead representative, who will be at the sale and will carry out your instructions. When writing, kindly mention this paper.

## McLAUGHLIN'S SCOTCH AND SCOTCH-TOPPED SHORT-HORN SALE.

Short-horn breeders in western Iowa and Nebraska should be and will be interested in the sale of Mr. W. H. McLaughlin, at Shelby, Iowa, on March 18th. He is selling forty head of cattle—twenty-eight heifers and twelve bulls. It is a good offering from end to end. He is selling a lot of good females and he also sells a splendid bunch of bulls. Many of the breeders already know that the great Scotch bull, Baron Kear 3d, heads the McLaughlin herd, and the most of the young things in the sale will be sired by him. Many of the matured cows will also be bred to him, and in either case it will be well for the man that buys. We desire to say to our readers

that he is selling a good lot of cattle. They are not only bred well, but they are good individuals, and another good feature in his sale is that there will not be a non-breeder nor a shy breeder in the sale. The Scotch families represented are the Duchess of Gloster, Nerissa, Jasmine and there are several richly-bred Lavinas in the sale. Besides the Scotch cattle that will be sold, there are also several in the sale that have as many as six and seven Scotch tops. One of these is Violet's Flower, a daughter of Imp. Scottish Pride and she has six imported sires on the top of her pedigree. One of her daughters also goes into the sale and her sire is the noted Mysie bull, Baron Kear 3d. He sells a good three-year-old Duchess of Gloster heifer in the sale and she will be right at her calving at sale time. Nerissa 18th of Maine Valley will be one of the most richly-bred Scotch cows in the sale and she will also have a good heifer in the sale. There will be several daughters of Baron Kear 3d in the sale, and breeders all know that they are good because he has the reputation for siring good things. The Scotch-topped tribes that will be sold are all good individuals. Mr. McLaughlin is also selling twelve young bulls, one of which is a straight Scotch bull of the Duchess of Gloster family. He was a year old in November, was sired by Baron Kear 3d and is out of a daughter of Imp. King James. He is a roan in color, a good individual and his pedigree is beyond question. The rest of the bulls are sired by Baron Kear 3d, Gloster Bud, Baron Victor, Gloster's Choice and Lord Avon. Breeders will find a good offering of Short-horn cattle in the W. H. McLaughlin sale. Write for catalog and kindly mention The Homestead.

## AT AUCTION

AT SOUTH OMAHA, NEBRASKA, MARCH 12 AND 13, 1907

65 COWS---38 BULLS---FOUNDATION STOCK AND HERD HEADERS

All the leading families are represented such as Blackbirds, Queen Mothers, Prides, Heather Blooms, Ericas, Abbesses, Barbaras, Coquettes and others equally as good. They are choice selections from the herds of Parrish & Miller, Hudson, Kan.; Oliver Hammers, Malvern, Iowa; Wheatley & Ward, King City, Mo.; C. D. Hooker & Son, Maryville, Mo.; Davis Bros., Maryville, Mo.; N. M. Pettit, Overton, Neb.; R. L. Milton, Stafford, Kan.; Robinson & Chappell, Maryville, Mo.; J. H. Mayne, Council Bluffs, Iowa. Another such an opportunity to buy Aberdeen Angus show and breeding cattle will not be offered soon. There are first and second prizewinners and sires and dams of prizewinners in the offering. Write today for catalog of this, the greatest sale of the season in the West. Address,

**HAL. T. HOOKER, MGR., . . . MARYVILLE, MISSOURI.**

COLS. WOODS, IGO AND HARDING, AUCTIONEERS.

### Iams' Stallions.

Frank Iams writes: "Mr. Farmer Horseman: 'Make good' every statement, have 'the goods' as advertised, sell imported stallions on 'honor' and save stallion buyers \$1,000 to \$1,500 on a stallion and sell them a first-class imported stallion of big size, quality and finish at \$1,000 or \$1,500 (few higher), guaranteed better than any fourth-rate stallion sold by 'gold brick' peddlers at \$3,000 to \$5,000, or you get the \$500 hung up. That's what Frank Iams, of St. Paul, Neb., does. He is the importer of stallions behind the gun that is 'boosting' his business selling 'top notchers' at 'let live prices,' saving stallion buyers thousands of dollars by saving them the middlemen's profits, and all commissions. His 'Peaches and Cream' stallions are so good that they sell themselves, they are the salesmen. It's 'dollars to doughnuts' that Iams talks less and sells more stallions than any ten men in the United States. He is an easy salesman, an expert horseman, a successful business man of twenty-five years' experience at St. Paul, Neb. He has rubbed up against the importing business and knows the 'tricks' that are practiced on the farmers. It is by 'keen judgment.' His 'square dealing,' his characteristic advertising, his independent stand against the 'giant stallion trust' and having the best stallions that can be bought in Europe. A visit to Iams' town of barns filled to the 'roof' with the big ton 'black boys' is an eye opener worth going 2,000 miles to see. They are the best bunch of 'big-boned' 'top notchers' imported in twenty-five years. All of Iams' famous prize winners in the United States and Europe are in his barns and must be sold. He has 'lifted the lid' again and is knocking 'high prices' on stallions off the 'Xmas tree.' It is 'bargain day' at Iams' stallion barns; all your folks will take off their hats and say, 'Iams has the goods' as advertised. Iams wants your business, that's why he advertises. 'He will put your hair in a curl' with swell ton stallions and save you \$1,000 or \$1,500 and a better stallion, then you can wear the diamonds, not the 'peddler' or 'auction blockman.' You say, 'Why can Iams sell better stallions at half the price of others?' Iams buys and sells every stallion himself at his home barns. He buys stallions by 'special train load,' eighty to 150 at a time. He speaks the languages, saving you 20 per cent. He is not in the 'stallion trust,' saving you \$300. He pays no 'slick salesman' \$1,000 to sell you a fourth-rate stallion. He has two to ten men as partners to share profits. He pays spot cash for his stallions, owns his farms, houses, barns, stocks and stallions. He sells stallions by 'hot advertising.' One thousand dollars to \$1,500 insurance placed by Iams on stallions. The illustration on page 21 is Iams' Bismuth (51863), black Percheron stallion, winner of second prize at Iowa State Fair, 1905, and second prize at Illinois State Fair, 1906, and took a \$10,000 horse to defeat him. He is a smooth-finished drafter of big size, big clean bone. A sensational 'Peaches and Cream' stallion that don't need any booster or 'hammer thrower' to sell him. He is a 'Kansas cyclone' in action. You will keep 'a shovin' and a pushin'' until you own him when you see him at Iams'. Iams has on his 'selling clothes,' they fit all buyers. No man that will 'talk business' and will pay cash or give bankable note gets away from Iams. Write for Iams' 1907 horse catalog with 100 illustrations, an eye opener that will save you thousands of dollars."

### Absorbine at West Oak Farm.

Absorbine is a pleasant remedy to use; does not blister or remove the hair, and horse can be used during treatment. You will find it as Mr. Hoel says—a little better than we say it is: "W. F. Young, P. D. F. Dear Sir:—About four months ago I had a driver badly affected with what proved to be a very bad case of 'tendonitis.' My veterinary applied blisters, but to no avail. One day, while reading 'The Farmer' my attention was attracted to your advertisement. I ordered a bottle of Absorbine immediately from my druggist. I used that bottle according to directions, and to my surprise, after three days use the swelling was coming down nicely, and after two weeks' treatment the horse was perfectly well. I have been using him ever since. And that was not all. About the same time I was

badly affected with rheumatism. I used the Absorbine with equally good results upon myself. Absorbine is everything that it is claimed to be and a little more. It should be in the barn of every horse owner, and I must say I cannot testify too highly to its merits. Yours very truly, S. C. Hoel, proprietor West Oak Farm, Christine, S. D., Dec. 8, 1905." Two dollars per bottle from your druggist or sent direct upon receipt of price. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass.

### Closing Out Sale Aberdeen Angus Cattle.

One of the important dispersion sales of Aberdeen Angus cattle that will be held this season will be that of Messrs. White Bros., at Perry, Iowa, on March 19th. Included in this sale will be all of their breeding cows, representing Trojan Ericas, K. Prides, Queen Mothers, Lavenders, Blackbirds, Isabellas and other good families, together with their descendants. There will also be four imported cows in the sale, one a Trojan Erica, a K. Pride and two Lavenders. Their splendid Pride bull, Prince of Pilsen, a son of the well-known Blackbird bull, Cranewood Black Knight, will also be sold and he is not only bred in the purple, but he is one of the very best breeding bulls in the state. He is the sire of a string of heifers and young bulls in the sale that will show breeders present on that occasion just what kind of a breeding bull he is. This herd was founded some fifteen years ago by Messrs. White Bros., and they drew upon some of the very best herds in this country for foundation stock. A change in the firm has now brought about this sale and everything will be sold. The imported cows are Imp. Kate 2d of Tullyally, a K. Pride of the Pride of Aberdeen family and her descendants; Imp. Entoria of the Dell, a richly-bred Trojan Erica and her descendants, and Imp. Lavender 11th of Tullyally, a royally-bred Lavender, noted for their great show records in both Scotland and Ireland, and her descendants. Besides these will be a number of Prides, Queen Mothers, Ericas, Isabellas, Waterside Bessies, Georgians and other standard sorts. No. 2 of catalog is Blackbird Eclipse of Glen Lea, a daughter of Imp. Leander of Dalmeny and a well-bred Blackbird cow. Her dam is Blackbird Eclipse by the noted Moon Eclipse and she is safe in calf to the Pride bull, Prince of Pilsen. She will have a two-year-old and an eleven-months-old heifer in the sale. One of these will be a daughter of the celebrated bull, Bamboo, a son of old Heather Lad 4th by old Jim Iams, and she is one of the most richly-bred Blackbird heifers in the sale. The Lavenders that go into this sale will be found a splendid lot and as there are not very many of them on this side of the water they should be appreciated by breeders present on that day. Eleanor of Maple Grove is a yearling Erica heifer and is one of the nice young things in the sale. She is a daughter of Woodlawn of Maple Grove by old Lord Woodlawn, and her dam is Imp. Eleanor of Braevil. She is a double bred Erica and one of the plums of the sale. Home Dale Queenan is a four-year-old Queen Mother and a daughter of Black King of Woodlawn, a sire of an international champion and also the sire of many other noted winners. She is one of the best producing cows in the herd and one of her yearling bulls will also be sold in the sale. There are quite a number of Waterside Bessies and some of the very best individuals that will be offered will belong to this family. Besides these will be some Georgians, Isabellas and other families. There will be thirteen head of bulls in the sale, including the herd bull, Prince of Pilsen. Among the young bulls will be a Queen Mother, a Lavender, a K. Pride, an Erica and others of the Georgiana, Isabella and Waterside Bessie families. It is a good offering throughout and Angus breeders who are looking for some good and well-bred cattle need not hesitate in going to this sale. Their catalog is now ready for distribution. Write for it and kindly mention this paper.

### Billeter, Burris & Billeter Sell Choice Percherons.

At Carroll, Neb., March 14th, the above breeding firm, an old and reliable one in the horse business in Nebraska, have chosen to put up all the stallions they own and

## W. H. McLAUGHLIN'S SHORT-HORN SALE

Scotch and Scotch Topped

Shelby, Iowa, March 18, 1907

40 HEAD

28 COWS AND HEIFERS, :: :: 12 YOUNG BULLS

There will be 8 Scotch cows in this sale and one good young Scotch bull, of the Duchess of Gloster, Nerissa, Jasmine and Lavina tribes.

**Baron Kear 3d, 158073**

Dark red, calved February 15, 1900.

Banner Pro. 124047.....Cookson Bros.  
Mysie 52 ..... Imp. Prince President 77023.....A. Cruickshank  
Mysie 47th ..... Imp. Goldstick 86748.....A. Cruickshank  
Mysie 45th ..... Imp. Earl of Aberdeen 45992.....A. Cruickshank  
Mysie 43d ..... Crown Prince of Athelstane 2d 16585 David Christie  
Imp. Mysie 36..... Scotland's Pride 25100.....A. Cruickshank

This splendid Cruickshank bull is the sire of most of the young stuff in the sale and is also bred to most of the older cows.

I am selling one of the best drafts of cattle that has ever gone under the hammer in Shelby county. I am putting in some of my best Scotch cows and I also sell twelve good young bulls. One of these is a pure Scotch sired by Baron Kear 3d and he is a herd header. The other bulls will have four and five Scotch tops on them and are a splendid lot. The Baron Kear 3d heifers are bred to the Scotch bull Nonpareil Courtier 3d 238981. There will not be a cow in this sale that is not strictly all right in every way. No shy breeders nor barren cows will be sold. That kind I sell on market. Write for catalog. Address.

Col. BELLOWS, Auctioneer

## W. H. McLaughlin, Shelby, Ia.

Shelby, Iowa, is forty miles east of Omaha on the C., R. I. & P. Ry. Parties coming to sale can stop at Tennant, Iowa, on C. G. W. Ry. My farm is 1½ miles from Tennant.

without reserve. The offering of stallions is guaranteed to be exactly as represented and will consist of both imported and home-bred individuals. Nothing is above six years of age, while in weight, substance and quality the bunch will be up to the highest expectations. In color the horses are black and dark grays, and by reference to the advertisement on page 46 it will be seen that some very good weights are recorded. This sale will, no doubt, supply an excellent opportunity for Nebraska farmers to get something choice at their own price and right at their own door. The five Polled Durham bulls will offer a nice side attraction, as they are of the right age to be developed into good herd bulls. Write for a catalog of this sale if interested in Percheron stallions or Polled Durham bulls. Kindly mention The Homestead.

### Taylor & Jones' Horses.

Messrs. Taylor & Jones, of Williamsville, Ill., write: "Our new importation, together with many of our American-bred stallions now coming from our pastures which have

sell them under the auctioneer's hammer become old enough for service, give our patrons a lot to select from that will be pleasing to them. Our business continues very good and we report the following sales of stallions during the past week: Messrs. Bird, Ellis & Co., of Broadwell, Ill., an extra good American-bred Percheron; Mr. John H. Bryson, of Buffalo Hart, Ill., selected an American-bred Percheron that was full of quality; Mr. R. L. Kirk, of Ina, Ill., got an imported Shire stallion, while Messrs. Van Meter Bros., of Sherman, Ill., got one of our best-bred American Percherons; Mr. Jas. Graham, of Fancy Prairie, Ill., who has been raising good horses all his life, with his sons, selected a good American-bred Percheron; Mr. Orville Current, of Baldwin, Iowa, chose an imported Shire stallion that will please the people where he goes; Mr. John Hersberger, of Arthur, Ill., got an American-bred Percheron, and Mr. W. W. Jarrett, of New Berlin, Ill., got an imported Shire stallion, and Mr. Wm. Hinman, of Springfield, Ill., got a Percheron. Our sales have been better than ever before, making it necessary to get a new importation for our spring trade." See advertisement on page 47.

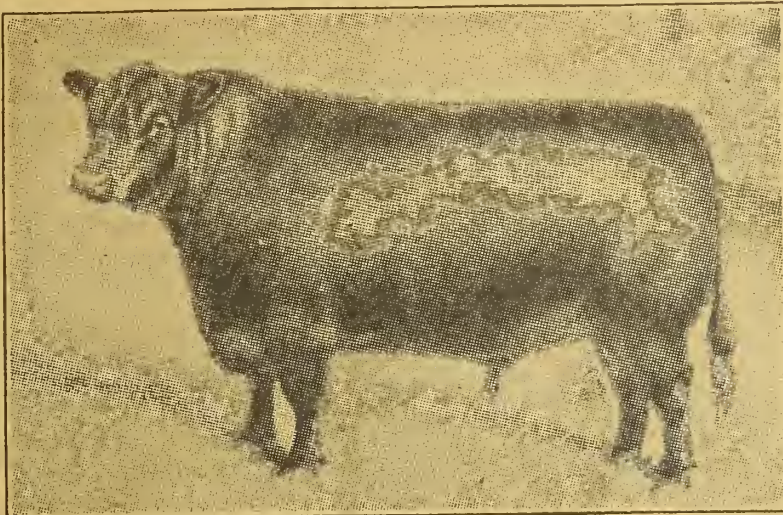

**CLOSING  
OUT  
SALE**

# Aberdeen-Angus Cattle

PERRY, IOWA, TUESDAY, MARCH 19, 1907

**61 Head, 48 Cows and Heifers and 13 Bulls 61**

4 K. Prides  
3 Blackbirds  
2 Queen Mothers  
4 Lavenders  
1 Imp. Pride heifer  
2 Imp. Lavenders  
1 Imp. Trojan Erica

There will be 13 bulls in the sale including our splendid pride bull **PRINCE OF PILSEN** 59249, also a good **TROJAN ERICA**, **K. PRIDE**, a **QUEEN MOTHER** and a **LAVENDER**. All good enough to head herds, besides several others.

PRINCE OF PILSEN 59249.

Owing to a dissolution of the firm we have decided to close out our entire herd. When laying the foundation for this herd we purchased the very best that money would buy, and drew upon the best herds in this country. Now everything will be sold including our splendid K. Pride herd bull, **PRINCE OF PILSEN**, all our breeding cows, young heifers and young bulls. The best families known to the breed are included, and it is one of the best offerings of Aberdeen Angus cattle that will be sold this year. There will be a lot of good young bulls in the sale of the very best families.

**COLONEL IGO, Auctioneer.**

**WHITE BROS., Perry, Iowa**

WRITE AT ONCE FOR CATALOG.

## Whittington-Harris Poland Sale March 13th.

By this time most Poland China breeders are undoubtedly well informed regarding the forthcoming sale of Messrs. B. P. Whittington, of Earlham, and J. C. Harris, of Panora, who have decided to hold their sales jointly and at Redfield, Iowa, March 13th. The offering will number fifty head of high-grade **Tecumseh** and **Perfection** bred sows and gilts. Originally it was the intention of the former breeder to hold his sale alone, but since this idea has been abandoned he has reserved more for his own use, and his thirty-five head, along with the fifteen put in by Mr. Harris, should certainly bring out something worthy of good hids. The offering, especially the young stuff, is sired by **Dietrich's Darkness 91453**, a grandson of **Chief Perfection 2d**, and also by **Young Tecumseh 3d 94101** by **Chief Tec. 3d 38233**. Among the bunch will be some splendid yearlings in fine shape to produce strong litters, probably two of them this season. The bunch has been bred to **Longfellow Jr. 121403**, sired by the noted **Tec. Longfellow**. This is just the kind of breeding that so many are looking for, and it is a dependable kind for money making. Recently Mr. Whittington purchased **Osborn's Perf. 2d** at the Fox sale. This sire has great stretch and bone, as those acquainted with his breeding will know. A few of the gilts will be bred to this hog and they will undoubtedly be prizes. Catalogs regarding this sale may be obtained by writing either of the above consignors. Come out to the sale, even if it is a little late. You will be assured of good treatment by the boys. Remember the **Geo. Vader** sale at Churdan, March 12th, the **Short-horn** sale at Jefferson, March 14th, and the **Jackson-Patrick Poland** sale at the same place the day following.

## Lakewood Percherons at Public Auction.

Percherons from the **Lakewood Farm**, owned by Mr. H. G. McMillan, of Rock Rapids, Iowa, will sell at Sioux City, Iowa, Wednesday, March 20th. Our readers of horse news and announcements are too well acquainted with this establishment to need any further introduction than to say that everything that will be sold in this sale will be of high standard. Anyone who will look up the record of this establishment, either in the show ring or sale ring, will need no further proof of the high merit of whatever comes from **Lakewood Farm**. The offering which will be sold at Sioux City will number seventy head of registered **Percheron** stallions, mares and fillies. The sale last December, made by this establishment at Sioux City, failed to supply all of the buyers and this is partly the reason why the present offering is being made. Twenty-five head of the offering are choice stallions, including all that had been reserved for sale at private treaty. Among them are some of the state fair and International winners. The mares and fillies in the sale had been reserved for home breeding, but to make the sale especially attractive a good collection of females were added to the offering. For further particulars see the advertisement on page 46 and send for a catalog and if you are in the market for something good, attend this sale.

ment on page 46 and send for a catalog and if you are in the market for something good, attend this sale.

## Davidson's Crimson Wonders.

**Duroc Jersey** breeders who are always on the lookout for the good things will be interested in a few good gilts sired by the sweepstakes boar, **Crimson Wonder 1 Am**, owned by Mr. U. G. Davidson, of Manson, Iowa. He has about ten of these sows now on hand and all of them are bred to the young boar, **American Lad**, a son of **Iowa Wonder**. Two of these gilts were farrowed April 13th and are out of a sow called **She's a Blossom**. One of these was bred December 13th and she is a good one. This gilt is very fancy in head and ear, is well developed for her age and is good in her lines. A litter sister of hers, just as fancy, but a trifle smaller, is another one of the best he is offering. One of the largest gilts that Mr. Davidson is offering for sale is out of **May Blossom**, and she is a good one. This gilt has plenty of size and is as smooth as she can be. The only thing about this gilt is she is just a trifle straight in the ear, and yet is not bad. She is the making of a splendid brood sow. Mr. Davidson is only asking \$50 each for these three gilts. For the others he asks from \$35 to \$50. He has about ten of these left and anyone wanting a **Crimson Wonder** sow had better write him at once. The old boar is in excellent condition and holds his own first rate. **Iowa Wonder**, the boar Mr. Davidson showed last year at Des Moines, is rounding out into good form and he is the sire of some good sows now in the herd. The dam of the sweepstakes boar, **Crimson Wonder Again**, is due to farrow shortly to **Crimson Wonder 1 Am**, and also the dam of **Crimson Wonder 2d**, the third-prize **Iowa State Fair** boar, is heavy with pig by the same boar. There isn't any other herd that carries more smoothness than will be found in the **Davidson** herd, and there has always been a good outcome to the sows and boars he sends out. Mr. H. S. Allen got first and sweepstakes Mr. August Voge got third prize on boars at the **Iowa State Fair** from this herd, and sows from this herd have sold well in many of the big sales of the winter. If any of our readers want a sow sired by this old sweepstakes boar they will have to order one at once, as they will not last very long. Send your order today and be sure to get one of these gilts.

## Billeter, Burress & Billeter Sell Percherons At Carroll, Neb., March 14th.

Sixty miles west of Sioux City, Iowa, at Carroll, Neb., the above firm will sell from their breeding and importing establishment a very choice bunch of imported and home-bred **Percheron** stallions. Half the number are imported and range in age from four to six years, while in weight they are standard, as a glance at the advertisement on page 46 will show. The American-bred stallions are younger and include three yearlings, two two-year-olds and one five-year-old. Every horse goes without reserve. Here is your

chance, Nebraska breeders and farmers, to get some of the reliable breed that produces drafters to sell for long prices. There will also be five young **Polled Durham** bulls on sale and they promise to make good herd headers. Post yourself on this sale. It may contain just what you are looking for. Send for catalog, kindly mentioning **The Homestead**.

## A Live Auctioneer.

It gives us a great deal of pleasure to be able to introduce to our readers one of the live auctioneers of Iowa, Col. C. E. Luther, of Grand Junction, Iowa. It is hardly fair to limit the popularity of this auctioneer to the state, for he cries very successful sales in adjoining states as well. However, the demand for his services in Iowa has been so great that it indicates a popularity with the boys that is certainly enviable. Colonel Luther has made a very strong record the past season, as you may learn by asking any one of his numerous customers throughout the rich states of Iowa, Nebraska, Illinois, and adjoining territory. Anyone who is familiar with sale reports will find some very choice averages credited to the work of this auctioneer. Whether on the stand or in the ring, he is right there with the goods every time. Dates are now being booked for sales this fall and next spring, and we would advise any of those who are expecting to need the services of a good auctioneer to write or wire your inquiry to C. E. Luther, Grand Junction, Iowa. On page 44 appears his card.

## Last Call for E. T. Rickard's Angus Dispersion.

This is the last chance which we will have to call our readers' attention to the sale of the above breeder on his farm, six miles north of Grinnell, Iowa, on Friday, March 15, 1907. Mr. Rickard is about to leave the farm and engage in other business. While his home trade has always been very appreciative he feels that there is a good part of the herd that will be in demand among breeders, and in this opinion he has been supported by those who have looked over his herd. Since Mr. Martin Rickard founded the herd in 1882 with the best blood he could find among the **Mayflower**, **Waterside Bessie** and **Roghead Rose** families, the collection has been steadily improved. Along with generous feeding the herd has come to be one in which good fleshing qualities are to be seen in every member. The foundation stock of later years can safely stand on its own merit. Buyers will be able to see on sale day just what improvement has been made from year to year. The cows have been money makers, as regular producers of the kind of stock they have produced would naturally be. Among the heifers will be some splendid individuals of the low-down, blocky, thick type. Nine promising young bulls complete the offering. Mr. J. L. Burroughs consigns several head of cows to the sale. At 10 o'clock in the forenoon there

will be twenty-two head of grade **Percheron** mares sold. There will also be on sale the first twelve volumes of the **Aberdeen Angus** herd books. Write for catalog of this sale. This is not an every-day opportunity. See further particulars in the advertisement on page 39.

## Short-horn Cattle Sale at Union, Iowa, March 21st.

A combination sale of **Short-horn** cattle will be held at Union, Iowa, March 21st. Seventy-five head of cows, heifers, calves and bulls will be sold. The sales at Union have always been very successful and the consignors always sell every animal cataloged without any protection whatever. Among the cows are many fine milkers. Many have calves at foot and reared. There are twenty head of choice two-year-old heifers in the offering, all reds, very uniform, and possess much quality. They are **Scotch topped** and bred to **Scotch bulls**. There are also a few **Scotch cows** with plenty of breeding and individuality. The bull offering is first class in every particular. Three good **Scotch bulls** are listed, one **Bates** and the rest **Scotch topped**. You can surely find what you want in this sale. Union is on the Iowa Central railway, eighteen miles north of Marshalltown, seventy miles south of Mason City and four miles south of Gifford. Write to Mr. A. P. Mason, manager, Union, Iowa, for catalogs and plan to attend the sale.

## Ray & Son's Poland China Sale.

One of the last chances to secure **Poland China** brood sows this season will be at the public sale of Messrs. Ray & Son, at Defiance, Iowa, on March 12th. Their offering is rich in the blood of some of the most noted winners and they are offering a good lot of sows. These are bred to **Dude's Wonder 42564**, a son of **Nemo L's Dude**; **Impudence 3d 42565**, a son of the great sweepstakes boar, **Impudence**, and he is one of his best sons, and to **Perfection L. & W. 42566**, a son of the great show and breeding boar, **L. & W.** The sows that go into this sale will be bred to these three splendid boars, every one of which is a son of a noted prize winner. They are selling a fall boar in this sale, a son of the great **Meddler**, and he will make a good herd boar. The sows are the pick of the herd and there are some good ones in the sale. Every one carries her guarantee with her and it is going to be the last chance this season to get sows at public sale. Messrs. Ray & Son also sell two **Hereford** bulls and four cows and heifers. Send for their catalog at once and mention **The Homestead**.

## A Correction.

In our report of the B. W. Hale sale of **Durocs**, held at Mr. Hale's farm near Shelby, Mo., on February 4th, we credited the sale of Lot 2 to Mr. J. J. Boyd, of Reeds, Mo., at \$110, when the price was \$115, the top of the sale. It is not our intention to misrepresent or knowingly give credit except where credit belongs, but the writer, like the great majority, is liable to make mistakes.

### Last Call for the Omaha Angus Sale, March 12th and 13th.

Followers of the Aberdeen Angus will find few better opportunities to buy both show and breeding cattle than will be offered at the sale to be held under the management of Mr. Hal T. Hooker, of Maryville, Mo., at South Omaha, Neb., on next Tuesday and Wednesday, March 12th and 13th. Sixty-five cows and thirty-eight bulls, choice representative animals from a number of the best herds of the breed, will be sold. From the herd of Messrs. Parrish & Miller, of Hudson, Kan., there will be twenty-eight head, twenty-three females and five bulls. Several of the cows in their offering have calves at foot by their great breeding bull, Hale Lad. Several are in calf to Best Blood by the champion, Barbara McHenry 13th, and Japan Ito by the great Prince Ito. Their bulls all trace close to Gay Lad, sire of Hale Lad and Hale Lad 2d, some being by each of these bulls. Mr. Oliver Hammers, of Malvern, Iowa, contributes sixteen head, eight bulls and eight females. Heading the list of bulls from Mr. Hammers' herd is Imp. Quintus of Maple Grove, a Queen Mother bull topped out with the best Erica blood. His calves are said to be good, even flesh carriers, well balanced, with good heads, short necks and thick, deep bodies. Four sons of Quintus of Maple Grove are in the sale, also two sons and a grand son of Imp. Plummer, a Pride bull said to be one of the best breeding bulls imported in recent years. Six of the eight cows consigned by Mr. Hammers are by Plummer. Those who know Mr. Hammers know that he consigns only such stock as will do the purchaser good. The consignment of eleven head from the herd of Messrs. Davis Bros., of Maryville, Mo., are all young things of the best of breeding and of good individual merit. Five bulls and six cows complete their consignment. They will have some herd bull material in the offering that will bear inspection. Messrs. C. D. Hooker & Son, of Maryville, Mo., sell three bulls and thirteen females. Among the bulls is their great show and breeding bull, Blackbird Benton, a bull that any Angus breeder might feel proud to own. Blackbird Benton has many winnings to his credit. He will have in the sale a fourteen-months-old son and a daughter or two. One of these, Noregay Maid 3d, was a member of Messrs. Hooker & Son's 1906 show herd that took second at the state and interstate shows. A son of Eraste, Messrs. Hooker & Son's senior herd bull, should please someone hunting a good, useful fellow. They are selling a number of desirable breeding cows all in calf to either Blackbird Benton or Eraste. Messrs. Wheatley & Ward, of King City, Mo., also consign ten bulls and four young cows. Five of the bulls are Queen Mothers. All are useful fellows, well grown and will give good account of themselves wherever they go. The four young cows are in calf to Gardner's Pearl Rosegay. Messrs. Robinson & Chapple, of Maryville, Mo., contribute five head, a Queen Mother bull got by the Pride bull, Paragon of Alta, a grandson of Heather Lad of Emerson 2d. Someone will get a choicely-bred fellow and a good bull here. The four females contributed by Messrs. Robinson & Chapple are young and useful breeding cows. Three are by Black King of Woodlawn, probably the most intensely-bred Blackbird bull living. All are in calf to their herd bull, Black Pedro, a bull of which too much cannot be said. He was got by the great Prince Ito, that sold for \$9,000. His dam, Blackbird of Woodlawn 6th, was got by the great Moon Eclipsor, he by Blackbird 4th, and out of a daughter of Blackbird 2d. Cows in calf to this great bull are bargains at most any price, as Black Pedro has few if any superiors either as an individual or from a pedigree standpoint. Mr. R. L. Milton, of Stafford, Kan., and Mr. N. M. Pettit, of Overton, Neb., each contribute six head, all said to be good, useful cattle, nicely bred. Mr. J. H. Mayne, of Council Bluffs, Iowa, consigns three head. For catalogs of this sale address Mr. Hal T. Hooker, Maryville, Mo., mentioning The Homestead.

### The Wayne Short-horn Sale.

On Wednesday, March 13th, at Wayne, Neb., there will be a joint breeders' sale of Short-horn cattle from the herds of Messrs. W. M. Lessman and A. B. Clark, two of the very best breeders in the northeastern part of the state. They are selling forty head in the sale and twenty head of these are bulls, including the well-known Scotch bull, Scotch Fashion. Both Mr. Clark and Mr. Lessman have selected some of their very best cattle for this sale. Among the bull offering will be found the Scotch bull, Scotch Fashion 125959, a son of Imp. King James and out of Fashion's Light by Imp. Northern Light. He is one of the most richly-bred Cruickshank bulls today in the state of Nebraska. This bull has been used at the head of the Lessman herd for several years and has done excellent service. He now sells him because he retains so many of his helpers. Anyone wanting a good Scotch bull should go and see Scotch Fashion. Among the females that Mr. Lessman will sell is Rosemary of Maple Lodge, a daughter of the Scotch bull, Victor Chief. She has a heifer calf in the sale by Clipper Chief, a richly-bred Scotch bull that formerly headed the herd of Mr. Harry Hart, and she is bred again to Scotch Fashion. This cow is a good breeder and a great milker and one of the best individuals in the sale. Jessie Goldust is another good milker that he sells. She is also a good individual and will have a good bull calf at foot. Rose is another one of his good milkers and will have a calf at foot soon after the sale. She is a good breeder and has a splendid strawberry roan heifer in this offering. Frolic 15th is one of those popular Frantics that made the Robins herd famous. Fancy Fashion by Scotch Fashion is one of her daughters and is an outstanding heifer in this sale. This heifer weighed 500 pounds at five months old without the aid of a nurse cow. Her like has not been sold in Nebraska this year. Daisy Fashion is another good daughter of hers by the same bull. She is out of the same cow as the Sioux City first-prize heifer that Mr. Lessman won on at the Interstate Fair. He is keeping a full sister to her in his herd. Most of the young bulls that go into the sale will belong to Mr. Clark. One of the best of these and one of the best bulls in the sale will be Fame's Heir. He is a yearling son of Imp. Fame and his dam is

a daughter of Imp. Nonpareil. He is a Scotch-topped Young Mary, and the man who is looking for a good young bull to head his herd will find this fellow to be strictly all right. Mr. Clark also sells several bulls sired by Scotch Cup, Lord Bauff 4th and Gwendoline Lad. These are a good lot of bulls, are well developed, good in color and the most of them are ready to go right out and do good service. We want to call attention to the milking strains of this particular offering. There never was offered a better lot of good milking Short-horns in Nebraska than will be sold in this sale. Those who want either cows or helpers or bulls, either to head herds or to go out on the range, will find them in this sale. Write either of the above breeders for catalog and then be sure that you go to the sale.

### Last Call for the Steele Short-horn Sale.

In our last two issues we called our readers' attention to the forthcoming Short-horn sale of Mr. C. S. Steele, of Ireton, Iowa, on Tuesday and Wednesday, March 12th and 13th, and we want to repeat what we have heretofore said, that it will be one of the best sales that will be held in northwestern Iowa this year. He will sell 112 head and forty of these will be Scotch cattle. There will be three good imported cows in the sale. Two of these will have calf at foot by the noted show and breeding bull, Ceremonious Archer, and the other will have calf at foot by Lord Banff 3d, the bull that is now doing so much to bring the Steele herd to the front. Of the forty head of Scotch cattle that he will offer will be found some of the most richly-bred Duchesses of Glosters, Mysies, Orange Blossoms, Butterflies, Victorias and other Scotch tribes. These will be bred to the two bulls mentioned above and also to Sittytown Fame, the bull that formerly headed the C. S. Barclay herd at West Liberty, Iowa, and Gwendoline Lad, a son of Imp. Lavender Lad. The latter bull was formerly used at the head of the N. A. Lind herd and did excellent service in his herd. Several of the best cows in the sale will be bred to him. We desire to call attention to the great string of Scotch and Scotch-topped heifers that go into this sale. A large percent of these are sired by Lord Banff 3d and they are an unusually good bunch in every way. There will be about twenty-five bulls in the sale and there will be a liberal number of Scotch bulls among these. We consider this offering the best that Mr. Steele has ever sold from his herd. He is offering an unusually large number of Scotch cattle, as well as a great array of Scotch-topped sorts. He has issued a most excellent catalog which every Short-horn breeder should have. Write for it at once and mention The Homestead.

### Trumans' Announcement to Stallion Buyers.

The Truman Pioneer Stud Farm, of Bushnell, Ill., is making an announcement in the columns of this paper that should receive the careful attention of every stallion buyer. This establishment have always been known to have on hand at all times as choice a bunch of stallions of all the draft and heavy harness breeds as buyers will find. At the present time there are upwards of 100 head of first-class representatives of the different breeds. Great pains are being made for the coming season and Messrs. Truman are preparing to show their old and new customers some prices that will sell horses as fast as they can be brought out. Buyers need have no fear that the sale at Kansas City, March 27th, will in any way interfere with the trade at Bushnell. We are informed that all those that are to be sold in the sale have already left the barns in Illinois. The class of three-year stallions and older that are now on sale are certainly worth going to see if you are after a good type of draft stallion. Three-year-olds that weigh over a ton are big ones to say the least, but that is what you will see at Bushnell, Ill. Now is the time to buy before the numbers are reduced. If you are interested in buying a draft stallion you should get in communication with this firm. Write for the catalog to Trumans' Pioneer Stud Farm, Bushnell, Ill. Kindly refer to their announcement on page 47 and mention this paper when you write.

### Last Call for the Lone Retreat Jack and Jennet Sale.

On page 44 of this issue will be found the last announcement of the sale of the Lone Retreat Jacks and Jennets. Our readers who are interested in good Jacks know that Lone Retreat Stock Farm was owned by the late J. C. Ray, of Lawson, Mo., who was killed in January of this year, hence the sale. The entire stud was never in better shape than at the time of Mr. Ray's death, and under the management of Mr. C. F. Chamberlain everything has been well cared for and buyers will find there as clean a lot of stock as they wish to see. There is a whole string of big, black Jacks, any one of which is good enough to go into any community. Mr. Ray always had a fine string of Jennets and these will go at the buyer's price, as Mrs. Ray, the administratrix of Mr. Ray's estate, wishes to close out the entire business. There are also some high-class stallions to be sold, one a saddle-bred stallion, one Wilkes-bred trotter and two Percherons. A better place to buy will not soon be found. See the last announcement and arrange to be on hand sale day if wanting high-class stock that must be sold.

### Andrew County, Missouri, Short-horn Breeders' Sale.

On April 12th at Savannah, Mo., the Short-horn breeders of Andrew County, Missouri, will sell fifty head of Short-horns. Mr. H. R. Coffey, of Savannah, Mo., one of the younger breeders of Andrew county, will manage the sale. Other consignors are Messrs. J. H. Beattie, Rosendale, Mo.; P. W. Hishor, Rosendale, Mo.; Andrew Johns, Rosendale, Mo.; Sanford Johns, Rea, Mo.; Chas. Sweet, Filmore, Mo., and J. W. Zimmerman, Savannah, Mo. Each consignor is selling cattle of merit and animals that they think will do the purchasers good. Bull buyers will find a good string of bulls here. Watch these columns for future announcements.

## Dissolution of Partnership and Removal Sale.

March 15, 1907 at College View, Neb.

This offering of Duroc Jerseys is without a parallel in one auction for these ten reasons:

First, this breeding stock broke the world's record sow sale of 1906, averaging \$135.40.

Second, these sows again broke the world's record in fall or boar sale, averaging \$95.50.

Third, this herd again broke the world's record of 1907, averaging \$228.

Fourth, this herd produced the highest-priced pig of age from Alix II., October 16, 1906, sale.

Fifth, Alix II., acknowledged out-classer of the show yard, having the distinction of being the only sow taking first and sweepstakes at both Iowa and Nebraska in one year.

Sixth, Miss Bob, acknowledged one of the greatest brood sows of the breed.

Seventh, the greatest string of sensational prize-winning and producing brood sows and out-standing gilts in one herd.

Eighth, the greatest sire, living or dead, having fifty-seven firsts and sweepstakes prizes, and whose get have already won eighty-one firsts, champion, grand champion and sweepstakes prizes, while Kan't Be Beat's get have either topped, or sows bred to him topped the following 1907 sales: John M. Morrison & Sons, College View, Neb.; Arch Brown & Son, Waterloo, Neb.; Peek & Putnam, Tecumseh, Neb.; Grant Chapin, Green, Kan.; Kirkpatrick & Wilson, Lincoln, Neb.; Pagan, Browning & McCabe, Hersman, Ill.; Watt & Foust, Cedarvale and Xenia, Ohio; all these sales together averaging through Kan't Be Beat's value as a sire, \$113.14, while the average of the top sows directly effected was \$565.

Ninth, the only Proud Advance, Orion and Ohio Chief sows bred to Kan't Be Beat this year are from this herd.

Tenth, this one sale includes tops of more other sales than any one offering, as one-half interest in the great Kan't Be Beat and the following sows to be sold absolutely for what they will bring: Alix II., Miss Bob, Van's Lady, Ida M., Parnell B., Victor's Banner, Foust's Pride, seven Ohio Chief gilts and other topsy gilts reserved for this farm, bred to Kan't Be Beat, Morrison's Bell Top and Ohio Chief Banner.

Free entertainment at Royal Hotel, Lincoln, Neb., one of the best hotels in the West. Send for catalog.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH &amp; SON.

Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 6 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

H. LEFEBURE'S  
BELGIANS.

Best and largest collection of Belgians in America, imported and home bred; 8 mi. west of Cedar Rapids on 2 railroads. The greatest Belgian horse market in America. Cedar Rapids and Iowa City elec. car passes 3 mi. E. of farm every hour. Come and see or send for catalog. H. Lefebure, Fairfax, Ia.

### AT PUBLIC AUCTION

**SIoux CITY, IOWA, WEDNESDAY, MARCH 20TH**

**70 Registered, Stallions, Mares and Fillies**

**OLANTHE**, Champion mare at Iowa and Minnesota state fairs, and the Chicago International, 1906.

FOR the reason that many of our former customers were unable to fully supply their wants at our December sale, we have decided to hold a March sale. We will offer at this time 25 head of choice stallions, including all we had reserved for sale at private treaty, among them some of our State Fair and International winners; also 45 of our best mares and fillies. Many of these mares and fillies we had intended for our own breeding, but have decided to catalog them, as we want to make this sale unusually attractive. Most of the mares are bred to the world famous CALYPSO and the Champion OLBEIT. Send for catalog.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man of the neighborhood), whose influence is obtained by a large commission paid to him by the seller placing the stallion. The long-time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500 which has to be paid to this influential neighbor or neighbors to sell you a horse.

Good American-bred stallions, \$800 to \$1,000. First-class imported stallions, \$1,200 to \$1,600. Choicest stallions a little higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barn and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

Send for illustrated catalog and calendar.

### OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individually given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with an unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

**OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.**

## FIRST ANNUAL SALE Percheron Stallions

**Carroll, Wayne Co., Neb.**

**March 14, 1907**

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs was the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE;" "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 102 Percherons, Belgians and Coachers 102

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." ALL REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES;" they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

KEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holier." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. REFERENCES: St. Paul State Bank and Citizen's National Bank.

## ST. PAUL, - NEBRASKA

## TAYLOR & JONES,

IMPORTERS AND BREEDERS OF  
PERCHERON, SHIRE, HACKNEY AND  
BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

Importer and Breeder of

## PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (36577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

## PETERSON'S BLACK PERCHERONS.

FOR \$200 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot.

H. E. PETERSON,

LYONS, NEBRASKA

# Let Me Send You a "KNODIG" Pitless Scale on 30 Days Trial.

H. C. GUMBEL

The man who stands back of the  
"KNODIG" PITLESS SCALE.

## My New Direct-From-Factory Selling Plan

### Saves You All Jobber's and Dealer's Profits

No Deposit—No Notes to Sign—No Obligations of Any Kind

### You Have Nothing to Pay Until Satisfied

The Only Scale  
Guaranteed by  
the Maker  
for 10  
Years

**T**HIS is a real free trial offer I make you. You can test the "KNODIG" in your own way on your own premises before you pay me one penny. It isn't one of those sham "free offers," where you pay first and then take your chances on getting your money back, if the article you buy is not satisfactory.

No, sir! I mean just what I say. My "KNODIG" Pitless Scale, with the Protected Bearings, is the best scale ever put on the market. I know all about it because I make the "Knodig," and I know it is good enough to put out on a genuine free basis.

I will send a set to you or any other honest man on 30 days' trial. You have nothing to pay me, no notes to sign, nothing to do but make a fair test of the "KNODIG," entirely at my risk. If it fails to satisfy you, return it at my expense, and I will pay freight both ways.

You can't afford to buy one of those inaccurate, cheaply constructed Pitless Scales which will do poor work and get out of whack in a month or two,—nor a high-priced, old style Pit Scale which runs up big repair bills and cannot be moved about on your place.

What you need is a KNODIG PITLESS SCALE which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run, because it lasts a lifetime. The "KNODIG" costs you from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee.

As a matter of fact, you positively can't afford to buy any scale until you have seen my big, illustrated catalog showing the new models A and B "KNODIG" PITLESS with Protected Bearings. They are the only scales ready for instant use when you want them. No ice nor snow to cut away from the bearings in winter—no dirt nor dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "KNODIG" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest wholesale factory prices. Cost about half the price of a Pit Scale and have no expensive pit with rotting timbers, rusting parts and big repair bills.

The KNODIG PITLESS can be removed anywhere on your land, wherever the work happens to be. It is personal property. Should

you sell your farm, the "KNODIG," unlike the Pit Scale, does not go with the land. Absolutely accurate because tested according to U. S. Standard of Weights. The U. S. Government has selected the "KNODIG" for use in the Kansas City Postoffice. Also in use exclusively at the U. S. Experiment Station, North Platte, Neb.

Here's how I save you money on scales of high quality. Other scales, including the high-priced pit scales, are sold through Jobbers, Dealers, Agents and Salesmen, who all take their profits out of the scale by the time it reaches you, the user. My new Direct-from-Factory Selling Plan now saves you all these middlemen's profits, because I have cut out absolutely everyone who stands between you and me in the sale. You now pay only one small profit on the "KNODIG" over and above the actual cost of labor and materials in producing it.

No other scale in the world is sold this way. If you question this statement, just write to any scale manufacturer and see how quickly he will turn you over to some agent or dealer. But why should you pay MORE for the privilege of buying scales through a third party? That isn't good common sense,—is it?

Does it make the scales you buy any better to pay this extra profit? Is there a single reason why you should NOT deal directly with the factory? You buy Stoves, Incubators, Organs, Buggies and a hundred other things that way, and save money by doing it. Then, why not—Scales?

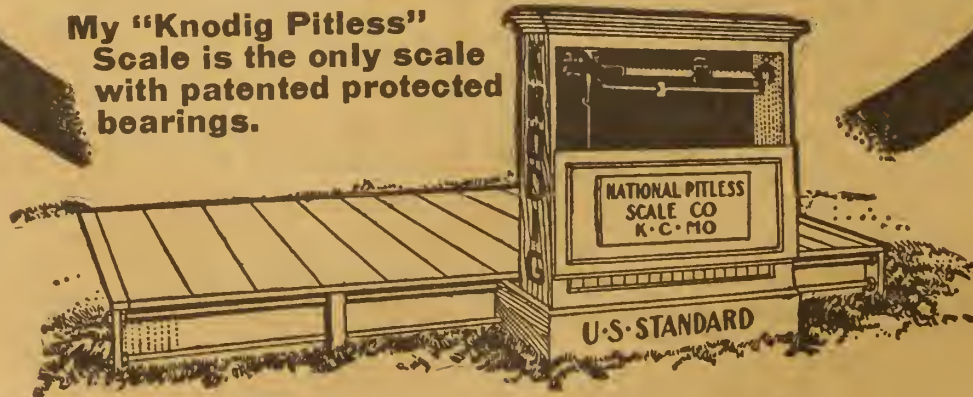

In adopting this policy of direct selling, I realize that I am making many powerful enemies for the "Knodig" Scale. For I am antagonizing every scale jobber, mail-order concern, dealer, agent and salesman in the country, who will naturally, in self-defense, talk against the "KNODIG" and in favor of the scale that gives them, instead of you, the extra profit.

So, you see, I must rely solely upon you, the man who pays for and uses the scale, and I ask you to decide for yourself where your REAL interest as a scale buyer lies—whether with the scale that comes to you burdened with a "rake-off" for the middlemen or the "KNODIG," which you can now buy direct at a saving of one-third to one-half? Just sit down and think the matter over carefully before you decide. Figure it out for yourself, before giving up any of your good money for anybody's scale. Consult your own interest. Consider your own pocket-book, that's all I ask you to do, Friend.

Am I right about it?

This  
Scale  
is Used  
and Ap-  
proved by  
the U. S. Gov-  
ernment, which  
proves that it must  
be right.

My "Knodig Pitless"  
Scale is the only scale  
with patented protected  
bearings.

At the  
Royal  
American  
Live Stock Show,  
Kansas City,  
"Knodig" was se-  
lected as the offi-  
cial scale.

### Send for My Big Free Scale Book

The "KNODIG" must satisfy you, or no sale, remember! No buying a "pig in a poke" when you deal with me. You try BEFORE you buy my scale. The new "KNODIG" Scale Catalog gives full details of my wonderfully liberal Free Trial Plan and Guarantee. You ought to see this book whether you expect to buy a scale now or not. It contains over forty fine pictures illustrating scenes from farm life and is chock-full of sound scale sense from cover to cover. Cost me a big lot of money to get up, but I'll be glad to send you a copy—FREE—if you say so. Just address me personally, and write today, before the books are all gone, for I want you to have one.

#### SOME HINTS ON PUBLIC SALES.

The following communication has been received from one of our subscribers, Mr. F. G. Miner, of Hancock county, Ill.:

Since disposing of their surplus stock and crops at auction has become a common practice among farmers and breeders, a few timely observations will surely be in order. The writer has had the privilege of attending a number of auctions of various kinds and has observed a number of ways of conducting sales.

We all like to make good sales of our own, and ought to enjoy equally as well seeing our neighbors doing as well or better than we do. So many times we hear one commenting on someone's sales and how low the animals sold. Many times this is due to the management. We remember one sale during the short-grass season of 1906 where the stock sold very low. This, we believe, was due to the owner's brother, who bought quite heavily. It so turned out that the brother paid for nearly all he bought.

At another sale a farmer put up a mare that he said was ten years old. The buyer after purchasing began to make inquiry and learned that she was twenty years old. The buyer had a sale about a year later in the same neighborhood, and to the surprise and satisfaction of all he told the whole story and then added that her true age was twenty. The former seller was compelled to hear the story in this public way, much to his discomfort.

Farmers are not alone in this. Noted breeders come in for their share of condemnation. A few years ago we knew of a breeder who heralded in big letters the merits of his cattle. We attended, but, we are pleased to say, did not invest. Some of our friends spent \$500 for cows that never bred after their new owners bought them, and others were very slow breeders. This the owner certainly knew. Recently we attended a pure-bred sale. Some of the animals were dragging along and a member of the family who was acting as clerk commenced bidding. Some of the animals were sold to him. He neglected (?) to keep any account, and before the sale was over some of the same animals were brought in for the auctioneer to sell again.

These are only a few of the sales we have attended and we are pleased to say that not all are thus conducted. We have attended sales that gave everyone as square a deal as could be given. This we admire and is as it should be. We like to buy at auction when it is properly conducted, because we know we are getting honest treatment. In selling, of course, tell all the points of superior merit, then if there is anything that would detract from the value, tell that as well. Your friends and neighbors are at your sale by your invitation, to help you get the value from your stock, so why not give them the treatment that is due them by giving a "square deal" to all?

Men who have had no experience in holding public sales can profit by the few hints thrown out by Mr. Miner. Take the matter of by-bidding. When it becomes known in a sale crowd that this is going on men almost shut up like a clam, and no man who ever expects to hold a second sale should resort to it under any circumstances. We have known cases where men have practically put themselves out of business, insofar as being able to sell by public auction, on account of getting up their reputation for by-bidding methods.

When it comes to the matter of guaranteeing any article or any animal sold, no man can afford to be anything but square. This applies as well to the ordinary farm sale as to pure-bred offerings. To establish a reputation for absolute honesty is to create an asset of large value.

The auction ring will always be an important factor in selling pure-bred live stock, and if one will but build up a reputation for honesty it is possibly the best medium for the man who is what might be called an extensive breeder. Some of the most profitable sales held annually are those of men who have from the first made a practice of standing behind, with a genuine guaranty, everything sold. A study of the methods employed by these men

indicates that while occasionally a "crook" takes advantage of their liberality in guarantees, yet in the main they find it good business to be liberal in a guaranty of blooded stock. There are plenty of men who would pay half more for an animal when they know for a certainty that it is just exactly what it is represented to be.

#### SHOULD CORN STALKS BE BURNED?

The following communication has been received from an Iowa subscriber, Mr. P. P. Nissen:

I have a field of very heavy corn stalks that has not been pastured and I would like to ask if these stalks should be raked up and burned, or would it be better to disk the land, thereby cutting up the stalks, it being my intention to sow barley and also seed down to grass? Would the better preparation of the seed bed which would naturally result if the stalks were removed more than offset the value of the stalks to the soil?

While we are not in favor of a soil-robbing policy, at the same time the fact cannot be lost sight of that men are more interested in the next crop they are to raise on a given field than they are in succeeding crops. If, for example, there is any plan by which we can obtain a yield of forty or fifty bushels of barley per acre without reference to what effect the crop will have on the land, that is the method that most of us are anxious to use.

Corn stalks do not furnish very valuable humus-making material and, considering the fact that unpastured stalks offer a good deal of opposition to the working of farm machinery in the spring, we believe that the better plan is to break them off some frosty morning, rake them up when they are dry and fire them while they are in the windrow. You can then go after your soil with your disks and harrows and prepare an ideal seed bed. On the other hand, we have seen instances where even after disking a soil four times when the stalks were on the surface there were

little patches here and there that were never touched. As a result seed is not covered uniformly under these conditions, and, naturally, one cannot expect a perfect stand of grain, nor can he expect the grain to come on uniformly.

Although by recommending the burning of stalks we realize that this means the waste of a certain amount of fertility, yet our belief is that one can so much more effectively restore fertility to the land by rotating with legumes than by attempting to bring it up with old corn stalks that the better policy is to handle land in such a way as to obtain the largest possible yield.

By removing stalks from the surface and then disking twice before sowing the grain, and, if possible, giving the surface a single or double disking afterwards, there is no reason why, under average climatic conditions, that a forty, forty-five or fifty bushel crop of barley cannot be grown.

It is especially desirable that the surface be freed from stalks when it is the intention to seed down to clover and timothy. If the stalks are removed, the work done by the implements in the spring will prepare a much more ideal seed bed for the grasses, while this plan will make your first hay crop much cleaner. If a heavy coating of old stalks remain on the surface, a goodly percentage of these will rake up with the hay so that one has to perform the labor of taking them off along with the hay and at the same time obtain no benefit from them whatever.

Both in preparing land for small grain and corn we have adopted the policy of burning the stalks in every instance, and believe that it pays well to do it.

#### MIXING BARLEY WITH WINTER WHEAT.

The following inquiry has been received from a subscriber, Mr. L. R. Sherman:

I have a field of winter wheat that shows

rather a poor stand at the present time. Now, I have wondered if it would not be practicable to sow a little barley early this spring, so as to thicken it up and therefore get more out of the land this year.

We have never known an instance where this experiment was tried out, but, knowing the habits of both crops, we are of the opinion that it would not be advisable to sow the barley.

In the very necessity of the case the winter wheat would have such a start on the barley that it would practically intercept its growth, and even though it should not affect the growth of the barley in bare places, the two crops would in all probability not mature at the same time so that one crop or the other would be at least partially lost at harvest time.

It will be fortunate if under circumstances of this kind it is convenient to sow timothy and clover with the wheat. If the surface is well harrowed in the spring after sowing the seed, the chances are that an excellent stand will result because a light growth of winter wheat will not choke out the young plants.

#### WILFUL MISTAKES IN THE JUDGING RING.

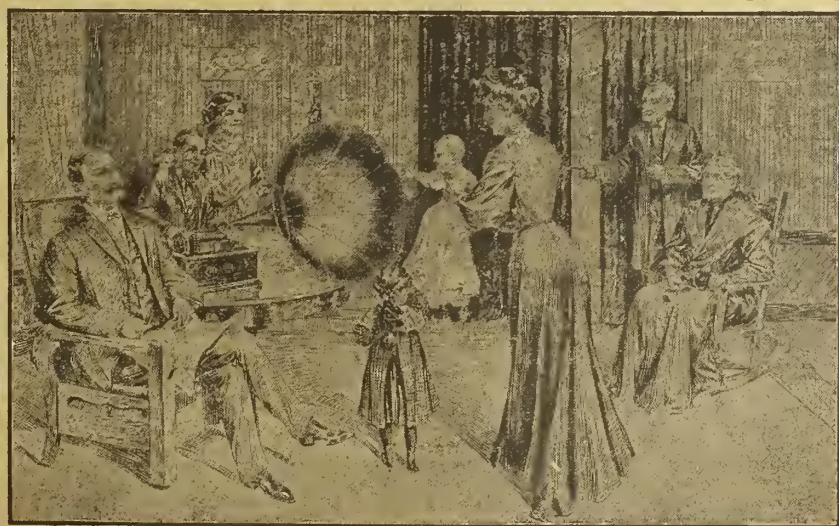

At the annual meeting of the Iowa State Board of Agriculture an address was delivered by W. Z. Swallow on the subject of showing hogs. Mr. Swallow is one of the pioneers in the breeding of Poland Chinas, having been in the business constantly for more than forty years. During this time he has also been a regular exhibitor at state fairs and consequently has had unusual opportunity to study the judging situation.

In his paper at that time, after stating that on the whole the judging done at the state fairs now-a-days is mostly right, he refers to a case where, in his opinion, a decision was rendered that worked harm to swine interests. On this point Mr. Swallow said:

I will say that the occasional and inefficient or dishonest judge is a most aggravating fellow, whose power to harm the industry is a matter for serious consideration. Its misleading influence is far reaching and may be a means of damage and disappointment to innocent men who depend upon it. An instance of this came under my observation at the recent International Live Stock Exposition at Chicago. In one class a prize was awarded purely because of a personal opinion of a judge who absolutely ignored breed characteristics and failed to give consideration to the objects of the show or to comparisons that should have entered into the competition. As a result of that decision, breeders who did not attend the show will be misled in the idea as to what is the popular and profitable type.

Reference is here made, no doubt, to the class lined up at the International for the grand championship individual barrow prize. As stated in our report of the International, the winner of this prize was a 600-pound bacon hog. He was smooth, mellow, and was an extra good type of a hog for his breed. There were in the same ring an extra good Poland weighing 430 pounds and a snug Berkshire weighing about 250 pounds, also a heavy and rather smooth Duroc. In putting the premium on the big bacon hog it is apparently thought by Mr. Swallow that harm was done to the swine industry in general. If a car load of 600-pound hogs would have topped the market on the day that the ribbons were placed, the judges were right in placing the ribbon as they did; but, if there were hogs in the ring that would, by the car load, outsell the prize winner, then someone blundered seriously.

With the increase in the market of vegetable fats to take the place of lard

Interesting Phonograph Announcement.

"We take it for granted that wherever this paper goes there is a desire on the part of its readers to have attractive homes. If the members of the family do not find entertainment at home they will seek it elsewhere. Ten to one the average lively boy will spend enough money in one year on cheap shows and various other amusements to pay for a good phonograph. It seems quite likely that this very paper contains an opportunity that you have been looking for. To make the home cheerful is the mission of the Edison Phonograph. The new style model for the year 1907 embraces all the desirable features in the construction of this instrument. The list of records is now larger and more complete than ever before. It contains everything that can be heard at the best lectures, concerts, choruses, operas, or any other entertainments. A special offer is now being made that should prove especially interesting to those who expect to purchase a good phonograph. Think of the enjoyment you can have with one of these entertainers after the toll of the long summer days that are coming. Read the advertisement on the last page of this issue and look for the coupon in one corner, which you are to send to Frederick Bahson, Mgr., Edison Phonograph Distributors, Chicago, Ill.

one can understand that an exceedingly fat Poland weighing 430 pounds might not be regarded as a top hog, even though he may be perfect in conformation. The lard in such a hog is undoubtedly a lower-priced product than would be a leaner class of meat. The question is, did the big bacon hog furnish this class of meat? In other words, is heavy lean bacon and heavy lean hams and shoulders higher-priced meat when placed on the block than lard?

This is a question that will bear debate, and if any of our readers have clearly defined ideas on the subject we shall be glad to hear from them.

### MAMMOTH CORN EXPOSITION PLANNED

More than a year ago members of the Commercial association of Chicago began working for a corn exposition to be held in Chicago. At that time more than \$50,000 was pledged for this work. It was decided to wait until the fall of 1907, at which time the first great corn exposition will open. Last week the members of the Commercial Association who have this matter most at heart met and organized the National Corn Exposition, electing officers and appointing committees. It was decided to expend something like \$150,000 on this exposition, a goodly proportion of which will be paid out in prizes. According to present plans the date of the exposition is from October 5 to 19, 1907. Adequate facilities will be secured for holding this big show. The building will be elaborately decorated, but the central idea of the great show will be "education."

Culture of corn has become a science, and it is the desire of the management to demonstrate that it is possible for the average corn grower to produce greater yields and better quality than heretofore. During the past ten years the matter of seed selection has been worked out and it has been shown that by this alone, it is easily possible to increase the yield from two to ten bushels per acre. It is possible to select seed properly only when the grower has become familiar with the proper type of the ear, bearing properly shaped kernels, possessing good germinating qualities and high vitality. These points will be illustrated at the great show and the object lessons here presented will be of inestimable value to corn growers everywhere.

It is the desire of the management to make the corn exposition as valuable to corn farmers as the International Stock Exposition is to stock raisers. The worth of this latter exposition has been fully demonstrated. It is even easier for the corn grower to improve his product than it is for the stock man. Consequently, the benefit which will come to corn farmers throughout the United States through the effort of Chicago's business men cannot be calculated.

The details for awarding of premiums have not yet been worked out, but in a general way are very liberal. Cash prizes will be offered and these will be so distributed that every corn section of the United States will be rewarded, provided it participates in this exposition. There will probably be state prizes, probably district prizes and certainly prizes for the farmer, the farmer's wife, the farmer's son, the farmer's daughter, etc. If, for example, Connecticut grows good corn, prizes will be arranged for that section. It may not be possible for Connecticut growers to compete with Illinois or Iowa in certain respects, but it will be easily possible to arrange the premium list so that the New England growers will receive a just compensation for this effort.

Corn farmers of the United States are urged to better this great show now. Let them select their seed with that in view, picking out ears that are uniformly true to type and with a high percentage of germination. Let them select a first-class piece of land, prepare it carefully, plant the corn at just the right time, cultivate it thoroughly, and be in position to select show samples when the time comes. Every locality should bear this in mind and take a personal interest in seeing that the visitors in the great corn exposition know just what that locality can present.

The exposition will be a success. This goes without saying from the fact that Chicago push and energy is behind the movement. The men having the exposition in charge are the leaders in Chicago business enterprises. They are used to handling large propositions. They propose to make this the greatest thing

on earth and this is the same as saying that it will be the greatest thing on earth.

### COW PEAS FOR SEED AND HAY.

A large number of inquiries have been received from subscribers during the last few weeks requesting that some information be given relating to cow peas. In replying to these we cannot do better than refer to a bulletin published by the Kansas Experiment Station dealing with this crop, as it is used for seed, forage, ensilage and green manure. According to this bulletin cow peas should be planted for seed in rows about three feet apart, dropping the peas about two to three inches apart in the rows. A common grain drill may be used as a planter by stopping up part of the seed cups. Set the drill to sow about two bushels of wheat per acre. When seeded at this rate eight to ten quarts of peas are required to plant an acre. Do not plant until the soil is warm, usually not before the first part of June.

Varieties of cow peas adapted for growing in southern Nebraska, Kansas, Missouri and southern Iowa are: New Era, Whip-poor-will, Taylor, Early Black Eye, White Giant, Warren's New Hybrid, and Michigan Favorite. These varieties planted by the first of June will mature in about 110 to 120 days. The advantage in growing early or medium early maturing varieties in the more northern states is that these varieties may be grown either for seed or for forage, while later maturing varieties, although they may produce larger yields of good forage, will not mature seed except in the more southern states. Such varieties as the Clay, Iron, and Unknown are good forage producing varieties, but mature too late to insure a crop of seed when grown in the region named above.

When grown for seed the crop should be cultivated and kept clear of weeds. The vines spread and lie close to the ground so that it is difficult to harvest the crop with the mower. When grown in a small area a practical method is to pull the peas by hand, or when grown in a larger area it is necessary to use a special bean harvester, several styles of which are now manufactured and sold. The peas should be placed in small shocks and allowed to become thoroughly cured, when the crop may be put into the stack or thrashed with the common grain separator, but this method of thrashing breaks and splits the peas, and to save the crop in good condition for seed it is necessary to thrash with the flail or else use a bean thrasher.

When cow peas are planted for hay, perhaps the best method is to sow broadcast or plant in close drills, six to twelve inches apart, and give little or no cultivation after planting. Planting in six-inch drills requires four to six pecks of peas per acre. The grain drill should be set to sow about one and one-half bushels of wheat per acre. In order to be most successful in securing a good crop from planting in this way the ground should be clear of weeds and in good seed-bed condition. It is well to begin the preparation of the seed bed early in the season, and cultivate occasionally in order to destroy the weeds and conserve the soil moisture. Planted in close drills, as described above, the peas do not vine so much, but grow more upright and the crop may be readily harvested with the mower. Perhaps as large a production of forage per acre may be secured by planting in rows and cultivating, but the crop is more difficult to harvest, requiring special machinery, as mentioned above.

Cow peas make excellent hay, which is practically equal to alfalfa hay in feeding value, although stock do not seem to relish cow pea hay so well as alfalfa. Cut for hay when some of the pods are turning yellow and before the leaves begin to fall. Cure well in the windrow or shock before stacking; it usually requires several days of drying weather to properly cure cow pea hay, and this is an objection to the use of cow peas for hay, since if the weather is unfavorable the hay is likely to be spoiled or badly damaged.

Perhaps it is more practicable to plant cow peas with some other crop for hay or forage rather than to plant the peas alone. At the Kansas Experiment Station cow peas were planted with sorghum, kafir-corn, and corn. It is necessary, however, to plant the combination crop rather thin in order that the cow peas may not be too greatly stunted in growth. The cow peas make a very dwarf growth and produce very lit-

tle forage when sown broadcast with kafir-corn or sorghum, but the combination of corn and cow peas may be more successfully grown. Perhaps the best method of planting corn and cow peas together is to plant in rows and cultivate the same as when corn is planted alone.

### TREATMENT OF RUN-DOWN LAND.

The following communication has been received from an Illinois subscriber, Mr. Robert Reed:

I wish you would give me the outline of plans that should be carried out in handling land that is run down. Would you consider alfalfa or red clover the superior crop to be used in a case of this kind.

Just how to handle a farm that is run down depends a good deal on a variety of conditions. In the corn belt there is but little land that is worn out in the ordinarily accepted sense of this term. However, if grain crops have been grown for many years in succession land may have reached that point where it no longer produces profitable crops, and in that case the owner must take the matter up in dead earnest.

Soil to grow either alfalfa or red clover must be in fairly good condition to begin with, though we do not believe that one can do better than give a soil a trial of these crops. We would put red clover first as a soil renovator, because ordinarily one can get a stand much more quickly and in that way bring about the more rapid introduction of nitrogen into the soil.

Start in with a certain part of the farm sown to small grain and red clover, seeded at the rate of from twelve to fourteen pounds to the acre of the latter. If a good stand is obtained it will be advisable to take off one crop of hay or use the land for pasture and plow under late in the fall, with the idea of putting corn in that field the next spring. The following year another field can be handled in the same way, and so on until every part of the farm which is cultivated falls heir to a good clovering.

If it is impossible to get a stand of clover and there is no farmyard manure available, it will be necessary to resort to the practice of plowing under green crops, such as buckwheat, rape or even the small grains when they are in a green and succulent condition. In that way vegetable matter is introduced into the soil and this invariably paves the way for the successful growth of legumes. We doubt, however, if there is very much land in the corn belt that is so far down the scale in its humus content as to need green manure before it will grow clover.

When once vegetable matter is introduced into average corn-belt soils there is little difficulty connected with the growing of any of the common crops, such as oats, barley, wheat, corn, clover, or even alfalfa. To keep on building up the fertility supply the legumes should appear in the rotation as frequently as possible. Our most productive soils are generally handled in such a way as to be clovered every four or five years.

### THIS BEATS SKIMMING MILK.

If any of our readers want to make \$5 for \$4 they are now making on every cow they have, it will pay them to write and ask for a month's free trial of the National Cream Separator. You can write to the National Dairy Machine Company, Goshen, Ind., or the Hastings Industrial Company, Chicago, Ill., and if you just say you are one of our readers they will let you try separating your cream from your milk for thirty days free. It will prove a money-making experiment for you. Hundreds of farmers and farmers' wives have tried the National, because they don't have to buy it unless they like it after they try it thirty days. No hard lifting, as it is only forty-eight inches high. It's the lightest-running separator, closest skimmer and the easiest cleaned. Only two parts to clean, in three minutes. Stop your hard lifting and hard work scalding pans, skimming milk night and morning and losing one-fourth of your cream. Write today and ask for the free catalog anyway. Then try the National after you have read the catalog.

### EXCURSION RATE TO PACIFIC COAST.

Daily during March and April, the Minneapolis & St. Louis R. R. will sell one-way excursion tickets to points in Montana, Idaho, Washington, Oregon and British Columbia at \$15 less than regular rate. Ticket offices 512 Walnut St., and Union Station. For further information address W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

### SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

# \$5.95

Freight  
Prepaid

Is all I ask for the

Galloway  
Bike  
Harrow  
Cart

Orders  
From  
Farmers  
Only  
Accepted

That's less than your dealer pays for the cart he handles. I was about to say "the cart he sells" but I'm not sure he sells any. He won't sell you one if you read this advertisement through to the end.

And I'll tell you why. In the first place he can't sell you as good a cart, for I do not sell my cart to dealers. Dealers can't get them. I know all about this dealer business and how every farmer has to pay from 30% to 70% more for his goods, as I was a dealer myself once. But before I was a dealer I was a farmer and so I stick to the farmer. Many's the day I've walked behind a harrow with tired legs and my mouth full of dust. I guess that's the reason I'm so enthusiastic about my harrow cart.

Another reason is that I can save you money. I am going to save you from \$2.00 to \$4.00 on the best harrow cart made. That means that 30% to 70%. I can't help feeling that you will appreciate my doing this.

Wait a minute now. Don't take my word for anything but send for my book, "The Proof of the Pudding." In that book farmers who have used my harrow cart answer these questions.

- Is it good value?
- Does it save time and labor?
- Can you do more and better work?
- Is the draft light?
- Is it strong?
- Does it work properly on hillsides?
- Does it follow the harrow all right in turning?

All these questions are answered, not by me, but by men I never saw, and who never saw me.—men who have used my Bike Harrow cart, and know just how good it is.

Now about my price. \$5.95—that's it, five ninety-five, freight paid. I have to laugh.

When I hear this talk about the implement trust and the dealers,—and those fellows selling harrow carts for \$8.00 and \$10.00 I just chuckle to myself.

Talk about forcing me to do this or that—they can't force me to do anything.

I am dealing direct with the farmers and they are the fellows who have the money.

But to get back to the harrow cart. Send me \$5.95 and I'll send you the cart, freight prepaid. Try it—at my expense. If you don't want to keep it send it back at my expense and I'll refund you \$5.00—that's what you paid me and be for postage.

Write today, send an order. If you're not quite sure send for my booklet. A postal will bring it. Don't go through another summer's work without one of my New Galloway Bike Harrow Carts.

*Wm. Galloway*

President of William Galloway Company,  
105 Commercial St., Waterloo, Iowa.

## Cement Posts 10Cents Each

Cement Fence Posts made from Moore's Patent Fence Post Mold.

You can fasten any kind of fence.

Posts never wear out or rot—and having holes molded in them, you always have a sure way of fastening fence.

Make your posts at odd times—at a cost of only 10 cents each.

Write for descriptive circular today.

MOORE POST MOLD CO.  
327 E. Third St., STERLING, ILL.

### FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

This machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE,

Blandinsville, Illinois

### The "STAY THERE"

Aluminum Ear Markers

are the best. Being made of aluminum they are brighter, lighter, stronger and more durable than any other. Fit any part of the ear. Nothing to catch on feed trough or other obstacle. Your name, address and any series of numbers on each tag. Sample tag, catalogue and prices mailed free. Ask for them. Address

WILCOX & HARVEY MFG. CO.,  
187 Lake St., Chicago, Ill.

## Farm Furrows

Turned by a Practical Farmer.

Did you ever want to sleep worse than when your neighbor's dog was barking or some old cow in your own barnyard was mooring her head off?

What recollections are brought to mind by a fragrant whiff of good, old oak firewood! It reminds us of the old open fireplaces and all the rest of the luxuries and deprivations that went with those days.

House plumbing is about the limit when it comes to cost. However, we would rather have a good system of waterworks in the house, including a good bath-room, than any number of well-furnished parlors and reception rooms.

The currycomb used too extensively on the skin of either horses or cattle, especially the latter, causes a harsh coat of hair. Only when hair is to be combed out or dirt removed should the comb be used. The only thing to make the hair sleek is a good hair brush.

Don't wait until you are ready to go to the field to get down the seeder and overhaul the different farm implements. There is nothing that worries a man quite so much as to see his neighbors in the field when he is tinkering away with some obstinate piece of machinery.

Gilt-edged credit is the best asset a man can have in his business. There are a whole lot of reckless business men and grafters nowadays who seem to be making money, but, after all, what are a few hundred dollars compared with the confidence of one's fellow men!

Over-confidence in the friendliness of any herd sire has lost many a man a limb and even his life. One should never trust any male farm animal, for there is no telling when, either accidentally or intentionally, the beast will inflict an injury on his best friend.

Visiting is one of the chief sources of enjoyment on the farm. Of course there are a few people who carry it to excess, visiting Sunday and week days. There is absolutely no reason why any family should not be able to take dinner or spend an evening with some one of their neighbors several times a month, unless, perhaps, it is in the busiest season of the year.

How quick animals, especially horses and dogs, detect any change in a man's disposition. We know of good farmers who under no circumstances will allow hired men or others to swear or talk loud around their stock. We have heard some men say that a certain horse just acted the fool all day, when in fact it was very likely that the man's temper had been riled most of the time and the horse was merely reflecting the passion of the man.

Our hired men have fallen into a good habit in recent times. When the weather is bad so that shoes and clothes are more or less contaminated from the barnyard they utilize the furnace room for changing overalls and shoes. The cement floor of the furnace room is washed up once or twice a week so that it makes a perfectly proper place. It only takes a minute to change one's overalls and shoes and it wins the everlasting gratitude of the housewife who likes to have things clean and sweet.

Roast duck is certainly toothsome, and it is a splendid change from the meat of domesticated fowls. We cannot help but get the hunting fever when we read of the approach of ducks and geese from the South. A man will risk his life almost for a day's sport of this kind. How much of the wild blood still runs in our veins! We recollect once of a hired man who was a green hand at hunting and accidentally brought down a pintail duck one day. Imagine the

# HARVEST IS COMING AGAIN ARE YOU READY?

To be sure, it's some time yet before the grain will be ready, but it won't be long before you'll be so busy with Spring work that you will have no time to get ready for harvest.

Now is the time to give this important matter serious consideration.

How did you get along last year?

Were there any delays or any break-downs?

Did you lose any grain?

Were you able to begin harvesting when your grain was just ready, and finish before it got too ripe?

How did your horses stand the work?

Think back now, and you can easily tell about how you are fixed for this year. If you are not prepared to harvest your grain quickly and easily, without danger of delay, it is time right now to take steps to prepare yourself. Now is when you have time to give the selection of a machine the consideration you ought to give it.

When you buy a new harvesting or haying machine, you want to buy the right one. If you wait until Spring work is upon you, this important matter will be put off until the very last week before harvest, and you will have no time to investigate—no time to consider. You may even be forced to buy what you don't want. It is the part of wisdom to do this investigating now.

You know the International Harvester lines—**Champion, McCormick, Osborne, Deering, Milwaukee, Plano**—with any one of these you can do your harvesting right.

Four things are prominent in good farm machines of any kind: The principle is right; The materials are right; The workmanship is right; The record is right.

Now let us look into these things in connection with the International lines of harvesting and haying machines.

Since the invention of the self-binder, a great many different makes have been put on the market. Most of these failed to receive the approval of the American farmer. They were not built along right lines. Years ago the Champion, Deering, McCormick, Milwaukee, Osborne and Plano began to stand out from other harvesting machines, because of the correct principle back of them.

Time and experience have demonstrated that they were right; they embody all that is good that

has been developed in 30 years, and there's no feature about them that is in any way untried.

So you are safe enough as to the underlying mechanical principle of any of these machines.

Now as to materials. The farmer buying an International machine may be sure that the material is **always the best**. Every bit of material—wood, steel, iron, malleables, paint, etc., is subject to the most rigid test and experiment before being used. Only large capital and a strong organization make these things possible, for in addition to the superior out-put of their own coal and iron mines, iron and steel mills, timber lands and saw mills, they give at all times a first choice from all the other material manufacturers of the entire country. The International Harvester Company affords a known market to every material manufacturer in the land if his product comes up to the high International standard. These are but a few of the many advantages which insure to the farmer the best of quality in every International machine he buys.

Next comes workmanship. The enormous demand for these six leading makes of harvesting machines enables the International Harvester Company to maintain manufacturing plants of the highest efficiency and to employ workmen of the highest skill—factories and workmen that could not possibly be maintained to supply the small demand that would come to an individual manufacturer.

Now comes the record. Practically every farmer in the United States knows of the satisfactory record of these machines. He knows that for the harvesting of all varieties of grain, light, heavy, standing, down or tangled, these machines have never faltered—have never left him in the lurch. He knows that they have stood up to the work well and have endured season after season.

He has gone to the harvest always with the perfect assurance of success. When in rare cases the unavoidable accident has occurred, he remembers that the repair parts are near at hand and that **they always fit**. Another advantage in purchasing International machines is that repair parts may be had at any time and any where.

Any one of these machines will do your harvesting right. Visit an International dealer and get whichever catalogue you want. If you don't know an International dealer, write us and we will give you the name of the one nearest you.

## INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, ILL.

(INCORPORATED)

**International Line:**—Binders, Reapers, Headers, Header Binders, Corn Binders, Corn Shockers, Corn Pickers, Huskers and Shredders, Corn Shellers, Mowers, Hay Tedders, Hay Rakes, Sweep Rakes, Hay Loaders, Hay Stackers, Hay Balers, Feed Grinders, Knife Grinders, Cream Separators, Gasoline Engines, Pumping Jacks, Manure Spreaders, Weber Wagons, Columbus Wagons, Bettendorf Wagons and Binder Twine.

fit of laughter he threw the table into when he informed us that he had shot a "tin pail."

It is certainly a true saying that many so-called gilt-edged securities are guilt-edged.

Have you ever been acquainted with that form of willing worker who was always ready to work his friends? It

certainly is peculiar what lines of pursuit men's ambition will follow.

A good many farmers are getting shot these spring days—at the hardware store.

The duty of buying dry-goods, such as dress goods, etc., should never be imposed on the head of the house. If ever I get mixed up it is when I advance towards some nice young lady clerk and

try to recall whether I was to buy gingham, calico, ducking, cheviot or ticking. I would rather feed hogs any day.

Here is a woman's description of a Poland China gilt. I can vouch that it is true: "She seems to be so at home and is so pretty in person as well as manners. Would probably come into the parlor if coaxed a little."

# THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscription, \$1 a year; ten copies one year, \$10, and an extra copy to reader up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

## DAY BY DAY.

BY AGRICOLA.

What a wonderful heritage we have in the United States. Agrícola has seen gangs of men with the hoe cultivating cabbage in one locality and just as soon after as a train could take him there has seen other farmers shoveling paths through snow drifts.

And the rice fields of Louisiana, how different from the wheat fields of Kansas. The same method of harvesting is used, but the harvesters in the rice fields have wide tires to keep the machines from being mired. In Kansas the ground is dry and firm. In the rice fields the water in which rice must be grown has just been drained off so as to permit harvesting with machinery. The other way, leaving the water on the ground and gathering the rice by hand while sitting in canoes is too slow for this country.

Eleven counties in Wisconsin produce 15,000,000 bushels of potatoes annually, worth about \$8,000,000. The late blight, (Phytophthora infestans) is the worst enemy the growers have to contend with, as it not only causes premature death to the vines, cutting off the food supply, but it also causes rot. The growers fight the blight by spraying with Bordeaux mixture. Spraying and late digging are the best preventives known.

By the way, what has become of the

## A REAL High Foot-Lift Gang and MORE.

High means HIGH in the J. I. Case High Foot-Lift Gang Plow. With the foot alone the bottoms can be raised from plowing position six inches in the ground to more than six inches above ground or vice versa. And a boy can do it easily. It is not only a high lift, but an easy lift, due to the powerful leverage and strong lifting springs.

But the feature that is even more important to your ease and convenience and one which you will find on no other Foot-Lift Gang, is the double service accomplished by the floating lever. This lever is connected to the cross-bar to which the foot lever is also attached and can be used to assist the foot lever in lifting the bottoms out, or to force them into hard

ground. This lever is also used to lock the bottoms up in the frame, making it impossible for them to drop down when the plow is being transported. It may also be used to lock the bottoms in the ground, holding them securely to their work. And remember this lever can be instantly and easily changed to either a lock or a floating lever. Don't you see the importance of this feature? Wouldn't you like to become familiar with all the working principles of so marvelous a plow? Ask your dealer about it or write to us for full particulars.

**Farmer's Encyclopedia FREE**

## J.I. CASE HIGH Foot-Lift GANG PLOW

"cabbage snake" which did not scare our colored brethren "out of their boots" when first discovered because they simply were barefooted? This was only two years ago, and the scare spread pretty much over the country and lessened the demand for cabbage.

These so-called snakes were only worms the size of a hair and two or three inches long. The cabbage caterpillars indiscreetly eat the eggs of these worms, the eggs hatch in their bodies and the "swollen fortunes" keep swelling until the bodies of the caterpillars burst open and the imprisoned worms celebrate their advent into full citizenship by laying more eggs for more caterpillars to swallow. But last year no one was scared, the worms proving harmless to everything but caterpillars, and no one mourns for them.

Agricola is convinced by experience that when rot threatens the potato crop the wise course is to leave them undug as long as is safe on account of frost. And the Vermont Experiment Station has found the rotted tubers very much less when dug late.

The farm separator has been advertised as "the coming machine." It is hardly in that class now; it has "arrived," and to stay.

Two years ago a limited number of corn husking machines were distributed here. The dealers would not guarantee satisfaction, neither did the machines make good in the field, and nothing has since been heard about them except that the makers are still experimenting. This refers to machines husking from the hill.

It has been Agrícola's good fortune to attend farmers' institutes ever since they started in his state, and in many different parts of the state, and his experience is that the best institutes are where they are on wheels, going in turn to the different towns in the county, and the town people taking part and helping out. The brotherly kindness feeling is worth fostering.

When you come to the table two lines of operation present themselves. One promotes good digestion and good health,—the other causes indigestion and disease. To be healthy, eat; to be unhealthy, simply fill up. There is much in what we eat and drink, and there is much in the way we do it.

There are traction ditchers which operate more cheaply than can be done by hand, but on heavy, sticky soil, they are difficult to operate. When a farmer can ride a tile ditcher he will be so crazy to tile his farm the tile factories will be worked overtime.

I like to hear a man whistle at his work if he is a good whistler and a better worker. But I like to be confident that the combination is sure.

And now some of the agitators for reduced rates wonder if the next move cannot be to reduce the price of butter. They eat butter every day and rarely take a railroad trip. Be quiet if you

can, gentlemen. Do not discourage Old Brindle.

Martin Luther once said that the best preacher he ever heard was a little tame robin. The man or boy who shoots that kind of preacher is something of a degenerate.

There are some farmers who know to a quick certainty just how many pigs they have, but if you ask the number of their children they have to stop to count up. Their heart is with their treasure.

A. A. & W. G. Karschner Brood Sow Sale.

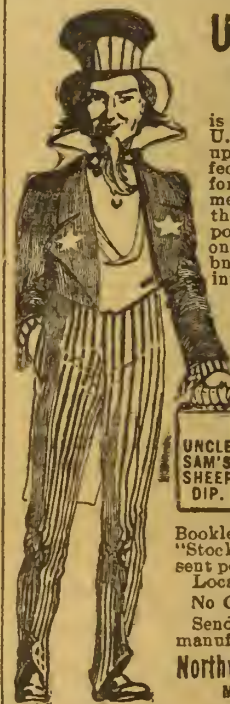

Messrs. A. A. & W. G. Karschner, of Wilcox, Neb., held their annual brood sow sale on March 2d and an average of \$53.80 was made on thirty-seven head. The attraction of the sale was three sisters to Crimson Dandy, the \$1,010 boar, they going to good herds of the state at long prices. The top was \$165, paid by Mr. E. C. Gwinner, of Holdrege, Neb., for No. 14 in the catalog, a daughter of Nebraska Wonder by the great Crimson Wonder. Mr. Gwinner has been a buyer of some of the very best sows on the market this spring and an extra good offering is looked for from this herd another year. Below is a list of those selling for \$35 and over:

Lot.	Name	Price.
1	H. B. Loudon & Son, Clay Center, Neb.	\$ 65.00
2	Wm. Sanstead, Holdrege, Neb.	72.00
4	B. F. May, Blue Hill, Neb.	38.00
5	E. C. Gwinner, Holdrege, Neb.	102.50
6	M. A. Sellers & Son, Huntley, Neb.	125.00
7	R. C. Whitacker, Holdrege, Neb.	70.00

38	W. J. East, Clay Center, Neb.	52.50
40	Hopkins Bros., Atlanta, Neb.	74.00

J. W. Pittman's Duroc Sow Sale.

On February 27th the above breeder sold a very creditable offering of sows and gilts and made the very neat average of \$57 on forty-three head. A stormy day dampened the enthusiasm of some of the local trade, though breeders came in good numbers. Those who came were ready for business and bids rolled in quite freely regardless of what was going on around. Mr. Roy West, of Churdan, Iowa, topped the sale by paying \$110 for No. 17. A number sold very near this price, as will be seen by the list of buyers. Col. F. F. Luther cried the sale.

Lot.	Name	Price.
1	Theo. Horton, Linden, Iowa	\$100.00
2	Geo. R. Manford, Shannon City, Iowa	90.00
3	Theo. Horton	47.50

# HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

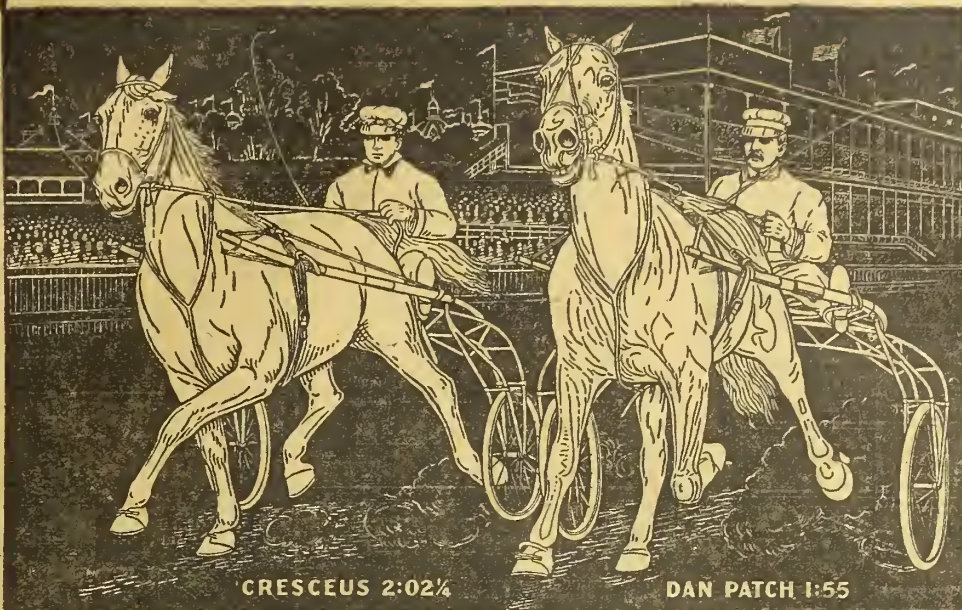

One of our readers has kindly described a device for holding a gate open. He finds it very handy. To make it, secure a piece of 4x4 two feet long and have a piece of steel strap iron made to lie on the top of this timber. The strap

iron acts as a spring or clutch. The timber is embedded in the soil at a place where when the gate is wide open the panels of same will cross the device at right angles, which allows the bottom of the lower panel to drop in the notch in the steel clutch. The gate is thus secured and to unloosen, merely press down the end of the clutch and the gate will slip out. Another latch which is in operation on many farms is made by setting a short post where the gate is to be secured when open. A wooden latch is attached to the post by means of a pivot which allows the latch to be lifted up and catch on top of one of the gate panels.

In answer to our request for descriptions of practical litter carriers J. L. Schaefer, of Nebraska, favors us with a sketch of one which he has been using and finds it suited to every need. The box proper can be made any size, but in this case it is two feet by two feet

## CAN DAN PATCH PACE A MILE IN 1:54?

### 3 FEEDS FOR ONE CENT

My stallions, Dan Patch 1:55, Cresceus 2:02 1/4, Directum 2:15 1/4, Arion 2:17 1/4, Roy Wilkes 2:06 1/4, Burtonwood 2:17 and my one hundred high-class brood mares eat "International Stock Food" every day. Dan Patch has eaten "International Stock Food" every day for over four years and during this time has broken fourteen World Records and his physical condition has been marvelous. It will pay you to use it for your Stallions, Brood Mares, Colts, Race Horses, Show Horses, Carriage or Coach Horses and Work Horses because it gives more Nerve Force, Endurance and Strength. "International Stock Food" is prepared from finely powdered medicinal Roots, Herbs, Seeds and Barks and is fed in tablespoonful amounts as an addition to the regular grain feed. It is equally good and very profitable to use for Horses, Colts, Fattening Cattle, Cows, Calves, Hogs, Pigs, Sheep or Lambs, because it Purifies the Blood, Tones Up and Permanently Strengthens the Entire System, Keeps them Healthy and Greatly Aids Digestion and Assimilation so that each animal obtains more nutrition from all grain eaten. In this way it saves grain and will make you a large extra profit. We have thousands of reliable testimonials on file in our office, and every pound of "International Stock Food" is sold by over 150,000 dealers on a "Spot Cash Guarantee" to refund your money if it ever fails. Constantly used by over Two Million Stockmen throughout the world. If you desire any further information write to M. W. SAVAGE, Proprietor of International Stock Food Co. ## BECOME A MUSICIAN! NO MONEY REQUIRED—HOME STUDY

We invented the HARMONIC TONE REVEALER, a marvelous mechanical instrument by aid of which our skilled instructors can teach you music at your own home. We know we can teach you to play the Piano or Organ by note, hence we will make this unheard of offer: Enroll with us and we will send you, express prepaid, the Harmonic Tone Revealer, a full course of lessons under our skilled instructors and 60 pieces of music. Pay us after you have learned to play. If we do not teach you to play, you do not have to pay a cent, and the instrument, lessons and music are yours. We are the largest Conservatory of Music in America, and will back up this offer. We also teach Violin, Guitar and Mandolin. Remember, you do not even have to make a deposit. Write immediately for enrollment blanks and information.

**International Conservatory of Music,**  
4050 Olive Street, ST. LOUIS, MO.

by three feet, eight inches. It is hung on a frame made of strap iron three-fourth by one-eight inches. The carrier pulleys are taken from an old check rower and have a groove about three-quarters of an inch deep which fits onto a cable. The frame is braced as shown in the illustration, and the rods on which the box is hung may be as long or short as desired. The rods are made with a loop into which the lugs of the ends of the box fit. These lugs were taken from an old check rower wire spool, and they

should be placed about eight inches from the bottom of the box so that when the box is tripped it will turn upside down readily. The trip is made by riveting a small piece of sharp iron to the frame just at the top of the box. When the box is in position to fill this catch fits in a slot in the rim of the box. A trip rope passes from the end of the catch over the pulley, and when the rope is pulled the catch releases the box. The cable on which the carrier runs is of twisted wire and preferably a half inch in diameter. It may be bought already made or twisted at home. The length of the cable depends upon the distance one wants to dump the litter from the barn. A three-quarter-inch rod with twelve inches of thread attaches one end of the cable to a post. By this contrivance the cable may be kept taut. Be sure and place the posts well in the ground and use only a smooth cable. It does not require much time to make this kind of a litter carrier, moreover it is inexpensive and very serviceable.

The Utah Colonization Company, of St. Paul, Minn., are putting a tract of irrigated lands in Utah on the market, and they have their first advertisement on page 27 of this issue. The company have a proposition that

## THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills. TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour. 30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill. Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

will be of interest to readers of The Homestead. It will pay you to look up their advertisement and write to them for their booklet, if you want to get a home in a fine climate and under conditions that will be easy for you.

**CHEAP RATES TO THE PACIFIC COAST.** Commencing March 1st and continuing until April 30th the Iowa Central Railway will have on sale reduced one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los

Angeles and San Francisco are run via Kansas City and the popular Santa Fe System. Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

**CHEAP ONE-WAY RATES.** Every Tuesday during March and April, the Minneapolis & St. Louis R. R. will sell cheap one-way excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. Rate is \$14 to most North Dakota points. Buy tickets at 512 Walnut St., or Union Station. For further information write W. K. Adams, Dist. Pass. Agent, Des Moines, Iowa.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to a considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

## ESTATE IN OKLAHOMA.

A Subscriber, Kan.—A single man died, owning a tract of land in Oklahoma, and his parents were his heirs. What legal steps are necessary to have the title transferred to the parents, and about what would it cost?

Answer.—The best way would be to have an administrator appointed for his estate and regular proceedings in the probate court, including order of distribution of property, etc. If that seems undesirable, a suit to quiet title would accomplish the object as to the cost. Ask some lawyer in the county where the land lies.

## DRAINING LAND—BALLOT BOXES.

A Reader, Brooklyn, Iowa.—(1) A man in this vicinity tile drained his land in such a way that it saved the township trustees the trouble and expense of putting in two culverts on the roadside to carry off the water, and now the trustees will not allow the man anything on account of it. Can he recover from them? (2) Should ballot boxes be kept locked during an election or can the judges raise the cover to put in ballots? The box is a small wooden one.

Answer.—(1) The man cannot recover anything from the trustees, because the work he did was on his own land, and was done for his own benefit and not for the good of the road, although it incidentally did benefit the road. (2) The ballot boxes should be kept locked during an election.

## TELEPHONE COMPANY'S RIGHTS.

An Iowa Subscriber.—A telephone company in constructing its line, set poles along a partition fence on B's ground with B's permission. Later B sold his land to C and nothing was said about the telephone line or its poles. C wanted to buy a share of the telephone stock, but the company refused to sell it to him. Then C ordered the company to remove its poles from his land. (1) Can C compel the company to remove its poles? (2) Can C lawfully connect a phone with the line without permission of the company? If not, what is the penalty? (3) Can C prevent the company from coming upon his land to repair the line? (4) Can C prevent the company from removing the poles from his land?

Answer.—(1) That depends upon the contract between B and the telephone company, by which the latter obtained the right to set poles on B's ground. (2) He cannot—penalty, fine not more than \$500, or jail not more than six months. As to questions (3) and (4), apply same answers as given to question one.

## PRIVATE ROAD.

A Subscriber, Blue Springs, Mo.—A and B own adjoining farms. A's farm lies along a public road and B's farm is back of it, away from the road. B travels out to the road through the middle of A's farm on a kind of pass-way, which he has used for several years. There was no deed or contract ever given for said pass-way. B's land extends to a partition line which runs along A's boundary to the road. (1) Can A close up the pass-way at any time without giving B notice? (2) Can B by law get a road through the middle of A's farm to the public road, or only along said partition line?

Answer.—(1) A has a right to close the pass-way without giving B notice, at any time. (2) B can petition the county court for a private road, and the

**I TOLD YOU SO!**

**"Cobalt Mutual" Advanced 40% in Price on February 20th**

**COBALT**

**The Block of Stock Offered at 25c Was Greatly Over Subscribed**

—and NOW comes another opportunity to buy "Cobalt Mutual" at 35c—and get the advantage of another 40% advance in price—for on April 25th "Cobalt Mutual" will GO UP again. If you lost the chance of buying at 25c—you should not NOW lose the chance to buy at 35c. "Cobalt Mutual" will go to 50c a share at least on or before April 25th, 1907.

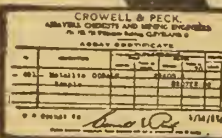

Don't forget that I predicted that this stock would advance 40% on February 20th. IT DID.

Don't forget that I predict that it will advance 40% again—that it will go to 50c a share on April 25th. IT WILL.

**W. V. Coons**  
PRESIDENT,  
**W. V. COONS & CO.,**  
Bankers,  
Bond Dept. 46  
Williamson Bldg., Cleveland, O.

Write Us TODAY for Special Report and free stickpin of Cobalt Ore. For a limited time we will send to everyone who writes, giving their business or occupation, a sample of Cobalt Silver Ore, mounted in an attractive stickpin. One will be sent YOU if you write at once before the supply is exhausted.

## Cobalt Ores of Great Value

Here is the actual value of ores taken from a few of the Cobalt mines:

LaRose mine ores run \$60,000 to the carload.

Jacobs mine ores run \$60,000 to the carload.

Foster mine ores run \$54,000 to the carload.

Nipissing mine ores run \$51,000 to the carload.

University mine ores run \$45,000 to the carload.

Trethewey mine ores run \$48,000 to the carload.

Silver Queen mine ores run \$42,000 to the carload.

Diamond mine ores run \$36,000 to the carload.

Nova Scotia mine ores run \$27,000 to the carload.

There is every reason to believe that our five tracts covering 560 acres will be as productive as any others in the entire Cobalt mining district.

# Another Chance To Make 40% On Your Money

ONE month ago I invited you to join me in making a fortune on "Cobalt Mutual" Stock.

I told you that the price would advance 40% on February 20th.

My prediction came true.

Subscriptions for this stock were received from all over the country, from business men, bankers, lawyers, professional men, everyone. The public recognized the fact that the Cobalt Mutual Mines Company was different from any mining proposition ever put before it. It recognized the stability of the men behind the enterprise. It recognized the fact that "Cobalt Mutual" was being handled along business lines—that the men interested in the enterprise had gone into it with the same determination to make a big success for the stockholders that they would have in going into any manufacturing or other enterprise.

## Work Being Pushed—Machinery Being Installed

Crews of miners and engineers are now at work night and day, double shifts, opening up the ground—and work will be pushed even more vigorously after the opening up of Spring.

We are going to have a great big proposition in COBALT—we're not going to stop at little achievements. We have the mineral land to develop—that's our stock-in-trade—a big acreage of rich mineral ground in the heart of the COBALT district. The Cobalt Mutual Mines Company is not basing its future prosperity on a 20-acre tract of land—it has

## 560 Acres

—enough land to keep us mining on a big scale for a generation.

When the President of our Company, Mr. W. V. Coons, returned from a long visit of inspection of Cobalt, he had this to say: I saw

## Nuggets of Silver

eighty to ninety per cent pure, weighing 300 to 400 pounds. I saw many carloads of ore running from \$30,000.00 to \$60,000.00 and one car of picked ore that actually sold for \$90,000.00. The whole region seems to be one vast rock covered with a thin skin of earth, filled with mineral deposits. In places the rock crops out of the top, and shows the silver veins of almost pure silver so rich that you can see the metal shine as though the rock were plated with it. I examined the entire region, saw the miners at work, talked with conservative men whose experience, ability and recognized standing placed them in a position to give me unbiased advice—and then I made up my mind that Cobalt offered the greatest chance in the history of mining for a great big, well-conducted, business methods mines company to make a vast amount of money.

Our stockholders—directors—and officers are all enthusiastic about the prospects of "Cobalt Mutual." Old stockholders are subscribing for more of the stock—taking every share that they can carry.

Now why don't you look us up—why not find out the responsibility of the men behind this enterprise? You can ask any bank anywhere of the standing of W. V. Coons & Co., of Cleveland—or look us up in any of the commercial agency books. Then decide. We invite the most careful investigation.

As soon as the weather permits we are going to invite our stockholders to take a trip to COBALT—and see for themselves, just the same as the President and some of our stockholders have seen, the great holdings of the Cobalt Mutual Mines Company.

Will you go up as a stockholder at 35 cents a share, or will you wait until it's too late to take advantage of this next raise in price and pay 50 cents a share for "Cobalt Mutual"? You'll surely buy if you go to COBALT and see our proposition.

## Installment—Payment—Plan

To accommodate numerous investors who have requested it, we have decided to accept monthly payments on "Cobalt Mutual" stock as follows:

25% of the total subscription with order—the balance in four equal monthly payments drawing 6% interest.

## Cobalt is Truly the Field of Fortune

You are going to be interested in COBALT some time. There's going to be a rush into that mining district the like of which the country has never before experienced. Will you join in the enterprise NOW—or wait until the price is much higher and thereby lose the increase in the price of stock?

## Directors and Officers

The officials of the company are all well and favorably known, and are men of substance, character and standing in the community. An investigation will reveal to any investor the fact that the directors and officers are eminently reliable and can be depended upon to conduct the affairs of the company fairly and honestly.

## OFFICERS

W. V. COONS, President.  
ISAAC DAVIS, Vice-President.  
FRED EDWARDS, Sec'y and Treas.

## DIRECTORS.

R. G. HEMINGWAY, Mnnie, Ind., President The Hemingray Glass Co.  
FRANK C. CAIN, Cleveland, O., President National Concrete Fireproofing Co.  
W. V. COONS, Cleveland, O., W. V. Coons & Co., Bankers.  
R. W. HARRIS, Streator, Ill., General Manager The Illinois Light & Traction Co.  
ISAAC DAVIS, Findlay, O., Wholesale Seed and Wool Merchant.  
J. M. BARR, Findlay, O., President The Producers Company.  
J. C. McDOWELL, Pittsburg, Pa., Vice-President Union National Gas Corporation.  
JAMES B. HOGE, Cleveland, O., Secretary United States Telephone Company.  
FRED EDWARDS, Cleveland, O.

**Don't Push**

The horse can draw the load without help, if you reduce friction to almost nothing by applying

**Mica Axle Grease**

to the wheels. No other lubricant ever made wears so long and saves so much horse power. Next time try Mica Axle Grease. Standard Oil Co. Incorporated

court then will appoint three disinterested persons as commissioners to view the place of the proposed road, mark it out where it will be most convenient and do the least damage to A's farm and assess the damages which B must pay to A, so you see it depends upon where the commissioners locate the road.

## Only One "BROMO QUININE"

That is LAXATIVE BROMO QUININE. Similarly named remedies sometimes deceive. The first and original Cold Tablet is a WHITE PACKAGE with black and red lettering, and bears the signature of E. W. GROVE. 25c.

## PROBLEM IN CORN PLANTING.

With an ordinary corn planter drop fifteen hills with ungraded corn and put down your findings. We venture to say the result would look something like this: For the first drop there would be three kernels to each hill, in the second and third the same, the fourth would have two in one hill and three in the other, likewise the fifth, the sixth would be regular again, while the seventh would not, and in the eighth only two would be found in either hill. The rest of the drop up to fifteen would carry between regular and two and three. It is likely that the above is somewhat better than the work of the ordinary planter. It would probably be considered a very good stand. Go over it again

**Piasa Bird** \$32.50 Complete! **2 BIG REASONS WHY WE SHOULD HAVE YOUR ORDER**

**Double Lift**

**New for 1907**

If You are Going to Buy a SULKY or GANG PLOW First—We absolutely guarantee this plow equal in every respect to any plow on earth, and refund your money if not entirely satisfactory to you.

Second—We save you the middleman's profit of from \$10 to \$20 as we are the only Plow Factory in the world selling its goods direct to the consumer at wholesale prices.

These plows are made of iron and steel throughout, are perfect in construction, ingenious in design, simplicity in handling, perfection in work and light draft. Every part is backed by our thirty-six years' of successful experience in this business. Write us before buying. Secure our big free catalogue of implements, Buries, Harness, Steel Ranges, etc.

14 inch Double Shill Plows, \$8.65; 12-16 Champion Disc Harrows only \$14.95. Tell us what you want when you write. Address

**Hapgood Plow Company, 1266 Front Street, Alton, Ill.**

The only Plow Factory in the United States selling direct to the consumer at wholesale prices.

and you will find that the planter has fallen eight grains short if you are planting three in a hill. Suppose these eight grains had been planted and had produced a stalk of corn with one ear. That would mean that you had lost eight ears of corn in those fifteen drops. Now, there are 3,240 hills in an acre of corn planted three feet eight inches apart between the hills, which means 1,620 drops of the planter. If you lose

eight ears of corn in fifteen drops in 1,620 drops you will lose 864 ears or about seven and one-half bushels to the acre. In a field of sixty ears you will lose 420 bushels, which at thirty-five cents a bushel amounts to \$147. Would it not pay to buy a sorter and save part at least of this loss? Delany's Seed Corn Sorter, advertised on page 11, is giving very good satisfaction and costs but a small part of the above sum.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## REAL ESTATE.

THE RUSH IS NOW ON for western North Dakota. Last chance to secure agricultural land where crop failures are unknown, at \$5.00 to \$10.00 per acre. Will produce more per acre than high priced land in Central States. Will be worth as much in a few years. Fine, healthy climate, excellent water, good soil, free coal for digging; two new railroads under construction will be completed this year when land values will double. The coming corn country. Few homesteads left. Don't wait, act before too late. For free booklet, maps, etc., address Claude M. Pease, Box 327, Jamestown, North Dakota.

HOME ON BEAUTIFUL LAKE—50 miles from Minneapolis, 143 acres, 70 plow, 30 meadow, 43 timber pasture, bordering on a large, fine lake, 2 miles from town, fair set of buildings, an elegant home, good land, \$25 per acre. Whitney, Rosenberger & Thayer, St. Cloud, Minn.

WHY GO TO TEXAS TO BUY LAND? Better land, better soil, better climate in Western Nebraska. Land \$5.00 to \$12.50 per acre. Buy your ticket to Sidney, Cheyenne County, Nebraska. Do not delay. Write today. Western Realty Co., Sidney, Neb.

CASH FOR YOUR PROPERTY wherever located. If you want to sell, send description and price. If you want to buy, send for our monthly. Northwestern Business Agency, 380 Bank of Commerce Bldg., Minneapolis, Minn.

FOR SALE, 10,000 acres, as a whole suitable for colonization purposes. Excellent land, millions feet of timber suitable for manufacturing purposes. Price \$5.00 per acre. B. M. Hungerford, Aitkin, Minn.

BARGAINS, KAY COUNTY, Oklahoma lands. We have them at from \$4,000 to \$8,000 per quarter, near Newkirk, the county seat of Kay County. Write Pochel & Dugan, Newkirk, Okla.

80 ACRE FARM for sale cheap, close to North Crandon, a place with two railroads. Good soil, easily cleared, some improvements. A. Itasmussen, North Crandon, Wis.

BIG BARGAINS—Kay County lands, 160 acres, smooth, less than \$40.00 per acre; 160 acres, smooth, less than \$35.00 per acre. Write Chas. E. Vogle, Newkirk, Oklahoma.

FOR SALE—Farms, farms and adjoining counties, ranches west special bargains. Write me what you want. A. M. Jewell, North Main Street, Hutchinson, Kansas.

OKLAHOMA FARMS—Write for prices. H. F. Stephenson, Kingfisher, Oklahoma.

## REAL ESTATE.

ARE YOU looking for a home? If so, don't buy before seeing copy of the Real Estate Journal. It has nearly 4,000 farms, city property and stocks of goods advertised in it, and reaches 45,000 readers each issue. Advertising sales 2 cents per word. Send 10c in silver for two months' trial subscription. Farm and Real Estate Journal, Traer, Iowa.

HERE IS A SNAP, MUST BE SOLD. California stock and fruit ranch, 1100 acres, fine residence, two barns, wagons, etc. 800 pure bred Angus goats, 12 cattle, 14 horses; \$30,000.00 worth of black oak timber, 12 miles from Napa, 47 miles from Oakland. For full particulars write, Crowe & Lewis, Inc., Dept. 4, 1056 Broadway, Oakland, California.

320 ACRE FARM in Sherman County, Kansas. 60 acres creek-bottom land, suitable for alfalfa, 200 acres level wheat land. Two miles to postoffice, school, church, and general store. Ten miles to town of 2,000 people. No improvements. Price, \$10 per acre. Apply to Albert E. King, McPherson, Kansas.

FINE DAIRY FARM—133 acres, 3 miles southeast court house with running water, brick house of 9 rooms, necessary out buildings, farm in high state cultivation. Price \$175 per acre to settle an estate. W. R. Wilkins, Station 6, Mrs. Alice Wynau, 2601 Logan, administrators, Des Moines, Iowa.

SNAP FOR RENTERS, quick action needed. 80 acre farm, 40 plow, 20 meadow, 20 timber pasture fenced, fair set small buildings; ready to move into at once. \$500 down, balance easy terms 7%. Whitney, Rosenberger & Thayer, St. Cloud, Minn.

120 ACRES, 5 miles from station, 10 acres seeded, buildings, good roads, school across road, no swamp or stone, \$1,200.00, one half down, balance terms to suit, 6 per cent interest. Other bargains. Fitzgerald Land & Loan Co., Tomahawk, Wis.

MONEY-MAKERS—There is none better than an irrigated farm in the Ordway district. Alfalfa, sugar beets, cantaloupes, small grain, fruit, poultry, bees and live stock are all money-makers here. Write Peck & Johnson, Ordway, Colo.

FREE—Beautiful illustrated booklet on Minneapolis. If you are thinking of moving, write for it. We are selling homes to many prosperous farmers and offer a big list of bargains. Nickels & Smith, Minneapolis, Minn.

FOR exchange, merchandise, hardware, houses, blocks, hotels and mills for farms, northern lands for southern farms. Land for sale cheap, improved or wild. American Land & Ex. Co., Minneapolis, Minn.

10,000 HOMESTEADS in Tripp county, S. D., to be given settlers by the Government. For full information write Gregory County Abstract Co., Bonesteel, S. D., enclosing postage.

FOR SALE OR TRADE, 320 acres smooth wheat land, Hamilton county, Kansas. Good soil; price, \$7.00 to \$10.00 per acre. Chas. Haas, Charleston, Iowa.

\$100 WILL BUY forty acres Missouri farm land, near town, clear title. Terms, \$10.00 down, \$5.00 per month. Address, Lock Box 144, Mt. Vernon, Ill.

BELLEW & CO., Wichita, Kansas, handle the best farms in Kansas and Oklahoma, also timber lands in all parts of the south. Write for list.

CHEAP—Two choice improved Iowa farms. Special low price for quick sale. Must be sold. Address owner, Lock Box 42, Sheffield, Iowa.

BEAUTIFUL HOMES in southwest Missouri, level prairie farms, no stone. \$30 to \$40 an acre. M. Wight, Iantia, Barton Co., Mo.

187-ACRE FARM in southern Iowa for sale. Extra well improved. A bargain. Address, Box 84, Decatur, Iowa.

SIX-ACRE POULTRY FARM for sale cheap. Address, Box 84, Decatur, Iowa.

## MISCELLANEOUS.

25 fine photos from any photograph 25 cents, size 1 1/2 by 1 1/2 inches, 15 nice post cards from any photograph 75 cents. Photographs returned unharmed. Satisfaction guaranteed or money refunded. Write Philip, Newlin Photo Co., 1369 East Ninth St., Des Moines, Iowa.

AN UNUSUAL OPPORTUNITY. As a special offer to introduce them for \$1.00, I will send postpaid an English Wade and Butler hollow ground razor, strop and brush. Satisfaction guaranteed or money refunded. John H. Bartram, Walden, N. Y.

GOOD TELEPHONE PLANT for sale or trade. Consists of town exchange, rural lines, 500 'phones. Will sell for cash half down; balance one and two years, interest 6%, or trade for good land. Address, E. Pease, Secy., Mt. Iamhill, Iowa.

CEMENT—Workers' Handbook tells farmers all about cement work. How to build walls, floors, walks, tanks, cisterns, blocks, posts, etc. Fourth edition revised; cloth bound. Send 50c to W. H. Baker, Wadsworth, Ohio.

START a factory on the farm, no machinery to buy, honorable, clean, profitable. We tell you how free. DeHaas Supply Company, Dept. II, 3215 Mt. Vernon St., Philadelphia, Pa.

WANTED—Hog and sheep raisers to send for our free booklet, "How to Build Cement Dipping Vat." Write a card today. The Home Medicine Company, La Harpe, Ill.

WOOL—Write for circular wool tying machine, makes profit 10 to 30 cents a fleece over old way. Geo. T. Underhill, Knoxville, Iowa.

MANLOVE AUTOMATIC GATE. Send stamp to secure valuable souvenir free. Manlove Gate Co., Milton, Ind.

MONEY \$ \$ \$—Reliable men write to John Hicks, Box 213, Cripple Creek, Colo.

WHAT have you to sell or exchange? Do you want to buy, sell or trade farm or grazing lands? Do you wish to sell live stock, dogs or other pets, poultry, poultry supplies, machinery, new or second-hand, implements, musical instruments, merchandise or, in short, anything that the farmer wants? If so, the best way to accomplish your purpose is by inserting an advertisement in the classified department of this paper. Only five cents a word for an advertisement in the greatest group of farm papers in the world, with 190,000 guaranteed circulation, covering the states of Iowa, Wis., Minn., South Dakota, Ill., Neb., Missouri, Kansas and Oklahoma. For further particulars, see announcement at top of this page.

## A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

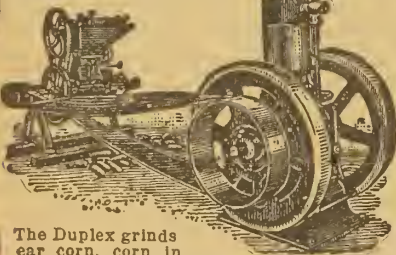

## Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

The O. S. KELLY WESTERN MFG. CO.  
DEPT. B, IOWA CITY, IOWA.

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### Advantages of Silo and Alfalfa for Dairy-men.

To the Editor of The Homestead:

To those who have adopted the use of the silo its advantages are ever apparent. My thought is to so present the facts that every man who owns a dairy, but not a silo, may resolve before the winter of 1907 that he will have one and thus be able to supply his cows, throughout the stable season, with a ration which as a milk producer closely resembles June pasture.

With the silo a vast amount of food can be stored in a small space. If the silo is just in touch with the barn so that its doors open inside the barn, it is an easy matter to take out the silage at any time during the winter. Where hay alone is depended on for winter's feed, it takes a good-sized barn to hold hay for a good-sized herd of cows, and often the farmer is deterred from getting more cows because he knows that his barn will hold no more hay than is necessary to feed the cows he has.

The cost of building the silo is more than offset by the saved expense of enlarging the old barn or building a new one. A chief economy in feeding silage is that the cellular structure of the corn plant has been preserved with all its juices, and this is easily digestible by the cows and helps keep their digestive organs in a good condition. Silage is not dusty as hay often is, and therefore there is no danger of filling the barn with millions of bacteria-laden particles when some of it is thrown down for feed. To cheapen the cost of production is the effort being put forth by those engaged in every channel of industry. New machinery supplants that which has been in use but a comparatively short time, because the manufacturer sees a lessened cost of production of the finished article. The silo will, without doubt, cheapen the cost of dairy production more than any other one factor of which the dairyman can avail himself, and it is good business judgment on his part to look at the facts as they are and determine if it would not be wise to adopt this approved method.

We make ensilage our main food. It is unnecessary to enlarge upon the value of ensilage, for every dairyman in the corn belt certainly knows the value of this great feed. I feed from thirty to forty pounds of ensilage per day in proportion to the cow. It is our intention for our cows to have all they want, and in the best condition. In the winter the ensilage is not removed from the silo until feeding time. The ensilage ration is balanced with corn-meal and bran, half and half by weight, and clover and alfalfa hay. The bran and corn-meal are fed in proportion to the period of lactation of the cow, and as much as she will consume at a profit. We feed our ensilage and grain the first thing in the

## THE OLD PAN WAY

50%  
MORE  
CREAM

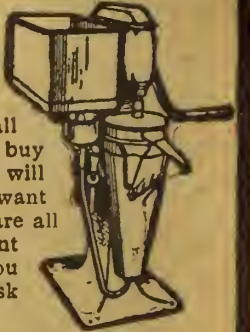

THE  
TUBULAR  
WAY

**DON'T PAY**  
The old pan way of raising cream don't pay—it's too mussy and fussy—too much work for the women. And it don't pay in dollars and cents because you actually lose 50 per cent of the cream you ought to get. You can increase your cream product about 50 per cent over pan setting; 33 per cent over cans set in cold water; 25 per cent over patent creamers or dilution cans by using the

## SHARPLES TUBULAR SEPARATOR

Besides you can skim the milk immediately after milking—save the handling and the expense of storage. A good milk-house costs more than a Tubular and isn't half so profitable—even if you already have the milk-house it will pay in labor saved, in crocks and pans saved, and the increase in cream will be all clear profit. Of course, when you buy a separator, you want the one that will get you the most profit—you'll want the Tubular—the reasons why are all given in a book which you will want and which we want to send to you free if you will only write for it, ask for book H. 121

Mr. Mac Tuttle, Danville, Ill., says "The first week we used the Tubular we made a gain of 12 lbs. of butter from five cows."

**THE SHARPLES SEPARATOR CO.,**

4 formulas, for Dairy Cows, Horses, Hogs and General feeding. If your dealer cannot supply you, send for **SPECIAL PREMIUM OFFER.** Our local agents are making money. Write for particulars, don't delay. We grind **ALFALFA MEAL.**

Quotations on application.

**TONIC STOCK FOOD CO. ELGIN, ILL.**

morning, then do our milking and separating, then feed at noon ten to fifteen pounds of clover and alfalfa hay. The same method is followed in the evening with ensilage and grain. We do not depend on grass alone more than ninety days in the year. Then if we have an ensilage left over from winter we feed about twenty to twenty-five pounds per day. If we have no ensilage we sow a small plot to oats and peas and begin feeding as soon as it will do, cutting from the field and hauling to the pasture each day. This is a more expensive way of feeding than the ensilage, but it is far better than to let the cows go hungry, for a hungry cow won't give milk.

I advise dairymen to grow more pro-

## GET DAVIS' PRICE

on a Cream Separator direct from the factory at real wholesale factory prices. Save 20% to 50%. Our improved 1907 model with wonderful cone bowl is a skimming device not equalled. It will double your dairy profits while cutting labor in two. We want you to have our 1907 catalog. Send postal or letter for it to-day—now, for money saving catalog No. 118.

**DAVIS CREAM SEPARATOR CO.,**  
541 N. Clinton St., Chicago, U. S. A.

tein feed upon the farm and not buy so much. I am sure that the plan is a good one and one that will pay under almost any conditions. What is the use of spending good, hard-earned money for rich concentrated feeding stuffs when we can just as well grow it for almost nothing, compared with what market feed costs? It certainly looks as if something were wrong with the farmer who persists in carrying on his farm and crop operations in the same old way, when he could just as well be profiting by new and better methods. The simple raising of more leguminous plants upon the farm will do away with the necessity of buying great bills of commercial feed in order to balance up the farm ration. When a ton of alfalfa hay contains nearly as much protein as a ton of wheat bran, which usually costs \$15 to \$20 per ton in the open market, and when one acre of land will produce several tons of the hay annually, it does not seem as if there would be much question as to which food produce is the cheapest for the farmer to use. The balance is greatly in favor of alfalfa hay. Clover, although not quite so rich in protein as alfalfa, furnishes a much cheaper source of this bone and muscle-making food. The matter of growing alfalfa need not greatly trouble the farmer, for, although it may be new to him and his soil, a little careful preparation before sowing and the proper attention afterwards will result in surprising success.

There is no reason why farmers should dislike to try new crops. The more interest involved in making the experiment which may result in introducing a more profitable crop should be enough to induce the trial. Investigation along these lines invariably leads to the increase of annual profit from farm as well as con-

# EASY TO OPERATE EASY TO CLEAN

**T**HERE are two things it pays to watch out for when you buy a cream separator.

**I. H. C. CREAM HARVESTERS** are of simple construction; are very easily operated and easy to clean.

Notice the natural and easy position of the operator in the illustration. The handle is placed at just the right height to turn easily. No high reaching or stooping over. The machine is also geared just right to make it run easily.

Another important feature is the low supply can,—one that is filled easily and yet the milk and cream spouts are high enough to make possible the use of large receiving vessels. The skimmed milk will flow directly into a ten-gallon milk can.

In many separators, either the supply can is high or the milk and cream spouts are low.

And because of their simple construction, **I. H. C. CREAM HARVESTERS** are easily cleaned. All you need is a pan of hot water and the two brushes which go with the machine.

These are but two of the good points of the **I. H. C. CREAM HARVESTERS**, and before you buy a cream separator, you will do well to learn all about them.

They skim close under all conditions, whether the milk is warm, cold, rich, viscid or old—they get all the cream down

to a thousandth part.

They are made so strong and simple that in years of operation, they show no perceptible wear. We have given them a practical test that equals several years' work in the dairy. Every machine is tested before it leaves the factory.

The working parts are self-oiling, and neatly housed to prevent accident; yet all are readily accessible, which makes them easy to keep clean.

**I. H. C. CREAM HARVESTERS** are made in two styles, and various sizes; **Dairymaid**, a chain drive separator, and **Bluebell**, a gear drive separator.

Call on local agent and inspect these separators or write for catalog.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A.**

(INCORPORATED)

**EXAMINE A  
PEERLESS  
CREAM SEPARATOR**

See the many points of superiority it has over all other makes.

The Peerless has a combination hollow and disc bowl. This one feature alone means a saving of the price of the machine over other standard makes.

You cannot afford to use a cheap separator if you can get one for nothing. Write for Special Catalog No. 9.

Waterloo Cream Separator Co.,  
Waterloo, Iowa.

**AGENTS WANTED For Mend-a-Rip**

Greatly Improved. Better than ever. Does all kinds of light and heavy riveting and stitching. Have it cost many times a year. A perfect Hand Sewing Machine and Sewer combined. Notice the Automatic Flyer which makes cost, even allowing TO show it means a sale. Agents make \$3 to \$15 a day. The agent makes \$24 first day and writes to hurry machine to him. Write for special agent price. J. B. Foote Foundry Co. Dep. 438 Fredericktown, O. (The Great Agents Supply House)

**SOLD ON 3 Months' Trial.**

1907 model gasoline engines, all sizes. Highest class, simple engines made. Three months' trial will prove it. For general information and prices address,

Holland Engine Co., Dept. 1, Cedar Rapids, Ia.

**Martin's Grinders**

Are the grinders that grind. What they save in gasoline will pay you to throw away your grinder and get one of these. All sizes. Sent on ten days approval. Sold direct from

**FACTORY TO FARM.**

Make what power you have. Mention Homestead and ask for free catalog.

**M. R. MARTIN,**  
St. Louis Park, Minn.

**BOWSER SWEEP MILLS**

Different from all others. 4 or 2 horses. Geared 10 to 1 or 7 to 1. Grind Corn with shucks or without. And all small grains including Oats and Wheat. (Also make 7 disc belt mills)

**E. N. P. Bowser Co., South Bend, Ind**

tribute to building up and retaining the soil fertility. Let it not be understood that I advocate the doing away entirely with grain feeds. Not at all, but by growing rough feeds that have a high per cent of protein the concentrated feed bill can be cut down materially and still our animals will receive a well balanced ration that will give the best of results.

J. P. Fletcher.

**The Wisdom of Cleanliness.**

To the Editor of The Homestead:

Every man who takes his pen in hand to write something on dairy topics always feels a temptation to emphasize the question of cleanliness. Because of that the subject has become hackneyed, and I suppose there is not one reader in ten who reads anything relating to that phase of the dairy question.

However, as every man sees things from his viewpoint alone, I have thought that someone might be interested in my viewpoint. I have been running a private dairy for about a quarter of a century, and during that time have had a great many different types of men employed. My greatest difficulty through all these years has been to impress these men with the importance of being clean about their work.

I have seen cows come in from the pasture during soft weather in the fall or in the spring through mud a foot deep. Naturally, in such cases their udders were more or less contaminated, and yet under these circumstances four men out of five will, if left alone, start to milk without going to the trouble of rubbing off or washing the udder. Under such circumstances, how can any man, no matter how skillful he may be, make good dairy products from milk that is drawn in that way?

Someone recently said that it is unfortunate that milk is not as transparent as water, as then all forms of filth would be easily detected. Because men do not see particles of filth that drop into the milk they are not impressed with the importance of keeping them out.

I will defy any man to make good butter no matter how carefully he handles his milk afterwards, if the milk is drawn originally from udders that are contaminated on the surface. The cream from such milk seems to contain some kind of undesirable organisms so that the butter is off flavor in every instance. If you will assign a certain number of cows to each of two men, one being cleanly in his habits, taking the precaution to rub off or wash filth from the udder, and the other a man of average habits so far as cleanliness is concerned, I venture to assert that if the milk drawn by each man is placed in a vessel by itself and allowed to stand for a period of twelve hours, even at a low temperature, that any man can tell by the taste of the milk which set of cows it came from. Now, if this is the case, it is even an easier task to distinguish between the butter made from two lots of milk, because in the butter you have the resultant product of the undesirable germ's work.

Now, I do not mean to be cranky on

**LOW TEMPERATURE  
CREAM SEPARATORS**

Ability to SKIM CLEAN at LOW TEMPERATURE is an other important consideration in the purchase of a cream separator and one of the chief DIFFERENCES between the DE LAVAL and other makes of separators.

The ordinary cream separator is capable of doing reasonably good work only with milk at a temperature of over 80 degrees. When the temperature is lower the skimming is so poor that the loss of butter-fat is great, while only a very thin cream can be run, and with most machines the bowl soon clogs and will not skim at all.

Farm separation is usually made above 80 degrees, but every user knows that there are frequently times when the milk must be separated cooler, unless a lot of trouble is gone to in heating it which must injure the quality of the cream and butter.

The superiority of the patent protected "ALPHA DISC" type of bowl construction used in the DE LAVAL machines is such that temperature makes little difference in results.

This is something so important in factory operation that it is one of the reasons why the creamery use of DE LAVAL machines is almost universal. Surely the buyer of a farm separator makes a mistake to overlook it.

**CLIP YOUR HORSES IN THE SPRING**

**WITH THIS NEW STEWART CLIPPING MACHINE**

Clipped horses look better, feel better, work better, and are less liable to take cold. Don't let your horse stand all night with a heavy, damp coat of hair on. It weakens them and they lose flesh. If clipped they dry quickly, rest well and their food does them good. It is built strong with file hard cut steel gears enclosed and running in oil. There is little friction and practically no wear. All progressive farmers and horse-owners now clip in the Spring, and this is the machine to do it with. Order one now. Send \$2.00 with your order and we will ship C. O. D. for the balance. Write for our big new catalogue, which shows the largest line of clipping machines in the world. It is free. Send today.

**CHICAGO FLEXIBLE SHARP COMPANY, 234 Ontario Street, CHICAGO**

the subject, but want to insist that every dairyman should keep available in the stables a few clean cloths and insist upon it that the udder and flank of a cow shall be wiped off in every instance before milking begins. The time required to do this is not an item of

any importance whatever, and yet it will, day by day, result in making the difference between high-class dairy products and those of medium or even poor quality. I do not think it is always necessary to wash the udder, a dry cloth in most cases, in my opinion, being sufficient to remove all kinds of contaminating material that will be liable to come in contact with the milk during the milking process.

This matter of rubbing off the udders should become a fixed habit never to be omitted any more than one would think of omitting the dairy cow's grain ration at feeding time. Good habits become fixed in one's character almost as easily as bad habits, where there is a will to have the right kind fixed. If you are engaged in dairying get into the habit of being clean at milking time.

A Dairy Crank.

**FILES CURED IN 6 TO 14 DAYS.**  
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded.

**GRINDERS THAT GRIND**  
This is a phrase that may well be applied to the grinders manufactured by the M. R. Martin Manufacturing Company, of St. Louis Park, Minneapolis, Minn. They have confidence in their grinders to such an extent that they will ship you one on ten days' free trial. The grinder is one of light draft, guaranteed to grind more feed with less power than any other mill. The grinders are built any size desired, the No. 16 grinding 100 bushels per hour. The price range from \$18 to \$50, according to the size. They are well built, and will outlast any other mills of some price, because the burrs do not touch while grinding, and it is built on a heavy metal base. A handy device is provided so that the feed, when ground, falls into sacks, saving the second handling. This paper taken pleasure in speaking for the goodness of these Martin grinders, and would deem it a favor if you would mention us when replying to their advertisement which appears on this page.

**The Cream Separator You Use  
Is It Anything Like Ours?**

Does it require a special kit of 14 or 15 tools or can you take care of it with only the bowl wrench?  
Does the bowl run "in the open" so that it may be stopped instantly, or do you have to wait for it to "run down"?  
Does it turn hard or easy?  
Does it give you constant trouble, necessitating numerous visits by an expert to make it "stick"?  
Does it satisfy you or not?

Does it have a bearing at the top of the bowl, as well as at the bottom, thus overcoming vibration?  
Does it deliver both skim milk and cream from the bottom of the bowl, so that the bowl drains itself?  
Can you stop the bowl, take it from the machine, clean it thoroughly and replace ready for work again, in three minutes?

**The OMEGA  
CREAM SEPARATOR**

is the only cream separator that really meets and fills all the requirements of the modern farmer who wants a modern machine. We want to show you why and prove our claims. That's all we ask. Don't you think it worth investigating?  
Send today for catalogue, guaranty and our booklet, "More Milk Money."

**The Omega Separator Company, 35 Concord St., Lansing, Michigan.**

# Your War on Weeds

The use of special-purpose tools for weeding means a big saving in time and labor.

With them more work can be done in less time than with ordinary tools, and profits on crops thereby increased.

True Temper Weeders are constructed for particular kinds of work, and there is a tool for every need.

They help to cover the ground more quickly and thoroughly. Notice the True Temper Hand-Cultivators also.

They are formed on the same principle—special adaptation to the work for which you use them.

Not only Weeders and Cultivators, but Forks, Hoes, Rakes, Hooks, Beel Tools, Garden Tools, Floral Tools—every desirable kind of farm and garden hand-tools.

**"The best tools you have ever bought at the same prices you have always paid."**

"You know a tool is just right when it is True Temper," because no tool receives that label at our factories until it has been tested and inspected.

It must prove true in quality, construction, "hang" and temper.

Ask your dealer for True Temper tools.

You'll get some valuable pointers about special-purpose tools from our **FREE BOOK**.

"Tools and Their Uses." Write for it today.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### HORTICULTURAL NOTES.

We examined the strawberry bed a few days ago. It was difficult to get about on account of the mud, but once we got our feet upon the mulch there was no further difficulty as the ground beneath was still frozen solid. We dug through the mulch and found the leaves fresh and green and the crowns in fine condition.

Yesterday we passed a strawberry patch which had not been covered. The plants were seared and brown. If the alternating thawings and freezings of the past week continue, we predict that these unprotected beds will be greatly damaged. Where the plants, though unprotected, have not been damaged mulch is still a necessity. It will serve a good purpose in keeping down weeds and in keeping the berries clean.

The man who is growing strawberries commercially should get his boxes as early as possible. There is often a shortage as the season progresses, especially if there is a large crop in Arkansas and Missouri. We have seen quart boxes sell as high as ten dollars a thousand before the season was over. The ordinary price is about one-fourth that much.

A cow in the orchard at this time means destruction, for she is sure to break and damage the trees by rubbing them.

The wife of one of our neighbors set before us a few days ago a pitcher of sweet apple cider. Her method of preserving it was by boiling three gallons down to one and then canning in glass jars the same as fruit.

Many hot bed failures are due to a mistake in putting in the manure. The manure should be fine—no coarse chunks. It should be spread in layers about four inches thick. Each layer should be tramped until the mass becomes firm and springy, but not soggy. This insures equal heating without which no hot bed can be a success.

A man who recently bought a place just outside the corporation limits of a city of ten thousand, on which there is an orchard of about one hundred and fifty large apple trees gave us some of his experience a few days ago. He said he had gotten good returns from his Duchess and Wealthy trees and had found a market for the fruit. The Ben Davis had done only fairly well, far from satisfactory. The Jonathans and Winesaps and other winter varieties had done scarcely anything, and a row of Russets, across the orchard were not near worth the ground they occupied. Coming when we are advised to "plant more winter varieties of apples," these remarks are significant. We believe they bear out the common experience north of the southern third of Iowa.

### Alfalfa Experiences.

To the Editor of The Homestead:

In this paper I shall outline causes that tend to successes and failures in securing a stand of alfalfa in order that in my next I may present the seeding as concisely as possible.

It seems that with no crop has there been the trouble in securing a stand that has attended the seeding of alfalfa. On this account many men and many communities are now without this wonderful plant where it would be of inestimable value and where I confidently believe it can be grown.

We were the pioneers in the introduction of alfalfa in this county and knowing nothing of growing it, our first venture in the eighties was not a brilliant success. This seeding producing less than a half stand, was allowed to remain a year or two in the fond delusion that it would "thicken up," not understanding the nature of the plant. No further attempt was made until 1896, since which time a number of seedings have been made with unvarying success, except in one case mentioned later.

Alfalfa will not grow on acid land, but I do not suppose that there is a great amount of this land being farmed.

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 60 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16

**5 VARIETIES** of seed corn for sale at \$1.25 per bu., ear or shelled. Satisfaction guaranteed or money refunded. Alex James, Rt. 1, Shenandoah, Ia.

### Save Your Crops From Insects

You can secure absolute protection from the ravages of all leaf-eating insects by spraying with

## Swift's Arsenate of Lead

This is the best insecticide for all insects feeding upon foliage, and in fact the only insecticide that will destroy every species. It has the further advantage of sticking to the foliage after application, so that rains will not wash it off. It cannot burn or scorch and is used without danger in application.

Write for booklet telling all about the use and value of Swift's Arsenate of Lead, and giving recommendations of leading growers. MERRIMAC CHEMICAL CO., 41 Broad St., Boston, Mass.

## Do You Want to Farm it Right?

Then sow our Hardy and Reliable Northern Grown Seeds most productive everywhere. We make it a specialty to grow from pedigreed Seed Stock, on our own farms, right here at Fairbault, Minn., all the Standard varieties of Seed Grain, Seed Corn and Seed Potatoes. We also offer novelties of wonderful productiveness, of our own origination. Try our Canadian Giant Oats, a giant on account of stiff straw and enormous yield. Our Canadian Chief Wheat, produces large, plump grain and heavy crops. Having such heavy chaff, it resists smut, rust and blight better than other kinds. For 10c. we will send samples of pedigreed Seed Grain, also sample of Fairbault Jewell Corn, earliest, largest, best yielding Yellow Dent Corn. Spring catalog, English or German, free. Write for it. Farmer Seed Co. Wm. Kueker, Mgr. Box 14, Fairbault, Minn.

borders on the acid or where the humus has been depleted.

I believe that the majority of the farmers fail in the preparation of the seed bed. The subsoil should be firm enough to promote the free movement of soil water through percolation or capillary attraction as the case may be, yet not so hard as an unbroken sod would present. The surface soil should be loose and fine enough to present the best condition for plant growth and to check evaporation, an important matter anywhere. For this reason I do not like to sow on freshly-plowed land, but much prefer to take a field that has been plowed the year previous. A corn field that has been well tilled is perhaps the ideal field, yet if one wishes to sow in the fall this will not be available and in that case the stubble land offers the best opening.

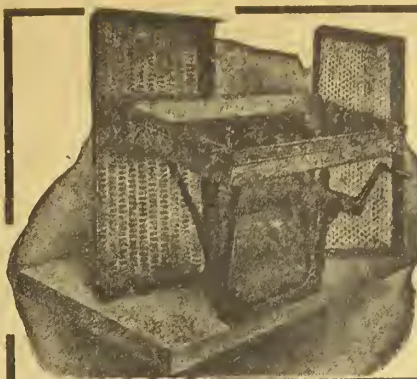

Fall seeding has its advantages if there be moisture enough to sprout the seed. The plant does not have to contend with weeds in its infancy and the farmer does not lose one year's use of the land; on the other hand if the winters are extreme there is some danger of winter killing. If alfalfa is sown the middle of August, the plant will be strong enough to stand all but the extreme winters and the next season will yield three fair crops of hay. The maximum yield, all conditions being equal, will probably be reached the fourth year.

I do not believe in sowing alfalfa with a nurse crop, though I have seen good stands secured in that way, but the danger of loss in one of three ways is too great to justify the risk. If the season is dry, the so-called "nurse crop" may take up all of the moisture and the alfalfa suffer for want of a drink. In a wet season the nurse crop may grow rank enough to smother the young plants; or, after the nurse crop is taken off the hot, bright sun beating down on the tender and hitherto shaded plants will cause them to suffer and possibly die. Then, too, there will be no protection to the ground, as where the weeds are clipped and left, nor any way to break the soil surface so that evaporation will not be checked and go on to the injury of the alfalfa plants if any yet remain.

If spring sown, alfalfa must be clipped two or three times the first season to keep down the weeds, but this must be done intelligently or you may do your work ever so well and yet lose out at this stage of the game. Alfalfa is not a grass and the stem does not continue to grow when the end is clipped off, but new shoots must come from the crown, but there is no crown until the plant has blossomed the first time. So if you must clip before the young alfalfa has come into bloom, be sure that you clip as high as you can, so that as many leaves as possible may be left on the stem. If you cut off all the leaves you have ruined your alfalfa. The leaves are the breathing organs of the plant and must be allowed to carry it on to the blossoming time or "crowning time."

We believe in harrowing the alfalfa the spring of the second year to loosen up the surface soil, to break the crust, to aerate the soil, to check the evaporation and kill the young weeds. After this we advise disking each spring as the plants begin to show green. If you doubt the efficacy of this in increasing the yield, just try it on a small scale and be convinced. To show that a harrowing may be beneficial allow me to illustrate: We sowed a field one year that was not fenced separately and lay directly between a stalk field and the pasture gate. The cattle tramped it that winter till it was as hard and as bare as a floor. In the spring when other fields were quite green this one was only showing here and there a green sprout and I feared that the stand had been destroyed. One morning after a light rain I sent a man out to harrow the field. In two days the transformation was a sight for sore eyes. The plants were there, but could not come through the hard crust. This incident, too, may go to show the grief that alfalfa will stand when you consider the fact that this was the first winter and that it was not only unprotected, but that the soil was packed as hard as it could very well be and that it made an excellent stand.

Alfalfa seed is too high, help too scarce and land too valuable to justify a man to make his own experiments from the beginning, so I am impelled to treat this subject at greater length than could generally be given to one subject at one time. I will now name the only failure to

## HUNDREDS IN SUCCESSFUL OPERATION

Hundreds of up-to-date farmers use Delany's Seed Corn Sorter and are enthusiastic in its praise. It increases the yield per acre by improving the work of the planter.

Many users state that they can obtain an almost perfect stand by its use. Figure out what that means in dollars and cents.

It costs less than other sorters and does better work because it does not fall over good seed as continuous flow machines do.

Its use on one acre will more than pay for it, not counting the time saved in planting.

Send for free Seed Corn Booklet C, showing our line of Sorters.

Get your orders in early.

J. F. DELANY, COLONA, ILLINOIS

get a stand that we have met with, not counting two by reason of the grasshoppers against which we were not able to cope. Last spring I found that the hogs had destroyed the stand in one of the pastures by too close pasturing, and not wanting to lose any time and as fall seeding is not to be relied upon with us, August often being too dry, I had the ground plowed; having been in hog pasture disking was practical. The soil was then packed with a disk in lieu of a subsurface packer and the seed immediately sown. But nowhere except where the horses had tramped in turning at the corners did any seed come up. Later a heavy rain packed the soil and more plants showed up, but when spring comes I do not expect to

see a full stand. Possibly uniform success bred recklessness, not to be tolerated with \$10 seed. H. D. Lute.  
Keith county, Neb.

#### Locating an Orchard.

To the Editor of The Homestead:

I notice in a recent issue an inquiry from Washington county, Kan., in regard to establishing an orchard and will give a few pointers.

If possible, select ground that is sloping to the east or northeast and not too wet. After your ground is well prepared the most particular part of the whole business is to select the trees. If you order them from a nursery first examine the roots and see that they are fresh and lively. Never mind what the agent says about the top of the tree; he will fool you if you don't attend to your own business. The top may look all right and the root be dead. You can shape the top at any time, and in pruning be sure to balance the tree.

Don't set closer than thirty feet apart for apple, and set one peach tree between one way and when the apple trees begin to bear, cut out the peach trees. You don't want any windbreak around the orchard in the latitude of Washington county, Kan., for fear of sun scald. It is the winter and early spring that burns the trees; summer sun never hurts the body of the tree. The windbreak will cause the sap to start early, so give the trees all the wind there is in motion and your fruit will not kill in March or April.

In 1867 I set out an orchard in Pawnee county, Neb., and the old orchard is still producing fine fruit on forty-year-old limbs that reach thirty-six feet from outside to outside. Subscriber.  
Pawnee county, Neb.

#### BABY'S TORTURING HUMOR.

Ears Looked as If They Would Drop Off—Face Mass of Sores—Cured by Cuticura in Two Weeks for 75c.

"I feel it my duty to parents of other poor suffering babies to tell you what Cuticura has done for my little daughter. She broke out all over her body with a humor, and we used everything recommended, but without results. I called in three doctors, they all claimed they could help her, but she continued to grow worse. Her body was a mass of sores, and her little face was being eaten away; her ears looked as if they would drop off. Neighbors advised me to get Cuticura Soap and Ointment, and before I had used half of the cake of Soap and box of Ointment the sores had all healed, and my little one's face and body was as clear as a new born babe's. I would not be without it again if it cost five dollars, instead of seventy-five cents. Mrs. George J. Steese, 701 Coburn St., Akron, Ohio."

#### A STRAWBERRY BED FOR ONE DOLLAR.

Every member of the family looks forward to the coming of strawberries. The big, mellow, luscious kind that can be found only in the farm garden. Located at Woodward, Iowa, is the firm of J. L. Todd & Son, formerly of Atlantic, Iowa. For \$1 they now offer to send their customers 300 strawberry plants, all healthy, vigorous stock of leading varieties, such as the Senator Dunlap and others. With your order you will also get printed instructions on how to plant and care for the bed. Three hundred plants for \$1. Write at once and have your order placed, as at these prices the supply will not last long. On page 4 will be found the advertisement. Address your letter to Messrs. J. L. Todd & Son, Woodward, Iowa.

#### A NEW DEPARTURE IN SEED CORN.

We are in receipt of a catalog of The Gateway Nursery Company, of Le Mars, Iowa, who have inaugurated a new departure in the seed corn business, and are now selling under the Holden test. They are offering eight varieties of corn, among which are Reid's Yellow Dent, Yellow Special, White Pearl, Iowa Silver Mine, Minnesota No. 13 and other standard sorts. Their descriptive catalog of hardy fruit trees, ornamental trees, shrubs, evergreens and all kinds of shrubs is now ready to mail, and they will send it to all who send their name and address. If any of our readers want seed corn or fruit trees we would urge them to write the above firm. They will fill your order to your satisfaction.

#### AN IOWA FARMERS' SUPPLY COMPANY.

At West Branch, Iowa, is located the Farmers' Supply Company, who are offering in our columns a roofing which they sell direct to farmers and builders. Great claims are being made for the brand, which is guaranteed to be just as represented. As the material has no sand coating there is no chance to cover up defects. For the standing of this supply company we refer you to any good citizens or state bank. See page 23 for quotations of this roofing.

\$58.40 PER ACRE.

Out in Page county, Iowa, there was a lot of farmers made good money last year

## Will You Just Try a Pair of RUBBERHIDE BOOTS

At Our Risk The Rubber Boot With a Sewed Leather Sole

You want a boot that will keep your feet perfectly dry that will keep your feet comfortable that will give you long and durable service, and that will be genuinely economical. Then try the Rubberhide Boot at our risk. It lasts longer; is more comfortable and gives better service than any other rubber boot in the world. It is the only rubber boot with a sewed leather sole. Made of the purest rubber, with heavy leather outsole, and leather innersole, with a rubber welt and middle sole, all joined together (without pegs or nails), and joined to the upper so securely that a team of horses can't pull them apart. And not a drop of water can find its way in. The heavy leather sole protects your feet from stones and rough surfaces, and does not cut or snag when you step on a nail or a sharp stick.

#### It can be easily resoled

Any cobbler can "tap" or half-sole the Rubberhide. The uppers are so good that they will outwear two or three pairs of soles. The inner sole of leather prevents excessive perspiration which makes the ordinary rubber boots such a nuisance. The Rubberhide is the only absolutely water-tight boot made; It will last longer than two or three pairs of rubber boots; It will keep your feet comfortable all the time; It is the most economical boot made.

#### Will you just try a pair at our risk?

##### NOTE THIS GUARANTY—

If you buy a pair of Rubberhide boots and find that they do not outwear two pairs of best quality rubber boots, we will refund to you the money you paid for them.

(We say two pairs but in reality experience has proved that usually the Rubberhide outwears three and even four pairs of ordinary rubber boots.)

If your dealer cannot supply you, and will not order for you,

#### SEND TODAY FOR CATALOG

and get a pair on our money back guaranty. We prepay express charges.

## FREE! THE FINEST SPREADER BOOK EVER ISSUED

I'll send you this big, handsome book FREE for your name and address on a postal. It's a book you ought to have—for it gives a lot of valuable information on the question of Fertilizing. It tells you how to increase the value of your crops—and of your land. Shows big photographs of the

#### AMERICAN MANURE SPREADER

and tells you how a Spreader will pay for itself by increasing the size and quality of your crops. This book gives detailed description of the celebrated American Manure Spreader

#### Sold On Time And On Trial

Tells you the style and size of machine you need for your particular farm—and gives you points on the question of Fertilizing that every up-to-date farmer will be glad to have. Write for this book at once—I'll send it FREE—and pay the postage on it too. Send your postal NOW—before the books are all gone.

**W. W. COLLIER, Gen'l. Mgr.**

American Harrow Co., 153 Hastings St., Detroit, Mich.

growing "Diamond Joe's Big White Corn," a new variety originated by the Rakekin Seed House, of Shenandoah, Iowa. In fact, all who planted it grew record-breaking crops, obtaining from 100 to 125 bushels per acre, one farmer making an average yield of 146 bushels per acre, which he sold on the market for forty cents per bushel, netting him \$58.40 per acre. We have before referred to this new and wonderful variety of corn, and have just arranged with the Rakekin Seed House, whereby a copy of their new seed book, illustrating this corn, will be sent free to all who will mention this paper. The address is Rakekin's Seed House, Shenandoah, Iowa. It is a very instructive book and every corn-growing farmer should have one. Send for it today. See advertisement on page 11.

#### PLANTER'S SEED TABLE.

As a rule one never places his seed table where it can be found. A reliable table of this kind comes very handy at planting time and is well worth preserving. It is impossible to remember the exact amount of every variety of seeds that are sown, so one must frequently refer to data. The A. A. Berry Seed Company, of Clarinda, Iowa, are remembering their customers this year with a seed slip or table showing the weight of a bushel of seeds and the amount to sow per acre. This seed company are well prepared to fill orders for all kinds of garden seeds, as well as field grains and seed corn. Send for their catalog of seeds at once if you have yet to make out your order.

**SEED CORN THAT FAILS TO GROW** makes a man all sorts of trouble. Some people have become so accustomed to re-planting a good share of the corn that it has almost come to be considered by them as a necessary part of the business. This kind of farming is accountable for many of the failures on the farm. Labor is too valuable to waste. The cost of the seed is a small consideration. Be absolutely sure that your seed will grow. If it fails then place an order with some good, reliable seed house for your supply. For this we would refer you to Messrs. J. B. Armstrong & Son, of Shenandoah, Iowa. They also sell other field seeds. See this page.

#### SAVING COAL AND WOOD.

Farmers without an evergreen windbreak ought to start one this coming season. It is a great protection and a saver of heating material. A good way to start one at little cost is to write the Gardner Nursery Company, of Osage, Iowa. They are giving away four evergreen seedlings free to all who ask for them. These trees will grow and in a few years surprise their owner with their

**A BIG GARDEN**  
The year of 1906 was one of prodigious plenty on our seed farms. Never before did vegetable and farm seeds return such enormous yields. Now we wish to gain 200,000 new customers this year and hence offer for 12c postpaid:

1 pk. Garden City Beet	10c
1 " Earliest Rippe Cabbage	10c

Monsees & Sons' Record-Breaking Jack and Jennet Sale.

The thirtieth semi-annual sale of jacks and jennets held on March 5th, by Messrs. L. M. Monsees & Sons, of Smithton, Mo., at their Limestone Valley Farm, was a record-breaking event. The offering was by far the greatest one of jacks and jennets ever made in the history of the business, buyers being present from such remote points as New Mexico and California. Two years ago the Monsees sale broke all records, when twenty-nine jacks sold at an average of \$704.14, with a \$1,405 top and only three jacks selling for over \$1,000. Last year these gentlemen again broke all records, selling thirty jacks at an average of \$856.16, with a \$1,600 top and nine jacks selling for over \$1,000 each. This year all records were again broken, when thirty-six jacks sold for an average of \$904.86, with a top of \$1,670 and thirteen jacks selling for over \$1,000 each. Eleven jack colts—yearlings and short two-year-olds—sold for an average of \$380.45. Seventeen jennets sold for an average of \$168.53. Several jennets not bred were included and cut the average. Two three-year-old mules sold for \$580, making the grand total of the sale over \$40,000. Colonels Harriman and Sparks conducted the sale and were assisted in the ring by Colonels Snyder, Burger, Harkles, Wells, Zaun, Ross and Hieronymus Bros. The day was the finest that Messrs. Monsees & Sons have had for several years and few larger crowds have ever attended their sales. Sixty jack men arrived Monday and every train to noon of sale day brought men from a distance. Following is a list of all sales:

JACKS.	
Limestone Wonder, five years, J. F. Schroeder, Mora, Mo.	\$1,670
Black Wonder, four years, R. T. Burge, Roswell, N. M.	1,300
King Harger, four years, Oscar Miller, Laomi, Ill.	1,000

**SUMMARY.**  
36 jacks ..... \$32,575; average.. \$905.14  
11 jack colts.... 4,185; average.. 380.45  
17 jennets ..... 2,865; average.. 168.53  
2 mules ..... 580;  
Twenty high-selling jacks sold at an average of \$1,104. Last year twenty head averaged \$1,067.

### The Hendershot Sale.

The sale of pure-bred Percheron stallions and jacks made by Mr. O. P. Hendershot, of Hebron, Neb., on March 5th, was very successful on the number sold. Although there did not seem to be buyers enough for all the offering, those that were sold went at a very satisfactory price. The top price of the sale was \$1,425, paid by Mr. R. H. Pigg, of Benkelman, Neb., for the great jack, Champion, first-prize winner at the Kentucky State Fair in 1905 and 1906. This was surely one of the greatest three-year-old jacks offered anywhere this year. Six Mammoth Kentucky jacks were sold for \$5,925, making an average of \$87.50 on the lot. The great black Percheron stallion, Bravado 34609, got by Samson 21760, sold to Messrs. Johnson & Meyers, of Bradshaw, Neb., at \$925. Mr. Frank Jameson, of Trenton, purchased a plum in Billy Burkhart at \$975. The crowd seemed eager to purchase the mares offered and four head sold at an average of \$472.50. Below is a list of the buyers:

JACKS.	
Champion by King Giant, R. H. Pigg, Benkelman, Neb.	\$1,425
Dr. Wm. Brown by King Giant, W. H. Humphrey, Imperial, Neb.	1,375
Contest Jr. by Contest, G. E. Norwood, Nelson, Neb.	825

## What Co-operation Has Done Farmer's Friend Separator Costs You Only \$55 Delivered

WE farmers of Iowa have broken away from the creamery trust and are manufacturing and marketing our own dairy products. During the past eight months, we have forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa.

Now we are saving money in another way—on farm supplies, and our offering of the Farmer's Friend Cream Separator gives you a fair idea of the saving.

This Separator is made for our members in the best cream separator factory in the world, and we fully guarantee it to be as good as any \$90.00 Standard separator ever made.

Just think of the difference in price, \$35.—Thirty-five dollars just as good as thrown away as far as you are concerned. Thirty-five dollars—not of separator value and efficiency, but of big profits for the manufacturers. It was only by getting nearly 2,000 farmers together, (there are more of us now) that we could force this reduction.

But we have it now, and we want every farmer in this part of the country to know about it. We organized to benefit the farmer and we want to help just as many as we can. Space will not permit us to describe the "Farmer's Friend" fully here. Send for our catalog. We have selected a number of articles on which we are able to offer remarkably low prices. We save you from 20% to 50%. Write today.

FARMER'S CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.

Capacity, 450 to 500 Lbs.

## PILES, FISTULA AND OTHER RECTAL, BOWEL AND STOMACH TROUBLES ARE DANGEROUS IF NEGLECTED

### DR. WILLIAMS PROVES HIS CLAIM.

On page 25 Dr. Williams makes a statement which is somewhat startling. He offers to give to any reader of this paper who is suffering with catarrh one month's treatment free. Certainly he could not afford to do

this if he was not sure that his treatment will positively cure catarrh. In order to prove to every person afflicted with catarrh in any form that his treatment will effect a cure even though other remedies have failed, he is willing to stand the expense himself for the first month's medicines. He will also send his free illustrated book, "Catarrh and Its Cures." The doctor gives each person personal attention and will make a diagnosis of your case and give an honest opinion without charge. Write him if you have not already done so. His address is 408 Flynn Bldg., Des Moines, Iowa.

Imported Shire stallion, owned by Trumans' Pioneer Stud farm, Bushnell, Ill., and Kansas City, Mo. Thirty head of such stallions as above have been selected for the forthcoming auction to be held at Kansas City, Mo., March 27th. See field notes.

## HATCH ALL Incubators Will Hatch Your Eggs

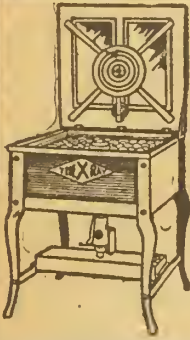

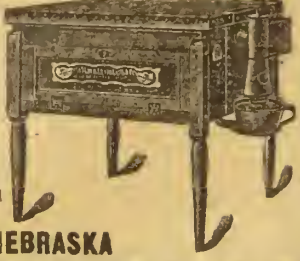

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

HEBRON INCUBATOR CO., Box 8, HEBRON, NEBRASKA

## Save 2/3 Expense

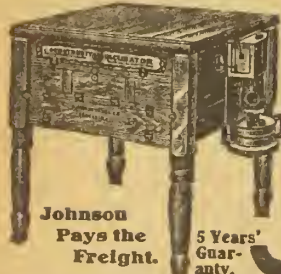

More than 2/3 saved in oil and time by using the X-Ray Incubator. One filling of lamp makes the entire hatch. Egg tray not removed during the hatch. Glass top, and thermometer in plain sight. Lamp need not be removed during the hatch. Automatic wick trimmer, chimney need not be removed. Flame is turned down automatically when hot enough. Eggs aired and turned by simply lifting the lid. The X-Ray Incubator is entirely different from other incubators. You should know about this before buying. Catalogue free.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### CHICKEN CHOLERA.

A subscriber submits the following inquiry:

I wish you would please send me a specific cure for chicken cholera. No doubt you are posted as to cures for poultry diseases. I have a valuable flock of Plymouth Rocks and I am losing them with cholera. Possibly your correspondents to the poultry department are prepared to give valuable recipes for cholera. Please answer as soon as possible.

Our correspondent takes it for granted that the trouble in this case is cholera. Since no symptoms are given, it is not possible to say whether the diagnosis is correct or not. True fowl cholera is very rare in the United States, many forms of digestive and bowel trouble being loosely and incorrectly called by that name. Remedies are of little or no use in real cholera, as the disease usually runs its course very quickly. The symptoms, as described by Dr. P. S. Woods in Reliable Poultry Farm, are as follows:

Loss of appetite, great thirst; drinks water eagerly until it cannot retain the water in the crop, and spills it whenever head is lowered. Bird has high fever, and the bulb of a thermometer placed close to the flesh under the shoulder will often register a temperature of 108 to 110 degrees. Legs hot and dry. The crop is usually distended with food which cannot pass, owing to paralysis of that organ. The bird is stupid with sleep, bunches itself into a dumpy ball of ruffled feathers with wings drooped, and avoids the rest of the flock. The comb is pale, almost white; face and wattles appear bloodless; eyes are dull and mostly closed. Flesh and strength are rapidly lost. Frequently the birds falls when trying to move, and is unable to rise. Diarrhea is always present, and is one of the chief symptoms. At first there is a slight looseness; that part of the excrement which in health is pure white, becomes yellowish or yellowish green. Copious diarrhea of glairy mucus follows, and it may be streaked and frothy. The droppings are voided frequently, and vary from deep yellow in color to mottled green and yellow. The excrement is thin and often frothy. The vent often seems raw and scalded. Convulsions frequently precede death, the bird appearing to be in great agony, often uttering sharp cries of pain.

Examination of the body after death of a fowl dying from true cholera shows full crop, discolored and inflamed intestines, liver greatly enlarged and soft, being filled with dark blood. Gall bladder distended; contents thick and dark green. Kidneys and the small tubes leading from them are usually filled with yellow or yellowish green masses. Ulcerations in and about the vent.

The chief symptoms in diagnosing cholera are: A rapidly fatal, wasting disease, accompanied by copious, yellowish green or deep blue green diarrhea. Frequent discharge of excrement. Pale face, comb and wattles. Sleepiness, which may last until death. Infection of a large part of the flock.

No attempt to treat birds sick with true cholera should be made. For the safety of the rest they should be strangled and burned. No particle of the flesh or blood of the diseased bird should be permitted where a fowl might get it and become infected. This disease is so very infectious that a case anywhere endangers the flocks for miles around. It may be transmitted by wild birds, flying from place to place. It has been known to be carried on the feet of people.

Kill the very sick birds and quarantine those slightly ailing. Give these isolated birds a few drops of creolin in their drinking water, (just enough to turn it faintly milky), or give them drinking water in which has been dissolved one-tenth of a grain tablet of corrosive sublimate to the quart of water. A good home remedy in any severe diarrhea, is to drop twenty or thirty drops of spirits of camphor on sugar and dissolve the whole in a pint of water; place this before the sick birds and allow no other drink.

It may be that our correspondent's birds have enteritis, or inflammation of the bowels. This is much more common than cholera, although it is often called by that name. For severe diarrheas and dysentery, the following pill, to be taken twice a day, is strongly recommended: Five grains powdered chalk, five of rhubarb, and three of cayenne pepper, adding half a grain of opium in severe cases.

### DISTINGUISHING MARKS OF GANDERS AND GEES.

A subscriber sends in the following query:

I would like to be informed as to the distinguishing marks of the Toulouse goose and gander. I am not able to tell them apart. Please enlighten me.

Box 38 Racine, Wis.

between the Toulouse gander and goose, there are certain characteristics which are well defined. The head of the goose is smaller and narrower than that of the male, while the latter has a thicker neck and general masculine appearance. Perhaps the most noticeable difference is in the voice, that of the female being coarser and harsher than that of her mate.

At this time of year the goose may be seen sitting around, covering her feet as much as possible, busily engaged in picking up straws and things of that kind, evidently dreaming of nest-building, while the gander holds himself

above any such domestic considerations. Close observation and study will soon familiarize any one with the differences and peculiarities, so that there will be little trouble in determining this often vexatious question.

## POINTERS.

—Mr. J. M. Janssen, of Sibley, Iowa, offers Barred Plymouth Rock eggs for sale on page 16. He is selling fifteen eggs for \$1.25, or thirty for \$2.

—Mr. E. R. Stillson, of Montezuma, Iowa, can furnish Homestead readers with Buff Plymouth Rock eggs. His advertisement appears on page 16.

—Mrs. O. W. Thomas, of Manchester, Iowa, is offering Silver Laced Wyandotte eggs for sale at a very low price in her advertisement on page 16.

—Mrs. J. T. Cooper, of Williamsville, Ill., advertises on page 16 of The Homestead that she has White Plymouth Rock eggs and Indian Runner duck eggs for sale.

—Eggs from prize-winning Black Langshans, bred exclusively by Mr. W. W. Baskerville, of Earlville, Iowa, are offered for sale in his advertisement that appears on page 16.

—Eggs are offered for sale from high-scoring, first-premium White Wyandotte chickens, in the advertisement of Mr. Samuel Gregg, of Fremont, Neb., which appears on page 16.

—Light Brahmas are good winter layers. Mrs. W. W. Drake, of Winterset, Iowa, is offering eggs from prize winners of that variety in her advertisement that appears on page 16.

—Mrs. P. L. Carroll is offering two cockerels which score 90 for \$3 apiece or \$5 for the pair. Also Mammoth Bronze toms, score 96, weight twenty-seven pounds, at \$8. Cheaper one if you want.

—Mrs. G. R. Fuller, of Rolfe, Iowa, has eggs for sale from Single Comb Buff Orpingtons and Golden Buff Plymouth Rocks. Her advertisement quoting prices will be found on following page of this issue.

—Mr. J. A. Matern, of Newton, Iowa, can furnish Homestead readers with eggs from Single and Rose Comb Rhode Island Red, Buff Orpington and Barred Plymouth Rock chickens. His advertisement appears on page 16 of The Homestead.

—Black Langshan cockerels scoring 92 to 95½, and Rose Comb Brown Leghorn cockerels scoring from 90 to 93½ points, are offered for sale by Mr. Harry Pfander, of Clarinda, Iowa. He can also furnish you eggs from either breed. Send him an order.

—Mr. R. E. Brown, of Richland, Iowa, makes the announcement on page 16 of The Homestead that he can furnish carefully-selected eggs for hatching from his Wyckoff and Blanchard strains of Single Comb White Leghorns. Write him for prices. He will guarantee satisfaction.

—Mr. W. E. Shutt, of St. Charles, Iowa, has an advertisement on page 16 of The Homestead offering eggs for sale from his Barred Plymouth Rocks. He writes: "My range stock is mated with large, strong cocks and cockerels. The cocks that head my cockerel mating pen score 90½. None of my pullets score less than 90. I am sure that buyers will be repaid in ordering eggs

from me, both in good hatches and the stock produced."

—Mr. George Boncwell, of Grinnell, Iowa, in sending copy for new advertisement that appears on page 16, writes that all his Barred Plymouth Rock cockerels are sold and that he has been compelled to return a good many orders that he could not fill. He is now offering Barred Plymouth Rock eggs for sale.

—Mr. R. E. Brown, of Richland, Iowa, makes the announcement on page 16 of The Homestead that he still has for sale a few yearling cocks and cockerels of the Single Comb Brown Leghorn breed. Mr. Brown will also be able to supply eggs for hatching from the famous Wyckoff and Blanchard strains of this variety of fowl and we would advise those of our readers in need of same to write him.

—Mr. J. A. Penn, of Alta, Iowa, whose card appears on page 16, writes that his sales have been good, nearly every inquirer being a buyer. He still has a score of strong, vigorous birds left and wishes to advise buyers that they are large, heavy birds scoring from 87 to 91½. A representative of The Homestead has seen the flock and can recommend anyone wanting good, vigorous cockerels to this advertiser.

—The Wayside Farm, of Mt. Vernon, Iowa, are offering Silver Laced Wyandotte eggs for sale in their advertisement that appears on page 16. They also have Buff turkey eggs for sale. In furnishing copy they write: "We have the finest lot of Silver Laced Wyandottes we ever owned and a great bunch of Buff turkeys. Our trade last year was good and we have the birds to make this year's trade better."

—The Barred Plymouth Rock eggs offered by Mrs. E. W. T. Peterson, of Montezuma, Iowa, to Homestead readers, in his advertisement on page 16, are from a choice flock of hens mated with cockerels scoring from 89½ to 91 points. They were scored at the Deep River and Montezuma Poultry shows by Judges J. L. Todd and F. H. Shellenberger. The prices at which eggs can be obtained are named in the advertisement which appears on page 16.

—Mrs. S. E. Newell, of Audubon, Iowa, breeder of Black and White Langshan and Light Brahma chickens and Mammoth Bronze turkeys, in furnishing advertisement appearing on page 16 of The Homestead, writes: "I have had good sales from my advertisement in The Homestead. I have sold all my Mammoth Bronze pullets, but have one fine, large tom for sale yet. I also have a few Black and White Langshan cockerels and pullets and a few Light Brahmas. I will make a low price to close out at once."

—Mr. W. R. Warwick, of Montezuma, Iowa, advertises some very choice Barred Plymouth Rocks on this page, and of the Hawkins, Thompson and Bradley Bros. strains. These birds now being offered are of high-scoring stock and have proven strong egg producers. Mr. Warwick is one of those who has been winning premiums at the Montezuma Poultry Show which holds in December. The flock is in prime condition and anyone wanting eggs or poultry would do well to deal with this fancier. Toulouse geese eggs in limited number are also being offered.

—We desire to call the attention of Homestead readers to the announcement made on page 16 by Mr. Reuben E. Saunders, proprietor of the Full Moon Poultry Farm, of Montezuma, Iowa. Mr. Saunders has made a specialty of Barred Plymouth Rocks for a number of years and has lately added to his yards a cockerel from the pens of Mr. E. B. Thompson, one of the noted breeders of this variety of fowl. Mr. Saunders' flock is made up of line-bred birds from the Hawkins, Felch and Thompson strains, his pens being headed by high-scoring, exhibition cockerels. He makes a guarantee that every male bird used in 1904 and for the past ten years has been bought direct from either Mr. A. C. Hawkins or Mr. E. B. Thompson's Madison Square Garden prize-winning pen, or from Mr. I. K. Felch's reserve pens. He mates them according to Standard rules and will guarantee a good hatch. Write him for his free catalog.

## WHAT ARE SQUABS?

A great many people living on small farms and engaged in different branches of poultry business find it very profitable to raise squabs for market. The squab is one of the most rapid-growing birds included in the list of marketable poultry. Returns are quick and there is generally a good market for this fowl. It requires but a small investment to start. A mated pair, guaranteed to be breeders, can now be secured at a special price by writing to the Bay State Squab Company, Wakefield, Mass. See page 16 and kindly mention this paper when writing.

## IOWANA POULTRY FARM.

The Homestead wishes to call the attention of those of its readers who are interested in poultry to the advertisement of Mr. J. W. Radebaugh, of Indianola, Iowa, which appears on page 16. Mr. Radebaugh had the satisfaction of receiving sixteen firsts and eleven seconds in two shows during 1906. His Iowana Poultry Farm made him famous in all parts of the country by the many famous birds which it raises. He specializes in Barred Rocks, White Rocks, S. L. Wyandottes and Single Comb Rhode Island Reds. He will be very glad to send you his complete catalog and prices if you write him at once and mention The Homestead.

## RIGHT PRICES ON INCUBATORS.

Poultry raisers have no occasion any longer to complain of exorbitant prices charged for incubators and brooders when such a reliable machine as the Belle City Incubator is selling for \$7 and the Belle City Brooder for \$4.50. These Belle City machines are made on approved plans of the hot water type, and are justly regarded as among the very best machines made by the very large number of poultry people who believe that hot water carries with it the true method of heating for incubating and brooding chicks. The regular price of these two machines is \$22, almost a 50 per cent cut. The offer is a limited one as to time. It may not appear in The Homestead again. A dollar saved is a dollar earned. It would certainly seem that right now is a good time to buy. The Belle City machines are manufactured by The Belle City Incubator

"The Recollection of Quality Remains Long After the Price is Forgotten."

## CHOICE PLYMOUTH ROCK EGGS.

On page 16 will be found the Plymouth Rock egg advertisement of Mrs. L. C. Reece, of Prescott, Iowa. She is offering eggs for sale from pen headed by a 92-point cockerel and out of high-scoring females. She is pricing these at \$1.50 for fifteen, \$2.50 for thirty, \$3.50 per fifty, and \$6 per 100. Mrs. Reece has been breeding Plymouth Rocks for fourteen years and has a good strain. The 92-point bird is of the famous Bradley strain and he is a good one. The hens that she is using are the select of 200. Mrs. Reece showed at the Villisca show where she was awarded some of the best premiums. We can recommend her as one of the good Plymouth Rock breeders and she will treat you right if you send her an order. All orders are neatly packed in cases that will secure their safe delivery. Send Mrs. Reece your order and mention The Homestead.

## BLACK LANGSHAN COCKERELS FOR SALE.

One of the best breeders of Black Langshan fowls in the state of Iowa is Mrs. J. H. Allen, of New Sharon. She has recently had her birds scored that are now offered for sale and the score ranges from 91 to 95 points, scored by Mr. J. L. Todd, of Atlantic, Iowa. There are thirty of these birds, fine, lusty fellows with splendid conformation and plumage. They are of good weights, as will be seen by the following range: Eight to ten pounds each, including a number of late-hatched birds. These birds should be moved at once and doubtless will at the modest prices asked for them. After March 20th Mrs. Allen will be in position to receive orders for Black Langshan eggs for hatching purposes. She sells these at \$1.50 per fifteen. Mrs. Allen's best customers this year are those person to whom she has sold birds or eggs in years gone by. The writer has seen some testimonials from her old customers, which are certainly the most flattering of any testimonials letters we have yet seen. Her announcement appears in The Homestead throughout the poultry season.

## TRUTH IN INCUBATOR ADVERTISING.

Poultry raisers will do well not to take too seriously all the claims made in incubator advertisements. Such statements as "it gives absolutely perfect results," "needs no attention whatever," "always gives 100 per cent hatches," etc., are hardly warranted in any case. The poultry business is like any other legitimate calling. Conducted rightly it yields profitable returns. But it requires some time and attention and only reasonable things must be expected. The Racine Hatcher Company, of Racine, Wis., have the good fortune to have a thorough poultryman who observes and experiments and improves and has been doing these things month after month for upwards of twenty-five years. His work has served a great purpose. All his efforts and his discoveries have gone into the favored Racine incubator. This man has written an incubator book not given to exaggeration. It deals with actual experiences, from his first incubator made in 1881 down to the present. It gives all the facts any poultryman cares to know. It deals with all machines and gives facts instead of theories. It is an excellent book to get the truth from without undue coloring. A copy may be had free by writing the Racine Hatcher Company at the address as given in their advertisement on page 14.

## Finley's Jack, Jennet and Stallion Sale Draws Good Crowd.

The sale of jacks, jennets and stallions held by Mr. W. J. Finley, of Marshall, Mo., on March 2d, was well attended by buyers from Missouri, with a few from adjoining states. The top of the sale, Lot 1, Major Randolph Jr., went to Mr. J. A. Ringer, of Davenport, Neb.,

## Why So Sure? FINE POULTRY

It's made on the right plan, it works right. It brings best results to the beginner as well as the experienced poultry raiser.

## Begin the Horse Right

If you would have the right horse. Don't handicap a promising colt with unwise management during the first few months of growth. Make the grain and feed he gets more beneficial by giving a little of Dr. Hess Stock Food. It increases digestion by supplying the system with bitter tonics, iron for the blood, nitrates to expel poisonous material from the system; such ingredients being recommended by Professors Winslow, Quitman, Finlay Dun and all the noted medical writers.

## DR HESS STOCK FOOD

the prescription of Dr. Hess (M.D., D.V.S.) is especially designed to make market stock take on flesh more rapidly and cows give more milk, besides curing and preventing stock disease.

Sold on a Written Guarantee.  
100 lbs. \$5.00 } Except in Canada and  
25 lb. pail \$1.60. } Extreme West and South.  
Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

If your dealer cannot supply you, we will.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of neighbors. Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### LAMENESS.

I have a black mare twelve years old that sprained her foot in the coffin joint five months ago and she limps as badly now as she did at first. There are no swellings about the foot or ankle. I have used several different liniments and bathed from the ankle down, but it has done no good. Is there any cure for her? If so, what is it?

We are of course quite unable to say whether your diagnosis of the seat of the trouble is correct, but if you are right then we would advise you to clip off the hair and blister coronet thoroughly twice in six weeks by rubbing in a mixture of one dram of biniodid of mercury and two ounces of cerate of cantharides. Rub the blister in for fifteen minutes; tie her up short so she cannot bite part; wash blister off in forty-eight hours, then apply iard daily for a week. Turn her loose in box stall a week after each application of blister.

#### WEAK COLT.

I have a gray yearling colt that seems to be weak in his back, or all of his joints. At his play he will fall, wind and twist. He looks well and eats heartily. He has been this way for two months. I fed him stock food and at first he passed lots of worms, but now I never see any. His kidneys are not right. I should like to know what to do for him.

We take it that the colt is afflicted with either osteo-porosis (big head) or with locomotor ataxia, both of which is practically incurable. Allow colt to run out doors and feed generously on oats, bran, carrots and best of hay with addition of a little corn in cold weather. Allow free access to a box containing a mixture of four parts barrel salt, two parts flowers of sulphur, one part ground gentian root and half part each of dried sulphate of iron and powdered nuxvomica.

#### LAMENESS.

I have a mare seventeen years old that is lame in her left front foot. She commenced going lame one year ago and began by stumbling. Now she is lame all the time and it seems to give her a good deal of pain. She rests her foot ahead. She seems to be shrunken at both sides of her breast bone. She had thrush on the other leg and we doctored for it. She has a puncture on her knee, which is bony. She eats well, but does not keep up in flesh.

Have mare shod with a bar shoe (flat) put on after covering the sole with a dressing of pine tar and oakum and then with a strong leather pad. Horn of discolored portion of sole first should be slightly pared down. After shoeing clip hair from hoof-head and blister the hoof-head with a mixture of one dram of biniodid of mercury in two ounces of cerate of cantharides, rubbing it in for fifteen minutes; washing it off in forty-eight hours and then applying iard daily until skin is well again. Repeat the blistering once a month until lameness subsides. The dressing and shoe also are to be replaced once a month.

#### LAME COW AND HORSE.

(1) I have a black cow twelve years old which is very poor and bony. I always keep her in the stable, for she can hardly get up without the aid of the rope with which she is tied. She has a good appetite and gives nearly twelve quarts of milk per day. She is lame in her right hind leg and it makes a cracking sort of sound when she moves. It was some time in July when she got lame, and in August, when she came in, it seemed to be worse. I kept her in a pasture near the barn part of the day, but I soon noticed she would rather stay in the stable. What do you think all her? (2) I also have a gray mare ten years old weighing 1,800 pounds, that got lame in her left front leg while plowing last fall. I always used her in the furrow when plowing with three horses in the sulky plow. It seems to be the shoulder, as I had the blacksmith look after her shoe several times, but he could not locate anything. I used liniment on her shoulder quite a while ago, and it seemed to improve a little. I gave her about six weeks rest and then started to use her again, and now it gets no worse and no better. What treatment would you advise?

(1) Lose no time in having this cow tested with tuberculin, as tuberculosis well may be the cause of her ailments and you would not care to use her milk or have her around if that disease is present. (2) As you will have to call in a veterinarian to make the tuberculin test, unless you or some neighbor have the instruments and experience, the doctor should be employed at same time to examine the mare and if he finds the lameness located in the shoulder he will

# Why Don't You Ride When You Harrow?

No Use Walking When You Can Buy a

## Rock Island Harrow Cart

Delivered at your R. R. Station  
For..... \$8

If Your Dealer  
Can't Supply You  
Send to Us.

### REAL HARROW COMFORT

Plowing is about the easiest work on the farm, but how many successful Farmers to-day use *Walking* plows? You don't—do you? No; horses are too cheap and life too short to wear your legs out following a plow all day.

You ride when you plow; you ride when you plant; you ride when you cultivate.

Well, then, why don't you ride when you harrow?

Is there any reason on earth why you should continue to make this work the hardest kind of drudgery by *walking* over plowed ground?

Or riding one of those crude carts that twist and turn and jerk you about until you wish you had walked?

No, Sir,—there is no longer any excuse for saying that "harrowing is the hardest work on the farm."

The new Rock Island Two-Wheel Cart has changed all that.

It offers you a pleasure you never enjoyed before—a ride behind a drag harrow that is just as comfortable as a ride on your Sulky or Gang Plow or your Cultivator.

LOOK at the man in the picture above. He's riding a Rock Island Cart, and he doesn't look a bit more comfortable and easy than he feels.

The feature that adds most to his comfort is the fact that he always faces the horses, no matter which way the wheels may be angled. Think what that means!

The swinging back and forth of the axle doesn't affect the driver a bit.

This is why: The platform for the seat is made of two circular plates, lower plate being bolted solidly to the axle.

Seat and foot-rest are both fastened to the upper plate which can turn on the lower plate.

An automatic locking device, similar to that used on the rear wheel of a Sulky Plow, holds the parts in position while the cart is being drawn straight ahead.

But permits the wheels to angle either way while making a turn, or when either of them strikes an obstruction, without disturbing the driver in the least.

This feature is exclusive with the Rock Island Cart. No other harrow cart has it.

### AN IMPORTANT IMPROVEMENT

One serious trouble with two-wheel carts is that in striking an obstruction which throws one wheel behind the other, the wheels do not quickly return to their correct position, but frequently slide along for quite a distance. This is why nothing of this kind can possibly happen with the Rock Island Cart:

The draw-bars are crossed and pivoted at the axle. While the axle can swing freely when one wheel of the cart strikes an obstruction, or when making a short turn, the axle and wheels are always perfectly controlled by the draw-bars in the same manner as the front wheels of a wagon are controlled by the tongue.

### SAVES YOU HIRED HELP

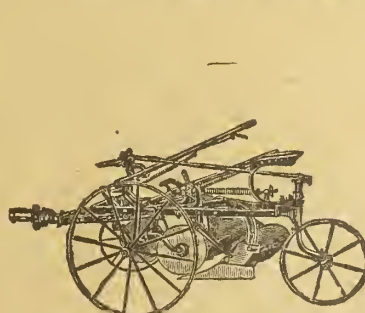

A boy at \$8.00 or \$10.00 a month with a Rock Island Two Wheel Cart will do as much harrowing as a man at \$25.00 or \$30.00 will do without the cart. You, therefore, actually save the price of this useful implement two or three times over in a single month.

And when you consider that the Rock Island Cart will last ten or fifteen years, you see that the price, \$8.00, means an investment of 50 to 75 cents a year. Can you point to any other labor saving implement on your farm that pays you as big a dividend as this? Think it over, Neighbor!

### WE'LL DO THIS FOR YOU

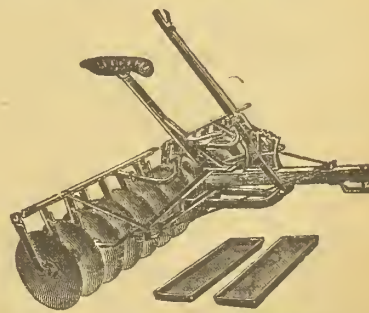

We are manufacturers of all kinds of Farm Implements, selling only through Regular Implement Dealers. But we want you to have a chance to buy this Harrow Cart, and if your dealer won't get one for you, just send us \$8.00 and we will ship you a cart. We will pay the freight on it to your nearest R. R. Station ourselves. Send the price, \$8.00 at once, or if you want to know more about the Rock Island Two-Wheel Harrow Cart, before you decide to buy, we will be glad to send to you a

### DESCRIPTIVE BOOKLET FREE

#### LIBERTY GANG PLOW

All levers within easy reach. Easy riding, light draft. Write for free description.

#### DEFIANCE DISK HARROW

Strongest and simplest construction, deepest penetration, lightest draft. Description free.

We are spending thousands of dollars telling the Farmers about the Rock Island Two-Wheel Cart, and we want every one of them to know just how good it is. Ask us questions. Let us hear from you. Write today, if your dealer can't show you the cart.

Full information about the cart is absolutely FREE. If, in addition to information about the cart, you would like to have a pretty watch charm, enclose 6 cents in stamps to pay postage and *always* mention this paper.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

### WITH THE EDITOR.

There has been for some time past, a growing opposition to the continued abolition of the army canteen. This opposition has found expression in no less than five bills now in congressional committee for its restoration.

When reformers have attained the thing desired they rest on their oars, so to speak. That is the opportunity of their opponents. Largely through the efforts of the W. C. T. U., the canteen was driven out of army posts; since then temperance and religious people have laid off their armor. This according to Dr. Burrell, writing in the National Advocate, is bad policy, one likely to result in disaster. Dr. Burrell claims that a well organized "still hunt" for the restoration of the canteen is under way, and that the secular papers with few exceptions are lending it their influence. In support of this statement he draws attention to the fact that the secular papers contain numerous articles, sometimes in editorial form, bearing upon the army canteen and that these articles abounding in mis-statements and perversions of the facts in the case are all on one side. A paragraph or two from Dr. Burrell's article provides food for thought for those who believe that the return of the army canteen would be a national misfortune:

For example, these papers say, quoting from Congressman Morrell, that "there is an increase of drunkenness, disease, insubordination, desertion, moral and physical degeneration in the army since the closing of the canteen" and "90 per cent of those in command of posts have expressed a positive opinion that the anti-canteen law has increased trials by court martial 95 per cent." This is not only not true, but it is immeasurably wide of the truth. The official figures of the war department show that in 1900 there were 1,645 courtmartial for drunkenness, and in 1906 (with canteen closed), 504. Does that look like a "95 per cent increase?" But get the newspapers to print that if you can!

And they say that practically all officers as well as soldiers favor the sale of liquor. How about Generals Miles, Shafter, Wheeler, Daggett, Henry, Boynton, Wilcox, and Stanley? How about Colonels Durbin, Gunder, and Gless? How about Surgeon-General Sternberg and Surgeon Genella, with others of like character? But you will watch the papers in vain to see their side of it.

But back of all others engaged in this campaign of the canteen stands the organized and mobilized army of brewers and distillers. It is these who command the "still hunt." It is these who control the literary bureau from which emanate the false and distorted pleas for the army dram-shop. There is, moreover, a tremendous subsidizing power in the advertising contracts of the secular press; and there are millions of money to enforce it. Prior to the exclusion of beer from the post stations the sale of liquor to soldiers amounted to three and a quarter millions of dollars in a period of two years! Is it to be expected that the brewers and distillers will quietly submit to such a loss?

It should never be expected by sensible people that anyone will quietly submit to the loss of large sums of money. And everyone knows that brewers and distillers are not likely to see their business interfered with without making strenuous efforts to protect it. That there is some connection between their desire to protect their business and the attitude of the secular press is not at all unlikely. Liquor advertisements form no small part of the income of the average newspaper.

Temperance people seem to be rousing themselves to the possibility of trouble, for not only Dr. Burrell, but Mrs. L. M. N. Stevens, president of the W. C. T. U., has been writing on the working of the bill which abolished the army can-

teen. In a recent issue of the Union Signal, Mrs. Stevens says:

The often-repeated statement that low dives and drinking places develop in the vicinity of military posts because of the abolishment of liquor selling in the canteen is disproved on authority of such men as Colonel Ray, of Kentucky; Major Nave, of California; General Daggett, of Pennsylvania. The reports of those who stand at the head of the several bureaus connected with the war department do not contain any evidence to indicate that the present law produces bad results. In support of this I quote from a correspondent to the Philadelphia Public Ledger of recent date, who says: "A few days ago the last annual report of Gen. George B. Davis, judge-advocate general of the United States army, was issued. It states that the trials by courtmartial for drunkenness and other offenses were 204 less than in the previous year. This report and those preceding it since the regimental liquor saloons, commonly called canteens, were abolished, utterly refute the statement so frequently made that the discontinuance of these saloons has resulted in much demoralization in the army."

### HOME AND HOMEMAKING.

#### LITTLE HELPS BY THE WAY.

Never trifle with one sin. It is like a little cloud which, as a poet has said, may hold a hurricane in its grasp. The next sin you commit may have a mighty effect in the brightening of your life. You do not know the streams that may flow from that fountain; for sin is a fountain—not a mere act, but a fountain of evil.—Andrew A. Bonar.

The worst effect of sin is within, and is manifest not in poverty and bodily deformity, but in the disordered faculties, the un-

worthy love, the low ideal, the brutalized and enslaved spirit.—Edwin H. Chapin.

#### TWO KINDS OF PEOPLE.

There are two kinds of people on earth today. Just two kinds of people, no more, I say. Not the sinner and saint, for 'tis well understood The good are half bad and the bad are half good. Not the rich and the poor, for to count a man's wealth You must first know the state of his conscience and health. Not the humble and proud, for in life's little span Who puts on vain airs is not counted a man. Not the happy and sad, for the swift flying years Bring each man his laughter and each man his tears. No; the two kinds of people on earth I mean, Are the people who lift, and the people who lean. Wherever you go, you will find the world's masses Are always divided in just these two classes. And oddly enough, you will find, too, I ween, There is only one lifter to twenty who lean. In which class are you? Are you easing the load Of overtaxed lifters who toll down the road? Or are you a leaner, who lets others bear Your portion of labor and worry and care? —Ella Wheeler Wilcox.

#### THOUGHTS FOR MOTHERS OF DAUGHTERS.

Every mother should insist on her daughter's learning something about housekeeping. The late Queen Victoria, of England, had every one of her daughters take a thorough, practical course in all domestic branches. The young princesses were taught to sew,

to cook, to distinguish between the different cuts of meat. Had they married poor men they would have known how to go into the kitchen and cook.

Every woman is queen over her own little kingdom. She can make that kingdom a haven of comfort and happiness or she can make it a miserable failure.

The more she knows about housekeeping the easier it will be to make her kingdom a happy one.—Beatrice Fairfax in Los Angeles Examiner.

**A GOOD HUSBAND, SEE?**

He—Mother seems to think you'll make me a good wife.

She—Oh, does she? Well, you tell her I'm going to make you a good husband. See?

**HOW TO EAT.**

Here are Horace Fletcher's rules for eating, which are given to all patients of the Harvard Dental School Dispensary:

1. Eat only in response to an actual appetite, which will be satisfied with plain bread and butter.
2. Chew all solid food until it is liquid and practically swallows itself.
3. Sip and taste all liquids that have taste, such as soup and lemonade. Water has no taste and can be swallowed immediately.
4. Never take food while angry or worried, and only when calm. Waiting for the mood in connection with the appetite is a speedy cure for both anger and worry.
5. Remember and practice these four rules and your teeth and health will be fine.

**WRINKLES FOR THE COOK.**

Crackers in damp weather often become soft and crumbly. To restore their crispness, put them in a hot oven for a few minutes.

For quick baking with a small fire the sheet-iron oven such as is used for gasoline stoves is very convenient set over the two hottest griddles of the range.

A nice sauce for lima beans, either dried or fresh, is made by taking a quarter of a cup of the beans when cooked and mashing them smooth in the cup; then add butter and one-third of a cup of cream, or milk, or the water the beans were boiled in. Pour all the water off the boiling beans and immediately add this sauce. Stir, and let boil up, then serve.

Sometimes yolks of eggs are left over when

**\$49.50 DIRECT TO YOU**

**BUY OUR NATIONAL LEADER**

Our "National Leader" Top Buggy at \$49.50, guaranteed 2 years, is a great bargain. Has all latest features. We want to send you our large catalog describing this buggy, and 160 other styles. Don't buy till you see it. No middlemen between you and us. You save one-half. Write for Free Money-Saving Catalog.

**U. S. BUGGY & CART CO. NO. 30 DAYS FREE TRIAL Sta. 86, Cincinnati, O. MONEY WITH ORDER**

**You can now buy the Famous Estey Organ**

**Direct from the factory, at lowest factory prices, and we send you the Organ for 30 days' free use BEFORE you buy it.**

**You know** what the Estey organ is—for 60 years the world's standard organ—used and loved and praised by the world's greatest musicians from Wagner and Liszt down.

**You know** that you cannot secure a better organ anywhere at any price, for a better organ is not made.

**You know** that the Estey is not only the best organ, but that your friends and neighbors and the world at large recognize it as the best. It's an instrument you will never have to apologize for.

Let us send you one **at our expense**—freight prepaid—for 30 days' free use in your home. After you have used it for thirty days and had your friends use it, let us know what you think about it. If you don't agree with us that it has

- A sweeter, purer, clearer tone,
- A more sympathetic touch,
- A smoother, easier action,
- A better style and finish,
- A more durable construction

than any other organ of the same character, simply box it up, and **return it at our expense**. That's all we ask.

But, if you want to **buy it**, after thoroughly testing it, we will sell it to you, at the **actual factory price**. If it develops any imperfections within a year, which we cannot rectify to your satisfaction, we will give you a brand-new organ, and we give you also, a 25-year guaranty—a guaranty with the name of Estey behind it.

Isn't that the kind of organ you want? The organ that has a **known reputation**—the organ you do not have to apologize for. But just let us send you one for 30 days' free use—that will tell the story! We will save you money—and give you the sweetest toned instrument in the world.

Send to-day for Catalogue No. 109, and select the organ you want to try.

**WE PAY THE FREIGHT**

making a dish which calls for only whites; drop them gently in a bowl of cold water if you do not need them immediately. They will not spoil if they stand for several days. Handle them carefully so they will not break.

Melt three tablespoons butter, add three tablespoons flour mixed with one teaspoon of curry powder and half a teaspoon of salt. Pour on gradually two cups of scalded milk. The amount of curry used in this recipe will not be objected to by most persons unless the flavor is very distasteful to them.

Take two cupfuls of finely-minced ham or, better, one cupful of ham and one of veal; mix well with one-fourth cupful of bread crumbs; add two tablespoonfuls of stock, and season with one teaspoonful of salt and one-fourth teaspoonful of pepper; add the yolk of two eggs; make into small balls; cover with egg and bread crumbs and fry.

Have ready six squares of hot, buttered toast and four hard-boiled eggs; separate whites and yolks; chop the whites fine and rub the yolks through a sieve; make a cupful of white sauce; add the whites and boil up well; heap on squares of toast and fill the centers with the yolks.

A pie not like that his mother used to

make, and perhaps to his way of thinking, an improvement, is built as follows: Line the pie plate with the best crust you can make and fill with pared apples cut in eighths; sweeten well and dredge with cinnamon and flour; pour over all one-half cupful of rich cream or the same amount of made custard.

## CARE OF FLATIRON.

Many people have been annoyed at finding their irons quite rusty after they have been put away a few days. The way to prevent this happening is before you put them away to rub a little warm grease over them, and then wrap them in brown paper. When you take them out to use, dip them into hot water that has had a small piece of soda dissolved in it, rub dry and then put them to heat in the usual way. When they are ready to be used on the ironing board, have a piece of brown paper with a little powdered bath-brick on it and rub the surface of your iron with this. It seems rather a lengthy process, but it really does not take long to do, and housewives will be rewarded for the trouble they have taken by finding the irons delightfully smooth and easy to use and when they are like this the ironing can be done twice as quickly.

## AMONG OURSELVES.

As the discussion regarding disparity of age in marriage has been running long enough to bring out most of the points it will be closed after we hear from Mrs. Belle and Mrs. Sensible—that is, unless some belated man rises to tell how he has gotten along with a partner a good many years his junior. Mrs. Sensible, friends:

All rules are subject to exceptions. One person may be really older, as far as growth and mind are concerned, at eighteen years of age than another at twenty-five. My advice is train your children to wait until they reach the age of accountability before they are allowed to keep company. Keep them children, then when they select a partner for life they will be more able to understand the meaning of the marriage vow. Now, will June Bug please tell me her motive in marrying? There are hundreds of reasons for marrying, but only one is right—marrying for love. A motive when sanctified by a desire and a resolution to improve and elevate each other, and to live true and holy lives before God, cannot fail to call down the blessings of Heaven. But sad is the fate of those who marry from wrong motives. A true union of hearts not even death can end. Now, my dear June Bug, I, too, speak from experience, since I have married a man almost twenty years my senior, and my experience has been long, for we have been married almost fifteen years. I had a great deal to learn. I was an office girl in a city in the thickly-settled state of Ohio. I came as a bride to a small inland town in the West, but I am not afraid to say that I can work alongside of any farmer's wife, and need not blush, either. I have a family of little ones to care for; have learned how to raise chickens, make top-notch butter, garden, sew and dispatch all the duties of a

of making another soul happy, but they married without having the proper motive, consequently they are mismatched. What can be done?

The trouble about marrying for love is that it is so difficult to test love, to prove the genuineness of the thing. In this country when two persons agree to marry they usually think they are in love. Nature is, of course responsible for what is frequently a delusion, but knowing her tricky way, is unfortunately only one step in the direction of thwarting her. But let us hear what Mrs. Belle has for us:

Love should be the foundation of all marriages. Without it marriage is a farce, insipid or bitter to the extent of one's capacity to feel or suffer. A girl between the ages of sixteen and twenty, it is very possible, would not be in union of mind and have tastes in accordance with a man more than five years her senior. But I think if a girl is not married before the age of twenty-five or older, ten years or even more could not prevent a happy married life, and I think if she wait until she is thirty, a mate of fifty years might not be too old for happy results. I feel that it is the young girl or woman who marries a man so much older than herself who finds such a marriage a disappointment or failure. I believe the longer a woman waits before marrying the greater may be the disparity of years without unhappy results. It is the sensitive young girl who marries the so-called bachelor who has had his day who suffers the most.

There is a rather serious side to this question which Mrs. Belle overlooks. A true story will illustrate it. A woman of thirty-eight married a man seventeen years her senior; within eight years she was left a widow with four children, mere babies, of course. The man had owned no property and carried only a small life insurance; the woman had lost the vim and force of youth, she had lost her place in the ranks of the breadwinners, her health was breaking and her hands were tied, but there she was, compelled to earn a living not only for herself, but for four others. Such marriages may yield happiness for a few years, but there is more to life than happiness for a few years. A woman contemplating such a marriage should have an interview with herself in which she squarely and seriously faces the possibilities of the future. I go further than this. I hold the man also should face them, and that, afterwards, the two should consider them together, reverently, soberly, sensibly as two who are responsible, not only for their own future, but possibly for that of others. It has been slow of dawning, but the day is almost here when right-minded men and women who contemplate marriage will have a distinct understanding regarding circumstances and situations incident to the marriage relation.

It is problems of parents which A New Member from Wisconsin and our old friend, Mrs. Massey, bring for our consideration:-

I have two boys, and my husband and I

## Doing a Week's Washing In 6 Minutes—Read the Proof

**T**HIS woman is using a 1900 Gravity Washer. All she has to do is keep the washer going. A little push starts it one way—a little pull brings it back—the washer does the rest. The clothes stay still—the water rushes through and around them—and the dirt is taken out. In six minutes your tubful of clothes is clean. This machine will wash anything—from lace curtains to carpets, and get them absolutely, spotlessly, specklessly clean. There isn't anything about a 1900 Gravity Washer to wear out your clothes. You can wash the finest linen, lawn and lace without breaking a thread. "Tub rips" and "wash tears" are unknown. Your clothes last twice as long. You save time—labor—and money. You wash quicker—easier—more economically. Prove all this at my expense and risk. I let you use a 1900 Gravity Washer a full month FREE. Send for my New Washer Book. Read particulars of my offer. Say you are willing to test a 1900 Gravity Washer. I will send one to any responsible party, freight prepaid. I can ship promptly at any time—so you get your washer at once. Take it home and use it a month. Do all your washings with it. And, if you don't find the machine all I claim—if it doesn't save you time and work—if it doesn't wash your clothes cleaner and better—don't keep it. I agree to accept your decision without any back talk—and I will. If you want to keep the washer—as you surely will when you see how much time, and work, and

money it will save you—you can take plenty of time to pay for it.

Pay so much a week—or so much a month—as suits you best.

Pay for the washer as it saves for you.

I make you this offer because I want you to find out for yourself what a 1900 Gravity Washer will do.

I am willing to trust you, because you can probably get trusted at home. And, if your credit is good in your own town, it is just as good with me.

It takes a big factory—the largest washer factory in the world—to keep up with my orders.

So far as I know, my factory is the only one ever devoted exclusively to making washers.

Over half a million of my washers are in use.

Over half a million pleased women can tell you what my washers will do.

But you don't have to take even their say-so.

You can test a 1900 Gravity Washer yourself.

Then you will know positively.

Write for my book today. It is FREE.

Your name and address on a post card mailed to me at once, gets you my book by return mail.

You are welcome to the book whether you want to buy a washer now or not.

It is a big illustrated book, printed on heavy enameled paper, and has pictures showing exactly how my Washers work.

You will be pleased with this book. It is the finest even I have ever put out. Write me at once.

Find out just how a 1900 Gravity Washer saves your time and strength—preserves your health—and protects your pocketbook.

Write now—Address—R. F. Bleber, Manager "1900" Washer Co., 23 Henry St., Binghamton, N. Y. Or, if you live in Canada, write to my Canadian Branch, 355 Yonge St., Toronto, Ontario.

both agree to use our utmost influence to teach pure manhood. He never allows evil stories told by hired help and never listens to them himself. I think very strongly on this subject. You may brand me a "crank" if you like—I am one on this particular subject. May I join the sunset club? I have a very beautiful sunset to describe some other time and am also interested in the book talks.

Which is the better plan, to start chil-

dren in life as they leave home, with a farm of their own or its equivalent in money; with the sum of say \$500 as a "starter," or let them begin with only their talents and depend on energy and perseverance to open the door to prosperity for them? Which plan is the best for the young folks? Also, should our girls, as they become of age, be given the same "start," that is, a farm or a bank account, etc., as the boys?

Interesting problems for discussion have been cropping up lately in a most encouraging fashion. Let us hear from the circle on those here proposed.

Apropos of the children, here is Aunt Belle to talk about what their family has been enjoying in the reading line this past winter:

I will tell the mothers what we read aloud of evenings at our house. This winter we have followed no regular course, but I have read from Longfellow's poems more than from any one writer. The children love such poems as "Nuremberg," "The Falcon of Sir Federigo," "Torquemada," "Lady Wentworth" and "The Bell of Stri." They enjoy both the story and the music of the measure. These poems cause the children to ask a score of questions and afford opportunity for much instruction along the lines of customs and manners of people of different countries. I want, also, to beg every mother to discourage the "awful" funny pages of the great Sunday dailies. Just stop and consider what good can come from the children who scramble to get hold of those coarse, artless caricatures? What ideals of art or color will they form in their young minds? I have long wondered that a cry has not gone up against these cruelly ugly sheets. Far better would it be if a good character sketch could come out each week with portrait and scenes relating to life and work of the subject. The ever-present "novel of the hour" has driven out a thirst for such reading and young school girls pour over "works of fiction" that in ten years will be gone and forgotten. How pleasant to get out of the main traveled roads and enjoy the cooling quiet of an hour or so a day spent with Scott, Milton, Barrie and even some of our American sane writers as Emerson, Holmes and Bryant. How pleasant to renew our acquaintance with Whittier by reading "Snow Bound" during the recent cold wave. It will be hard to teach children to love such literature if you do not love it yourself. Use a few quotations every day as some incident calls up a fitting use for the

words and soon your eyes will look out upon a somber world through roseate-hued glasses. Who will be next?

What a pretty picture is suggested by this talk. There are, in all the world, few things more delightful than the sight of father and mother and children gathered together enjoying the beautiful in literature or art. In such hours bonds are woven which the wear and tear of years cannot dis sever. Parents who simply provide for their children's material wants miss many of the sweet-

## Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned In Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

### Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5418, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

est joys of life. It is the parents who walk, talk, work, read and play with their families who really enjoy them.

A young man who voluntarily chooses the pseudonym, "A Crank," craves the privilege of the floor. The discussion regarding the going astray of girls stirred this young fellow, who believes that every young man should guard the purity of the girl in his company as he would her life. As the discussion which impelled him to rise is now closed, the first half of his speech is necessarily omitted:

The "gentleman" whose suit is cut according to the latest style; who wears his stiff hat on one side of his head; who has time to brush and fix and looks like he had just stepped out of a band-box, when this man goes to see "her," if he has lots of money to spend, even if he does have a cigar stuck in one corner of his mouth and takes a social drink once in a while—in other words, if he is termed a good fellow, then the ladies are his, in goodly numbers. He pays his attentions to one girl for one day, then he hunts another. But the ladies like him. They congregate on the street corners and talk about "that handsome fellow" until the next one comes along. I do not mean to say that everyone who smokes is such, but I do think a man ought not to smoke in the presence of ladies. It is the lady's fault if he does, for a gentleman will always get permission. She grants it and goes home with a roaring headache. She did not want to hurt his feelings, you see. If I am capable of advising let me say to the young ladies: The men require purity in you. They expect you to be almost angels, but you let the man be a slipshod creature. Come, make a few strict requirements of him and see how he will come to time.

"As unto the bow the cord is,  
So unto the man is woman;  
Though she bends him, she obeys him;  
Though she leads him, yet she follows,  
Useless each without the other."

Some may say I am a crank, but a small crank often turns a large machine.

To be a crank is to do your own thinking and have the courage of your convictions. The people who "do things" are usually cranks. And yet few of us are willing to be called cranks. Why is it, I wonder? But I want to ask a question suggested by the remarks of the crank who has just addressed us. If the situation is as he says, and I am inclined to think it is, why is it as it is? Why do girls encourage the attentions of undesirable young men? Let us hear from the accused.

The young men of the circle are doing their part bravely. Here comes "A Young Missourian" with his quota:

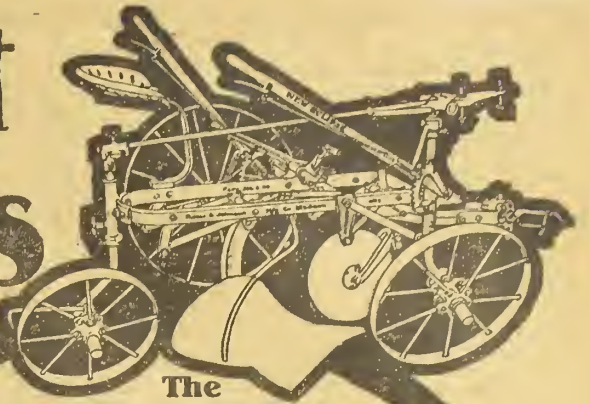

I presume the thing we "Among Ourselves" are aiming at is the capture of that slippery eel, that evades the rich and poor alike—happiness. All of our efforts to adjust social and domestic affairs are means to that end. In my opinion happiness consists in having a mental poise, a little food when hungry, a little money when we need it, to have the mental and emotional nature adjusted to each other, to govern the animal instincts by reason, to be satisfied with a little home, and to know that our neighbor is made out of the same kind of bricks that we are, but differently arranged. There is a line of demarkation where the mental and physical forces of waste and repair balance each other. Stay very near that line and you are happy; soar above it on the wings of religious emotions, day dreams or otherwise and you will pay for it by living in the cellar for a while. Hurry and worry are twin devils; keep them at a distance.

If this friend had slipped in without lifting his mask should we have called him "A Young Missourian?" I think not. He talks like Solomon; such wisdom is usually associated with gray hair—or lack of hair.

We are to discuss Sunday amusements directly. What Aunt Jane has to say will serve as a sort of prelude and perhaps furnish material for one of those side issues which are such an important feature in debates Among Ourselves:

After reading Among Ourselves for some time in silence I have been pleased and indignant by turns. I will pen a few of my thoughts to ye editor. I do not think that a man must go to church every Lord's day in order to be a Christian. If so, the average western farmer stands a very poor show of Heaven. Stock must be cared for the same on the first day of the week as on the remaining six; besides, most of our churches are located in the towns, and the residents of the towns, especially the male portion of them, make themselves conspicuous by their absence, and the farmer feels himself a little out of place in a church filled with stylishly-dressed ladies. Remaining at home makes his faith in a Creator none the less. If we believe and obey we are the children of God just the same as though we attended service every Lord's day. I think with Farmer's Wife and Nebraska Bachelor that a single standard of morals for both sexes is our only hope of redeeming the morals of our country, but who can tell us how that standard can be established? We are urged on every side to bring up our daughters to be model wives and mothers (cooks especially). Girls must be good and true, noble and virtuous, gentle and kind, and always smiling when husband comes home tired from his labors. Well, I verily believe mothers as a rule are doing all in their power to fill the demand, but where are we to look for husbands for such girls? While we have the saloon, and thirty freeholders in almost every town who will unblushingly sign a petition for one man to handle the goods to make brutes of men and boys, how can we hope to

raise the moral standard of our boys? Will someone tell us? I am at a loss to know.

"A Crank" has been whispering to me that he believes many mothers do their full duty; that allowance must be made for "the cropping out of the brute in man." This suggestion is worth consideration. Taken in connection with Aunt Jane's closing remarks it furnishes an admirable topic for discussion. Which is the better plan, to muzzle "the brute"

### The International Sunday-School Lesson.

First Quarter. Lesson XI. Genesis xxv, 15-23, 41-45. March 17, 1907.

#### Jacob and Esau.

After twenty years, and in answer to prayer, twin sons were born to Isaac and Rebekah. They are perfect contrasts in appearance, disposition, and occupation. There was certainly a preface to the crucial scene before us. It was not wholly fortuitous. The way to it was paved. Esau's contempt for his right of primogeniture was the gradual outgrowth of his recklessness, impiety, and misalliances. The priestly office and personal piety incumbent upon the inheritor of that vast estate so discounted it in Esau's eyes that he did not care a rush for it; he believed he could get a fortune by some other means, and one not incumbered by such distasteful conditions.

On the other hand, Jacob plainly saw his brother's utter unfitness for the primogeniture; how a great patrimony was in imminent danger of being

dissipated. The prophecy of his birth, too, was often whispered in his ear by a partial mother. He was over hasty, and thought he must needs use human expedients to help God carry out his plan. The hand of Jacob, the heel-holder, had often been stretched out before to trip his brother.

A half-dozen verses suffice for one of the finest portraiture of opposite characters to be found in literature. Jacob is at his tent door, seething lentils into a savory, pungent, nourishing porridge of a red color. Esau, coming from the field, fatigued and too impatient to wait until the game he may have taken could be prepared for him, cried: "Let the red (one) gobbler up that red!" It is the will of a wayward man. Jacob steps between the kettle and the hunter. He makes the most of his opportunity. "Ah, Esau! he has his hand upon your heel once more."

Esau's answer is pure Epicureanism. "Let me eat, drink, and be merry—tomorrow I die. The birthright! I don't care a fig for it any way." Crafty Jacob! He forestalls that saying, "A bad promise is better broken than kept by taking an oath for confirmation," which is an end to all things—to the Oriental. He is generous enough to throw in a little bread, which was not in the bargain. Esau eats, drinks, rises up, goes away.

The story of the stolen blessing is the

## INVESTIGATE ADVANCE FENCE

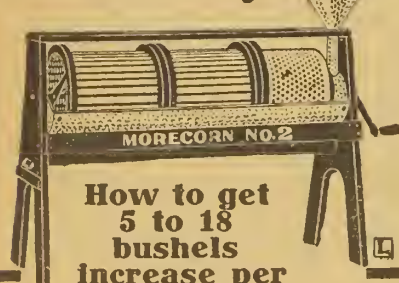

It's different from all others—in construction. We don't cut the wires into short pieces in order to enable us to make fences a little faster. We have stuck to the good old way in which we made fence seventeen years ago and while it's not the fastest way it's absolutely the best way. Our stay wire is continuous—not cut at the top or bottom or anywhere else. That makes our fence twice as strong as cut stay fences.

Sold on approval. We offer to ship you all the fence etc. you need on approval. After examining it carefully and comparing it with others, if you don't want it return it at our expense and get your money back. Isn't that a fair offer? We prepay freight and guarantee safe delivery. Get our Fence Book and prices.

ADVANCE FENCE CO., 34 OLD ST., PEORIA, ILL.

## More corn means more money

How to get  
5 to 18  
bushels  
increase per  
acre

You know as well as we do that if your planter drops too many kernels in the ground at one time, they cannot obtain the proper amount of nourishment from the soil. That means stunted stalks, stunted corn—dollars out of your pocket.

Again if too few kernels are dropped by the planter, the stalks will bear good ears of corn but you lose the yield from the missing stalks. Any good planter will drop two, three, four, five or as many kernels as you want, provided you sort them first with the

### Morecorn Sorter.

It sorts every kernel not only for length and width but for thickness, this is impossible to do by hand sorting. Even a hair's breadth makes a difference in this wonderful machine.

If you sort your seed corn with the MORECORN SORTER, then set your planter to drop 3 kernels, it will drop 3, no more, no less, 100 times out of every 100.

This means 5 to 18 bushels of corn increase for every acre. Does this interest you?

If it does—and it certainly should—sit down while you are thinking about it and ask us to send you our FREE literature.

Monarch Self Feeder Co.

## CARPETS, RUGS AND CURTAINS BY MAIL.

The illustration above shows one of Telfer's good rugs and on page 19 of this issue appears the advertisement of the Telfer Carpet Company, of Des Moines, Iowa, in which they announce their new 1907 catalog to readers of this paper. The Telfer Company are featuring carpets, rugs and curtains by mail. They sell their goods direct to the consumer and from their large fifty-page color plate catalog showing goods in actual colors, the purchaser can make a selection to even better advantage than in a store, having at the same time a much wider variety for selection, as well as later styles and choicer patterns than are usually carried in stock by the dealer. This company are well known to our readers. They have been advertising in this publication for years and we can unhesitatingly recommend them as being honorable and straightforward in all their dealings. Mr. Telfer states that he is offering even better values this season than ever before and in going through their large establishment recently the writer saw some of the handsome new floor coverings mentioned in their advertisement, and we can vouch for the fact that they are splendid bargains. Write for their catalog—try Telfer's good carpets on your floors—you'll find them more than satisfactory, and you'll probably save money besides. Better write for the book now, today, before you forget it, asking for the big new catalog, 1907 edition, the book of real carpet, rug and curtain bargains.

sequel to the story of the stolen birthright. The father's final benediction upon his first born took, in Oriental life, the nature of a sacrament. It was preceded by a sacred feast. The days of Isaac's dissolution were at hand. Preparations were making for the ceremony

## An Only Daughter Cured of Consumption

When death was hourly expected, all remedies having failed, and Dr. H. James was experimenting with the many herbs of Calcutta, he accidentally made a discovery, which cured his only child of consumption. His child is now in this country and enjoying the best of health. He has proved to the world that consumption can be positively and permanently cured. The doctor now gives this recipe free, only asking two-cent stamps to pay expenses. This herb also cures Nausea at the Stomach, Night Sweats, and will break up a fresh cold in twenty-four hours. Address Craddock & Co., 1032 Race St., Philadelphia, Pa., mentioning this paper.

**FREE TO FARMERS.**  
A Sample copy of THE AMERICAN FARM LIBRARY, the new National farm magazine. Every copy a 256-page book. ADDRESS: SEARLE PUBLISHING COMPANY, EDGAR, NEBR.

which should invest the eldest son with his sacred office. At this juncture Rebekah appears upon the scene in an unworthy and discreditable role. She practices a fraud upon her aged husband. She prompts one son to lie—and steals from another the highest office in the Oriental family. The picturesque narrative does not need the meretricious trappings of the stage. It is a living drama, the characters of which have a being before the eye. Aged and blind Isaac, wondering at his sons' speedy return from the chase, his dull palate mistaking kid for venison, confused at a voice that sounds like Jacob's, but hands that feel like Esau's. Jacob first acting and then telling a lie. Rebekah lifting the tent curtain to witness the scene.

How quickly that scene shifts! Esau's discovery of the fraud, his vengeance vowed. Rebekah's warning to Jacob, Jacob's flight. The irretrievable sorrow of sin has fine and forceful illustration in the denouement. Esau, the profane despiser of his birthright—hear his wild lament, his great and exceeding bitter cry, "Bless me, O my father!" And Rebekah, too, shall suffer her penalty. She shall never look into the face of her rover son again. And Jacob! He shall be a frightened fugitive in peril of his life for forty years. Deceits he practiced will be practiced on him, affecting the dearest relationship of life.

### Analysis and Key.

1. Isaac's two sons in contrast. Esau's contempt of primogeniture. Despises priestly office involved. Forgoes a fortune. Jacob: recognizes brother's unfitness, uses human expedients to help God.
2. Sequel to story of stolen birthright. The stolen blessing. Sacramental benediction preceded by sacred feast.
3. Rebekah's unworthy role. Deceives her husband. Teaches one son to lie, steals from another.
4. The dramatic scene. Persons and parts in the drama.
5. The denouement. Esau's lament and vow of vengeance. Jacob's forty-

year-exile. Rebekah's virtual loss of both sons.

#### The Teacher's Lantern.

Great events turn on small hinges. A long-continued, bloody war was waged in the Middle Ages between two Italian cities, all about a stolen bucket. So, in this instance, the destiny of the Hebrew race was within the narrow circumference of a bowl of soup.

How soon the pleasure of sin is over! Esau licked his lips, got up, and went away. The bubble may be very iridescent, but it bursts before you can wink your eye. How paltry the prizes of sin! Apples of Sodom! Ashes on the lips!

Sin lengthens out in sections, like a telescope. The overreaching of the brother seemed to necessitate the deception of the father. The deceitful pantomime before the dim vision of the patriarch had to break its silence in the audible lie, "I am Esau, thy first-born."

What irretrievable sorrow, and suffering sin entails! Esau the profane despoiler of his birthright, hear his wild lament, his great and exceeding bitter cry: "Bless me, O my Father!" And Rebekah, too, shall suffer her penalty. She shall never look into the face of her loved son again. Jacob shall be a frightened fugitive, in peril of his life—forty years an exile.

A noble end never justifies ignoble means. Jacob's end was laudable. He believed himself to be, he was, better qualified for the primogeniture than his brother. But God put the unmistakable seal of his disapproval upon Jacob's despicable methods.

Strongest emphasis should be given to Esau's utter lack of appreciation of spiritual things. He was a profane person; one destitute of the religious sense. He was engrossed in the present, the material, the fleshly. He was carnally-minded. Unhappily he is not singular or exceptional in this. He is the very type of the man of the world who despises his title and inheritance as a child of God; in fact, sells it for a song. The last sentence clinches the lesson: "So Esau despised his birth-

right." Despising one's birthright is not a folly peculiar to Patriarchal times. Failure to live up to one's highest ideals and opportunities is in every instance a present day despising of one's birthright. It cannot be done without loss. The useless lament will follow.

The ethics of the family life were all outraged in this olden incident. But they are outraged in the story of human life that is writing today. And in the larger family, the race, the individual and collections of individuals are deceiving and robbing each other. They think they thrive by doing so, and that this is the price of thriving. The social conscience needs quickening and instruction.

#### Announcement.

The Originator of the Combination Oil Cure for Cancers and Tumors says that under his present management the chances for a cure are far better than ever before. Write for free book to Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

#### ADVICE TO BUGGY BUYERS.

In the interest of readers who may be thinking of buying a buggy this spring we direct attention to the vehicle line of the Marvin Smith Company, of Chicago. Our readers pretty generally know of this big manufacturing concern and the Marvin Smith Company never fails to prove its ability to save buyers money on their plan of direct dealing. Certainly no better example can be given of this plan than the prices they make on their large and complete line of vehicles and harness as illustrated and described in the beautiful new catalog they issue. The wonder is that vehicles can be made and sold at such prices as are quoted by this concern and their prices, as a matter of fact, are ridiculously low, when the quality, style and finish of their honest made goods are taken into consideration. A question might arise as to whether their vehicles will stand and give the proper service that is naturally required of them, and the answer to these questions is that the Marvin Smith Company has been manufacturing and selling these same vehicles at the same prices, and supplying a great many of the same customers for many years. The best proof that this information is correct is the fact that people everywhere have been putting their vehicles into use and have been giving them thorough tests, and, last season the company's business increased over 67 per cent as compared with any previous year, and we learn that there is a large demand for their goods this spring, which is certainly a testimonial to the marvelous value of the product of this large manufacturing concern. All their vehicles are sent out on thirty days' trial and the Marvin Smith Company has too good a reputation to hazard it by putting in anything not fully up to what they claim for it. Their most popular selling vehicle is the "Chicago Special" buggy, which is certainly one of the greatest vehicle bargains ever offered at the price they have put upon it. It is a high-grade, first-class buggy and the best vehicle that they build in their great factory at Huntingburg, Ind. It is sold under a five-years guarantee, and they claim that it is at least the equal of buggies regularly sold for twice the price charged for it. This particular buggy always proves a great advertisement for the company, and they are shipping thousands of them out on approval every season, and their large and increasing business has been built up, to a great extent, by this service this sample buggy is giving their customers in all sections of the country. The "Chicago Special" as well as the entire line of Marvin Smith Company vehicles and harness, is fully illustrated and described in the company's large 1907 combined vehicle and harness catalog V139, which may be had on request. If you are interested in vehicles or harness of any kind, do not fail to send for it. See advertisement on page 19.

#### LEARN DRESSMAKING BY MAIL.

We wish to call the attention of our readers to the advertisement of this National Correspondence School of Dressmaking found on page 18 of this issue. This school has been very successful in teaching hundreds of ladies the art of dressmaking and we would ask any of our lady readers who may be interested in this matter to write to this school and ascertain what will be required of them to take a full course of instruction by correspondence. The company will be very glad to answer any questions regarding their system and how it is taught.

#### CANADA LAND ADVANCING.

The demand for Canada land is growing stronger every day that the sun casts stimulating rays over the rich farms of the North. Here and there are bargains, and a few of these may be found in our columns. Anyone who is after some good dirt in the province of Manitoba had better write to Mr. F. H. Hole, 423 Twelfth St., Brandon, Manitoba, Canada. See page 28 for list of a few choice farms.

#### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

#### BARGAINS IN FARM LANDS.

If you want to learn about exceptionally rare bargains in South Dakota farm lands or unusual business opportunities in the new towns in the magnificent new country being opened up by the Minneapolis & St. Louis R. R. extension write for beautifully illustrated descriptive pamphlet on the "New Empire," the farmer's and stockman's para-

## This Valuable BUGGY BOOK

Mailed To Any Address FREE Write To Day

### I WANT to Send You One FREE!

The Greatest Book of General Information About Vehicles Ever Published.

Write me a Letter or Post Card, tell me what kind of a vehicle or buggy you want. I will send you my book by return mail ABSOLUTELY FREE.

Don't buy a vehicle of any kind from anyone until you read this famous book. I have already distributed 150,000 of these useful books to vehicle buyers throughout the United States.

This Book Brings the Inside Workings of our Large Factory, one of the Largest in the World, Right to Your Home.

It tells you all about the Famous Split Hickory Line—how they are made, the kind of material used, why we can give you better values than you can get elsewhere. It gives a complete history of how these celebrated buggies are manufactured right from the hickory log and raw material into the most beautiful buggies of quality, ready for shipment to your home on thirty days' free trial.

You Can Have a Buggy to Your Order, Just as You Want It, and Shipped Without Delay.

We carry a very large supply of all vehicle parts in stock finished and ready to put together. We can ship quicker than any other factory. There is no delay in our large and fully equipped vehicle plant. Everything moves like clockwork. This book explains our wonderful system of building buggies at the least possible cost to manufacture, which enables you to buy your vehicles at fifty per cent less than you can buy them through the dealers.

#### I am the Originator of the Thirty-Day Free Trial Plan.

The book tells about my money-saving, thirty-day, liberal, free-trial plan. It explains how you can get a buggy just as you want it at lowest factory price, backed by my legal, binding, two-year guarantee for quality. How you can use it thirty days free, ride in it, examine it, test its strength and easy riding qualities in any way you see fit, and at the end of thirty days if you are not entirely satisfied, the vehicle can be returned at our expense—the trial costing you nothing.

OVER 100,000 SPLIT HICKORY BUGGIES IN USE THROUGHOUT THE UNITED STATES WITH EACH AND EVERY CUSTOMER SATISFIED

We manufacture over 800 different styles. Book illustrates many of these beautiful styles in color, exactly as they will appear in your home. Write me now—today—on a postal card and book will come to you by return mail.

## Harrow FREE

RETURN AT OUR EXPENSE IF IT DOESN'T PLEASE YOU.

Here is a harrow that looks very different from the old pike or spring toothed harrow.

It is different. Every point of difference is a point of big improvement. It is as much better than the old fashioned harrow as a modern plow is better than the Indians' crooked stick.

Sizes 3 to 17 ft.

The coulters or teeth of the "Acme" work as a gang plow. They turn over the pulverized ground and give the crop all the soil's benefit. Farmers will tell you that bigger crops grow after an Acme harrowing.

FREE BOOK for your Farm Library.

Write us today and we'll send you free, a valuable booklet, "A Perfect Seed Bed." It means money to you.

DUANE H. NASH, Millington, N. J. Box 44.

## FREE TO MEN

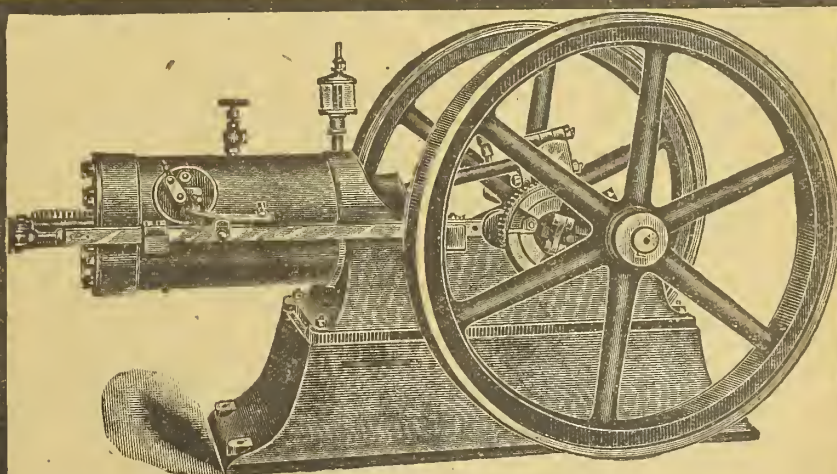

Sent Positively Without Cost.

One Week FREE Treatment

This is a bona fide offer to any man suffering from any of the diseases peculiar to men and is made by Dr. Rankin to give every man an opportunity to test, without cost, his superior and original methods. Dr. Rankin is without question one of the greatest specialists in diseases of men in the United States. His enormous practice, covering 30 years, places him beyond any experimenting. He cures where cures are possible.

If you need medical advice, why not get the best? This one week's treatment, absolutely free, will convince you.

Dr. W. D. Rankin, Dept. 18, 136 W. 34th St., New York.

THE greatest engine proposition ever offered to the readers of The Homestead. We build a complete line of stationary, pumping and portable engines from 2 to 30 H. P. Also hay stackers and rakes, power and sweep mills, thrashing machines. If your dealer doesn't handle our goods, write us direct.

CASCADEN-VAUGHAN CO., - - - WATERLOO, IOWA

## WATERPROOF RUBBER ROOFING

2-Ply \$1.90

3-Ply \$2.50

A PERFECT ROOF. Needs no coating and has no sand on it to cover defects. EVERY ROLL GUARANTEED. Will stand any climate, is acid proof, water proof and will outlast shingles at one-third price.

Can be returned if not just as we represent and money will be refunded. Send for samples. References: Citizens and State Banks. Shipping points, St. Louis, Missouri and West Branch, Iowa.

SOLD DIRECT to the FARMER

FARMERS SUPPLY CO., WEST BRANCH, IA.

This pamphlet will be mailed free. A fore edition is exhausted, to A. B. Cutts, G. postal card will do it. Write at once to P. & T. A., Minneapolis, Minn.

## ADVERTISING NOTES.

Mr. C. H. Drake, of Hazleton, Iowa, wants men to put in some tile ditch for him. His advertisement will be found on page 15 of this issue.

For choice western Canada farm lands in well-settled districts and near main lines of railroad, address the Montague Land and Securities Company, Winnipeg, Canada. See page 26 for further particulars.

Looking for wheat lands? All right. Turn to page 26 and you will find listed some Canada wheat lands in the finest part of that country. Write for map and route to Mr. W. T. Stevens, 214 Endicott Bldg., St. Paul, Minn.

A highly-improved eastern Washington farm is offered for sale by Messrs. Bevis Bros., of Spokane, Wash., in an advertisement that appears on page 27 of this issue. This farm will be sold, including stock and farm implements that are now on the place. Full information will be given upon application to the above firm.

Ten thousand acres of good Wyoming land, on main line Union Pacific railroad, is being offered for sale by the O'Keefe Real Estate Company, 1001 N. Y. Life Building, at \$5 per acre. Here is one of the best chances for speculation that has ever been made in the West. Write them about this land at once and mention The Homestead.

If any reader of this paper is so unfortunate as to be troubled with gravel or gallstones there is an advertisement appearing on page 19 of this issue that will be of special interest. We refer to that of the Graveline Medical Company, of St. Marys, Kan., in which they say that their medicine, Graveline, is a positive cure for the worst cases of either of these afflictions.

Having an only daughter afflicted with consumption, from which death was hourly expected, Dr. H. James, experimenting with many herbs in Calcutta, accidentally discovered a remedy that cured his daughter, and which is advertised to positively and permanently cure this dread disease. This recipe is given away for two-cent stamps to pay expenses. The address of the advertisement is Craddock & Co., 1032 Race St., Philadelphia, Pa., and appears on page 22 of this issue. Those of our readers afflicted with this disease should write the company at once.

## CEMENT POSTS—TEN CENTS EACH.

That cement fence posts can be manufactured at a cost of ten cents each is a statement made by the Moore Post Mold Company, 327 E. Third Street, Sterling, Ill. This company are ready to stand behind any assertions that they make. The proposition which they are placing before our readers in their advertisement on page 2 is certainly a good one and worth investigating. The cement post is the coming post. They are economical and are rapidly being improved to a high degree of efficiency. Their lasting qualities make them highly desirable. Any of our readers interested in this mat-

ter should by all means write at once for descriptive circular to the above company. GET A FREE TICKET.

If you are considering purchasing farm lands in Minnesota, North Dakota or Canada, either for cash or on crop payments, read the advertisement on page 26 of Messrs. Gillilan Bros., 555 Temple Court Bldg., Minneapolis, Minn. They have an offer of a free ticket which is interesting.

## TEXAS LAND CHEAP.

The Boyer-Peterson Company, of Kansas City, Mo., are offering some good land in the Panhandle of Texas very cheap. Those who would like to know more about the Panhandle country should read this firm's advertisement in the Lands and Homes department on page 26 and should write them for full particulars. This firm are reliable and will treat you right if you buy from them.

## CLIPPING HORSES.

Write the Chicago Flexible Shaft Company, 234 Ontario St., Chicago, for their catalog on horse clipping machines. It is a very handsome book and shows a complete line of modern machines, including one advertised on page 9 of this issue—the Stewart No. 1, which comes as low as \$6.75. Horse owners and farmers everywhere now recognize the advantages of clipping horses in the spring and this seems to be the ideal machine to do it with.

## LOOK IT UP.

We mean the special offer of the W. F. Shelton Land Agency, of Kansas City, Mo., which appears on page 27, relative to their lands in Colorado just east of Denver. The W. F. Shelton Land Agency will be glad to tell you of the many opportunities offered in the country in which their lands are situated and prove to you beyond question of a doubt that you would find it to your interest to buy land in that section of the country. For valuable information relative to Colorado lands write to the above named firm, mentioning The Homestead.

## NO AGENTS NEED ANSWER

The advertisement of the Locater Publishing Company, 349 Lumber Exchange, Minneapolis, Minn. This company wish to hear from only those who have farms to sell at private arrangement. They are in the market for good farms and in order to eliminate high commissions hope to buy direct. In this manner much needless expense may be eliminated. If you can see merit in this plan write these people for further particulars. State what you have to sell and other necessary information. See page 21 and when you write kindly mention The Homestead.

## FORTY YEARS OF SCALE BUILDING.

It takes time to bring any piece of work to perfection. Forty years is about what any man ever spends on bringing his ideal or hobby to this state. It represents a long time. Indeed, the man who has studied the making of farm scales for two score of years should know the timbers quite well—just about as well as could be known. Jones of Binghamton, Binghamton, N. Y., makes an announcement on page 5 of The Homestead that should interest any farmer or stockman who intends to purchase a scale either now or in the near future. He pays the freight and delivers his shipments at your station. See his special offer for \$45 on another page. Remember to look for Jones of Binghamton.

## BECOME A MUSICIAN.

For years instructors in music have tried to invent a system of teaching music by mail, and at last those in charge of the International Conservatory of Music, St. Louis, Mo., invented the "Harmonic Tone Revealer." With this instrument as a guide and the lessons sent out by this conservatory thousands of people are now learning to play by note, and play well. The International Conservatory is the largest in the world, and they offer to send the "Harmonic Tone Revealer," fifty pieces of music and all lessons on trial. If you learn you pay for the instruction. If you do not you may keep the instrument and music. See the advertisement in this issue on page 5 and write. The firm are absolutely reliable.

## THE RIDING HARROW CART.

It would be difficult to see how any valid argument could be used against the harrow cart which the Rock Island Plow Company are advertising on page 17 of this issue. We regard it as such a practical and useful attachment that we desire to call our readers' attention to it. Why should farmers walk to harrow? Why should not every farmer have a cart attached to his harrow and ride, the same as he rides to plow, to cultivate, to plant, to reap and to mow? Frankly, we do not believe any good reason can be given. This cart is a simple and yet an important invention, applied to the most common and slavish piece of work farmers have to do. The Rock Island people have done the farmers a real service in making a cart that is practical and up to date—an implement that is just as standard as a sulky plow—and an additional service in putting it on the market at a popular price. The Rock Island cart sells for \$8. It can be had from most any implement dealer, or, in cases where it can't, the Rock Island Company will send it to anyone for \$8 and pay the freight to the buyer's home station. The old way of harrowing, walking behind the harrow all day in the dust and soft ground, was a man-killing job. It was just about as slavish work as anyone could be called upon to do. With the Rock Island Harrow Cart a boy can do this work just as well as a man. If he can drive a team he can do the work. It will be no harder for him to harrow than to ride and do any other day's work that falls to the lot of a farmer boy. The harrow cart is a good investment aside from the shoe leather and leg weariness it saves. The total cost being only \$8, the charge for any one year is nominal, considering that the cart is good for a dozen or fifteen years. Estimating a boy's wages at \$10 a month and that of a hired man at \$30, the saving in wages alone is easily seen. On any farm it will at least save its cost every year in

## I Make Harness and Sell It Direct to You

This Heavy Team Harness Would Cost You \$35 at Your Dealers'. I Sell It For \$24

All Shipments on Approval.

The way to get a dollar's worth of harness for every dollar you pay is to buy direct from the makers. A \$35 harness at your dealers' is no better than it was when the manufacturer sold it to the wholesaler for \$24. Because the wholesaler's profit and the retailer's profit bring the price up to \$35 to you, doesn't make the harness one bit better.

It's the long way around that costs so much. If you went from Omaha to Chicago by way of St. Louis, it would cost you more than if you went direct, wouldn't it?

Why buy harness in the round-about way? Even the big mail-order houses charge you one profit more than I do. I make my harness and am satisfied with a fair profit. Big sales and small profits are better for me than small sales and big profits because every new sale means a new friend and then I sell to his friends. Those who buy my harness say I save them about a third—sometimes a half.

I make 50 styles of good harness. My line is complete. Each set that leaves my shop is the product of workmen highly skilled in harness making, and is guaranteed to be from the best oak tanned leather—the only kind that ever gets into my factory.

I save you 30 to 50%, because I sell direct,—no agents, salesmen, dealers nor middlemen of any kind stand between

you and my goods; you get better harness, greater selection, and the maker's guarantee of perfect satisfaction or your money back.

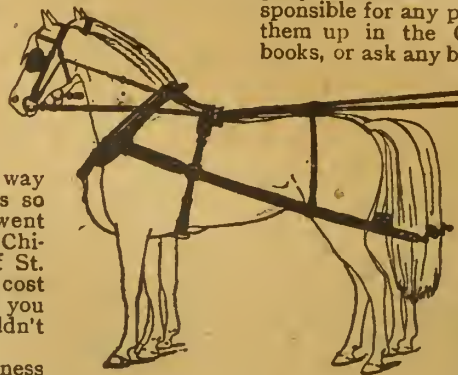

And you take no risk dealing with me, because my word is good, and the company of which I am President, is responsible for any promise I make; look them up in the Commercial Agency books, or ask any bank or express company where we are best known herein our home town.

Now, about my "leader,"—the \$35 set for \$24. The cut gives you a fair idea of it. This is a genuine bargain—a splendidly made 1½-in. team harness, strong, stylish in appearance, and made of the very best grade oak tanned leather.

And it is actually worth more today than it was when we made it up, because leather is advancing in price, as you know.

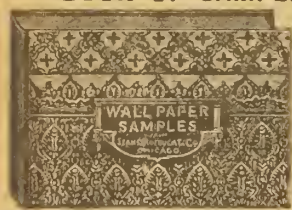

So, if you want this special harness value, please order promptly, as I shall probably not be able to advertise the set again at \$24. Just send me the money and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways if you are not perfectly satisfied.

My big, free Harness book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address, R. M. Knox, Pres., Western Harness & Supply Co., 613 Main St., Waterloo, Iowa.

## WALL PAPER OFFER

BOOK OF SAMPLES FREE

## WRITE US

and say "Send me your new 1907 Wall Paper Offer" and we will at once send you FREE, a big book of 1907 wall papers; immense variety, beautiful patterns, at astonishingly low prices. BEARS, ROEBUCK & CO., Chicago.

## Free Book For Men

A handsome illustrated book which explains all about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urinary Disorders, Piles, Kidney and Bladder Troubles, Etc. This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. Those interested should write for the book today. Same will be sent free in plain sealed envelope. Address,

DRS. FELLOWS & FELLOWS CO., 323 Rollins Bldg., Des Moines, Iowa.

## Buy Wright's Stock Feeder Before April 1st.

It saves a great amount of feed and labor, and helps develop a more uniform lot of pigs. Everybody who has tried it says a good word for it, experiment stations, hog raisers, sheep men, etc. Many of them say it more than pays for itself every year. No wasted feed. No runs when this feeder is used. Every pig has his place and gets his share of the feed; and the best of it is it doesn't cost much. I really ought to have more money for it, but have been able to make favorable arrangements for material and therefore have decided to give my patrons the benefit, and on all orders mailed me on or before April 1, 1907,

The Old Price of \$10.00, Freight Prepaid,

This is it—Invaluable for Feeding Pigs, Sheep and Calves. Also breeder of registered Duroc Jersey Hogs.

still holds good. This includes the right to manufacture other feeders for your own use; worth this amount in itself. Postively no orders filled at this price after April 1st. Order at once if you want the feeder. You'll never regret the investment. Booklet illustrating and describing the feeders if you want it. Address all correspondence and orders to C. A. WRIGHT, Rosendale, Mo.

wages. On larger farms it will save its cost several times over in one season. We commend the large harrow cart advertisement now running in The Homestead to the notice of our readers. Send for free circulars giving particulars and see whether, when you have posted up on the matter, you do not agree with us that a Rock Island Harrow Cart would be a wise investment.

## NEW TONGUELESS DISK.

Have you seen the latest style in disk harrows yet? In compliance with the demand for a disk harrow without a tongue one of the makers of farm implements comes out this season with a disk truck. You will see by the illustration in the advertisement on page 13 just what this splendid improvement is. By placing a two-wheeled truck under the disk tongue at the point where the tongue is attached, the weight of the tongue on the horses' necks is eliminated. The draft on a disk is always heavy and this feature should prove a very attractive one in the disks that are on the market this season. It leaves the horses to work freely and independently and tends to promote more easy turning at the ends of the field. This truck is an attachment that can be put on any disk, old or new. It is manufactured by the Crescent Furnace & Foundry Co., Des Moines, Iowa. See their advertisement and write for more details, mentioning this paper.

## THE LIGHT IN THE WEST.

The West has ever beckoned to the East. The West has always been an attractive field for the explorer, the miner, the promoter and the farmer. It has been a field of unsurpassed resource. Opportunity lay waiting for the right man like gold nuggets waited to be picked up by hunters in the early days of the gold craze. The great wide West has been expanding for decades. It is still expanding under the development of its resources. Some people are afraid to venture west. Those who do seldom return. They become so infatuated with the country they never care to return. The man not tied down in business should now inspect the grand inducements offered in the states of

Washington, Oregon and Idaho. Transportation is rapid and as a vacation the trip would be great. Companies are making it easy to invest in western opportunities. Watch the West grow, but don't neglect in getting some of it to grow for your benefit. Write for free information about the West to Lewistown & Clarkston Bureau, Lewistown, Idaho. See page 27.

## UNUSUAL OFFER OF A WORLD-FAMOUS MANUFACTURER.

You can now have your washing done by gravity power, for a washing machine has been invented which actually makes the rotation of the earth on its axis do all the hard work of the weekly wash. The machine is very simple in construction, very easy in operation and very wonderful in results. After the dirty clothes are put in the tub of the machine and covered with hot suds, all that is needed to start the work of washing is a slight push of the hand. The strength of a small child would be far more than enough to set the machinery in motion. And, once started, the washer is easily kept going by slight pushes and pulls with your hand. The machine oscillates slightly and you exert but very little strength, because the earth power—gravity—does all the hard work. You can sit down to do your part, if you prefer. This wonderful machine is rightly called "a Gravity Washer," because gravity does practically all your washing. This Gravity Washer is made only by the world-famous 1900 Washer Company, of Binghamton, N. Y., who have patented the machine; and to show you the wonderful work this machine will do, the makers offer to send a Gravity Washer to any responsible party, for a month's free trial. See advertisement on page 20. You need not send them any money in advance, make any deposits, or sign any bonds. All you have to do to obtain the proof that you can be rid of wash-day worry and wash-day work forever and ever is: Write the 1900 Washer Company that you are willing to try one of their Gravity Washers. They will send you the washer at once, all freight prepaid, so you are put to no expense for the trial, and you have only to take the washer home and use it a month. The makers ask you to give the washer a thorough test; to wash everything from lace curtains to carpets with it, and if you are not perfectly satisfied, you need not keep the washer. This test will cost you nothing. It is free. But if you

## DON'T BUY GASOLINE ENGINES

alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome by compact mounting on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mfrs., Meagher and 15th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

UNTIL YOU INVESTIGATE "THE MASTER WORKMAN," a two-cylinder gasoline, kerosene or alcohol engine, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome by compact mounting on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mfrs., Meagher and 15th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

are pleased and satisfied, as you are almost sure to be, the 1900 Washer Company makes you an even more remarkable offer, still. If you decide to keep the Gravity Washer, after using it a month free, you can, if you wish, pay for it by the week or by the month; the makers let you do as you choose about this. Full particulars of this liberal guarantee of the free trial offer and of the "Pay as it Saves for You" plan of selling, may be had by sending your name and address to the general manager of the 1900 Washer Company. Address your letter or post card to the general manager of the 1900 Washer Company, Mr. R. F. Bieber, 296 Henry St., Binghamton, N. Y.

#### WHAT ARE "TRUE TEMPER" TOOLS?

That's just what many a farmer has been asking himself. True temper tools are the high-grade farm and garden tools made by the American Fork & Hoe Co., of Cleveland, Ohio. Their motto is "The best tools you have ever bought at the same prices you have always paid." Why not buy the best? It is seldom that you get a hoe, rake or fork that is any too good. Somewhere in the makeup of these tools there is a weak place where they are not carefully made. Did you ever find one of these places? It generally comes as a surprise and you wonder how that new fork or hoe could be so easily broken. Well, it was due to poor material, that was all. Avoid the recurrence. Buy True Temper tools. Ask your dealer for them. He will send for them if you are firm with him and he does not happen to have them. Turn to page 10 and find out more about True Temper goods. The name sounds good, the goods wear well and the price is what anyone can afford.

#### IT PUMPS AUTOMATICALLY.

The question of water supply has long been a problem with western stockmen. Up to this time the windmill has been the best, but in dry times in summer when cattle need water the worst, the wind does not blow regularly. Many have had to pump water by hand and others to drive their stock for miles. An Oklahoman who saw the great demand for a pumping machine that would supply water at any and all times at a little expense invented a machine last year. The first cost of it is less than that of a windmill, and the cost of maintaining it much less. This machine is put on the market by the Myers Pump & Mfg. Co. It has been thoroughly tested and will do the work. The machine is designed to supply water whenever needed. It only stands seven feet high and there is no danger from wind. A boy of eighteen can wind it up and when wound the machine is intended to run twelve hours straight work, but as the average farmer does not need over one hour's steady pumping to give him what water he needs for one day, the machine will run twelve days with one winding, or if two hours a day is required it would run six days. The machine will last a life time. It can be attached to any make of pumps, is covered with galvanized iron, keeping out snow, sleet and dust. It will give water pressure for the house, as well as pump water for stock.

We use scrupulous care in choosing glasses to aid our eyesight. Why not use scrupulous care in selecting lamp-chimneys?

MACBETH is the only maker of lamp-chimneys who is proud to put his name on them.

Let me send you my Index to chimneys—it's free.

Address, MACBETH, Pittsburgh.

It will draw from wells from 100 to 300 feet deep. Read the advertisement of the Myers Pump & Mfg. Co., Beals Building, Kansas City, Mo., and write them about this machine.

#### THIS INVENTION SIMPLIFIES FARMING.

One of the most valuable inventions from the standpoint of the farmer is a new harrow which has just been put on the market, which, it is claimed, actually reduces the labor of preparing the seed bed by one-half. This really wonderful agricultural implement is called the Two-in-One Harrow and is manufactured and sold direct to the farmer by the Naylor Manufacturing Company, 14 Spring Ave., La Grange, Ill. Mr. Naylor, the superintendent and general manager, is a practical farmer of many years' experience. This harrow combines in one implement the virtues of both a spring-tooth and spike-tooth harrow, and the construction is such that all the weaknesses of both the spring-tooth and spike-tooth have been overcome, yet this new harrow has all the virtues of either the spring-tooth or spike-tooth used separately. Where in former years it was necessary to go over new plowing with a spring-tooth harrow to break up the sods, following with a spike-tooth to complete the process, this new harrow does it all at one operation, thus saving half the time of men and team. This harrow has also developed many other features in actual use, which are highly approved by agricultural experiment stations and all who have used it. Now that farm labor is scarce and hard to obtain, anything which will cut in half the labor of preparing the seed bed is bound to appeal most strongly to farmers all over the country and we predict enormous sales for this really wonderful invention. We understand that this wonderful labor saver costs little, if any more, than the inefficient single harrows of either the spring-tooth or spike-tooth variety. See advertisement on this page.

#### A KANSAS CITY MINING COMPANY MAKE WONDERFUL GOLD AND SILVER STRIKE AT BRIDAL VEIL NEAR TELLURIDE, COLORADO.

The Double Eagle Gold Mining Company which has been developing and opening up a number of rich claims recently uncovered several true fissure veins of ore, that will most surely bring splendid returns to the company's stockholders. The Double Eagle Gold Mining Company's property is located in San Miguel county, Colorado, in the southwestern part of the state, a little more than 200 miles from Denver. It is in the famous San Juan formation of which the Denver Times says that the twelve counties in the San Juan region produced last year \$4,952,746 in gold. In 1905 the mineral production of this county surpassed even the whole state of Nevada in mineral production. The county of San Miguel leads the San Juan list for 1906 and makes good its claim to run next after Leadville as a producer of the precious metals. In spite of rough weather and heavy snowfall in the spring months and a shortage of labor in the fall, the tonnage shipped from the Telluride, Low Pit, Pandora and Ophir district foots up 1,136 cars, or 28,400 tons. Of this 911 cars were credited to Telluride station and 225 to the other three districts. The total tonnage compares with 22,079 tons in 1905, showing a gain of 6,321 tons, or 29 per cent. This must be considered in connection with an increase of 10 per cent in the price of silver, 17 per cent in the price of lead, 22 per cent in the allowance for copper, and 5 per cent in the market rates for spelter. In 1905 some 60 per cent of the shipments were concentrates, whereas in 1906 the concentrate percentages were close to 90 per cent. This makes a decided difference in the value of the ore, and suggests that the figures at the head of this review may be too low, rather than too high. The revised mint returns for 1905 credited San Miguel with an output of \$1,881,296 in gold, \$709,052 in silver (market value), \$333,730 in lead, \$43,065 in copper and \$101 in spelter, making a grand total of \$1,967,244 for the year. Hence 1906 shows a gain of \$470,324 in gold, \$212,715 in silver, \$133,500 in lead, \$21,532 in copper and \$149 in spelter. The vanadium product, \$187,500, is entirely new. The Double Eagle Company have been for some time husbanding their resources and is understood to have set aside a considerable fund which will be expended in the spring for an air compressor and machine

drills. With the installation of the new machinery drifting on the Double Eagle vein will be resumed and an upraise put through to connect with the upper workings. On the completion of the upraise a handsome block of stopping ground will be available for ore extraction and the next order of business will be the construction of a mill upon one of the two sites, which the company owns upon the banks of Bridal Veil creek a short distance below the mouth of their tunnel. It is the intention of the company to resume driving their main tunnel as soon as the air drills are available and push the bore as rapidly as possible to a junction with the numerous veins of the district. The Double Eagle tunnel is the only practical

advertisement of the Ohio Carriage Manufacturing Company which appears on page 23 of this issue, telling about their famous line of "Split Hickory" vehicles and offering

to send a valuable buggy book free. Mr. H. C. Phelps, the president of the Ohio Carriage Manufacturing Company, is well known personally to many of our readers as the originator of the famous thirty days' free trial plan of selling "Split Hickory" vehicles from factory to consumer direct, thereby cutting out the large profits of the middlemen or retail dealers, which is a very great saving for the consumer. By Mr. Phelps' liberal plan the purchaser has every opportunity to test a buggy or vehicle of any kind on free trial for thirty days at his own home and then, if he is not entirely satisfied, he has absolutely nothing to pay. Mr. Phelps is considered one of the widest known and best-posted vehicle men in the country. He has built up an immense business for the famous "Split Hickory" vehicles, and he and his company have earned a splendid reputation for honest, fair and liberal dealings. Mr. Phelps has published one of the greatest books of general information about vehicles ever gotten out by any vehicle manufacturer. In it he gives facts about buggy-making as never before given to the consumer. If you expect to purchase a buggy of any kind we advise you to send to Mr. Phelps for one of his great books. Just use a postal card and says: "Mr. Phelps, please send me one of your buggy books," and he will send you one by return mail absolutely free. Mr. Phelps has already sent out over 150,000 of these valuable books to buggy buyers throughout the United States. We advise you not to delay, but write at once to the following address: Mr. H. C. Phelps, president of the Ohio Carriage Manufacturing Company, Station 31, Cincinnati, Ohio.

F. G. Paul's Poland and Chester Sale.

At Laurel, Iowa, February 28th, Mr. F. G. Paul held an exceedingly successful Poland China and Chester White sale. On that date twenty-seven head of Poland sold at an average of \$49.50 and twenty-eight Chesters brought an average of \$37.50. There were only four Poland and three Chesters in the entire offering over one year old. Mr. A. R. Fox, of Elberon, Iowa, topped the Poland offering for No. 2 in the catalog, at \$85. Some of the principal buyers of Poland were Walter Smith, Melbourne, Iowa; Wm. Pedrick & Son, Ottumwa, Iowa; Edw. Tweed, LeGrand, Iowa; J. L. Miller & Sons, Brooklyn, Iowa; James I. Paul, Laurel, Iowa; John McIlrath, Laurel, Iowa; W. H. Paul, Laurel, Iowa; F. W. Akers, Laurel, Iowa; Henry White, Trivoli, Ill.; H. W. Ogan, Marshalltown, Iowa; Will Schultz, Laurel, Iowa; G. H. Chase, Grinnell, Iowa; Chris Hesselbrink, Haverhill, Iowa. Those who purchased Chesters were Clark Richardson, Pella, Iowa; John McGinley, Brooklyn, Iowa; H. W. Andrews, New Providence, Iowa; Cyrus Loupee, Laurel, Iowa; L. R. Maytag, Laurel, Iowa; John Lefebure, Fairfax, Iowa; Peter Pfeifer, Haverhill, Iowa; M. O'Connell, Gilman, Iowa; Wm. Beye, Laurel, Iowa; E. J. Robb, Marshalltown, Iowa.

## My 2-in-1 Harrow Makes a Perfect Seed Bed in HALF THE TIME

BECAUSE it does the work of both a Spring Tooth and a Spike Tooth Harrow at one time and at one operation.

Because, you see, my harrow is BOTH HARROWS IN ONE.

If you have to go over your field four times now—you'll only have to go over it twice with my harrow.

If your ground is in such shape that you now go over it twice, then only once over will give you an even better seed bed when you use my harrow, and you can follow right along with a planter.

That means if it rains overnight you haven't got your work to do over again.

On newly broken sod you can work across the furrows (instead of with them) and not pull up a single sod or choke the teeth. You can prepare new ground with my harrow in a THIRD the time you can working the old way—using two harrows separately.

One lever instantly adjusts my harrow so you can use the spring teeth alone—or the spike teeth alone—or both together—or you can throw all the teeth up out of the way so that the frame will slide along the ground like a stone boat.

When a live farmer knows about my harrow he wants it. I can name, off-hand, twenty places near my farm in Cass Co., Mich., where you'll find good spring tooth and spike tooth harrows out in the barnyard with grass growing up around them.

The farmers have thrown them away and are using my harrow alone—and they're MAKING MONEY by doing it.

#### HOW I CAME TO INVENT THE 2-IN-1 HARROW.

I always had the same trouble you've had in getting my ground ready.

It seemed like there ought to be some way around it. So my brother and I got busy one winter AND SOLVED THE PROBLEM.

This is the way we figured:

A spring tooth harrow wants to keep digging in all the time. That keeps the frame pressed hard on the ground and it's a tough pull on the horses.

A spike tooth wants to keep jumping up all the time, you have to put some left on the top to keep it down. The horses have to drag the heft as well as the harrow.

So we made a 2-in-1 harrow—spring and spike teeth together. That season we used it on our farm and it worked just as we figured it would.

The spikes kept the springs from digging in too far, and the dig of the springs kept the spikes down to their work—and once over (except on extra bad ground) left a smooth, even, perfect seed bed.

That's why my 2-in-1 Harrow was easier on the horses than either a spring tooth or spike tooth alone and SAVED OVER HALF OUR TIME getting ready for planting.

The best proof of how really good my harrow is lies in the actual fact that every harrow I have sold has since sold from two to five more.

My Harrow is such a really wonderful thing and such a TIME and MONEY saver for the farmer that I expect each harrow I place will keep on selling others in the neighborhood. So I have decided to make a

From Factory to Farm

## ADDITIONAL FIELD NOTES.

## NEW HERD OF ANGUS CATTLE AT MANNING, IOWA.

Lovers of the Aberdeen Angus breed of cattle who have been familiar with the unusual undertakings and successful operations of Mr. Matt Baker, will be interested in knowing that he landed on his new farm near Manning, Iowa, on February 26th. Mr. Baker has been known to the writer for nearly a quarter of a century. Matt Baker, as he is generally known, is notorious in several ways. In the first place he is strictly honest, is an indefatigable worker, a most excellent judge of beef cattle, and fourth is one of the best fitters and exhibitors of beef cattle in America. The writer's acquaintance commenced with Mr. Baker during his regime as manager and herdsman for Dr. G. W. Dean, of Maryville, Mo. Later Mr. Baker was in charge of Mr. L. H. Kerrick's famous breeding farm at Bloomington, Ill., where the Chicago champion fat stock show steers were prepared under Mr. Baker's direction. Later we find Mr. Baker taking the place of Uncle Willie Watson, at Winchester, Ill., in charge of the herd owned by Mr. A. P. Grout. Next we find him in charge of the famous Charles Escher, Sr., establishment at Botna, Iowa, where he successfully fitted and exhibited doddies from this establishment, and next we find Mr. Baker formed a partnership with Mrs. C. A. B. Smith, at Mt. Vernon, Iowa, which was in force five years. Their contract having expired the past winter, this herd was dispensed and the proceeds divided jointly between Mr. Baker and Mrs. Smith. At this sale the greatest number of Blackbird cattle were dispersed that was ever offered by one firm or breeder. Of this number Mr. Baker succeeded in securing nine of the best with which to found a new herd of his own. He secured the great Blackbird bull, Black Man 72244, and of females he secured Blackbird of Cloverland, the best Blackbird cow that was ever in the Cloverland herd. Mr. Baker bought this cow at auction for \$1,000. He also has Blackbird of Cloverland 18th and 14th, Blackbird Beth, Blackbird of Quietdale 3d and one Pride cow, Pride of Aberdeen, a daughter of Black Keillor 3d and out of Pride 5th of Woodlawn by Moon Eclipse. Mr. Baker has certainly the nucleus for one of the best herds of Angus cattle in existence, and with his past experience is in position to build up a herd second to none. The Homestead predicts for him that success to which he is entitled.

## NORTON'S CRUICKSHANK BULLS.

The time has come when a good herd bull means everything to a breeder and his herd. The time has gone by when a breeder can afford to use a poor bull, and the future will demonstrate this more clearly than ever before. Short-horn breeders who want the best, both in breeding and individuality, should get in touch with that veteran breeder, Mr. C. C. Norton, of Corning, Iowa. If you want a first-class herd bull, one that will reflect credit on you and your herd, he has them. We want to call our readers' attention to a few that he now offers for sale that are good enough to head any herd in America. One of these is a Duchess of Gloster bull called Gloster's Favorite, a two-year-old son of Imp. Bapton Admiral and out of Lady Gloster by Imp. Prince Bishop. This bull has five imported sires on the top of his pedigree and he is as royally-bred a Duchess of Gloster bull as was ever offered for sale. This bull will now weigh 2,000 pounds, is a red in color, a bull of splendid length and depth, has a most excellent head and horn, a good back and loin, full over the crops and through the heart, and in every way you look at him you are impressed with him as a great herd bull. Mr. Norton has used him and his calves are good. If there ever was a herd bull that is fit to head the best of herds, this one is. The price is reasonable, considering what he is. Another great two-year-old that Mr. Norton is offering for sale is called Sultan. He is sired by Imp. Bapton Admiral and is out of a daughter of Imp. Salamis. Then comes Bonnie Scot, Imp. Lord Cardinal, Staplehurst, Roan Gautlet, Pride of the Isles and Champion of England. He is one of the most richly-bred Cruickshank Secrets, and is one of the smoothest, showiest bulls ever bred by Mr. Norton. He is a full brother to the bull sold to Mr. Eckle, of California, for \$1,000. This bull could be easily made a show bull that would be hard to beat. We doubt if in all his career as a breeder Mr. Norton has ever bred a better one. A description of him would not do him justice. He should be seen to be appreciated. We could not cite a breeder who wants a first-class bull to head his herd, to where he could secure a better one. If any of our readers want a herd header the thing to do is to go and see Mr. Norton about this fellow. Another good two-year-old is a Bampton Rose bull. He is sired by Banker's Victor out of one of Mr. Norton's best cows, Bampton Lily. Here is an excellent prospect for a great herd bull. Mr. Norton also offers a good young Duchess of Gloster bull for sale that is all right, and several others that we might also mention that are within the reach of any farmer or breeder. Mr. Norton has just sold one bull that goes to Wisconsin, another to Pipestone, Minn., and another to Lowden, Iowa. The Short-horn breeder who is looking for a herd bull should write Mr. Norton at once. The best thing to do, however, is

to go and see the bulls, and if you want a herd bull you will never go away without buying. Kindly mention The Homestead when writing.

## BIG SHORT-HORN SALE AT MASON CITY, IOWA.

On March 28th will occur at Mason City, Iowa, the largest sale of Short-horn cattle ever offered at this historic point. On this occasion Mr. A. H. Brett will offer from his herd 150 head, including twenty pure Scotch cattle, among which are two imported cows, Imp. Zoe 5th and Imp. Roan Ribbon. Each of these have calves at foot and ought to be good property for anyone. Their breeding is certainly all that could be desired. Zoe 5th represents Mr. Cruickshank's famous Clipper tribe, a family that has furnished more herd bulls for the Sittytown herd than any other. Zoe 6th is listed in the sale also and is out of Imp. Zoe 5th, sired by the agricultural college bull, Imp. Scotland's Crown. Another well-bred Scotch cow is Flora Princess, sired by Prince Orange 2d, her dam being Flora Queen by Scottish King. She belongs to Mr. Cruickshank's Flora or Louisa family. The Louisa came from the herd of Mr. Robert Syme, Redkirk, Scotland. Imp. Roan Ribbon was by Lyddite. She is a daughter of Imp. Red Ribbon that sold for \$1,000 at auction in 1902. This cow has a splendid heifer calf at foot by Prince Victor and is rebred to Hampton's Marshal. She is an excellent milker and is worthy of a place in some good herd. Lot 7 of the sale catalog is Butterfly 3d of Wildwood. This is one among the best Scotch cows in the offering. She is a dark red, low, thick, blocky cow, and is one of the five heifers that sold in the C. C. Bigler herd at \$1,000 each. She has an exceptionally good calf at foot by Hampton's Marshal and is again rebred to him. Lot 11 is Likely 2d, a daughter of Imp. Likely by Imp. Faucy's Pride. This is only a two-year-old heifer, but is of such lines of breeding as to make her desirable. Imp. Likely is a half-sister to Choice Goods. Mr. N. A. Lind purchased Imp. Likely at one of Mr. Brett's sales at \$830. Gloster of Aberdeen has a beautiful cow calf at foot and is a low, thick heifer of proper type and conformation. She was sired by Imp. McNaughton, while her dam was the \$600 cow, Cherry of Aberdeen. She traces directly to Imp. Vain Maid. The complete catalog has not as yet reached us, hence we cannot give all of the stock's pedigree, but will say that Lot 8, Serepta Lady, is a nice red cow sired by Nonpareil 2d. She is a dark red and one that Mr. Brett considers among the choicest in the offering. She is bred to Windsor of Maine Valley. Lot 5 is Geanie Deans 3d, sired by Baron Gloster of White Hill 2d. Her dam was Imp. Jennie Dean 2d by Daybreak. This is also a red cow, her dam selling for \$400 last June. Miss Buckingham is a Canada-bred heifer, sired by Lord Gloster and traces to Imp. Airy Buckingham by the Cruickshank bull, Master of Arts. The Miss Buckinghams are rated among the good Scotch breeding of the present day. This is a large roan cow weighing about 1,550 pounds. She is bred to the Cruickshank bull, Windsor of Maine Valley. In addition to the 150 Short-horn cattle to be sold, Mr. Brett will also offer at the same time and place the Clydesdale mare, Sally Maggregor. Sally Maggregor is a nice bay mare coming six years old and weighs 1,600 pounds. She is bred to Royal Heir, he by Imp. Heir of Fame and out of Imp. Princess of Airds. The remainder of the offering of horses are all Percherons, there being seven Percheron stallions, all of good ages and good clean horses. The catalog of both horses and cattle will be sent upon application to Mr. A. H. Brett, Mason City, Iowa. See page 33.

## CLARKE'S SHORT-HORN SALE.

Readers of The Homestead will be deeply interested in the announcement on page 34 of the present issue of this important sale, which will be held in the new stock pavilion at South Omaha, Neb., March 27th, at 1 p. m. Regarding the general excellence and merit of Meadow Lawn Short-horns the public is already thoroughly informed. Through upwards of a quarter of a century this remarkable herd has been establishing a reputation for prize winning and superior quality as breeders and sires that is peerless in Short-horn history. In sustaining this reputation the animals offered in the coming sale are sure to have a prominent part. Descendants of the most noted and popular Scotch families, of most approved conformation and highest quality, many being already producers of exceptional merit, they are one of the choicest and most desirable lots ever offered for sale. Not an animal is included in the offering that would not make a valuable addition to any herd in the country. The large majority are pure Scotch and include several imported cows. The bulk of the offering, however, is of Mr. Clarke's own breeding and shows the result of his careful selection and mature experience. For the most part they are the offspring of such great sires as March Knight, Bapton Ensign, Imp. Peunan Commander and Imp. Red Knight, and nearly one-half are out of imported cows. The twelve bulls offered are surely a choice lot. Of the most approved and desirable type, thick and beefy, with splendid heart girth and great feeding and digestive qualities, they will be eagerly sought after by herd breeders and as show animals. Among so many good ones it is hard to pick the best, but probably the splendid young

For shooting the swift flying, heavily feathered ducks and geese the **Martin** 12-gauge repeating shotgun has no superior. This gun is exceedingly strong in construction and yet is not heavy. It is bored to throw an excellent pattern with great penetration. The solid top keeps out the weather and the brush and twigs of the blind, and the side ejector prevents the empty shells from being a nuisance to the shooter. It's the best bad weather gun.

The **Martin** 12-gauge is suited to all forms of bird and trap shooting, and for durability, strength and ease of action is unexcelled. Made for both black and smokeless powders and for heavy loads. Two separate extracts make sure w. k.

The **Martin** Experience Book is full of real shooting stories. Free, with 130-page Catalogue, for 3 stamps. Write to-day.

**The Martin Firearms Co.**  
135 Willow Street New Haven, Conn.

## LANDS AND HOMES FOR SALE

## Are You Texas Bound?

If you are, and have lived and farmed in Iowa or her neighboring state, you should go to Oldham County, for you can farm in the good old home fashion there, raise good big crops and feed stock. We have 25,000 square miles of mostly good black soil farm lands in the Shaw Water Belt of the Panhandle, just west of Amarillo. You can buy a good farm here at \$10 an acre or a better one for \$15 per acre. Write us for literature and come and see us when in Kansas City. Excursion March 19th, leaving Kansas City March 20th.

## BOYER, PETERSON &amp; CO.,

408-410 Gumbel Bldg., 8th and Walnut Sts., Kansas City, Missouri  
(Five minutes' ride from Union Depot.)

**Near Minnedosa, Manitoba:** 480 acres, cultivated; good house and buildings; heavy black loam, clay subsoil. Considerable wood, fenced, \$40 per acre. 320 acres fenced for cattle.

**Near Brandon, Manitoba:** 320 acres; new house, every comfort; good buildings. River on one side. \$32 per acre. Will write about, or show over.

## F. H. HOLE,

423 12th Street, Brandon, Man.

## FARMERS, READ THIS!

If you are going to buy land in Minnesota, North Dakota or Canada, either for cash or on the crop payment plan, it will pay you to write us for prices and terms and we will tell you how to get a free ticket to see our lands. Gillilan Bros., 555 Temple Court, Minneapolis, Minn.

**STOCK Ranch For Sale**—Splendid stock ranch near C. & N. W. in Converse Co., Wyo. 760 A. deeded land, 225 A. irrigated; 500 head mixed cattle, 10 horses, implements, etc.; good 6-room house, barn, granary, shop, machinery house, sheds, corrals, etc. Abundance of timber for domestic use on place. For particulars address owner, John Kern, La Bonte, Wyo.

**FOR SALE OR EXCHANGE:** 300 acres Mer- cer county, Missouri, improved, good land. 246 acres Henry county, Missouri, good new improvements, productive soil. Write for description and price. Box 151, Independence, Iowa.

**IF YOU WANT TO BUY** sell or trade a farm, send full description of what you have or want with 25 cents to the Farmers' Want Journal, Dept. 51, Kansas City, Mo., and we will advertise it before 30,000 buyers and sellers and send you a copy of the paper.

**DONT COME TO VIRGINIA!** 500 Special Bargains in Farms. Northern farmers send for new catalog. Learn about this country. Southside Realty Co., Inc., (Successors to Percival Bros.) Petersburg, Virginia.

**FOR SALE, RENT OR EXCHANGE:** Good improved grain and stock farm of 140 acres in Chautauque county, Kansas. Write for particulars. Box 81, Independence, Iowa.

**TO EXCHANGE:** Good 640-acre farm in Wilkin county, Minn.; 468 acres in Dunn county, Wis., both improved. Want smaller farm, livestock or city property. Box 151, Independence, Iowa.

Cruickshank Mysle, Knight Commander 263720, son of March Knight, the head herd bull at Meadow Lawn, will stand at the front. A winner of four firsts as a calf, including the International, and head of the winning calf herd last fall, he should command especial attention. But little behind him will come Nonpareil Victor 2d 258255. Here is a straight Lovely out of Imp. Lovely Maid 2d that, as a show bull, will be hard to beat, and be should find a place in one of the best herds. Fair Knight 262490, sired by March Knight out of Fairplay 6th, and a winner of International honors, is another good one. Red in color, short legged and beefy, he is a splendid individual. Nonpareil Knight 2d 263205, by March Knight and out of Imp. Dalmeny Nonpareil 3d, is a bull of excellent quality and very desirable. The Cruickshank Venus, Pittville's Nonpareil 258256 by Nonpareil Stamp, out of Imp. Pittville Caroline, is a beautiful roan that in breeding and conformation leaves little to be desired. The grand champion, Whiteball Sultan, has one son in this sale, Whitehall's Stamp 263208, out of Lancaster of Glencoe, a straight Cruickshank cow, sired by Imp. Matabele Chief, that will also be included in this sale. He should be regarded with much favor. The remaining bulls by Nonpareil's Stamp, Bapton Hero and March Knight are so good that any breeder will be fortunate if he can secure one of them. In our issue of next week attention will be called to the high quality and desirability of the cows and heifers in this offering. In the meantime do not fail to write for a catalog of the sale. It is finely printed with illustrations of many of the individuals and descriptions that will give detailed information regarding their points of superiority. Kindly mention The Homestead and address Mr. N. P. Clarke, manager, St. Cloud, Minn.

## BEFORE COMING TO WASHINGTON IDAHO OR OREGON LOOK UP

## LEWISTON-CLARKSTON

Unusually Low Railroad Rates in March and April. Mild climate; superb scenery; fine hunting and fishing; rich farms, orchards, gardens; immense yields of grains, grasses, apples, peaches, grapes, melons, berries; live stock, dairying, poultry; mines, timber. Five new railroads. Growing cities. Head of all-year navigation from Pacific Ocean. Manufacturing and jobbing. Investment opportunities. Good schools and churches. For free information write today to Department D. LEWISTON-CLARKSTON BUREAU, Lewiston, Idaho

## CALIFORNIA IRRIGATED FARMS

TEN, twenty and forty-acre tracts, from \$35 to \$100 an acre; terms, one-sixth cash, balance in five years. Rich, black sediment soil. Every fruit and vegetable yields enormous returns. Free water rights. Perfect title. Excursion rates from all points east after March 1. Write for illustrated booklet. F. E. Robinson & Co., Dept. G, 216 Pacific Electric Bldg., Los Angeles, Cal.

## CHOICEST

## Western Canada Farm Lands

ELEVEN thousand acres personally picked in small parcels out of 300,000 acres—all number one—well settled districts near main lines railways. Easy terms of payments. Address,

## MONTAGUE LAND &amp; SECURITIES CO.,

301 Kennedy Block, Portage Ave., Winnipeg, Canada

## EASTERN WYOMING RANCH

TWELVE thousand acres, join the main line of the U. P. R. R. well improved; two sets of improvements in good repair and a stream of water passes through two miles of this place. If you want to use it for a ranch, it's hard to beat; if you want to speculate, here is your chance. More than fifty thousand acres of table lands has sold to farmers from Iowa, Illinois and Missouri, and they are moving into this country fast. Address,

## O'KEEFE REAL ESTATE CO.,

1001 N. Y. L. Bldg., Omaha, Neb.

## Canada Wheat Lands.

PARADISE VALLEY, Northern Alberta, the finest farming country in the world; wheat runs 50 bushels, oats 100 bushels to the acre; cattle shipped last June averaged 1,600 lbs., fattened on grass. Beautiful park country with clump of trees, mostly open prairie, gently rolling, lakes of good water, ample rainfall; deep black loam topsoil, clay subsoil. A few good agents wanted. \$10 to \$14 per acre, easy payments. Write for maps and route to W. T. Stevens, Manager Paradise Valley Land Co., 214 Endicott Bldg., St. Paul, Minn.

## MR. RENTER

STOP MOVING. Buy a farm in St. Louis County, Minn., on terms easier than renting and settle down. Good agricultural land at reasonable prices and easiest terms offered. For full information address Land Commissioner D. & L. E. R. Co., 525 Wolvin Bldg., Duluth, Minn.

**FOR SALE OR EXCHANGE:** 240 acre eastern Texas peach and pear orchard, located within 2 miles of growing city of 18,000 population. The owner will sell on easy terms or will exchange for northern farm or city property. Northern Iowa Land Co., Independence, Iowa.

## LAND ADVERTISING.

## No Live Stock Diseases

**I**N ALBERTA, Canada there are no live stock diseases such as hog cholera, black leg, scabies or other contagious or infectious animal plagues.

If you are a farmer you know what a difference it would make in your annual profits if you did not have to take losses of live stock from disease into consideration.

Sunny Southern Alberta is the finest stock country on earth because cattle, hogs and sheep can be produced cheaper there than anywhere else, and because there is a good market right at the door of the stock raiser.

Since the great Canadian Pacific irrigation project has been started the farmer who likes diversified farming will find a paradise in Alberta as he can raise all kinds of live stock at the lowest cost and he can produce practically all kinds of cereals and vegetable crops at the same time his live stock is growing and developing.

On the great Canadian Pacific irrigation tract hundreds of farms have been laid out a portion of which are under irrigation and a portion of which can be devoted to the live stock industry—In other words you

can buy a natural range for live stock which produces the finest grass to be found anywhere and you can raise on another portion of your farm forage crops for winter feed, sugar beets, wheat, oats or any other vegetable or cereal, you desire to cultivate.

If you desire to engage in the dairy business you will find conditions perfect in Alberta—The government operates the dairies and pays the farmer for his cream every cent there is in it, simply retaining enough to operate the dairies and to pay for the cost of marketing the butter.

Of course, if the farmer desires to make and market his own butter he is at perfect liberty to do so, but the government can make it and market it at better prices and at lower cost than the farmer possibly can and the additional profit goes to the man that milks the cows.

Land can now be bought at prices so low and on terms so easy that no man should be without a farm. If you want to know how to see Alberta at the least possible cost, and how to secure lands that will make you independent in two or three years we will be glad to tell you—Write for full information to

## ADDITIONAL FIELD NOTES.

## LAST CALL FOR WHITE BROS.' ABERDEEN ANGUS SALE.

Few Aberdeen Angus sales this year will offer a better lot of cattle than will be sold in the dispersion sale of Messrs. White Bros., at Perry, Iowa, on Tuesday, March 19th. Everything will be sold from herd bulls down to the youngest things on the farm. All their imported cows and their descendants go, and among these are some of the most noted and popular families of the breed. This sale has been brought about to close a partnership. One member of the firm having moved away and the others not desiring to carry on the herd alone, they decided to close out. They are selling sixty head, and fourteen of these are bulls. Their catalog reveals some of the richest breeding of the Angus breed. Of late years this firm purchased only the tops, and such families as Blackbird, Pride, Erica, Lavender, Queen Mother and other well-known tribes are found very liberally distributed through the catalog. Among the most-choicely bred females are Imp. Entoria of the Dell, a richly-bred Trojan Erica; Imp. Kate 2d of Tullnally, a richly-bred K. Pride and one of the best of the Pride of Aberdeen family; Imp. Lavender 11th of Tullnally, a descendant of one of the most noted show families in both Scotland and Ireland, and their descendants. Besides these there will be found some royally-bred Blackbirds, Erica and other well-known and popular Aberdeen Angus families that have won their way to the front in the most hotly-contested show rings in this country. Another richly-bred cow is Blackbird Elciper of Glen Lea, a four-year-old Blackbird cow, and a daughter of Imp. Leander of Dalmeny, imported in 1900 by Messrs. Chas. Escher & Son. Her dam is Blackbird Elciper by the noted Moon Elciper, and her second dam is by the great Young Wellington. She is a very smooth cow and has been one of the best matrons in the herd. Two of her daughters will also be in the sale, one by the noted show bull, Bamboo 38965, the other by Prince of Pilsen 59249. Home Dale Queenan is a four-year-old Blackbird Topped Queen Mother, and a better one will not be offered for sale this year. She is the dam of the young Queen Mother bull in the sale. There are quite a few of these Lavender heifers in the sale, and here is a family that the best breeders should go after. The strain of Angus cattle have been noted for their show yard success in both Scotland and Ireland, but very few have been imported to this country. There are a number of Ericas in the sale, and these are all descendants of the most noted prize winners. Besides these are some splendid Isabellas, Waterside Bessies, Georgianas and other good families. Among the bull offering will be their splendid Pride bull, Prince of Pilsen 59249. Here is a bull that has done them more good than any bull they have ever owned. As a breeding bull he has few equals in the state, and as an individual he will compare very favorably with any other bull in the West. He has never been fitted for show, but has been used solely for breeding purposes. There will go through the sale ring on that day a string of young heifers and young bulls that will prove all we have said about him as a breeder of high-class Angus cattle. Anyone wanting a good bull had better buy him. Among the younger bulls will be a K. Pride,

a Lavender, an Erica and several others of the old reliable families. These bulls have been well cared for and will make good herd bulls. It is an offering of Angus cattle that is seldom put up at public sale, and were it not that Messrs. White are quitting the business, many of these would never be sold. If you are interested in good Angus cattle send for a copy of their catalog and then attend the sale. Perry, Iowa, is about forty miles northwest of Des Moines and can be easily reached from all points.

## A CHOICE BULL CATALOG.

Messrs. Owens Bros., of Homestead, Iowa, prominent breeders of Scotch Short-horn cattle, have just issued a private sale catalog of the bulls in their herd that are now old enough for service. It contains the pedigrees of fifteen bulls that from a Cruickshank standpoint cannot be excelled. This firm have been in the business for a number of years and succeeded their father, Mr. R. E. Owens, one of the most prominent breeders of Short-horn cattle in America. They have not made a public sale since their memorable sale of 100 head at Newton, Iowa, in 1905. No. 1 of their bull catalog is Royal Marshal. This is a bull that now weighs about a ton, was calved Nov. 10, 1902, got by Field Marshal and out of Pro Narcissus by Imp. Pro Consul, she out of Imp. Narcissus by Barmpton. This bull was bred by Messrs. Cookson Bros. and has been successfully used by Messrs. Owens Bros. Lot 2 is a beautiful red bull, Baron Secret 2d. He is a very growthy fellow, was sired by the great herd bull, Baron Kear 2d and belongs to the Cruickshank Secret tribe. Lot 3 is the Queen of Beauty, called Golden Banner 2d. He was sired by Baron Kear 2d, also. This is a short-legged, thick bull, with good top and bottom lines and comes of a family that has perhaps done this herd as much good as any other family they ever owned. Baron Lavender 4th is No. 4. He is a dark red and as his name indicates, belongs to the famous Cruickshank Lavender family. He was also by Baron Kear 2d. The other families represented are Butterflies, Narcissus and Dorothy, with one or two American-bred sorts. Messrs. Owens Bros. make a specialty of high-class Scotch herd bulls, and while not desirous of parting with any females at this time, they might spare one or two in connection with the purchase of a young bull. Their announcement appears on page 36 and the location is on the main line of the Rock Island between Iowa City and Des Moines.

## CHOICE HEREFORD BULLS FOR SALE.

On page 35 will be found the new announcement of Messrs. C. W. Way & Son, of New Sharon, Iowa, breeders of the choicest strains of Hereford cattle. A Homestead representative last week visited Messrs. Way & Son and inspected their herd, which is now in the best condition, from every point of view, that it has ever attained. The eight young bulls that they are offering are all by their superior bull, Beau Brummel 4th. This bull is as well bred in Anxiety 4th lines as any Hereford bull living. He was bred by Messrs. Gudgell & Simpson, calved November 21, 1903. His picture appears in the advertisement on page 35. This bull was good enough to win first at the Iowa State Fair in the Iowa class, 1906. We know of no herd outside of the Beau Donald herd, where the use of a single bull has made such a marked improvement. Quite recently the Gudgell & Simpson herd was visited again by these enterprising breeders and two splendid heifers, rich in the blood of Lamplighter, were secured, to further strengthen the Way herd. One of these was Bright Countess 5th, she by Paladin, he by Lamplighter. This heifer was out of a daughter of Beau Brummel and was calved June 3, 1905. Her companion is Bonnie Lucy 6th, a daughter of Beau President and he by Beau Brummel. Her dam was Bonnie Lucy 4th, she by old Lamplighter himself. This heifer was dropped November 25, 1905. This pair of Lamplighter heifers, added to the Printer cows already on hand, is certainly building up Messrs. Way's herd in identically the same lines that has made the Gudgell & Simpson herd famous. In addition to the eight young bulls offered by Messrs. Way & Son, whose ages run from six to fourteen months, a choice lot of cows and heifers including some yearling heifers, is offered for sale. Prices on this stock are within keeping with the quality. Few men come to the farm to inspect the herd without pur-

chasing something. The day of The Homestead representative's visit a gentleman from Northwood, Iowa, and a Homestead reader, was present and purchased a cow just ready to drop a calf, and a beautiful yearling heifer. These were the first pure-breds owned by this gentleman, and we predict that the appetite for more will increase as he watches the development of these. The new four-inch announcement of Messrs. Way & Son will be found on page 35.

## DISPERSION SALE OF ONE OF AMERICA'S GREATEST HERDS OF HEREFORDS.

On Thursday, April 4th, in the fine stock pavilion at Kansas City, Mo., Mr. W. G. Swinney, of Bois D'Arc, Mo., will sell his entire herd of Herefords. No sale of pure-bred cattle of like quality and of as good breeding has been held since the dispersion of the Teho Lawn herd of Short-horns. True, Mr. Swinney's cattle have not been brought before the people of America by use of the show ring and of any amount of printer's ink, yet the cattle are there and when the Clover Leaf herd is dispersed it will mark the passing of one of America's greatest herds of Hereford cattle. Mr. Swinney founded this herd some ten years ago, buying the best, and that no mistakes were made is best proven by a careful inspection of the herd. The blood lines throughout Mr. Swinney's herd stands as solid to the Hereford world as does the Rock of Gibraltar to the coast of Spain. We shall not attempt to take up the past history of the herd, but deal with the cattle and the various individuals that go to make this great herd, as the writer saw them last week "Uncle Dan" Beardslee, who has few superiors as a herdsman, first took us to see the herd 'bull, Brigadier, that has been in service at Clover Leaf since 1901. Brigadier was got by Lamplighter, the Gudgell & Simpson bull that has furnished the Hereford world with so much good stuff. Lamplighter was got by Don Carlos and out of a North Pole dam. Brigadier's dam, Bright Duchess 11th, was an Anxiety-bred cow, thus making Brigadier a line-bred Anxiety. In 1901, the same year Dale was champion, Brigadier was junior champion. He is a bull that has not gone back, but on the contrary has improved. In his seven-year-old, breeding form he weighs right at 2,400 pounds and is as smooth as the smoothest yearling. A better head and horn is rarely, if ever, found, the horns having the desired droop and the eye the brightness of a youngster. From end to end Brigadier is covered with an absolutely perfect coating of mellow flesh—few bulls have the same covering over hip bones as has Brigadier. Over crops and loin he is perfect, through the heart and lower front flank he has no superiors, his hams are full and rounding and he will measure as much around the rear flank as around the heart. A better set of legs better placed, with the bone, cannot be found, and the best thing the writer could see around Clover Leaf Farm was the evidence of Brigadier's ability to transmit these qualities to his get. He goes in the sale and fully half the offering are his get. The man who will buy Brigadier will find he has a herd bull second to none and one that is as sure as they are found. The second herd bull at Clover Leaf Farm is Dale Jr., a three-year-old got by the champion, Dale, and out of Miss Zenobia, a Java cow that sold to Mr. Jesse Adams for \$2,000 and later resold for \$5,000. At five months of age Dale Jr. cost Mr. Swinney \$1,500. He has proven the best breeding son of the great Dale and the best young bull that goes in the sale is his son, Recorder. These are but three of the eighteen bulls that go in Mr. Swinney's dispersion. Breeders, as well as ranchmen, will find much good material here. There are listed forty-eight females, among which are nineteen cows with calves at foot, and all but possibly two or three rebred to one of the herd bulls. One of the greatest features of this sale is the number of daughters of Beau Brummel that Mr. Swinney sells. They are the kind so much sought after and every one sells with calf at foot. These are not old, worn-out cows, but are grand individuals just rounding out into their best form, four, five, six and seven years old. There will also be daughters of old St. Louis, Juryman, Meadow Lad and a great lot by Brigadier. A finer lot of broad-backed cows that are great producers and cows that have made Mr. Swinney big money will not again soon be driven through a sale ring. In all, sixty-six lots go in the sale. Eighteen are bulls and forty-eight are females. Every Homestead reader who is in the market for high-class Herefords, every one of which sells without protection, should arrange to attend this sale, as it is an absolute dispersion and the best of the best go at your price. Write Mr. Swinney at once for catalog so that you may study the blood lines, and kindly mention The Homestead when doing so. The advertisement will be found on page 32.

## LAKEWOOD'S NINTH SALE OF PERCHERON STALLIONS AND MARES.

On March 20th will occur a very important sale of registered Percheron stallions and mares, the property of the Hon. H. G. McMillan, of Rock Rapids, Iowa. It has been the aim of Mr. McMillan, from time to time, in presenting these annual offerings, to make each one superior to its predecessor. There is, however, a limit to this and when the December, 1906, offering was made it was thought by some that the acme of perfection had been reached. However, conditions have brought about a surprise even to Mr. McMillan himself; at least twenty of his best mares that had been intended for the December sale were found too thin in flesh to be put into that sale, owing to the fact that they had been suckling colts late into the fall. Very reluctantly these mares, with a number of other choice ones that had been bred and retained at Lakewood for private use, are now slated for this sale. Also an exceptional bunch of yearling stallions and fillies that had not been intended for sale until a year hence, but owing to the demand on Mr. McMillan by some of his friends to make another sale this spring, he has found himself forced to draw on the reserve herd for a considerable portion of this offering that he had not intended to sell. The twenty choice young stallions that he had reserved and was fitting for sale at private treaty are also listed in this sale. In private conversation with Mr. McMillan recently he told the writer that these twenty

## ATTENTION

## CATARRH SPECIALIST SPROULE

Offers Every Reader of this Paper a Free Treatment for Catarrh

The above is the remarkably generous, yet true, offer of Catarrh Specialist Sproule, a man who has probably cured more sufferers from catarrh than anyone living; a man who counts his cured patients by the thousands. He will give to any reader of this paper who is afflicted with catarrh, his great three-fold treatment absolutely free of charge.

For twenty years this famous specialist has been curing catarrh. He wants to stamp out this great scourge; he wants to prove that catarrh can be cured, absolutely and permanently.

Don't suffer any longer; don't be a splitting, hawking, foul-breath nuisance to your friends and all you meet; don't take chances of filling a consumptive's grave. Start getting cured by sending for the treatment today.

Don't let this chance slip by you; you will regret it all your life if you do. Send a postal or write today for this great three-fold treatment, and see how much this noble and generous-hearted specialist is willing to give you for nothing.

Address: Catarrh Specialist Sproule, 475 Trade Building, Boston, Mass.

young stallions were in his mind the superior of any like number that he had ever owned, and as his private sales have invariably ruled very much higher than the public sales, he is certainly taking some chances in consigning this class of stallions to the auction ring. There are fourteen exceptionally well-bred weanling colts. In order to further make this offering attractive, two imported stallions are listed. It was a matter of much comment at Mr. McMillan's December sale that the quality of that offering was a most excellent one, and we predict that those who attend the March 20th sale will be fully convinced that they have never seen a better offering than will be made on this date. Among the stallions and fillies offered are a goodly number sired by the great prize-winning stallion, Calypso, and practically all of the mares of breeding age are either bred to Calypso or the champion stallion, Olbert. Among the matured stallions offered, aside from the imported ones, are some first-class horses suitable to go into any community and give satisfaction. There are also a number of two and three-year-old stallions that weigh from 1,700 to 1,900 pounds. One of the notable features in the McMillan sales has always been the fact that every known defect was pointed out on day of sale, and where anything was overlooked, Mr. McMillan has always cheerfully made matters right. Further, his auction sales have always been absolutely on the square. If a single bid was made on an animal in his sales, and it was not raised, the bidder got the animal. The public have learned that when Mr. H. G. McMillan announces a public sale every animal offered will be sold without reserve. If a single bid is made. These horses will all be at the Sioux City stock yards sale pavilion some three or four days prior to the sale, so that parties who desire to look the stock over carefully at their leisure will be afforded this opportunity. A certificate of pedigree will be furnished with every animal sold and a written guarantee given that every stallion sold is a breeder. All mares and fillies that have been bred are believed to be safe in foal, but should, perchance, any not be so, they can be returned free of charge and bred either to Calypso, Olbert or any other stallion on the farm. Mr. McMillan has provided two clerks and two assistants for this sale, so that any purchaser of stock who cannot remain until the end of the sale can settle for his purchase, give shipping directions and leave at any time. It would be superfluous for us at this time to reproduce the prominent winnings from Lakewood Farm during the years 1905-6. The Homestead reproduced these in full in December; however, it is sufficient to say that at the Iowa and Minnesota State Fairs, at Sioux City Interstate Fair and at the International at Chicago, more prizes were won by Lakewood than by any other establishment in America. At the International alone in 1906 twenty-six prizes were won by Lakewood. Eleven firsts and championships are included in this number. In 1905, seventy-one prizes were won by this breeding establishment, and in 1906 at the three fairs previously mentioned, and not including the International, fifty-five prizes were captured by Lakewood. The beautiful sale catalog is now out and ready to mail to all intending purchasers. Lots 1 and 2 of sale catalog are the imported stallions previously referred to. There will be included in the sale thirty stallions and forty-four mares and fillies. For the first time Mr. McMillan has decided to let a lot of exceptionally choice bred and choice individual yearling fillies go to the public, on the presumption that many buyers would like to have a registered mare and grow it up to suit their own tastes. Besides this, the yearlings, of course, will not bring as much money per head as do the matured mares. Hence those who have more limited means can in this way start with a very high-class foundation and by waiting a little be in position to have as good as the best. It should be remembered also that Mr. H. G. McMillan is president of the Percheron Association of America, and is a man whose character and credit in the breeding world stand as high as any other man's in America. Financially and otherwise he is able to make good every guaranty and stands ready to do it cheerfully. These are points worthy of consideration by prospective buyers who wish to forestall any future trouble. The Homestead can heartily recommend not only this offering as a superior one, but the proprietor himself as being a safe man with whom to deal. Remember the date, March 20th. See advertisement on page 38.

A low wagon at a low price. Handy for the farmer. Will carry a load anywhere a horse can travel.

**Low Down Wagons**  
soon earn their cost on any farm.

**Steel Wheels**

for farm wagons. Straight or staggered spokes. Any size wanted, any width of tire. Hubs to fit any axle. For catalogue and prices, write to Empire Mfg. Co., Box 103 H Quincy, Ill.

**Bushnell**

TONGUED AND GROOVED

**A Tank It Pays to Buy**

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:  
Big, thick staves that are made to fit from edge to edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent tank lugs; look at the picture and you'll see what we mean. You can always keep your tank booped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

Share**

## GOLD! SILVER! IN GREAT ABUNDANCE

**The Famous Double Eagle Gold Mining Co.** There are a few good mining enterprises. This is one. -- We invite your investigation. --

Read this advertisement very carefully, IT MAY MEAN FORTUNE TO YOU

### Announcement

#### Extraordinary

The Double Eagle Gold Mining Company, incorporated under the laws of Colorado for \$3,000,000, divided into 3,000,000 absolutely non-assessable shares.

#### PROPERTY.

The property of the Company is located in Bridal Veil Basin, near the city of Telluride, and right in the very heart of the rich gold and silver bearing district of San Miguel County, Colorado.

It consists of twelve very rich claims and three mill-sites, and comprises about 130 acres. The Company owns this property in fee simple, and there is no incumbrance or indebtedness on same.

Immediately surrounding this Company's property are the famous Smuggler Union, Liberty Bell, Tomboy, Nellie and Camp Bird mines.

These companies earned upwards of \$4,500,000 last year. The Double Eagle property is more advantageously situated, and its ores assay far greater values than any of the foregoing companies.

#### PRESENT EQUIPMENT.

The company has erected on its property one fully equipped mill with a capacity of ten tons daily, a blacksmith shop, a machine shop, power house and dynamo room, a bunk house, assay office and laboratory and other minor buildings, all fully equipped. The machinery and buildings are all in splendid condition, and as good as when installed.

#### WATER POWER.

Within 150 feet of the mill runs Bridal Veil Creek, and this stream has been utilized by this Company to provide about 80 horse power. A turbine has been installed which gives us sufficient power for all present needs. One hundred horse power more can be generated on our water rights. We have no expensive fuels costs.

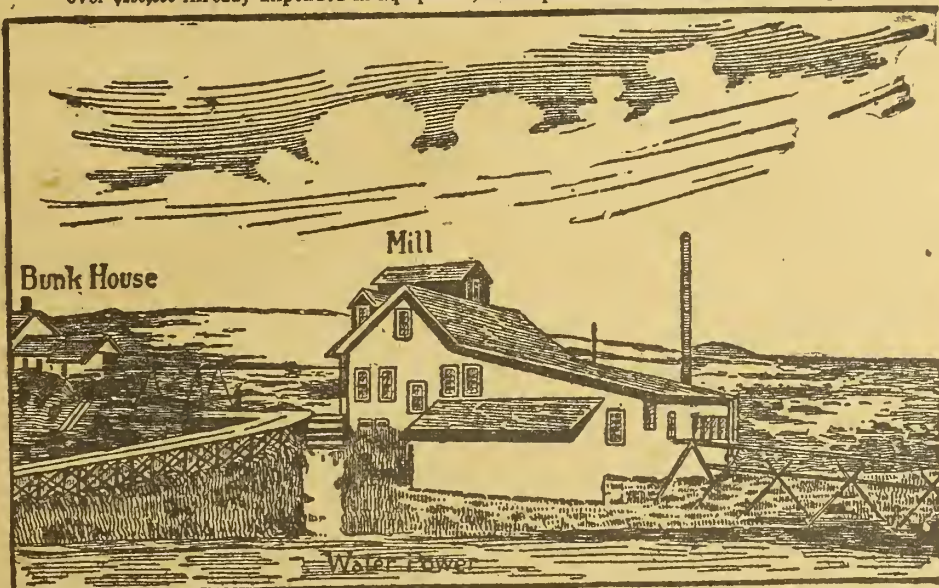

#### DEVELOPMENT.

The various claims of the Double Eagle Group have been opened up in eight different locations, and to date work has been done, as a result of which there is now upward of 3,000 feet of tunneling, drifts, cross-cuts, winzes and up-raises. These cuttings, crosscuts and drift upon eight true fissure veins from four and a half to twelve feet wide.

#### VALUE OF ORE DEPOSITS.

Assays and smelter tests show that the average value of the Double Eagle ores are upwards of \$60.00 per ton. Assays show from \$44.00 to \$8,261.00 gold and silver values per ton. The Company has now over 150,000 tons of this high grade ore blocked out, and also about 140,000 tons of low grade ore, averaging about \$10.00 per ton, lying on the dumps; only awaiting increased facilities to be turned into cash.

Over \$200,000 Already Expended in Equipment, Development and Purchase of this Property.

This Company owns its property outright. Not a prospect, but a thoroughly developed and equipped mine.

This Developed Mining Property Is Located in the Heart of Colorado's Richest District THE COMPANY'S OFFER.

This Company now offers to the public its treasury stock at ten cents (10c.) per share. This is an unparalleled offer. Seldom, if ever, is the opportunity presented of purchasing stocks in a property of this character at this low price. The price of this stock will advance to fifteen cents in a very short time.

**THE COMPANY'S PURPOSE** Is to increase the mill capacity to 200 tons per day; to install a 200 ton cyanide plant; to install aerial tramways; to equip the shafts with electric hoists; to increase the water power; to continue underground development, and to purchase other very rich claims on which the company now has option. It is to accomplish the foregoing that the Company is placing on the market 1,000,000 shares of its treasury stock.

#### ESTIMATED EARNINGS.

This company confidently expects to pay dividends of at least 30 per cent annually. This means that at ten cents per share your investment will earn you 300 per cent, and that each share you now pay ten cents for will then be worth \$2.00, i. e., \$25.00 will buy 250 shares. Thirty per cent dividends on 250 shares will net you \$75.00 per year; in addition your stock will probably be worth \$500.00 on the market. Just think what \$1,000 will do, if invested in this stock.

#### THE COMPANY'S OFFICERS.

Pres., J. H. HARRINGTON, of the Harrington-McCormick Commission Co., Kansas City, Mo.

Vice Pres., WM. PEET, President of Peet Bros. Soap Co., Kansas City, Mo. Sec. and Treas., C. C. COURTNEY, State Agent of the Mutual Benefit Life Insurance Co., Kansas City, Mo.

#### DIRECTORS.

HARRY HALDEMAN, of the Sonora Chief Mining Company... Kansas City, Mo.  
J. T. GOODELL, Cudahy Packing Company... Kansas City, Mo.  
E. E. TOMLINSON, Traffic Manager, Swift & Co... Chicago, Illinois  
Z. F. CRIDER, Crider Bros. Com. Co... Kansas City, Mo.  
J. H. KETNER, Prop. Hotel Washington... Kansas City, Mo.  
J. LINDERMAN, Farmer and Real Estate... Kansas City, Mo.

#### REFERENCES

The foregoing gentlemen earnestly urge you to inquire of ANY BANK IN KANSAS CITY, MO., or any MERCANTILE AGENCY, as to their character and high standing. They are men of the very highest integrity and are trusted and respected business men of Kansas City.

F. C. VINCENT, Fiscal Agent, Suite 410 Gibraltar Bldg., KANSAS CITY, MO.

### THIS STOCK WILL ADVANCE TO 15 CENTS PER SHARE SHORTLY

The Double Eagle Co. has already spent over \$200,000 in Development and Equipment of its 12 rich Claims.

If you PURCHASE DOUBLE EAGLE NOW you permanently increase your income. Bear in mind that this is a Developed Industry and not in any respect a prospect. It costs you nothing to inquire. Cut out the coupon, mail today.

### Our Guarantee

#### This is Important

This Company will repurchase from any stockholder any stock purchased by him (from the Fiscal Agent of this company) in the Double Eagle Gold Mining Co. after one year from date of purchase of said stock, and will pay said purchaser 10 per cent over and above the price paid by said purchaser for said stock.

This protects your investment. This guarantee is backed by over \$200,000 assets.

### IMPORTANT!

The Famous Camp Bird, Liberty Bell, Tom Boy and Smuggler Union Mines are in the same district as The Double Eagle Mines. All have paid millions of dollars per year to their stockholders and none have stock for sale. The Double Eagle is as good, if not better, than any of the aforementioned properties.

San Miguel County, in which The Double Eagle is situated, produced over \$4,000,000 in precious metals in 1906.

#### Price of stock on monthly payment Plan.

Mar. 28, A. H. Brett, Mason City, Iowa.  
SHIRE AND PERCHERON STALLIONS.  
March 27, Trumans' Pioneer Stud Farm, Bushnell, Ill., at Kansas City, Mo.

## FIELD NOTES.

Mr. H. H. Diers, of St. Olaf, Iowa, will hold a dispersion sale of pure-bred Short horn cattle on June 14th.

California irrigated lands are offered for sale by Messrs. F. E. Robinson & Co., of Los Angeles, Cal. Their advertisement appears on page 26 of this issue. Write for their illustrated booklet.

Some very choice Poland China sows bred for last of March and April farrow, are offered for sale by Mr. John Schmieder, of Remsen, Iowa, at \$30 apiece. These are all right and easily worth the money.

A closing out sale of the herds of Short-horns of Messrs. J. H. Harvey & Son, of Maryville, Mo., and Messrs. B. T. Wray & Sons, of Hopkins, Mo., is announced to take place on May 29th at Maryville, Mo.

Messrs. Hunter & Smith, of Beatrice, Neb., are headquarters for heavy-milking, high-testing Jersey cows. Note the winnings of their great herd bull, Emanon. They will be found in the advertisement on page 35.

Messrs. Manley & Co., of Lyons, Neb., are offering seven fall boars for sale sired by old Proud Advance. These are all out of Orion dams, the same combination that has produced so many of their winners. If you want one of these boars write them at once.

Mr. H. B. Griffiths, of Bowen, Ill., breeder of Duroc Jersey swine, has a few fall boars of extra quality that he is offering for sale at reasonable prices. Mr. Griffiths has one of the best herds of the central West and is now booking orders for spring pigs. Write

him for prices and descriptions of his stock as per the announcement on page 36 of this issue, kindly mentioning The Homestead.

Well-bred Hereford bulls are offered for sale by Mr. W. M. McDaniel, of Delhi, Iowa, in his advertisement that appears on page 35 of this issue of The Homestead. These bulls are of the Corrector, Fulfiller and Improver stock. Full particulars can be obtained by writing the advertiser.

Duroc Jersey boars and bred sows can be obtained from Mr. L. R. Kuney, of Adrian, Mich., as per advertisement found on page 36. Mr. Kuney's Duroc Jerseys are recorded in both American and National Associations and he will show his stock to visitors with pleasure, whether they wish to buy or not.

If you are raising twenty or more pigs this spring a Wright stock feeder will save enough in feed and gains made to pay for the feeder and show a nice profit on the investment of \$10. Read what Mr. Wright says in his advertisement which will be found on page 24. Then order a feeder, saying you do so at the solicitation of this paper.

On April 3d Messrs. T. A. Stevenson & S. G. Smith, both of Shannon City, Iowa, will make a public sale of thirty-one head of Aberdeen Angus cattle. There will be eleven bulls and twenty females in the sale. The females will be mostly in calf, and the bulls are a good lot. Those of our readers who want Aberdeen Angus cattle should remember this sale on April 3d.

On April 3d, at Shannon City, Iowa, Mr. T. A. Stevenson will hold a public sale of Aberdeen Angus from his herd which he established in 1891. Over 100 head of choice, well-bred individuals compose the herd at present and from this number will be selected an offering of high merit. Mr. S. D. Smith also consigns to this sale. After March 10th catalogs will be out. Watch our columns for further particulars.

Mr. L. H. Lamar, manager of the Lakeside Farm at Storm Lake, Iowa, informs us that he will hold a sale of Angus from this noted herd June 4, 1907, at the farm. The Lakeside Farm, our readers will remember, was the home of the late William Miller, so well known as a breeder of the doddies both in America and across the sea. Watch for later announcements of this notable coming sale in our columns.

Messrs. Manlove Bros. & Norris, of Bowen, Ill., well-known breeders of Duroc Jerseys, are offering a number of extra good fall pigs for sale at this time. They have in service the noted boars, Hambletonian, Illinois Chief and Veribest, and can supply breeders with good breeding stock at reasonable prices. Orders for spring pigs are now being booked. Write for further information, kindly mentioning The Homestead.

Mr. W. W. Vaughn, of Marlon, Iowa, breeder of Short-horn cattle, writes: "Sales from the Wildwood herd have been good, but we still have four high-class Scotch bulls of Orange Blossom and Brawith Bud families, suitable to head first-class herds, and ten Scotch-topped bulls, from ten to twenty-four months old, that are good reds, in thrifty, vigorous breeding condition and will be priced reasonably." See advertisement on page 36.

Messrs. J. L. Slick & Son, who advertise Poland China sows at private sale on page 37, write us that they have been kept shipping hogs and answering inquiries as fast as they could for several weeks. Every buyer has been well pleased and this is the best recommendation that any man can have. Messrs. Slick have still a good bunch of sows to farrow the last of March and say that buyers need have no fear of taking them this near farrowing time, since there is no danger in shipping a sow well along in pig.

Messrs. Thomas & Hogsett, of Golden, Ill., half owners of the grand champion boar, Tip Top Notcher, and sole owners of the sensational yearling boar, Ambition, recently called the attention of the writer to the averages which stock bred to Tip Top Notcher averaged in their fall and winter sales. An average of \$146 was made on all sows bred to Tip Top Notcher which were cataloged, while an average of \$132 was made on all sows bred to this noted boar which were sold by this firm, there being a number of substitutes in the winter sale that were bred late. The get of Ambition have sold at good prices, there being sixteen head in the two sales, and they brought an average of \$104.75. This is certainly a wonderful record for a hog of this age, and Messrs. Thomas & Hogsett are to be congratulated on being the owners of a hog with the reputation and breeding qualities that Ambition

## HEALTH AND STRENGTH

## OBTAINED FROM THE AIR YOU BREATHE

Gained by a Deeply Scientific yet Simple Treatment with Oxygen from the Air

Positively no drugs or medicine, no dosing of the stomach—Just the simple OXYDONOR treatment, the treatment that has cured thousands—the treatment that will cure YOU if you are willing to be cured.

## OXYDONOR

## DOES AWAY WITH DRUGS AND MEDICINE.

It acts on the new scientific principle which is now being indorsed by the best authorities in the world—the principle of instilling oxygen into the system.

## OXYDONOR TREATMENT CARRIES THE VITAL FORCE OF ANIMATION INTO EVERY PULSE BEAT

and thus it is made to throw off any disease, causing the process of life to proceed. Oxydonor treatment does not work against nature (as drugs and medicines do), but it works with nature, and aids nature in restoring the natural vital forces of the human system. A new discovery in physical science has been applied by Dr. Sanchez to the healing art.

## ASTONISHING! HARD TO BELIEVE?

Not when you see the cures Oxydonor accomplishes. Investigate this—do not let doubts keep you from perfect health, life-giving strength. When the telephone, the phonograph and other modern wonders were invented, people doubted and denied. The truth was proven to them, as the truth of Oxydonor treatment is being proven today.

BEAR IN MIND THAT THIS OXYDONOR TREATMENT works on a newly applied physical law—vital animation—and is not a battery or electric treatment.

## WE APPEAL TO THE INTELLIGENT THINKING PEOPLE.

Many high-grade physicians recommend Oxydonor treatment in spite of the fact that it does away with the use of drugs—for Oxydonor can be applied without cost by any sick person in any home.

## WE APPEAL TO ALL PEOPLE WHO WANT TO REASON THIS OUT.

people who want to know about the correct method of curing disease without medicine, to send for the free Oxydonor pamphlet. It tells you how Oxydonor treatment operates; it cites case upon case of remarkable cures with Oxydonor. No obligation to purchase anything; we merely want you right now to send for the pamphlet and study it. You who need it—we want you to have it free. Write at once.

Case after case has been cured of Stomach Trouble, Rheumatism, Nervous Prostration, Insomnia, Kidney and Liver Trouble, Dropsy, Blood Diseases, Ulcers, Abscesses, Tumors, Scrofula, St. Vitus' Dance, Lung Diseases, Catarrh of Head, Throat or Stomach, Blood Poison, Appendicitis, Female Diseases, etc. HUNDREDS AND HUNDREDS OF CURED PEOPLE FROM ALL PARTS OF THE COUNTRY WRITE US LIKE THE FOLLOWING. READ WHAT THEY SAY:

George P. Gnodke, Secretary Detroit Free Press, Writes:

I know of no other discovery whose value approaches Oxydonor. I have a sure conviction, founded on actual personal experience, that it is one of the greatest boons within human reach, and it seems to me the most important step toward healing human ills in 3,000 years.

Wm. Converse, Hancock, Iowa, Writes:

I would not take \$1,000 for my Oxydonor and do without it; it cured me after the best medical skill in western Iowa failed.

Mrs. Sallie M. Hindsell, of Turner, Minn., Writes:

I was a total wreck when I procured your Oxydonor, having long suffered with curvature of the spine, stomach and heart trouble, rheumatism and various troubles, and I lived for 40 years on drugs and never knew what it was to be well or free from pain, but since using Oxydonor I scarcely know what pain or sickness is, and I have cured two cases with Oxydonor of St. Vitus' dance and one case of home erysipelas of 40 years' standing.

The full history of above cases and scores of other remarkable cures given with our free book. Call or write for our free book and learn about this, the greatest of all healing methods.

DR. SANCHE OXYDONOR CO., ROOM 559, 67 WABASH AVE., CHICAGO, ILL.

possesses. If in need of good Durocs write this firm as per the announcement on page 37 of this issue, and kindly mention The Homestead.

Mr. Fred Ebendorf, of Strawberry Point, Iowa, writes us that as he is crowded with work he will sell his Poland Chinas and Short-horns at especially attractive prices. He also offers to trade a carload of corn to be delivered at Volga, Iowa, for Short-horn cows and heifers. Those who have corn and no stock should get in communication with this advertiser, for here are some good bargains undoubtedly. The herd bull, Royal Jacks, a Scotch Nonpareil-bred bull, and of herd bull merit, is offered at a very reasonable price. The cows being offered are of the strong, vigorous kind with lots of bone and of prolific breeding.

Mr. G. H. Burge, proprietor of the Wayside Farm of Short-horn cattle, of Mt. Vernon, Iowa, whose new advertisement appears on page 36 of this issue, writes: "Since my sale last October I have shipped out twenty head of Short-horns, sold at private sale. Among the later sale was the bull, Grand Master of Wayside, out of Mildred, the twin with Money Musk; this calf at twelve months weighed 1,010 pounds and was the best bull I ever sent out. He was an ideal Short-horn in every sense and I considered him the best prospect for a show bull I ever bred. He had as good a covering of flesh as any calf I ever saw, had a hide and coat of hair like a coon's in mellowness and thickness of coat; etched on the shortest legs and was a feeder par excellence. He goes to head the herd of Messrs. Cook & Adams, of Frankfort, South Dakota, and the price was more than I ever before received for a Short-horn. I sent one to Mr. S. W. Truckenbrod, of Lamolite, Ill., that will be as good an advertisement for Wayside Short-horns in that

section of Illinois as I want. A Mysie calf goes to Messrs. Larson & Miller, of LaPorte, Iowa, that is the thirteenth calf sent into that vicinity (the results of the advertisement one good calf put in the hands of a steer feeder in that county, and I have been sending good ones ever since). One fine calf goes to Mr. D. A. Bennett, of Lisbon, Iowa. This calf is from my show cow, Jarnett B., and by Money Musk; an example that prize-winning blood breeds on. I have 100 head in the herd and would sell ten or fifteen cows and heifers at attractive prices, bred to Money Musk and Hopeful Knight. Also have some fine bulls for sale at reasonable prices. Homestead readers are shown the stock at any time with pleasure."

Mr. J. G. Truman, of Trumans' Pioneer Stud Farm, writes in a recent letter as follows: "I am pleased to say that our trade is good and we have plenty of good horses to supply our trade, and notwithstanding the fact that we are selling at public auction at our stables in Kansas City, Mo., on Wednesday, March 27th, thirty imported Shire and Percheron stallions, the sale in no way will affect our business here, as the horses we expect to sell at that sale are at the present time in our stables at Kansas City. A cablegram just received from our Mr. J. H. Truman advises us that he has twenty-six head of Shires ready to leave England on receipt of a cablegram from us that we have room for them here and to this end we are making attractive prices to move the horses we have here."

Mr. W. H. Jones, breeder of Poland China swine, of Clemons, Iowa, whose advertisement appears on page 37, writes: "I still have a lot of fine Poland China sows and gilts bred and safe in pig to Baraboo and Y. J. Perfection, that are large and growthy, heavy boned and the kind that breeders are

## Free Book

ABOUT CURING

Deafness AND  
Eye Diseases  
AT HOME

I WANT to place one of  
my books in every  
home, absolutely free of  
charge.

This book tells of a new method by which people who are willing to devote fifteen minutes time each day, can cure themselves of mild forms of Deafness, Head Noises, chronic Catarrh, Chronic Sore Eyes, Wild Hairs, Granulated Lids, Scums, Eye strain, Weak eyes, or failing sight, at home by a mild method without visiting a doctor. 100,000 people have used this method.

My book tells of their experience and of many remarkable cures of Deafness and Eye diseases.

I want no money for this book—just want everyone to read it and know of my new system. Write me today. Address

DR. W. O. COFFEE,  
340 Century Bldg., Des Moines, Iowa.

## ELECTRIC HANDY WAGON ON AN AFRICAN DESERT

The novel scene shown in the photograph we are reproducing will have interest for our readers. It represents in part a great caravan crossing the Nubian Desert from the valley of the Nile to the Western Oasis in Upper Egypt. It was the first wagon train that ever crossed this desert, and was the forerunner in opening up to civilization a vast territory not yet on the maps of the world.

The caravan was in charge of Mr. James S. Grey, formerly of Lima, Ohio, who represents a large English corporation in making drillings in Egypt. The picture was taken early in 1906. Of course only camels could be used for drawing the wagons in that climate. Mr. Grey had made a former attempt to cross the desert, starting with ordinary wagons and carts, manufactured

of wood, but they failed to stand the evaporating power of the desert sun and all gave out.

This illustrates very forcibly the sterling character of the Electric Handy Wagon. It should serve as a useful hint to wagon buyers at home. These wagons are not specially made for desert work. They were the regular pattern wagon, secured from stock kept in Pittsburg, Pa., and fitted with Electric Steel Wheels. These wheels can be made to fit any wagon. They served admirably under the heavy loads in the trying journey over the hot, dry, trackless desert. There is no question about their excellence for use in any climate. But the great point is their convenience and labor saving in the farm work. With the low wheels with which

they are usually made, they are nicely adapted to all sorts of farm jobs. They are guaranteed to carry a load of 4,000 lbs. over any kind of road. In lasting qualities they are far ahead of the wooden wagon, which always has a train of such incidents following as tire setting, rattling spokes, loose fellos, breakdowns. In most every instance too, the draft is lighter than on the narrow, high, wooden wheeled wagons. Everything considered, it is certainly entitled to be called the wagon of economy.

For particulars in regard to the above expedition and detailed information in regard to the Electric Handy Wagon or Electric Metal Wheels, write direct to the ELECTRIC WHEEL CO., Box 43, Quincy, Illinois.

looking for. They are due to farrow in March and April and as farrowing time is at hand we will need the room for coming litters, of which we have two fine ones to date. We are offering them at a very low price that will move them fast. These gilts will weigh close to 300 pounds and are just in nice breeding condition, not over fat and a dandy lot to select from. Now, if the readers of The Homestead are looking for something nice that have the size and finish, here is their chance to get it at a low price."

Messrs. McNeil Bros., of Bowen, Ill., sole owners of Buddy K. IV., the highest-priced Duroc Jersey boar ever sold at public auction, also sole owners of the sensational breeding boar, Hanley, and Helen's Tip Top Notcher, up to the time that Buddy K. IV. was sold was the highest-priced boar ever sold at auction, are offering some very good fall boars for sale, sired by Buddy K. IV. and Hanley. The writer has looked them over carefully and is pleased to recommend them to the man who is looking for a show boar for the coming season. They will also breed a limited number of sows to Buddy K. IV. and Hanley at \$100 each. Readers of The Homestead who contemplate breeding sows to either of these boars should make arrangements at once, as only a limited number will be taken. Write this firm if in the market for good Durocs, as per the advertisement on page 36 of this issue, kindly mentioning The Homestead.

**IMP. FASHION FAVORITE FOR SALE.**  
Anyone wanting a good tried bull should write Mr. J. D. McDermott, of Wiotia, Iowa. He is offering his herd bull for sale, Imp. Fashion Favorite, and a couple of good young Scotch bulls, both sired by him. He also offers a good son of Imp. Craibstone for sale. Write Mr. McDermott or go and see these bulls.

**RED POLLED CATTLE DISPERSION SALE.**  
Mr. Geo. H. Smith, of Chillicothe, Ohio, informs us that on Thursday, April 4, 1907, he will close out his entire herd of Red Polled cattle. For the convenience of buyers from the western states and other portions of the corn belt the sale will be held at the sale pavilion of the Union Stock Yards, at Chicago. Catalogs are out and may be secured by writing to Mr. Smith. Mr. Geo. B. Buck will act as sale manager. Mention The Homestead when requesting catalog.

**S. J. MILLER OFFERS BARGAINS IN PERCHERONS.**

The man hunting a Percheron stallion should visit Mr. S. J. Miller's barns at Kirksville, Mo. Mr. Miller makes personal selections in the old country and brings over the best only. He also does his own selling, thereby saving the expense of high-priced salesmen. The class of horses he will show you are worth going to see. Furthermore, the prices are such that you will buy without going further. His coming three-year-olds are great, big, smooth fellows that have great bone and lots of quality. Those who contemplate buying should get in touch with Mr. Miller at once. See page 38 for his advertisement and kindly mention this paper when writing.

**A GOOD SHORT-HORN BULL FOR SALE.**

Mr. J. H. Moyer, of Newton, Iowa, has a small but select herd of Short-horn cattle. He lives adjacent to Mr. H. D. Parsons and has some of the same lines of blood that have made Mr. Parsons' herd famous. Mr. Moyer has for sale at the present time his herd bull which belongs to the Scotch Beauty family, also a nice Scotch calf, fit to head some good herd. This calf is sired by Scottish Champion and his dam is Beauty 4th of Maine Valley. He is an all red, low-down, thick-fleshed fellow, well ribbed and is well bred. His lines are straight and his back as level as a floor. Mr. Moyer will be pleased to make prices on either of the above bulls and will do so feeling that they cannot be duplicated at anything like the money asked. His announcement appears in The Homestead on page 36.

**J. F. COOK & CO.'S JACK SALES.**

Recent sales of jacks made by Messrs. J. F. Cook & Co.—Majorca King 1139, five years old, imported from the island of Majorca, a premium winner on the island and one of the finest jacks imported by them, sold to Chehalis River Lumber Company, Centralia, Wash.; imported three-year-old Majorca Lucero 1120, to Mr. S. D. McKeever, Rensselaer, Ind.; two-year-old imported Cataloulain Larsagont 1128, to Mr. Stanley Turner, Water Valley, Texas; to Mr. J. D. Burns, Moorefield, Ky., three-year-old Dr. McCord Jr., 15½ hands high; to Mr. James Merrick, Jr., Sudlerville, Md., a four-year-old, 15½ hands high; to Mr. D. Hart, of Del Rio, Texas, eleven yearlings and two one-year-olds. At their branch barn, Newton, Kan., a three-year-old imported Majorca King of Kings, one six-year-old 15 hands high, and two two-year-olds. Note their advertisement on page 35.

**ANSTHEY'S HEREFORD SALE.**

On April 4, 1907, Mr. George J. Anstey, of Maseau, Iowa, will sell a draft of forty-five head of Hereford cattle at South Omaha, Neb. This offering is the natural increase of his herd and are sired by Sidney 1st 161307, a son of Keep Ahead by Keep On, and Fairview Tom 3d 130860, a grandson of old Corrector. They will be bred to his present herd bulls, Beau Shadeland 10th 207380, a son of the well-known show bull, Beau Donald 28th, and also to Sidney 1st 161307. There will be twenty-five bulls in the sale and twenty heifers. The bulls are a strictly first-class lot. They are ready to go right out and do good service. They have been well cared for, are growthy, with plenty of bone, and are in excellent condition. The heifers are a choice lot and the whole offering is the best that Mr. Anstey has offered from his herd. Those who want

Hereford cattle should remember that this is a draft sale from his herd, and he is putting in the very best he has. Those who want Hereford cattle should send their name to Mr. Anstey so they will be sure to get a catalog as soon as it is issued.

**MCLAY BROS.' CLYDESDALES.**

While the Clydesdales are not so numerous in this country as some of the other draft breeds, it is generally admitted that they are rapidly "coming into their own" and wherever you find a Clydesdale stallion there you will find some choice young stuff coming on, and that even a sprinkling of this blood mixed in is very valuable in shaping up and in giving style, finish, bone and soundness to those geldings that bring the highest price in our markets. Messrs. McMay Bros., of Janesville, Wis., are leaders in this country for this valuable breed, and they report a good demand, having recently sold to Pennsylvania, Illinois, North Dakota, South Dakota, Indiana, Wisconsin and Iowa. They have some of their highest priced horses still on hand and are prepared to name attractive prices on them. They keep everything on their farms at a minimum expense. You can't do better than to deal with them. See their advertisement on page 32.

**LAST CALL FOR SHORT-HORN SALE AT UNION, IOWA.**

Ten Short-horn breeders of Marshall, Hardin and Grundy counties will hold a combination sale of their offering at the above place on March 21, 1907. A good sale pavilion has been secured for the purpose and as this event is an annual affair the consignors feel that they are fully prepared to make the event one of enjoyment to their buying friends. In size, the offering numbers seventy-five head, consisting of cows and heifers, some with calves at foot, and a number of vigorous young bulls. All the leading families of the breed will be represented and with individual merit in keeping with the breeding. The bulls to which the offering has been bred are both of Scotch and Scotch-topped breeding. Many of the cows are heavy milkers and for these there should be a very strong demand. Catalogs may be obtained by writing to Mr. A. P. Mason, Union, Iowa. On page 33 will be found interesting particulars. Write for the catalog at once.

**A CRUICKSHANK SHORT-HORN BULL FOR SALE.**

Mr. E. R. Silliman, of Colo, Story county, Iowa, is in position at this time to offer for sale one of the best Cruickshank Short-horn bulls living. We refer to Baron Foxglove, three years old, a very dark roan bull sired by Imp. Fancy's Pride, the bull that burned up in Mr. Lind's disastrous fire. Baron Foxglove belongs to Mr. Cruickshank's famous Brawith Bud family, and there is probably no better bred Cruickshank bull living. This bull is offered for sale only because Mr. Silliman's other bull, Claverburn's Ideal, has now reached an age where he is considered capable of taking care of the entire herd.

## GIVES THE CREDIT TO THE HOMESTEAD.

INTELLIGENT ADVERTISING IN THE BEST MEDIUM AND GOOD WORK IN THE RING MAKE A SALE A GREAT SUCCESS.

Mr. C. M. Dewey, of Shannon City, Iowa, proprietor of the Pleasant View herd of Duroc-Jersey swine, writes under date of March 2d:

"Herewith please find check in payment for advertising of White & Dewey sale. The sale was a great success, for which we give due credit to The Homestead and your splendid field man, Mr. M. T. White. Please accept our thanks for the excellent work done for us."

The calves from Baron Foxglove are numerous and of splendid quality, which is a prominent factor in determining the qualities of a herd bull. Prospective buyers can have this advantage when coming to see Baron Foxglove. He is a splendid breeder and is equally good on both bulls and heifers, as the get of each sex will practically demonstrate. Mr. Silliman will price this bull at \$300, which is at least \$150 less than he is worth.

**MORTON'S DUROCS.**

A name that is always thought of in connection with the Duroc Jersey breed is Mr. S. E. Morton, of Camden, Ohio, one of the oldest and best breeders of Duroc Jerseys that this country has ever known. He has been secretary of the American Association a number of times and has been one of the successful showmen of this country. He was the owner of Ohio Chief, and showed him at the World's Fair in St. Louis, where his winnings are too well known to require mention here. Mr. Morton was also the owner of Protection, a boar which sired more boars that headed herds than any boar living or dead. A consignment of sows sold by Mr. Morton this winter in the Whitehall sale including seven daughters of Ohio Chief, sold at an average of \$385.71. He now has in his herd thirty daughters of Ohio Chief, and a better lot of brood sows is seldom seen in any herd. His principal herd boars are King of Colonels and The Chief, a son of Ohio Chief, the best son the writer has ever seen of this noted hog. King of Colonels was sired by Prince of Colonels by Carl's Colonel and traces to Walt's Colonel, one of the most noted boars of the breed. He is a show boar in every respect and his ancestry has been producing that kind of stock for many years. The Chief was sired by Ohio Chief and is out of a daughter of Ed's Colonel by Walt's Colonel. He is a stylish fellow and is the sire of much of the good stock found in this herd. Mr. Morton recently sold to Mr. Grant Chapin, of Greene, Kan., the spring boar, King of Colonels II., at the good figure of \$600, the highest price ever paid for a spring male pig. Mr. Chapin attended the Ohio circuit of sales and was a liberal bidder. He is to be congratulated on securing the good pig by King of Colonels. Mr. Morton is now booking orders for spring pigs and will be pleased to correspond with anyone in search of good Durocs.

# PILES NO MONEY TILL CURED.

**FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.**  
**DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.**

## PUBLIC SALE OF REGISTERED Percheron and Shire Stallions and Mares

AND ONE MAMMOTH JACK  
**At Milan, Mo., Tuesday, April 2, 1907**

**PERCHERONS**  
Mark Me 41579, color black, star/eight years; a sure foal getter; over 75 living foals last year. Admiral Togo, coming two years, color bay; will make ton horse. Senator Warner, coming yearling, black; Minnie 25240, gray mare; Zella 25242, sorrel mare; Mollie Belle 50185, black mare; Fanny Belle 30181, black mare.

**SHIRES**  
Imp. Hoebling Craftsman 6358, color mahogany bay, seven years, a sure breeder and a horse importer sell at \$1,200 to \$1,500. Sweet Marie 8093, sorrel mare; Daisy Bell 8188, sorrel mare; Dorothy 8112, bay mare; Tom Curtis, a black Mammoth jack and one of the best jacks in Sullivan county.

It will pay anyone wishing to buy good breeding stock to come to this sale, where you can buy as good horses and mares as at one of the sales made by some of the large dealers, where you pay for their name. They buy from the farmers, double their money and you pay it. Come and buy from first hands. Everything sells without reserve. Send for catalog.

**Jas. A. and S. E. Niblo, Milan, Mo. MILAN IS ON THE O. K. AND C. B. & Q.**

He will be pleased to have western breeders inspect his herd and if notified will meet them at Camden at any time. Look up the announcement on page 36 of this issue and write for particulars, mentioning The Homestead.

**COMBINATION SHORT-HORN SALE AT HARVARD.**

The combination sale of Short-horn cattle to be held at Harvard, Neb., on March 20th, should attract the attention of all lovers of this breed. Mr. Albert Hultine, of Saronville, Neb., will close out his entire herd and among them are a bunch of cows that could not be bought other than in this kind of a sale. Among the special attractions of the offering is the great cow, Nebraska Belle got by Goldie, of the noted Miss Ramsden family. Her dam was Belle by Nebraska Mon-

## CLOVER HILL SHROPSHIRE

IN favor everywhere because of their good size, strong constitution and true type. We now offer a strong, growthy lot of rams and ewes, coming yearlings, sired by 275 to 345-lb. champions of England and America. Will import this summer, as usual, from England and Scotland and will execute orders for show or breeding sheep on a very low commission. If wanting home bred or imported, few or many, our offers merit your consideration.

**CHANDLER BROS., Kellerton, Iowa**

## Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

**GEORGE ALLEN, Lexington, Neb.**

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Anita, Iowa.

15 Registered Shropshire ewes, bred to imported Minto ram, W. C. Frazier, Atlantic, Cass county, Iowa.

good one. If you are interested in a stallion plan to visit the barns at either Kansas City or Bushnell before making a selection, as you will be pleased with the stallions shown you. Look up the advertisement on page 39 of this issue and write for catalog, kindly mentioning this paper.

**JAS. A. & S. E. NIBLO'S SALE OF PERCHERON AND SHIRE STALLIONS AND MARES.**

On Tuesday, April 2d, at Milan, Mo., Messrs. Jas. A. & S. E. Niblo, of Milan, Mo., will sell their entire stud of Percheron and Shire stallions and mares, a list of which will be found in their advertisement on this page. Messrs. Niblo have been breeding horses for a number of years and are not speculators. The sale is brought about on account of their having sold their farm preparatory to moving from Sullivan county to engage in other lines of business. Their original purchases were made from Mr. S. S. Spangler, of Milan, Mo., who was known as one of the leading breeders of the draft horse in north Missouri. The very best imported stallions have always been used by these gentlemen and as a result they will offer choice stock well bred. Their herd stallions have a reputation in Sullivan county for getting an unusually high-class lot of stock, and the man hunting stallions will do well to look after these, as Messrs. Niblo are going to sell without reserve. The mares are all in foal and are the kind so much sought after. Buyers will find this an excellent opportunity, as it is strictly the closing out of a small but select herd. See this page for the advertisement and write today for a catalog and kindly mention this paper when writing.

**NOVINGER & SON OFFER TWO FINE SHORT-HORN HERD BULLS.**

Messrs. Isaac A. Novinger & Son, of Kirksville, Mo., breeders of Scotch and Scotch-topped Short-horns, write that they have never offered two as good herd header prospects as they are now offering. Both are bred right and their individuality is such that they should go to good herds. One, a Lavender called Lavender's Choice, is a beautiful rich red roan and was got by Lavender Viscount 2d, he by the champion, Lavender Viscount. The dam of Lavender's Choice, Sweet Lavender, was got by Imp. Golden Crest and out of Imp. Lavender Thyme 2d by Prince of Fashion. Few equally as well bred Lavenders are found, as he traces twelve times to straight Lavender dams. Lavender's Choice is a bull from end to end, a thick fellow and a feeder set on good, short legs. Another is Lavender Viscount 5th, a dark red got by Lavender Viscount 2d and out of the Victoria cow, Margaret Victoria by Golden Crown. She traces close to Imp. Victoria 71st by Roan Gauntlet. This fellow is just a year old and weighs 1,000 pounds, but has never been crowded. Some mau who wants a bull that has scale and quality should look to him. Three other

## HORSE OWNERS! USE

**CAUSTIC BALSAM.**

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from Horses. Impossible to produce scar or blemish. Send for circular. Special advice. THE LAWRENCE-WILLIAMS CO., Cleveland, Ohio.

Scotch bulls are also to be found here, as well as some fine Scotch-topped fellows. See page 36 for Messrs. Novinger & Son's advertisement and if in the market for a herd bull write them, or better still, go and see the bulls.

#### COMBINATION HORSE AND CATTLE BREEDERS' SALE, WATERLOO, IOWA, MARCH 21, 1907.

At the above place and on the date given there will be held a notable sale of horses and cattle. The stock is registered or eligible to registry and is of the kind and breeding that would be found at some of the best individual sales. In Percherons, there will be a number that are imported stallions and others from the best stables in the country. Mr. Holland, the manager, informs us that the stallions are not second handed, but are first-class in every respect. There will be, besides, a number of Belgian and coach stallions. The cattle part of the offering will include sixty head of Angus, Short-horn and Hereford males and females. Mr. Tom Maxwell, of Earlham, consigns fifteen Short-horn bulls, twelve to eighteen months old, besides a number of this breed consigned by Mr. Victor Speers, of Cedar Falls, and Mr. John Bedard. Angus are consigned by Messrs. A. E. Glenn, of Waterloo, and Frank Hoyt, of La Porte City. Mr. John Heinz, of Waterloo, will offer Hereford bulls, fourteen to eighteen months old. Mr. Holland, the manager and auctioneer, has been selling stock in Waterloo for many years and his ability in getting up a sale is first class. The sale is made to sell the stock offered at a price that the public may see fit to pay. Here is a chance for every breeder, and probably one to secure some snags. If interested write for catalog to Mr. Wm. Holland, Waterloo, Iowa. Kindly mention that you saw the advertisement in The Homestead.

#### MEAR'S CHESTER WHITE SWINE.

One of the many good Chester White herds of the central West is that of Mr. E. L. Mear, of Neponset, Ill. The writer has visited this herd for the past two years and is pleased to note the improvement made. One of the principal reasons of Mr. Mear's success has been his selection of herd boars. At present he has one of the best boars he is using this year, Neponset Boy 13779. This boar was first prize winner in the twelve and under eighteen months class and headed the first-prize young herd at four of the leading state fairs of the central West in 1906. He possesses great quality and smoothness and has a good future if properly handled. Another boar of much promise is Prince O. K. 15604. He was winner of second prize in class at Illinois State Fair in 1906 and headed second-prize herd at same show. His pigs have been widely distributed this year and have given good satisfaction. Neponset Edd is the making of an extra large hog and is a well-bred one, his sire, Counsellor, being the champion boar at Illinois State Fair in 1905 and his dam, Baby Belle, the champion sow at St. Louis Fair in 1904. Mr. Mear has for sale sixty fall pigs of September, October and November farrow, that will please the most discriminating buyers. A few bred gilts are also offered for sale for April and May farrow. Readers of this paper should avail themselves of this opportunity to secure good breeding stock at reasonable prices. Mr. Mear is now booking orders for spring pigs and will be pleased to furnish any information in regard to his herd to interested parties. Look up the advertisement on page 37 and write for prices, kindly mentioning this paper.

#### J. H. ENO'S ANGUS DISPERSION.

Below we present our readers with a likeness of Mr. J. H. Eno, of Havelock, Iowa, one of the highly respected breeders in the northern part of the state. Mr. Eno will close out his herd of Angus cattle along with a good bunch of pure-bred Poland China sows on March 27, 1907. The business has always been profitable for Mr. Eno and his

sons. It is very reluctantly that this move is made, but it is only for the reason that more money is needed to carry on the affairs of the farm. The foundation stock was carefully chosen. Among the catalog numbers will be found a number of the breeding of the late Wm. Miller, of Storm Lake, Iowa. These are sired by Baron Inca, a sire of note once in that herd, also Invaluable Blackbird, Cranewood Black Knight and others. There will be a number of the cows with calves at foot which will offer a good opportunity to those looking for foundation stock. The fact that there are only five young bulls to be sold goes to show that the business has been carefully handled. There is much merit in this quintet and they promise to make good, large, sappy bulls. The swine offering merits the attention of all those looking for good, growthy hogs. The breeding is principally Perfection and buyers will find in them some splendid producers. They have been handled right and are in as good condition as could be desired. Plan to leave the corn stalks a day and attend this sale.

Send for catalog Next week watch for detailed particulars.

#### CHOICE ABERDEEN ANGUS BULLS FOR SALE.

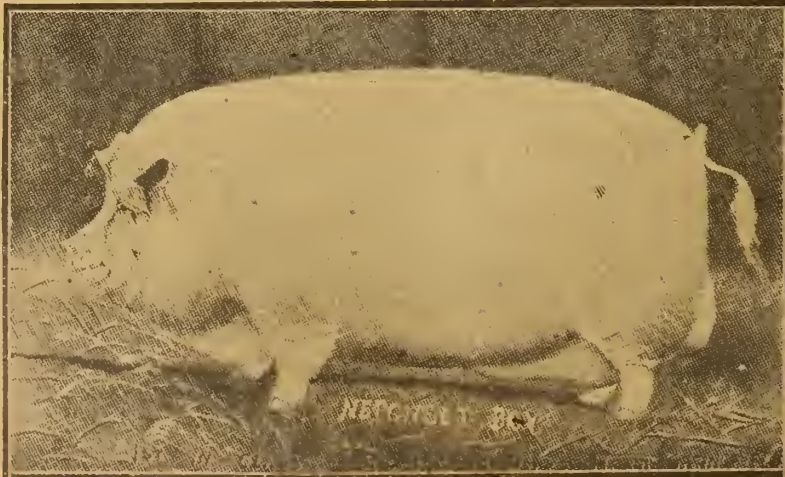

Throughout the middle West the Aberdeen Angus breed of cattle have been gradually growing into prominence. This is particularly true since 90 per cent of the fat stock show champions for the last fifteen years or more have been of this breed. One of the good herds of Aberdeen Angus cattle in the great state of Iowa is that owned by Messrs. Allen Bros., of New Sharon, Iowa. As seen by one of our representatives last week, they are in position to furnish five fine, big, strong Aberdeen Angus bulls at from \$100 to \$200 each. These bulls are all coming two-year-olds and are strong, thrifty bulls of the following families: One Pride, one Drumin Lucy, three Favorites. A portion of them are by that famous old bull, Proud Blackcap. One is by Bentley of Allendale, one by Dakota West Side and one by Black Knight 37th of Roycroft. The splendid Queen Mother bull is priced at \$200 and is readily worth more money than this. A new bull has recently been procured to head Messrs. Allen Bros.' herd, and one that will undoubtedly make his mark as one of the good bulls of the breed. We refer to Black Monarchist. He is a double Blackbird, being sired by Black Monarch of Emerson and out of Black Lassie Bell. This bull has three crosses of that famous old bull, Rugby. He is a bull very even and true in his lines, has a nice dandy head, short of leg, with a tremendous thick padding of smooth, even flesh on the loin, and this, too, in only modest breeding condition. Messrs. Allen Bros. are in position to furnish a liberal number of cows and heifers at modest prices. Homestead readers will find it to their advantage to go and visit the Allendale herd.

#### SPRING OFFERING OF SHORT-HORN BULLS.

On page 36 will be found the announcement of Mr. A. L. Stutzman, of New Sharon, Iowa, a prominent breeder of Short-horn cattle and a regular patron of The Homestead, who is now offering for sale four good Short-horn bulls, two reds and two roans. They are all by his splendid Scotch bull, Golfman. One is Golfman 3d, a beautiful red bull, she out of Imp. Melba 2d and she out of Imp. Melba by Fearless Archer. The other red bull is a little younger and is out of a Minerva cow and promises to make a good, thick block. A large roan bull, not a straight Scotch, but nevertheless is a good one, is Panny Forrester. This is a splendid bull, strong boned and a very impressive-looking fellow. Another good roan calf is out of Melba 4th, she being a daughter of Melba 2d, first referred to. Melba 4th was by Baron Aylesby, a son of Baron Cruickshank 3d. Mr. Stutzman's present herd bulls are three in number and include the great herd bull, Golfman, and a red three-year-old by the Cruickshank bull, Victorious, and out of Imp. Melba. The other herd bull is a six-year-old red Mysie called Mysie's Victor. He is a son of Victor Baron and out of Mysie's Carnation by Duke of Oakland, and is a direct descendant of Imp. Mysie 36th by Scotland's Crown. Mr. Stutzman is making very attractive prices on these bulls in order to close them out and make room for the large crop of calves that are expected to arrive soon. He has had good sales during the winter from Homestead readers, having recently disposed of some seven young bulls at satisfactory prices. Nevertheless his prices are only about half what some breeders ask for bulls of like breeding.

#### LAST CALL FOR THE McLAUGHLIN SHORT-HORN SALE.

Those who want to buy some good Short-horn cattle should not overlook the sale of Mr. W. H. McLaughlin, at Shelby, Iowa, on March 18th. He is offering a most excellent lot of cattle of the best Scotch and Scotch-topped sorts. This is not a cull sale, either, but on the other hand is the best he has in the herd. It is, as a rule, the natural increase of his herd, and no breeder has ever exercised more pains in the selection of animals to be sold than he has on this occasion. Most of the heifers and the young bulls in the sale will be sired by the noted bull, Baron Kear 3d 158073, a son of Banner Pro and out of a daughter of Imp. Prince President. This bull formerly headed the herd of Messrs. C. W. Daws & Son and he cost an even \$1,000. He is one of the best Scotch bulls today in western Iowa, and he has always been a splendid breeder. Mr. McLaughlin sells a good Duchess of Gloster cow in this sale and she will be right at her calving to Baron Kear 3d. There will be a most excellent Nerissa cow in the sale and several of those good Lavinas. She will

Neponset Boy 13779, first-prize Chester White boar in junior yearling class at four state fairs in 1906, and headed first-prize young herd. A number of good gilts bred to this boar are offered for sale by Mr. Ernest L. Mear, of Neponset, Ill. See field notes.

# CLOVER LEAF FARM HEREFORDS

ONE OF THE

## GREATEST HERDS IN AMERICA

AT KANSAS CITY, MO., THURSDAY, APRIL 4TH

48 Females--Anxiety 4th strains predominate--18 Bulls, 19 Cows with Calves at foot

SEVERAL are daughters of the great Beau Brummel. Half are by the Junior Champion Brigadier 109729. Lamplighter's best son and out of an Anxiety bred cow. Everything of breeding age is bred to this bull or Dale Jr. 157199, a great breeding son of The Champion Dale. Not a shy breeder or an old decrepit cow in the lot. Brigadier and Dale Jr., my great herd bulls, head the bull offering which is pronounced the strongest of the year. To the men wanting absolutely high class herd bulls and choice females good enough to enter any herd, I extend a cordial invitation. It is an absolute dispersion brought about on account of my having sold my farm, preparatory to moving to town. Write today for catalog.

W. G. SWINNEY, BOIS D'ARC, MO.

COLS. SPARKS, HARRIMAN AND ZAUN, AUCTS.

have a yearling heifer in the sale sired by Gloster Bud, a straight Scotch bull. There will also be sold a daughter of old Camille, and she is one of those good Sonsies that have done so much for several western herds. There are many other splendid females in the sale of the very best families. Mr. McLaughlin will also sell a splendid lot of young bulls. Among these is a richly-bred Duchess of Gloster called Mysie Gloster. He is a son of Baron Kear 3d and out of Duchess of Gloster 49th by King James. This young bull is a roan in color and a good prospect for a herd bull. Some enterprising breeder should go after this fellow. He also sells a number by Baron Kear 3d, one by Gloster's Choice and one by Cumberland 2d. These are growthy bulls, well developed, and are a good lot in every way. The whole offering is good and it is one that will be appreciated on sale day. Write for catalog and mention The Homestead.

#### SOME GOOD SCOTCH BULLS.

On page 36 of this week's Homestead will be found the advertisement of Mr. Ernest Funke, of Greenfield, Iowa, one of the most reliable breeders of Short-horn cattle in the state. Mr. Funke is now offering a few Scotch and Scotch-topped bulls for sale, nearly all of which are sired by his former Scotch bull, Golden Champion. One of these is a yearling and is out of Victoria Funke 4th and is a well-bred Victoria bull. His grandam sold in the Bigler sale for \$1,000 and is now conceded one of the best Victoria

## McLay Bros. Clydesdales

Janesville, Wis.

THE RECORD OF PRIZES WON FAR SURPASSES THAT OF ANY OTHER STUD IN THE UNITED STATES.

Twenty-eight prizes at 1906 International. Three champions. Considerably More Than Double Any Competitor. We just as surely outclass all competition for a Choice Young Stallion at a reasonable price. Sixty-five head in stud, imported and home bred. We cater to the very highest class of trade. If interested do not fail to

Send For New Catalog.

FOR SALE, Reg. Percheron stallion, wt. 2000, black, age 9 yrs., three Reg. Hereford bulls. This will appear but once. V. C. Atwell, Little Sioux, Iowa.

cows in the state. He is red in color, with just a speck of white on the shoulder, is a very stylish fellow, excellent in his lines and will make considerably over a ton bull. He is a herd header and Mr. Funke is very reasonable in his price. He also offers a good young Acanthus bull for sale, and another young Victoria bull, as well as a Miss Ramsden. He has a number of others that are coming on that he will price to anyone who wants them. At the head of the Funke herd today is Nonpareil Perfection 206647, a son of Nonpareil Victor. This is the massive roan bull that Mr. Tom Warnell showed at the leading state fairs and that afterwards topped his sale. He is a well-bred Nerissa and is bred along the same line as the great show bull, Nonpareil King. About thirty of his calves have been dropped already and they have more than come up to expectations. In fact Mr. Funke never had a better lot of calves on the place. He has some good show propositions among these young heifers if they were fitted. Among the best of these is a Victoria, an Orange Blossom and a Snowdrop, and there are several others that are very promising. He also has a few Ceremonious Areher calves in the bunch. The Funke herd has been widely known for the great number of Victorias, Orange Blossoms, Acanthus, Miss Ramsdens and Lavenders that are to be found therein, and he has bred a class of cattle that have given the greatest satisfaction to those who have bought of him. He will make a public sale this fall and he always puts up an offering that breeders want. In the meantime he has a few good Scotch bulls for sale, and we will assure our readers that Mr. Funke will treat them right. Write him or go and see him at once.

# ...BREEDERS' SALE...

OF REGISTERED PERCHERON, BELGIAN AND GERMAN COACH STALLIONS, SHORT-HORN, POLLED ANGUS AND WHITE FACED CATTLE, AT WATERLOO, IA., THURSDAY, MARCH 21st  
This sale will include several of the best Percheron stallions in Iowa, ranging in age from three to five years old--10 head of Imported German Coach Stallions, [Government approved] from three to four years old. The above stallions are not second-handed, but come direct from first hands to our sale, and we can assure the public that they will not be disappointed in the quality of the offering, for without doubt they will be the best-bred stallions ever offered, at your own price, and there are certain to be some great bargains. I purchased these stallions direct from the importers, and I am willing to allow the public to make the prices on them, and they will be sold on the above date without reserve.  
WM. HOLLAND, OWNER.

## 60 HEAD SHORT-HORN, POLLED ANGUS AND WHITE FACED CATTLE

Consigned by the following well-known breeders: Tom Maxwell, of Earlham, Iowa, consigns 15 head of Short-horn bulls, ranging in age from 12 to 18 months. They are deep reds, have great style and conformation, possess the required quality, from an individual standpoint are in the pink of condition, and are sired by one of the best-bred Scotch bulls in the United States. Remember, Mr. Maxwell's offering is second to none, as there are 12 bulls in this consignment that are good enough to head any herd in the United States. Mr. Maxwell consigns 6 head of females that he considers among the best in his herd. W. C. Natzke consigns 3 head of bulls, that are grand, good individuals, and are royally bred. Victor Speers, of Cedar Falls, Iowa, consigns several head from his herd of Scotch cattle. John Bedard consigns 5 Angus cattle in both males and females. Mr. Bedard has paid strict attention to the breeding of his cattle from a quality standpoint, and his offering will prove to the public that his efforts have been crowned with success. These cattle are direct descendants from some of the best Short-horn families, and are surely worthy of a place in the best herds. A. E. Glenn, of Waterloo, Iowa, consigns several head from his celebrated Angus herd. Frank Hoyt, of La Porte City, will also be a liberal consignor of fine individuals, are just the right age, being from 14 to 18 months old and are bred in the right lines. Remember, this sale is made to sell the horses and cattle offered at the price the public may see fit to pay for them. We do not expect to get \$10,000 for any one stallion nor \$5,000 for any one bull, but we do expect to make this sale a clean business transaction and we will insure those who are desirous of purchasing any of the above offering that they will not be disappointed in the quality of our horses and cattle, as you will find our draft stallions will be big, bold and flashy, and they have a draft horse look to them, and will meet the approval of those looking for the right kind. Our Short-horn cattle are pure-bred Scotch and Scotch topped. Our Angus cattle are descendants from the best families known to the breed. From an individual standpoint you will find the bulls in this sale to be low-down, thick-made, mellow-looking fellows, with a fluffy coat of hair, standing on a set of limbs that are faultless. They have a great width of loin, and are good enough to please the most fastidious. Sale commences at 10 o'clock sharp. For catalogs and particulars address,

WM. HOLLAND, MANAGER AND AUCTIONEER, - - WATERLOO, IOWA.

## PUBLIC SALE OF 150 REGISTERED

# SHORT-HORN CATTLE

AT MASON CITY, IOWA, MARCH 28TH

7 PERCHERON STALLIONS AND ONE CLYDESDALE MARE---ALL REGISTERED STOCK

On the above date I will sell, included in the 150 head, twenty head of pure Scotch cattle, among which is Imp. Zoe 5th and Roan Ribbon. Each of these two famous cows have calves at foot. Will sell ten head of young bulls. A great many of the cows in this offering have calves at foot. The first twenty head cataloged are the choicest that I have ever offered. The females will be bred largely to Hampton's Marshal, one of the best sons of Imp. Merry Hampton. A brother to this bull sold for \$1,000. Imp. Roan Ribbon is a daughter of Imp. Red Ribbon 2d, which I sold in 1902 for \$1,000. She has a splendid cow calf at foot by Prince Victor and is rebred to Hampton's Marshal. The sale will be held in Mason City where all can be made comfortable. Address for sale catalog,

A. H. BRETT,

## Angus Dispersion

TO BE HELD AT HAVELOCK, POCAHONTAS COUNTY, IOWA,  
WEDNESDAY, MARCH 27, 1907

55

Females of the Leading Families

55

COWS sired by Baron Inca 58611 of the late Wm. Miller herd, also by Cranewood Black Knight 39477 and others. These cows are regular producers of high grade stock as their offspring will show. A number have calves at foot. Herd bull is Cottonwood Floyd 45416 by C. Gaybird 31327 out of Finery 28992. Here are snags but I need the money.

Five Young Bulls 9 to 12 Months Old. They and the heifers are sired by the herd bull. My young stock is in splendid condition. Nothing will be overfat.

Thirty-six Head pure bred Poland sows and gilts of Perfection breeding. Bred to Highland 66223, grandson of Keep On. All big growthy stuff. Snags for farmers or breeders.

Sale under cover--Free entertainment--Write for catalog.

OUT  
SALE**

# Aberdeen-Angus Cattle

PERRY, IOWA, TUESDAY, MARCH 19, 1907

**61 Head, 48 Cows and Heifers and 13 Bulls 61**

4 K. Prides  
3 Blackbirds  
2 Queen Mothers  
4 Lavenders  
1 Imp. Pride heifer  
2 Imp. Lavenders  
1 Imp. Trojan Erica

There will be 13 bulls in the sale including our splendid pride bull **PRINCE OF PILSEN** 59249, also a good **TROJAN ERICA**, **K. PRIDE**, a **QUEEN MOTHER** and a **LAVENDER**. All good enough to head herds, besides several others.

PRINCE OF PILSEN 59249.

Owing to a dissolution of the firm we have decided to close out our entire herd. When laying the foundation for this herd we purchased the very best that money would buy, and drew upon the best herds in this country. Now everything will be sold including our splendid K. Pride herd bull, **PRINCE OF PILSEN**, all our breeding cows, young heifers and young bulls. The best families known to the breed are included, and it is one of the best offerings of Aberdeen Angus cattle that will be sold this year. There will be a lot of good young bulls in the sale of the very best families.

## W. H. McLAUGHLIN'S SHORT-HORN SALE

Scotch and Scotch Topped

**Shelby, Iowa, March 18, 1907**

**40 HEAD**

**28 COWS AND HEIFERS, :: :: 12 YOUNG BULLS**

There will be 8 Scotch cows in this sale and one good young Scotch bull, of the Duchess of Gloster, Nerissa, Jasmine and Lavina tribes.

**Baron Kear 3d, 158073**

Dark red, calved February 15, 1900.

Banner Pro. 124047.....Cookson Bros.  
Mysie 52.....Imp. Prince President 77023.....A. Cruickshank  
Mysie 47th.....Imp. Goldstick 86748.....A. Cruickshank  
Mysie 45th.....Imp. Earl of Aberdeen 45992.....A. Cruickshank  
Mysie 43d.....Crown Prince of Athelstane 2d 16585 David Christie  
Imp. Mysie 36.....Scotland's Pride 25100.....A. Cruickshank

This splendid Cruickshank bull is the sire of most of the young stuff in the sale and is also bred to most of the older cows.

I am selling one of the best drafts of cattle that has ever gone under the hammer in Shelby county. I am putting in some of my best Scotch cows and I also sell twelve good young bulls. One of these is a pure Scotch sired by Baron Kear 3d and he is a herd header. The other bulls will have four and five Scotch tops on them and are a splendid lot. The Baron Kear 3d heifers are bred to the Scotch bull Nonpareil Courtier 3d 238981. There will not be a cow in this sale that is not strictly all right in every way. No shy breeders nor barren cows will be sold. That kind I sell on market. Write for catalog. Address.

**W. H. McLaughlin, Shelby, Ia.**

Col. BELLOWS, Auctioneer.

Shelby, Iowa, is forty miles east of Omaha on the C., R. I. & P. Ry. Parties coming to sale can stop at Tennant, Iowa, on C. G. W. Ry. My farm is 1½ miles from Tennant.

**C. E. CLARKE'S**

## Short-horn Sale

to be held at

**South Omaha, Neb., Wednesday, March 27, '07**

**55 - Head--12 Bulls, 43 Females - 55**

**Best Draft of Short-horns that will be offered this year**  
10 Pure Scotch Bulls--10 Cows with calf at foot  
3 Imported cows

**Several winners of first honors at the International Show heifers and calves that will make winners**

No choicer lot of Short-horns was ever included in a public sale. NINETY PER CENT are pure SCOTCH, descendants of the most noted and popular families and richly bred. Bulls are sons of the great March Knight, Nonpareil Stamp and grand champion White Hall Marshall. Best lot individually ever together in a sale ring. Breeding and quality will satisfy the most discriminating buyer. Will make show animals and herd headers of first class. The females are of exceptional value and highest personal merit. Cows are regular breeders and safe in calf to the best Meadow Lawn bulls. The heifers are daughters of March Knight, Imp. Pennan Commander and Bapton Ensign. Many are of the famous Broadhooks family and promise to add new laurels to the name. The majority have been bred to Bapton Nonpareil, a son of Bapton Ensign, that will win International honors, and Choice Knight, one of the most prominent sons of grand champion Choice Goods. Breeders who wish to secure strictly high-class animals to enrich their herds should not fail to be present. Kindly mention The Homestead and write at once for a catalog.

Auctioneers: Cols. Woods, Bellows and Mason

## AT PUBLIC AUCTION

SIoux CITY,  
IOWA,  
WEDNESDAY,  
MARCH 20,  
1907.

IOLANTHE, Champion mare at Iowa and Minnesota state fairs, and the Chicago International, 1906.

70  
REGISTERED  
STALLIONS,  
MARES  
AND FILLIES

For the reason that many of our former customers were unable to fully supply their wants at our December sale, we have decided to hold a March sale. We will offer at this time 25 head of choice stallions, including all we had reserved for sale at private treaty, among them some of our State Fair and International winners; also 45 of our best mares and fillies. Many of these mares and fillies we had intended for our own breeding, but have decided to catalog them, as we want to make this sale unusually attractive. Most of the mares are bred to the world-famous CALYPSO and the champion OLBERT. Send for catalog.

**LAKEWOOD FARM, - - - ROCK RAPIDS, IOWA.**

H. G. McMILLAN, PROP., C. M. DENT, MGR., COLS. F. M. WOODS, P. McGUIRE AND DAN SAYRE, AUCTIONEERS.

## Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

**Watson, Woods Bros. & Kelly Co.,** LINCOLN HOTEL BUILDING Lincoln, Neb.

## THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props.  
Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equaled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH & SON.

Departments:

Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## FOR SALE AT A BARGAIN

KING WILLIAM 12782.

Registered French Draft Stallion. Foaled June 1899, Weight 1,800; also have some Scotch top bulls for sale. W. A. JOHNSTON, Prairie City, Iowa.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs was the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE;" "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 102 Percherons, Belgians and Coachers 102

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES;" they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

IKKEY! What a rich graft there "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$3,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holter." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. FOR \$700 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot. H. E. PETERSON, LYONS, NEBRASKA

## Making the Home Cheerful

How to Provide Amusement for Old and Young

### Fun and Entertainment for All

The editor of this magazine has frequently urged his readers to do all they can towards making the home as cheerful as possible for all the family.

Now I want to tell you how you can cheer and brighten your home in a simply wonderful way.

Read what Thomas A. Edison the world's greatest inventor "the wizard of the 20th Century" has said:

"I want to see a phonograph in every American home."

If you have never had a genuine phonograph in your home you cannot imagine what a wonderful pleasure it will be to you.

"What pieces can I hear on a phonograph?" some may ask.

Well, you can hear almost anything. There are 1500 genuine Edison gold moulded records and you can have your choice of these.

Suppose you get some vaudeville records reproducing to absolute perfection the greatest comic artists. Then take some band music, Sousa's Marches, Waltzes by Strauss, soul stirring lively music; then grand opera concert pieces as well as the finest vocal solos; also comic songs, ragtime, dialogs, comic recitations, piano, organ, violin, banjo and other instrumental music; all kinds of sacred music, duets, quartettes, full choruses.

The Edison records are perfect—absolutely natural—and unlike the inferior though higher priced records of others the Edison records never become rasping and scratchy.

### Fun For Everybody.

The most rollicking minstrel music in the world. Comic songs and recitations that set everybody in a roar, putting all in the merriest humor, and casting out every care and every worry. Don't you want your home to ring with the merry laughter of old and young? Don't you want your friends to hear the very latest things that have brought pleasure to the great world? Surely you do. The Edison Phonograph plays and sings them for you quite as well as could the great artists if they were right in your own home.

This wonderful instrument, I think, is far, far better than a piano or organ, though costing only one-fourth or one-eighth as much; for it gives you endless variety, it always plays perfectly and anybody can play it.

With an Edison phonograph in your home you can arrange a concert at any time with just such a programme as brings \$1 and \$2 a seat in the opera houses of a big city.

Or if you like dancing you can arrange a dance in your home or in any hall; for the Edison phonograph is loud enough.

Furthermore with the Edison phonograph you can make your own records reproducing to perfection your own voices and the voices of your friends and children. These records you can keep for years and years having the voices of the absent ones always with you.

Yes, indeed the Edison phonograph is "the king of entertainers for the home."

Here is Mr. Edison's signature which you will find on every genuine Edison Phonograph. Look for this trade-mark.

Thomas A. Edison

Here is a special machine with our beautiful new Flower Horn, horn being more than 2 ft. long and over 1 1/4 ft. in diameter. A splendid horn!

# FREE TRIAL

Read every word of this straightforward offer.

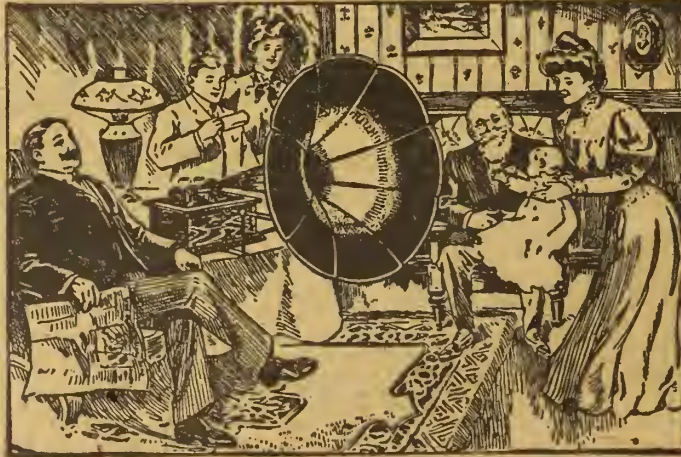

While this Offer lasts every responsible, reliable person can get on free trial a genuine Edison Phonograph Outfit, including 12 Edison genuine gold-moulded records, direct from us to your home: positively not a cent in advance—no deposit—no bother with C. O. D.—no formality of any kind. We allow 48 hours' free trial at your home; and in rural districts up to a week if necessary for convenience of patrons.

Try the instrument at your home, play the stirring waltzes, the two-steps, concert pieces, minstrel dialogs, old-fashioned hymns and other religious music, beautiful vocal solos, operatic airs and other beautiful Edison gold-moulded records. Play all these and if then you do not care to keep this wonderful Edison outfit, send the instrument back at our expense—and we will charge you absolutely nothing for the trial.

We make this remarkably liberal offer to all responsible, reliable parties because we know that after trial hardly anybody ever returns an Edison outfit. When trying it you will see at once the vast superiority of the genuine Edison, particularly our new special Edison outfits, over ordinary talking machines; you and your family and everybody that calls at your house will be more than pleased—constantly amused and entertained and you would not part with the instrument if it cost twice or three times what we ask. Read what the Editor of this paper says in first column of this page.

## Music for Your Home!

Entertainment for the old and the young! No end of pleasure for all the family! An Edison Phonograph means endless variety; it is far better than a piano or an organ, and everybody can play it perfectly. You cannot imagine how much pleasure you will get from an Edison Phonograph until you have tried the instrument in your home.

# \$2.00 A MONTH

Now Pays For a Genuine Edison Phonograph Outfit

including one dozen genuine Edison gold-moulded records. \$3.00 a month and upward for larger outfits. The great Edison Outfit No. 5 for only \$3.50 a month!

This Easy-Payment Offer places a genuine Edison Phonograph—long known as the luxury of the rich—within the reach of everyone—and because we charge only the lowest net cash prices without even interest on monthly payments, the rich are also taking advantage of this modern method of saving and are buying Edison instruments on the EASY-PAYMENT PLAN.

## CUT OFF THIS COUPON NOW!

To assure prompt shipment in case you order, do not fail to write AT ONCE for the free Edison catalogs. Remember—no money in advance—Free Trial—no deposit! Clip the coupon now and mail it today.

No Discount for Cash. So many cash purchasers are taking advantage of this opportunity to secure direct the finest Edison outfits that we are often asked what discount we can allow for cash. We are obliged again to say that we can give no cash discount, for the prices in our catalog are the lowest net cash prices established by Mr. Edison himself, and as the retail dealers throughout the country are positively prohibited from selling genuine Edison Phonographs below these catalog prices, our patrons will recognize that we ourselves cannot afford to violate this rule.

FREDERICK BABSON, Mgr., Edison Phonograph Dists.

Suite 3243 149-150 Michigan Ave. CHICAGO, ILL.

[The Editor of this paper cannot urge his readers too strongly to consider this offer. For the offer is so straightforward and I know it to be exactly as represented. Just think! A genuine Edison phonograph and 12 genuine Edison records for \$2.00 a month! And a free trial besides before you pay Mr. Babson one cent! Don't miss this offer!]

Look for this trade-mark:

Thomas A. Edison

## READ WHAT OTHERS SAY

Here are just a few of the hundreds of letters constantly reaching us from those who have accepted the Free Trial Offer—just a few letters to show how satisfied, how enthusiastic the people are when they get the Edison Phonograph on free trial.

Find enclosed my first payment on Phonograph. Accept my many thanks and highest appreciation for your wonderful machine, your fulfillment to the letter of your agreement, promptness in delivering and fairness in every particular. I shall delight in answering all letters as to you and your instruments.

E. B. Hale, Webster Groves, Mo.

I received the Edison Phonograph I ordered a short time ago, and will say it is more than satisfactory in every way. I am a farmer, and it seems good to hear such good music and song after a hard day's work is ended. I think we should all thank Mr. Edison for the great pleasure his musical wonders afford us.

E. A. Pike, Rowe, Mass.

I have tried the Standard Edison Phonograph and it is "dandy." My father-in-law has another well known make of talking machine but it and a rather expensive one, too, but since he heard my Edison machine he won't play his machine at all.

James W. Ekins, Bedford, Ind.

Of all the other talking machines we have heard play, we think a trial proved yours the best.

John Kent, Grandview, Wis.

The Phonograph I received is a splendid instrument, and we are all enjoying it very much, and we all agree that it has no superior.

J. M. Von Kennel, Cheyenne, Wyo.

Your Phonograph is more than you claim for it, and no words can describe the pleasure it gives to old and young. I have, of course, often heard the Edison, but I never realized before what it meant to have your instrument in one's own home. You may have anybody write to me.

(Prof.) J. W. Flwood,

1406 Farnam St., Omaha, Nebr.

Received instrument today, every thing just as you stated it would be. Would not believe it now for \$50.00.

E. D. Ellison, Tacoma, Wash.

Your machine is, indeed, one of the finest entertainers I ever heard. There has been a crowd at my house every night since I received your outfit.

(Mayor) E. W. Walton,

Buonerville, Miss.

Your Phonograph should be found in every home. I would not think of being without my machine now I have tried it.

Hans Christensen,

Garland, Minn.

People whom I consider judges of music, say, without any exception, my Edison is the best and plainest they have ever heard.

E. J. Carter, Spring Lake, N. Y.

The No. 5 outfit was received in good order. Yesterday I mailed you the first payment. I was so well pleased with your machine that I did not wait for your bill, but paid at once.

R. O. Woods, Mattoon, Ill.

### THE FARMER NEVER A BOOR.

One of the Chicago papers announces the conclusion that the common notion of the farmer must be entirely abandoned; that "the long-whiskered individual who says 'by heck,' has hayseed in his hair, is interested in the lake front explosion and is ready to consider favorable propositions for the transfer of title in the Masonic temple, is a passing type." The writer of the article from which we have just quoted is of the opinion that all this has been brought to pass in the past few years, and that the rescue of the American farmer from his former crude state is the work of the rural telephone, the rural mail carrier, and the distribution of newspapers, magazines and other mediums of intelligence in the rural districts.

It is not an agreeable task to dispel the illusion under which this writer is evidently laboring; but the fact is that the American farmer never was a boor, a clown or a clodhopper; that he was the original American gentleman of the highest type, and that the tendency and disposition to treat him otherwise was from the beginning simply the smart vulgarity of a half-baked urban civilization. The really polished city man recognizes merit wherever he sees it. It is the novice in town or city life who, conscious of his own deficiencies in culture, exposes his lack of assured position in the scale of gentility by jeering at those whose refinement is not wholly a matter of surface. There has been progress in manners in our cities and towns in the present generation, and that progress is best evidenced by recognition of the superiority of the American country neighborhood as a type of community life. The cities are slowly rising to the level of the country. Agriculture was the largest and most respectable industry of the colonial period of this country. George Washington, the finest gentleman of whom early American history gives us a record, was a farmer and an extremely good and practical farmer, interested in every problem of the farm—a breeder of good horses and cattle, a student of agriculture, and the prototype of the farmer as he is today. He loved his calling, and never ceased to long for the broad acres he had deserted when, as leader of the revolution, he

gave eight of the best years of his life to fight for the country's independence.

It is all very well to recognize the farmer as the substantial factor he is and always must remain in American life; but let us hear no more of his sudden rise from crudeness and uncouthness to decency and refinement. The situation simply calls for apologies from those who did not recognize the country gentleman when they saw him.

### THE WORK HORSE'S MEALS.

Prices for good horses have been so brisk during the last year or two that men have been tempted to part with everything that could be spared. As a result, farmers of the great central West will possibly undertake to put in the 1907 crop with fewer horses than have been used for this purpose for many years.

It is a question, therefore, of getting more units of labor out of the horses we have on the farm or take less pains in putting in the crop. The latter we cannot afford to choose, though the former is not without its difficulties that must be overcome.

The extra units of work must originate in the manger. It may mean that a more expensive ration must be used than in the past, and also that this shall be given with better judgment than is ordinarily the case. The average horse in the central West goes through his spring work on corn, and corn alone. In most instances this is fed in the ear. It is simply a ration of corn in the morning, another at noon and a third

at night, and this is repeated day after day, with about all the hay that the animal will eat in addition.

On this ration the average horse will do a fair day's work and keep in fair flesh, but he will not give the service that will come from the feeding of a greater variety, and especially from the use of feeds that are more flesh-forming in character.

A mixture of equal parts oats and corn will give much better results than straight corn when fed to the work horse. Of course this ration is somewhat more expensive than corn alone, but, considering the kind of service that one will usually receive in return, we think that it is still the more sensible ration. If oats are scarce and corn plenty, a very sensible ration can be made up of three or four parts of corn and one part of oats. If the corn is shelled and these grains well mixed, a horse will hardly ever tire of the mixture, and he will eat enough to keep him in normal flesh under heavy pressure of work.

As a rule, men who have considerable to say on the feeding of horses advise the use of bran. We have always liked bran, but it is even more expensive than oats, ordinarily, and our experience is that one can get along without it very nicely if he has on hand a good quality of corn and bright, heavy oats.

As to the amount of grain that should be fed daily, much must be left with the man who does the feeding. A draft horse weighing from 1,500 pounds up will usually require about six quarts at a feed, though we have known cases where

1,200 pounders would work every day on twelve quarts; that is, four quarts at a feed, of oats and corn. No man can tell another one just how to feed his horses, and therefore we repeat that much must be left to the judgment of the teamster.

When horses are on heavy machinery every day we believe that it pays to go to the limit on the feeding of grain and cut down the hay ration to ten or twelve or fifteen pounds a day. Horses will do their work much more snappy and will keep in a better condition of flesh if they are given about all the grain they will eat and but little hay, than will be the case if they are put on a partial grain and full hay ration.

### PROPOSED WATERWAY FROM CHICAGO TO ST. LOUIS.

A formidable movement is on foot in Illinois, under the leadership of Governor Charles S. Deneen, looking to the construction of a great deep waterway to connect the great lakes and the gulf. By the time this article reaches our readers, it is probable that a special message already prepared by the governor will have been laid before the general assembly of Illinois, emphasizing the need for such a waterway and its advantages to the agricultural, commercial and manufacturing interests of that great state and the country at large. The message is accompanied by a voluminous report from the state improvement commission created in 1905, treating the subject both economically and

historically. It is two hundred and thirty-three years since the famous Joliet, in a letter written to Father Dablon from the head of Lake Michigan, first proposed a canal across the Chicago divide, by which boats could pass from the lakes to the great river. The project has never been quite lost sight of; and, since the building of Chicago and the settlement of the state of Illinois, it has been almost constantly agitated. It now comes to the front as a really practicable plan, at a time when the construction of waterways as correctives of the railway rate situation is more seriously and generally mooted than at any time during the past fifty years. The vast project of the enlargement of the

IMP BY TAYLOR AND JONES, WILLIAMSVILLE, ILL.

Shire Stallions, first prize herd, get of sire, Illinois State Fair, 1906. Got by Hendre Baronet, a stallion that was leased for the season 1903 for \$5,000. Imported, owned and for sale by Taylor & Jones, Williamsville, Sangamon County, Ill., at prices from \$1,000 to \$1,500. New importation reached the barns March 9, 1907.

Erie canal; the proposed ship canal between Lake Erie and the Ohio river; this proposed canal connecting Lake Michigan and the Illinois river and, above all, the Panama canal are looming up as mighty factors in limiting the powers of the railways to levy toll upon the productive forces of the farm, shop and mine.

Railway regulation, as favored by the president of the United States, is along extremely moderate lines. It does not contemplate the original making of rates by congress or the interstate commerce commission. The railways are to make their own schedules, under the mildest and most general restrictions; and they are to be corrected only upon complaint and hearing, subject to court review, and then not in a sweeping way. Publicity and the natural operation of economic causes are expected to do most that is done to make rates reasonable. Discriminations between shippers and localities are prohibited. Within these broad limits, President Roosevelt expects the transportation problem to solve itself. He is even reported to be willing to restore to the railways the legal right of pooling their earnings, thereby eliminating competition. His evident theory is that the public is interested mainly in equality and stability of rates, and much less so in the reasonableness of carriers' charges. Senator LaFollette represents another element, by no means small, who believe that rates must be both stable and equal and also reasonable and that they will never be really reasonable until watered stocks are no more, and railway valuations are ascertained and put on a solid foundation of actual cost.

Under either of these theories of solving the railway problem, waterways are an important element in the safeguarding of public rights. The people of Illinois and, indeed, of the entire Mississippi Valley are to be congratulated on the vigor with which Governor Deneen is pressing this great matter upon the arena of practical affairs. The farmers of the middle West will watch the movement with the keenest interest.

#### FEEDING BROOD SOWS.

The following communication has been received from a subscriber at Cambridge, Neb.:

I would like a little information about the feeding of brood sows that are to farrow the latter part of March and the first of April. These sows weigh about 250 pounds now. I have on hand plenty of corn, oats and barley, corn being worth twenty-six cents a bushel, oats twenty-five cents and barley thirty cents. I also have some rye which is worth forty-five cents per bushel and shorts can be purchased for \$15 per ton, tankage \$37 a ton and oil meal \$2 per hundred.

At the prices named, exceedingly good results will be obtained by feeding a ration composed of equal parts of corn, oats, barley and shorts. These grains may be fed either whole or ground, depending entirely on how the sows are thriving. If they seem to do well on the whole mixture fed dry, there is no need of going to the expense of grinding. During real cold weather it might be advisable to feed the sows a little ear corn in addition. One must be guided in this matter by their condition.

It might not be inadvisable to add either tankage or oil meal to the ration, using either one of these by-products to the extent of about 5 per cent of the total food used. These are flesh-forming foods and they are highly adapted to the use of brood sows. Of course they cost more per pound than the other grains, though, considering their protein content, they are not so expensive.

We presume it is not necessary to dwell on the amount of food that should be fed to brood sows, this being a matter that must be entirely left to the man who does the feeding. Keep their appetites in such condition that they clean up with dispatch all the food given, and yet give them enough so that they are kept gaining right up to farrowing time.

Where one has access to soft coal slack or where it is convenient to make a little charcoal out of cobs or old wood it will pay to put in a little supply for the brood sows. In fact, we always believe that a self-feeder kept supplied with material of this kind mixed with salt is about the best paying proposition on a hog farm. It is not a difficult matter to make one that will hold two or three bushels and place it so that the sows may have access to it at all times.

#### PUTTING MANACLES ON EDUCATION

When the Iowa house of representatives, one year ago, defeated the so-called board of control bill for the government of the State University, the State Agricultural College and the State Normal School, The Homestead hoped that the measure would never again be urged for passage in the general assembly. Regarding the bill, though supported with the best of intentions, as a menace to the large, free development of education in Iowa, and especially as certain to have a stifling influence upon agricultural education, we opposed its passage; and the cordial approval with which our course was greeted by the farmers of the state demonstrated such a determination not to accept the proposed change that we have taken it for granted that the legislature would be too familiar with public sentiment in the rural districts to resurrect the objectionable project. In this, it appears, we were in error. The bill has again been introduced; has passed the senate by a majority only one less than that of last year, and is being aggressively supported in the house of representatives. Unless the farmers of the state again come to the rescue as they did a year ago, their interests will suffer the severe blow which this ill-advised measure involves.

The Homestead will be pardoned for saying that it is perhaps in a better situation to know the state of public opinion among the farmers and stockmen of Iowa than any other publication or any other institution in the state. Our mail brings us daily hundreds, and sometimes thousands, of letters from Iowa farmers. The Homestead's one hundred thousand subscribers are farmers and a vast number of them reside in Iowa. Its issues are read in every county, township and school district. On the average, over six hundred farmers in every county are regular readers of this paper. They regard The Homestead as peculiarly their spokesman and representative, and their letters to this office are frank and outspoken. We are stating the fact mildly when we say that they are earnestly opposed to a board of control for our educational institutions, though supporters of such a board for penal and eleemosynary institutions.

It is hardly necessary to restate the farmers' position on this question. It concerns primarily and especially the Iowa State College of Agriculture and Mechanic Arts. The farmers are cordially friendly to all public schools, from the district school—the mightiest of all factors in American development—up to the State University. But the Agricultural College is par excellence their school. They are proud of it as one of the world's great agricultural schools. They take pride in its superb work and in its world-wide fame. They rejoice in the results it is accomplishing. They approve its present broad-minded and competent management. They thoroughly trust that management on both its educational and its financial side. And they dread a change which cannot improve the conduct of its affairs and may result in seriously hampering its freedom and retarding its growth and development.

Farmers are conservative. They have little of the restless spirit which craves change for the sake of change. Bold and radical in maintaining their rights when invaded, their strong common sense always rallies against uncalled for innovation. Their opposition to the board of control bill is along this line.

The board of control bill proposes a single management for these three great, splendid institutions and a management aimed primarily at financial rather than educational results. It proposes to take

away the ardent support which a specialized management gives to each of the three schools and to substitute a common management which cannot partake of that loyal and enthusiastic character which individual management imparts. From necessity, both the division of attention among the three institutions and the emphasis this measure places upon mere financial considerations must work for slower progress and narrower development. This is not intended by the supporters of the measure, but it cannot be prevented, because this tendency is inherent in the plan itself.

Bad for the University and bad for the Normal School, the measure is infinitely worse for the Agricultural College, because technical education calls for broad, liberal and progressive methods and is stifled by picayunish economies and what is popularly called "red tape." The Iowa State College has on its faculties great specialists in the several fields covered by its courses. Would it not be short-sighted folly to throw about the work of such men, the hampering and disheartening restraints which a board of control expected to make a record of cold-blooded economies would necessarily import?

It will probably not be too late, when this issue of The Homestead reaches its readers, for the farmers of Iowa to make known to their representatives at Des Moines how they feel regarding this disaster-bearing measure. Let them act without delay. Let them write or, still better, wire their members of the legislature entreating them to defeat the board of control bill and thereby refuse to put shackles on agricultural education.

#### UNAVAILING BLUSTER.

The word appears to have gone forth from influential centers of railway management that the public must be warned that grave dangers are ahead if the president of the United States and the legislatures of the several states persist in their policies of regulation and control of railways. Veiled threats are heard that if a halt is not called, railway improvements will cease and financial institutions will refuse to furnish funds even to provide rolling stock to carry the rapidly increasing products of American industry to market. It was even suggested, not long ago, that half a dozen railway presidents confer with the president and beseech him to issue a manifesto to the state governments advising them to call off the dogs of legislation, leave the control of railway and other corporations to the national government and thereby avert various and sundry dire consequences alleged to be inevitable if the capitalization and management of railways are subjected to state control. Wall street, too, "got busy" at the psychological moment and gave an exhibition of its capacity for hysterical activity in buying and selling the watered stocks whose position in the market is always a subject of solicitude.

Strange to say, the public has calmly pursued the even tenor of its way, kept both its head and its feet, and refused to believe that the country is in any danger from what congress and the state legislatures, under the leadership of the president, have been doing.

A great, ably managed business like that of our American railways, which has been permitted to develop along lines of its own choosing, without let or hindrance, is naturally averse to being brought into the full light of publicity and subjected to the restraints of law. Admirable as our railway system is as a whole, it has not reached its present great height without serious abuses arising; and it is inevitable that railway managers should shrink a little from letting the public see the seamy side of the fabric they have been weaving. They should not, however, become unduly exercised over the public determination to correct certain irregularities and to bring the great business of transportation under legal control.

Nothing really drastic or radical is seriously proposed either at Washington or, so far as we have heard, at any of

the state capitals. Where there have been reductions of freight rates, they are moderate and reasonable. The requirements that railway employees be not required to work under strain for long hours, endangering human life by wholesale, are only decent and moderate. Laws compelling the companies to furnish cars to all shippers promptly and on equal terms are no more than the American people ought to enact and enforce. They are simply along the line of the railways' best interests. It is perhaps a little embarrassing to some of our railway magnates to be exposed in the stock-jobbing and stock-watering schemes whereby certain of their number have made overgrown fortunes; but the exposure is really a protection to the legitimate investment market. The state legislatures are perhaps a little inconsiderate in making reductions of passenger rates immediately effective, not giving the companies time to prepare their traffic departments for the change; but these matters, though inconvenient, are not vital; and, judging by past experience of railway regulation in the states, all this legislation is really in the interest of the railways and will result in increasing their revenues.

It may as well be assumed, once for all, that the American people will never destroy or permanently repress or injure any legitimate industry. The American farmer, who is the strongest force behind this legislation, is no extremist. He is a just man, a fair and reasonable man, a conservative man. He is even a patient man in submitting to wrong, and moderate in action when aroused by persistent injury. No amount of bluster will drive him from his well-chosen positions. He wants only what is right and is just now not disposed to accept anything less. The interests of the railways are safe in his hands—safer than in the hands of stock-jobbing manipulators.

#### Alfalfa Experiences—Seeding.

To the Editor of The Homestead:

Select your ground, add a few loads of well-rotted manure per acre to sweeten the soil and to promote bacterial growth. As soon as the frost is out in the spring, disk thoroughly by half lapping to leave the ground level, until the surface is in garden like tilth; on corn land a double disking will usually be sufficient. If you are going to sow in the fall the manure must be added and the disking done as soon as the grain is cut. This prevents the loss of any more water, places the soil in condition to take up any rain that may fall and to check the weed growth until sowing time.

Get your seed as near home as possible. That is probably a good rule with all seeds, except potatoes, and in no case get southern seed, as it will not stand the winters so well. If you must depend on commercial seed, send a sample of it to your experiment station or to the United States Department of Agriculture for examination for adulteration. Alfalfa seed is expensive and you cannot afford to pay the price and get something else.

Twenty pounds of good clean seed per acre is sufficient if your seedbed is in prime condition for sprouting the seeds. We prefer to sow broadcast, using any good hand seeder. A drill is too apt to get the seed in too deep; it should not be covered more than one inch, as much of it will fail to come up if covered too deeply. We cover with an ordinary harrow.

If the soil is sandy or so devoid of humus that it is inclined to drift, one of two ways of preparing and seeding may be followed: The "corrugated" method, which is simply to prepare the land with an eight-tooth cultivator, then sow the seed and it will be covered at different depths and if that which comes up first is destroyed that which comes later may escape the fate of the first. A better way, I believe, is to sow the land to cane first; after the cane is cut disk the stubble as light as may be to secure the seed bed and sow the seed. The cane stubble will prevent the drifting of the soil.

Bear these in mind. Plow not (this year); disk thoroughly; sow good, clean, home-grown seed; sow last of April or first of May, or in August; use twenty pounds of seed per acre; use no nurse crop; clip weeds, but clip them high; get your having machinery out, for it will keep you busy.

Keith county, Neb. H. D. Lute.

## Farm Furrows

Turned by a Practical Farmer.

The man who keeps up to date will relegate a good many of his notions to the tall timber every year.

Did you ever see a couple of green-horns put on boxing gloves and go at one another as though they were "killing snakes?" Young ambitions must have their outlet.

Corn-belt herds of swine have been unusually healthy this winter. We surmise that the scarcity and high price of pork have made growers more careful of the health of their herds.

Western live stock has suffered its usual losses. It has been reported that the loss this year is of sufficient consequence to reduce the market receipts perceptibly for some months to come.

It makes a good deal of trouble to always have to bother with a basket of eggs and a jar of butter when one goes to town, especially when he has on his best clothes; but it certainly makes one feel like wearing good clothes when it comes to settling grocery bills at the end of the year that have already been paid up.

I hardly believe I could enjoy a country where the change in the seasons was not marked. I like to see the winter come after all if it does make one shiver. Then again, I am glad to see it go and in place of the cold heavy clouds that hang overhead see the white fleecy ones that indicate the coming of sunny days and fine weather.

The greatest death rate recorded for any one disease in 1905 was that from tuberculosis of the lungs. Pneumonia follows closely, while the dreaded cancer shows a steadily growing death rate, though less than half as much as that credited to the first-named disease. It is the same old story of poor ventilation to which a large share of the first two named diseases are due.

The barnyard that is situated on a side hill next to a small stream is located in an ideal place for good drainage. Such a location is very common, yet I believe that if it could be known just how much of the value of the manure seeps away with the rain water a great many people would relocate their stock yards. Where there is forty rods or so of pasture or farm land, through which the surface drainage water must

H. C. GUMBEL

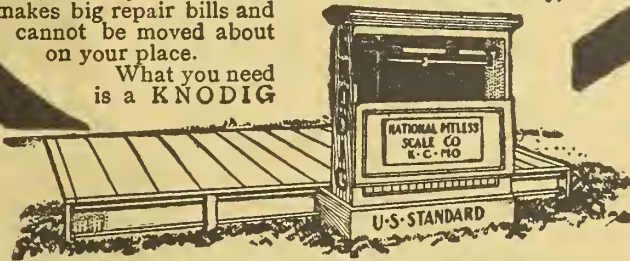

scale you like best. I will ship it to you all ready to do business as soon as it is set up on your place. If it doesn't suit you for ANY reason, I will take it back, pay freight BOTH ways and send you a check to cover the expense of setting up and taking down the scale.

How's THAT for a liberal offer? I couldn't afford to make it unless I was absolutely SURE that my scale was right, could I? Well,—I DO know it. You see, I make the "KNODIG," and can afford to stand back of it. My 10-year guarantee shows how much faith I have in it. No other scale is backed up by the manufacturer as mine is.

Now, you can't afford to buy one of those inaccurate, cheaply constructed Pitless Scales, which will do poor work and last only a year or two, nor a high-priced, old style Pit Scale which makes big repair bills and cannot be moved about on your place.

What you need is a KNODIG

My Scale is Used by the U. S. Government in the Post Office at Kansas City

## Let Me Send You a "Knodig" Pitless Scale on 30 Days' FREE TRIAL

YES, that's just what I mean, Friend; an absolutely free test of my scale for one month. You have nothing to pay in advance, no notes to sign, nothing to do but give the "Knodig" Pitless Scale a full, fair, free test in the actual weighing of your stock, grain, hay and farm produce for 30 days.

If you think this plan is a good one, write for my splendid new illustrated "Knodig" catalog, look it over carefully and pick out the scale you like best. I will ship it to you all ready to do business as soon as it is set up on your place.

My plan saves you all the middlemen's profits. Deal direct with me. No Agents, Salesmen, Jobbers or Dealers stand between you and my factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer? Does it make the scale you buy any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

Remember, I am willing to PROVE that the "KNODIG" Pitless is the scale you need. I will send a set to you or to any responsible Farmer, Stockman, Elevator Man or Grain Dealer on a month's free trial. Write me personally for the new Knodig Pitless Scale Catalog. It contains over 40 fine half-tone pictures that will interest you.

The book is free. You will want to see it. Write for it today to

flow, of course there is but little value of the barn liquor lost.

On a farm that is devoted to general farming there can be some feature that may be specialized to a certain extent without over-crowding one with work. Use your own community for this illustration. Neighbor B is known as a good farmer and one that always has a few bushels of choice seed corn on hand. Neighbor C is generally the first man to be visited by horse buyers, for if any-one in the neighborhood has any first-class horses he has. Your neighbor over west has cows that always look a little better and give a little more milk than

the average run of cows. Now, where would you send a buyer of any of the above should you be unable to supply him? Now, in return what can your neighbors send buyers to your farm for?

It is my opinion that there are not nearly so many fights, that is, hand-to-hand encounters, as there were twenty-five or thirty years ago. I can remember when somebody got a good cudgeling almost every Saturday night on the square.

The other day in driving through a town I noticed a house made of red cement blocks. It has always seemed to us that houses built of cement blocks looked stiff and unhomelike, but this one was certainly a striking contradiction of that idea. I notice now that there are also forms of prepared roofing on the market that are other than plain black.

I like to see the colt with plenty of bone in his limb. Of course the colt with great, big, heavy joints and lots of substance is not the prettiest looking object to cast your eyes on, but someday you can depend upon it—if he is kept out of barbed wire fence and fed right, he will make a draft horse that will excite the envy of any good horseman.

A subscriber, J. H. Sanford, of Colorado, gives the following treatment for a lantern that has chronic tantrums: Take a soft wire, says Mr. Sanford, and thrust it down through one of the flues or tubes, hook in a bit of cloth and draw it back through the tube, thus sweeping out the dead flies, soot, dust, cobwebs, etc., which are the cause of the trouble. Serve the other tube the same way. If you cannot get the wire through, fill the tubes with soap suds, give your lantern a good shaking and you will change darkness into light.

There is evidently an explanation for every odd practice. It is said that the reason for odd prices is that while the change is made the purchaser naturally looks around and sees more bargains. Therefore if your wife buys a pound of coffee for nineteen cents and while waiting for the change sees some teapots marked twenty-one and a half cents she will probably take one of them on the return of the clerk. This will necessitate the purchase of six and a half cents' worth of baking powder to save

the half cent that would otherwise have been lost on the teapot.

Why is it that so many men who are absolute failures in their own business affairs are so fond of giving advice to the other fellow? I have a neighbor who has failed at everything he ever undertook and I heard him the other day pouring advice on practical agricultural topics into the ear of one of the most successful and one of the most up-to-date farmers of my acquaintance. It is always thus.

How much difference one observes in farming communities. Take, for instance, the plan for the building of barns. In some communities every barn will be of the low, flat-roofed pattern. I always wonder what people think of, wasting so many shingles. I always thought the barn with the high eaves and hip roof furnished the greatest amount of barn room for the amount of money that was required to build it. To my opinion such a barn has a much better appearance, too, than the low, flat kind.

### IT PAYS TO BUY THE BEST MACHINERY.

In buying farm machinery it pays to buy the best, even though it costs a little more. Remember that low prices and good machinery do not go together. Breakdowns are expensive. One delay in a breakdown is liable to cost a man more than the difference between the price of a high-grade and a low-grade machine. A good rule to follow is to investigate the different makes of any machine you wish to buy. Don't depend too much on what your dealer says. You can easily tell the difference in value. For example, take a manure spreader. You will find that some have oak and some pine poles. You know that oak is better. You will find the same difference in the main frame. Some are oak and some pine. Examine the timber with your knife. Go right through the material piece by piece. Then another good thing to consider is the weight. If one machine weighs, say 1,300 pounds and another 2,200 pounds, you can see that there is a difference in the cost of manufacturing. A fair value of finished material in a machine like a spreader is four to six cents per pound. If you figure it at \$4 per 100 pounds you will surely be on the safe side. You can't expect to buy a big, heavy machine made of the best material at the lowest price. Buy good machines and take care of them and you will be a big gainer in the end.

## This Little Pig Went to Market and Got Top Price

Clean hogs are healthy hogs and make profit. 42 State Agricultural Colleges use Zenoleum on their hogs, and unhesitatingly in Bulletin after Bulletin, recommend you to do the same thing. So do America's most successful hog breeders.

# ZENOLEUM

### Makes Hogs Wallow in Profit

Disinfectant destroys disease germs, makes sanitary quarters, prevents contagious diseases from taking hold. Famous for warding off and avoiding hog cholera. As a dip, it kills lice, cures mange, eczema, scours, sores, scurvy, canker, surfeit and wounds. *Non-poisonous when taken inwardly*, and is a sure relief from intestinal worms.

**Most Dealers Everywhere Sell Zenoleum.**

**At All Dealers**—Small size, 25 cents; Quart, 50 cents; Half gallon, 90 cents; One gallon, \$1.50; Five gallons, \$6.25—or we will deliver one gallon or more, charges paid, to your station. **Ask Your Dealer First.**

**The Zenner Disinfectant Co.,** 131 Lafayette Ave., Detroit, Michigan.

## AGRICULTURAL CONDITIONS IN IN- DIA.

The government printing office at Washington has recently issued a report by Mr. Charles M. Pepper, special agent of the department of commerce and labor, upon "Trade Conditions in India" which, if we mistake not, will prove as interesting to the farmers of the United States as to our brethren who are primarily interested in commercial rather than agricultural prosperity. The work reveals large competitive possibilities in the great irrigation schemes of the British government in that far-away land, and also shows limitations on progress which mean that whatever changes result from the government's immense activities will be gradual rather than sudden.

There are already 40,000,000 acres of irrigated land in India, of which 20,000,000 acres are under state control. The total length of irrigation canals has grown from 9,000 miles in 1891 to nearly 50,000 miles in 1906. The Punjab is the seat of the most extensive works, this being the region of the five rivers whose waters are tributary to the Indus. Very large extensions of these vast public and private works are projected, which will greatly increase the production and exportation of wheat and cotton and the production of cane sugar. Sugar is not likely to become an export crop for India, but its increased production will involve diminished importations of beet-sugar from Austria and Germany, which will thereby become more determined and aggressive competitors of other sugar-producing countries.

Mr. Pepper's comments on the methods

# Ask him he knows

## DIPOLENE

### THE ONE MINUTE STOCK DIP

When you want advice on law you consult a lawyer, don't you?  
And why? Because he is an authority on that subject.  
When you want advice on important agricultural matters why not apply the same rule as in the case of the lawyer, or doctor.

**Consult an authority**  
On the question of "Dips" and "Dippings" we say, ask Prof. W. J. Kennedy, of Ames Agricultural College—he knows—he's an authority.  
He is a man that has spent a life time studying and experimenting to obtain the best ways and means of breeding, feeding and rearing farm stock. Naturally fighting and preventing disease has occupied much thought and attention in his life work.  
That's why we say, "he knows."  
We asked him about "Dips" and "Dippings" not long ago and here is his reply. Its worth remembering—it's authoritative.

Iowa State College, Ames, Ia.

**MARSHALL OIL CO.**  
Gentlemen: In response to your favor concerning Dipolene I wish to say it has given very good satisfaction in all our tests in which we have used it, pertaining to cattle, sheep and swine. I think that farmers as a rule are too economical when it comes to the point of purchasing dips. If more were used there would be much less disease on farms.

Yours very truly,  
W. J. KENNEDY,  
Professor Dept. Animal Husbandry.

Isn't that good advice! Why not follow it?  
Note the suggestion he makes for preventing disease on the farm.

Go to your hardware, implement dealer or druggist and ask him for a can of Dipolene on our no-money-down

### 30 Days Free Trial

plan. Take it and test it according to directions. If it does not do all we claim for it take it back. You're nothing out. If your dealer does not handle it send to us direct. We pay the freight. Could you ask for anything more fair and honest than that?

Ask your banker about us, or write to our business house or bank in Marshalltown.

If your dealer handles it—get it from him on same terms, if not, send to us direct.

Don't accept the "just as good" kind. There is none like Dipolene. It's the best and the offer above proves it.

Protect yourself—get a can today. Remember, you can't keep the standard of health among your stock up to the highest notch as long as disease germs lurk in their pens, troughs, sheds or barns.

Your stock can't escape disease if their general condition is not strong enough to ward it off and Dipolene will effect the purest, most sanitary conditions possible.

The cost will be but a few cents. The saving possible is hundreds of dollars.

Ask for booklet "Dipping for Dollars," a story of a fellow farmer. It will interest you.

Our Improved Dipping Tanks are the best on the market. Special construction prevents animals from falling or turning over. No chance of drowning. Circular and prices free.

Marshall Oil Co., Dept. D4, Marshalltown, Ia.  
Oskaloosa, Mason City, Ia., and Lincoln, Neb.

and needs of agriculture in India are extremely interesting and suggestive. The great majority of the more than three hundred million inhabitants of the country are engaged in agriculture; but India is not an eager or omnivorous market for farm tools. The sub-division of both land and labor is so minute that nothing is or can be generally done on a large scale, as on the farms of the United States or Argentine. But a more powerful hindrance to the introduction of machinery is the immovable conservatism of the Hindu cultivator, who, according to Special Agent Pepper, "uses the same type of wooden stick for turning over the sun-baked soil that his ancestors used three thousand years ago. Sometimes the handle is perpendicular to the fork, sometimes it has an angle of thirty degrees. The bullock treads out the grain or it is winnowed by hand flails as it has been for centuries. The sickle or curved knife and the scythe in the hands of the coolies reap the wheat as has been done from time immemorial." Yet there is a limited market for the simpler and more elementary farm implements, if offered at low prices. Light plows, irrigating pumps, corn shellers and windmills are slowly finding their way into a permanent demand.

It is evident, however, on the whole, that while the Hindu farmer may, through irrigation and by slow educational evolution, be made a much larger producer of foods for the world's markets, he will not prove a smashing rival to the American farmer or any other agricultural producer whose brain is large and well-nourished and who is free from the ruinous fetters of caste and unreasoning conservatism.

## THE WEST THE CENTER OF POWER.

Boogaboos die hard. Some of them have great vitality of their own and others are kept alive because they are useful. The Twentieth century has buried a good many of them and there are indications that others will get their quietus as the march of events proceeds. The American people are especially prone to smash senseless old traditions and substitute for them the living precepts of present-day experience.

A severe jolt was given last week to one of these hoary old beliefs—the opinion which used to prevail that Wall street governed this country; that when that once important and imposing creation of the financial interests sneezed, sound logic and good reason required that chills pass up and down the national spine. Wall street became dreadfully alarmed one day last week, lest the policies of publicity regarding the capitalization of corporations and government regulation of their affairs should "destroy confidence;" frighten the lambs so that they would not flock down to Wall street to be shorn, and work blue ruin from Maine to California and from the lakes to the gulf. For two days, the gamblers and speculators of the stock exchange demeaned themselves like madmen, working themselves into a frenzy over imaginary ills

**W. W. COLLIER, Gen'l. Mgr.**  
American Harrow Co., 153 Hastings St., Detroit, Mich.

about to befall the country. Then, finding that the whole farce had been much ado about nothing and that the country outside of New York City was jogging along at its usual pace, refusing to get excited, the brokers decided that there was no occasion for a panic, broke into enthusiastic cheers over the unexpected elasticity of the financial situation and dispersed to reflect over the fact that this is no longer a little country, consisting mostly of one big city and a large tributary region; in short, that the West is the center of national power and gravity and that Wall street can no longer sway it at will.

This is not the first time that the financial powers of the East have found their most violent local disturbances too weak to move the mighty West from its moorings. The Northern Pacific "fury" of 1901 on Wall street would have ripened into a fully matured panic in the country as it used to be. The West took note of it, smiled and pursued the even tenor of its way. The half-way "panic" proved simply a corrective, and led the way to better and more prosperous conditions instead of to hard times. Last week's eastern financial storm was in itself quite a gale, but it did not budge the sturdy oaks of western finance.

Even as far back as the genuine panic of 1893, the West developed unexpected financial strength and held the structure of the nation's credit firm and steady till the storm and stress had passed over. The Homestead at that emergency underwent an experience which demonstrated how really fanciful and imaginary the panic was. Believing that the West would not be seriously affected by the threatened depression and that its resources would prove abundantly equal to sustaining enterprises conducted in a spirit of confidence. The Homestead went ahead and erected a costly new four-story building for its own use. That this belief in the stanchness of western resources was justified found demonstration in the fact that one year's earnings paid for the building! The Homestead ignored the alleged "depression;" pushed on into new and broader

fields, and never, in a single year, failed to record a gain in business actually done.

The seat of power has been transferred to the great Mississippi Valley. The West is the center of national power, financial as well as political. The farmer, steadily paying his own debts and next becoming the banker and creditor of his community and the whole country, has proven a steady force in our national life. With his products fairly choking the channels of commerce so that the steel mills and locomotive works cannot turn out rails and engines fast enough to meet the demand, the country's entire situation takes on a new aspect. It is evident that, with the advent of the western farmer upon the scene as the principal actor, the days of the wild, unreasoning financial panic went by, never to return again.

## NO REST NIGHT OR DAY.

With Irritating Skin Humor—Hair Begun to Fall out—Wonderful Results from Cuticura Remedies.

"About the latter part of July my whole body began to itch. I did not take much notice of it at first, but it began to get worse all the time, and then I began to get uneasy and tried all kinds of baths and other remedies that were recommended for skin humors; but I became worse all the time. My hair began to fall out and my scalp itched all the time. Especially at night, just as soon as I would get in bed and get warm, my whole body would begin to itch and my finger nails would keep it irritated, and it was not long before I could not rest night or day. A friend asked me to try the Cuticura Remedies, and I did, and the first application helped me wonderfully. For about four weeks I would take a hot bath every night and then apply the Cuticura Ointment to my whole body; and I kept getting better, and by the time I used four boxes of Cuticura I was entirely cured, and my hair stopped falling out. D. E. Blankenship, 319 N. Del. St., Indianapolis, Ind., Oct. 27, 1905."

## \$4.00 to \$8.00 Per Acre

That's What a Good Spreader  
Will Do If Used as It Should Be

Write Us and  
Let Us Tell You  
How.

There Are Several Kinds of  
Spreaders

## All The Best ?

No Spreader is best, or even good, unless  
it has:—

- An Oak Pole—not pine
- Oak Sills and frame—not pine or maple
- Wrought Iron Truss and Stay-ropes to  
keep the frame square
- Hickory Double-trees—not rock elm
- Malleable Fifth Wheel—not cast iron
- Double Oak Bolsters
- Wide Front Axle so wheels will track
- Front Axle set under the front end of  
the body so the load is equally bal-  
anced on front and rear axles
- Gear Wheels and Sprockets keyed on  
—not pinned on or fastened with  
set-screw only
- Heavy Wheels with big spokes—not  
light wheels with 1 1/2 or 2-in. spokes
- An Endless Apron—not a half apron
- A Hood and End Gate to keep the  
manure away from the beater while  
loading

The Great Western Endless Apron Spreader  
has all of the above good features.

It is Made for the Man  
Who Wants the Best.  
There is no other "just as good" or nearly  
as good. Ask your dealer about the

## Great Western

Don't let him sell you a substitute,  
that he says "is just as good."

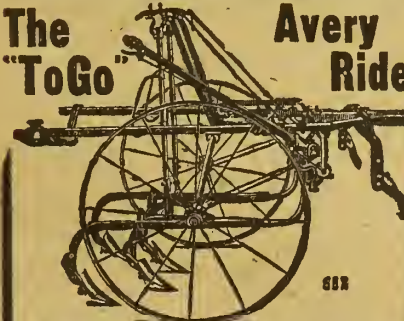

The Great Western will cost you just a little  
more than any other, but for every dollar  
extra that it costs, you will get \$5.00 more in  
value. The difference in cost will be more  
than made up in repairs alone in a short time.  
Besides this, you will always have a machine  
that will be ready to do business. It won't be  
laid up for repairs just at the time that you  
want to use it.

We issue a book that will tell you when, how  
and where to spread manure; how to make  
from \$4.00 to \$8.00 more per acre from your  
farm than ever before. Write just these  
words on a postal card or in a letter. "Send  
me your book, Practical Experience with  
Barnyard Manures, and catalog No. 4368."

They will be mailed to you Free. Do it now  
before you haul your manure or prepare for  
another crop. Write us at any address below.

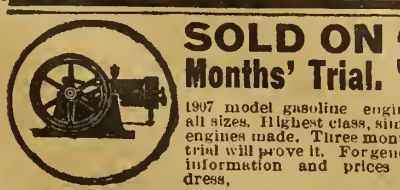

**SMITH MANUFACTURING CO.,**  
158 Harrison St., CHICAGO, ILL.

1201 Leavenworth Street, Omaha, Neb.  
1808 West 11th Street, Kansas City, Mo.  
Fourth Ave., and 3rd St., Minneapolis, Minn.

**The TOGO** (BOUND TO GO) furnished with any style  
gangs or shovels. In common with all Avery  
Cultivators it has the usual "Go-In" to it as well as  
their easy handling and light draft features. Some  
of its own special good points are:—Dust proof  
axles; balance levers; oscillating couplings; triple-  
acting lifting springs; level swing gang, etc. It  
lacks none of the good points of other Hammocks  
and has many possessed by no other. We just  
want it to show itself. Price reasonable. Write  
in- vite investigation. Ask for complete Catalog B of  
Wagons, Farm and Threshing Machinery.

**EVERY MFG. CO., 169 Iowa St., PEORIA, ILL.**

**SOLD ON 3  
Months' Trial.**  
1907 model gasoline engines,  
all sizes. Highest class, simple  
engines made. Three months'  
trial will prove it. For general  
information and prices ad-  
dress,  
**Holland Engine Co., Dept. L, Cedar Rapids, Ia.**

**TRY THE LANKFORD  
COLLAR CURE**  
Cures galls, sore necks and sore  
shoulders while working the  
horse. Fits any shaped neck, guar-  
anteed. Cotton lined, and flexible,  
strictly humane collar. Costs only  
\$1.00. Circular and book free.  
**THE POWERS MFG. CO.,  
1405 Commerce St., Waterloo, Ia.**

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer,  
who has had years of experience at the bar. He  
will give accurate and reliable answers to all legal  
questions when they are of sufficient importance to  
be of practical interest to any considerable number  
of our readers. Subscribers who desire questions  
answered in this department should base them upon  
a brief, plain, concise statement of the actual facts.  
To insure immediate attention inquiries should be  
addressed to "The Legal Department," in care of  
this paper; but as the inquiries sent are at times  
very numerous, thus delaying printed answers,  
those to whom it is important to receive an im-  
mediate reply by mail should remit \$1.00, addressed as  
above.

### LAW QUESTIONS CONSIDERED.

#### DEATH OF LESSOR.

A Subscriber, St. Charles, Mo.—C, who  
is a widow, leased seventy-five acres of land  
to A and B, who are brothers, for a term of  
five years. They pay cash rent every six  
months. In case C should die before the  
expiration of the five years, would A and B  
have to give up their lease?

Answer—They would not. The admin-  
istrator or executor of C's estate would  
collect the rent from A and B until the  
term expired, and they would hold pos-  
session of the land meanwhile.

#### OUTLAWED NOTE.

Mr. Frank W. Lee, Radcliffe, Iowa.—What  
is the statute of limitations in the state of  
Illinois, on a promissory note secured by  
mortgage on real estate, dated February 8,  
1893, due in three years after date, with  
interest paid every year?

Answer—Ten years after the note be-  
comes due—that is, on the 9th day of  
February, 1903—the note would be out-  
lawed unless meanwhile the maker  
should give a new promise in writing  
to pay; then ten years from that prom-  
ise.

#### ANOTHER MAN'S DEBTS.

A Subscriber, Cazenovia, Wis.—A, B and  
C and others are stockholders in a co-oper-  
ative creamery company. The company is  
not incorporated. A and B each own a good  
farm. C is an extensive lumber dealer. In  
case C should become insolvent, could his  
creditors compel A and B to pay his debts?

Answer—C's creditors could not com-  
pel A and B to pay their claims. They  
could, of course, have C's stock in the  
creamery business sold to satisfy their  
claims, but that would not affect the  
creamery stock of either A or B, and  
could not possibly make them liable in  
any way.

#### TAXATION IN TWO STATES.

Mr. W. T. Spurlock, Richmond, Kan.—On  
February 16, 1906, I was assessed in Iowa,  
where I then lived, on my personal property.  
On the 20th of that month I had a sale and  
at once moved to Kansas and purchased a  
farm, and have paid the taxes on it. Will  
it be necessary for me to pay taxes in both  
places, thus making double taxes for the  
year?

Answer—The taxes on personal prop-  
erty in Iowa are assessed against the  
person who owns said property on the  
1st day of January. In Kansas all per-  
sonal property must be assessed against  
the person who owns it on the 1st day  
of March. You will therefore have to  
pay the Iowa assessment, and also any  
assessment on your personal property  
made on 1st day of March after your  
arrival in that state.

#### STEPCHILD NOT AN HEIR.

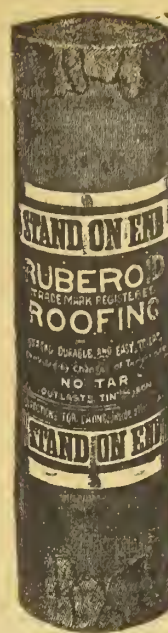

A Subscriber, Allen, Neb.—A man with  
one child married a woman who had one  
child. After their marriage they bought and  
paid for a farm, the deed being in the hus-  
band's name. The wife's child took the last  
name of its stepfather and is recognized as  
his child. It is a girl and was about five  
years old when its mother married. The  
husband is willing for this child to share  
in the estate he will leave, but has taken no  
steps in relation to the matter. In case of  
his death will the wife's child be entitled to  
any part of his estate under the laws of Ne-  
braska?

Answer—It will not unless the man  
legally adopts the child as his own by  
proceedings in the county court. If he  
should do this the child would be his  
heir the same as though it were his  
own child. Of course he could make  
a will and give the child a share of his  
estate without adopting it.

#### LIFE ESTATE—FEE SIMPLE.

A Subscriber, Fennimore, Wis.—A hus-  
band died after making a will in which  
he bequeathed all his property to his wife  
during her life, and then to be divided among  
his children equally. The will was opened,  
and the children were all satisfied, and  
signed their names to it. There is no ad-  
ministrator. The estate consists of real  
estate, part of which had been deeded to the  
wife before the death of her husband. Has  
the wife, or widow, a legal right to sell  
the land at a price which seems right to  
her, without the consent of the children?

Answer—She has no such right. She  
owns only a life estate in the land which  
her husband disposed of by will, and the  
children own the remaining interest in  
it. When she dies, the children will  
own the fee simple title—be absolute  
owners—that is, of the land disposed of  
by will. Of course the land which was  
deeded to the wife before her husband's  
death belongs absolutely to her, and she  
can sell that without the consent of any-  
body. There is another question in your

## THE ONLY PERFECT PREPARED ROOFING

ON THE MARKET FOR  
16 YEARS AND  
ALWAYS THE STANDARD

Remember the name "RUBEROID"

It is the pioneer weather proof, elastic and fire-resisting roofing.  
Ruberoid Roofs laid sixteen years ago are still in good condition.  
A smooth, neat appearing roofing that does not crack, melt or rot.  
Contains no paper or tar.  
Requires no painting when applying and costs little or nothing  
to keep in repair.  
Suitable for all buildings in all climates.  
Write for prices and samples.

## CLIP YOUR HORSES IN THE SPRING

WITH THIS NEW STEWART CLIPPING MACHINE

Clipped horses look better, feel better, work better, and are less liable to take cold. Don't let your horses stand all night with a heavy, damp coat of hair on. It weakens them and they lose flesh. If clipped they dry quickly, rest well and their food does them good.

WE GUARANTEE THIS MACHINE FOR 25 YEARS

It is built strong with file hard cut steel gears enclosed and running in oil. There is little friction and practically no wear. All progressive farmers and horse-owners now clip in the Spring, and this is the machine to do it with. Order one now. Send \$2.00 with your order and we will ship C. O. D. for the balance. Write for our big new catalogue, which shows the largest line of clipping machines in the world. It is free. Send today.  
**CHICAGO FLEXIBLE SHAFT COMPANY, 234 Ontario Street, CHICAGO**

## 34 Years Selling Direct

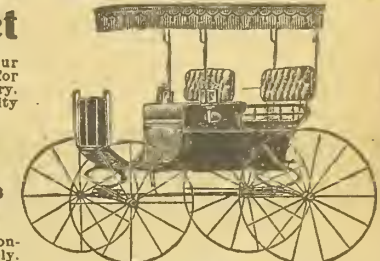

Our vehicles and harness have been sold direct from our factory to user for a third of a century. We ship for examination and approval and guarantee safe delivery. You are out nothing if not satisfied as to style, quality and price.

No. 758, Spindle Seat Bike Gear  
Driving Wagon with 1/2 in. Guaranteed  
Rubber tires. Price complete, \$56.50.  
As good as sells for \$75.00 more.

We are the  
Largest  
Manufacturers  
in the World

Selling to the con-  
sumer exclusively.  
We make 200 styles  
of Vehicles, 65  
styles of Harness.  
Send for large, free  
catalogue.

No. 333, Light Canopy Top Trap. Price  
complete, \$78.00. As good as sells for \$25.00  
to \$30.00 more.

**Elkhart Carriage & Harness Mfg. Co.  
Elkhart, Indiana**

## BROWN FENCE

AN EXTRA HEAVY FENCE  
Every wire—both strand and stay—No. 9 gauge.  
Thickly galvanized. Best grade steel. We mail free sample  
for inspection and test. A more substantial, stock-resist-  
ing, time-defying fence was never stapled to posts. We  
pay freight on 40 rods. Write for book showing 133 styles.  
**THE BROWN FENCE & WIRE CO., Cleveland, O.**

**SAMPLE FREE**  
15 to 35 CTS.  
PER ROD  
DELIVERED

letter, but it is wholly unintelligible and  
therefore it is not answered.

#### A SMALL GRAFT.

A Subscriber, Colby, Kan.—Last fall I  
hired a neighbor to cut my grain at the  
usual price of \$1 per acre. After cutting  
the grain, he measured the ground and  
claimed there were fifty-five acres, so I paid  
him \$55. Afterwards I had three other  
neighbors come and measure the ground,  
and they found it only forty-nine and one-  
fourth acres. I informed the man who cut  
the grain and he refuses to do anything  
about it. What would you advise me to  
do about it?

Answer—You could sue him and re-  
cover \$5.75, but it would cost you more  
trouble and vexation than the thing is  
worth, so we advise you to let it go  
and not deal with that neighbor any  
more.

#### Beware of Imitators.

The Combination Oil Cure for Canoe and  
Tumor has its imitators. The Original Oil  
Cure may be had of the Originator—Dr. D.  
M. Bye, 316 N. Illinois St., Indianapolis, Ind.  
Free books upon request.

#### Some Hen Figures.

Anyone with a liking for statistics may  
get some glorious facts and figures out of  
Uncle Sam's annual report on farming opera-  
tions. It gives a first-class idea of just  
what we are doing in the way of feeding  
ourselves, and the rest of the world. No  
one has a just conception of the immensity  
of American farm products until he reads  
such a report. Take the poultry industry—  
annual production about 45,000,000 crates,  
or 1,472,043,730 dozens, or 17,664,524,760  
individual and separate eggs, worth approx-  
imately \$130,000,000. These figures are  
amazing, yet in spite of this enormous pro-  
duction, it is still a fact that eggs are con-

stantly advancing in price. The hen man  
needs to wake up to this fact if he aims  
at the highest possibilities in his business,  
for until this increasing demand is met and  
passed, prices are bound to rule higher. This  
being true, it is manifestly wise to take any  
and every course that will help production.  
No better thing can possibly be done to  
increase laying than giving a healthy tonic  
in regular daily doses. All hens, and young  
chicks as well, need just this help in order  
to produce the most, or make satisfactory  
growth. Nothing better for the purpose can  
be found than Dr. Hess Poultry Pan-a-ce-a.  
Thousands of successful poultrymen from all  
parts of the country testify to the wonder-  
ful value of this tonic. Dr. Hess (M. D.,  
D. V. S.) has for years studied every pos-  
sible condition which may exist in poultry  
culture, and has given the world his Poul-  
try Pan-a-ce-a as a result. For those who  
do not know about his tonic let us say, it  
does not force egg production by exciting or  
stimulating the fowl unnaturally. Instead,  
it makes digestion in the hen an easy and  
natural process, so that every grain or spoon-  
ful of mash eaten either makes eggs or flesh  
as Nature intended, and in the largest pos-  
sible amount. Those who use Dr. Hess  
Poultry Pan-a-ce-a tell us that it does pos-  
itively cure and prevent disease. No flock  
can be sickly where it is used, because it  
makes the red blood which Nature requires  
for health, and also the necessary nitrates  
to carry off poisonous matter from the hen's  
system. By the use of this wonderful tonic,  
chicks are matured much earlier than would  
otherwise be the case; and pullets come into  
laying when eggs are highest and continue  
profitable the entire season. The cost of  
Poultry Pan-a-ce-a is a mere trifle com-  
pared with the great result it brings about.  
One cent's worth will feed thirty hens a  
day. Dr. Hess and Clark, of Ashland, Ohio,  
who prepare it, back Poultry Pan-a-ce-a with  
a written guarantee, so there is no risk in  
trying it. It is abundantly proved that if  
you use it as directed and occasionally sprin-  
kle hens, roosts and nests with Instant Louse  
Killer, your flock will be free from disease  
and uniformly profitable.

DAY BY DAY

Agricola

"Old men for counsel; young men for action" is a motto which some think ancient enough to be Oslerized. The young men certainly do astonish the world with ideas born of the eternal ages which the older generation never discovered.

And in national life there is a similarity to human life. We did not get our Australian ballot from the mother country, but from the "black sheep" of the flock, the original penal colony.

And just now New Zealand challenges the attention of the world. Shall we imitate her? It must be granted that the ossifications of the old nations do not allow them to limber up like their new-born offspring, and the question is what is the safe middle course for Uncle Sam.

Just one subject to illustrate. The United States sets the mark in provisions for old soldiers. New Zealand awards pensions for private citizens over sixty-five who have lived a good life for twenty-five years in the country. The idea is that one who has faithfully labored to build up the country through the arts of peace shall never be a pauper in his old age. Peace hath her victories, and they are no less honorable than those of war.

And to his brethren whose shadows have passed the three score mark on the dial of life, Agricola suggests that we do well to let the present generation do some planning and building unhampered by our "crittersnickers."

Some of our readers may be interested in learning of the first introduction of sweet corn to civilization. In the year 1779 an expedition against the six nations of Indians on the Susquehanna River scattered the Indians and Lieut. Bagnal brought back some ears of corn

which he found the Indians growing. It was the first sweet corn seen by white men. The cobs were red and would stain table cloths an indelible red if laid upon them. The staining feature was bred out.

New Zealand is young, only sixty-eight years old; young and frisky, the lamb-kin of the flock, but she is an interesting study. So are the youths of today swarming from our high schools. We honor ourselves when we honor our young people.

And now there is a furor in some quarters for the teaching of agriculture in the common schools. History repeats itself. About 100 years ago there was much said, and in 1824 The Agricultural Reader, designed for the use of schools, was published in Boston. And it is remarkable to read in it so much that is told now for new discoveries. Nitrogen was then called azote. Protein was an unknown term.

So quietly has it come that we scarcely realize that we are in a cement age. When Agricola was half as old as he is now the total output of cement was 3,000 barrels; last year it was 4,000,000 barrels. Posts, poles, foundations, bridges, walls, sidewalks, etc., are now made of concrete, with a steadily widening field. But we have as yet to draw the line on roofing. To make a cement roof is easy, but the sequel is unpleasant. The output last year would make a sidewalk one rod wide clear around the globe.

Fifty years ago the Roxbury Russet apple was called Roxbury Russety, and farmers were expecting it to "run out" soon, as it had been propagated by grafting for more than one generation and this was called artificial propagation and consequently only temporary. By the way, this still remains a puzzle.

It is refreshing to the lover of the human race to see the interest taken in providing good library books for the school library. Unless children are taught to read while young, and are led to love to read then, they will not have the reading habit when older, and an old age is always dreary and lonesome to him who has not the blessed companionship of books.

And now the reports are that all the states of the northern part of the corn belt have poor seed corn. Even the northern half of Iowa is placed in this belt of low germination. The teachings of the corn missionaries that each individual ear should be tested has special force this spring.

Grading seed corn by sight and grading it by machinery are two different propositions. A neighbor graded his by sight, shelling the tips and butts off down to uniform kernels, as he thought, and then put the shelled corn through a corn grader. Result, from the five bushels of this selected corn the grader removed one bushel of small kernels. He believes in the corn grader.

My neighbors smile more now than they did just one year ago. The spring pig crop is the reason. One year ago there was great mortality and this spring less loss, and each pig has a high value placed upon it because the corn cribs are not empty and the price of hogs is high and likely to be for at least another year.

There is one thing which deeply impresses all of us in this part of the corn belt. This is the advantage which a product of stable value has over one which is unstable. Many grow sweet corn for the canning factories, and others grow sugar beets for a sugar factory. Sweet corn is easier to grow and to can, sugar is easier to sell. Much of the canned product of last year is on hand, and there is surely no fever of zeal regarding accepting acreage for this year. But as to sugar, that market is assured, and the only anxiety is to get more acreage.

Butter and pork have both ruled high in price and we are all of us in this locality producing it and glad of the chance, but both of these products fluctuate more in price than is agreeable. Sugar is our greatest staple for stability in price.

The Lone Retreat Dispersion of Jacks, Jennets and Stallions.

The dispersion sale of the Lone Retreat Stock Farm's jacks, jennets and stallions on March 15th, at Lawson, Mo., drew a big crowd of jack and horse men from Iowa,

THE LOUDEN JUNIOR

Always ready. Never out of repair. The round top swinging fork pulley registers at an angle. Does not tip or bind on track as other Carriers do. Fills barn full clear up to the comb. Lock always works and never gives trouble. Patent swivel takes twist out of kinky rope. This is one of our many excellent Carriers made either for steel or wood track.

ALL HAY TOOLS

We are Hay Tool Specialists. Our line includes everything in Carriers, Tracks, Hay Slings, Forks, Pulleys, Stackers, Cable Riggers, Hay Rack Fixtures, etc. Also, the best Flexible Barn Door Hangers in the World, Feed and Litter Carriers and other hardware specialties. Write for free catalog and also booklet on "Fitting up Barns." Sent free.

\$21 Farmers' Cement Machines

These machines are complete and guaranteed to give satisfaction. UNITED CEMENT MACHINERY Mfg. Co., 100 First National Bank Bldg., Waterloo, Iowa.

FOR SALE: Controlling interest in one of the United States' largest, most profitable concerns in the United States. Located in Iowa, established 23 years. Unequaled chance for a young man with \$20,000.00 or more. Good reason for selling. Can refer you to the editor of this paper as to reliability. Address, Frank H. Dewey, Des Moines, Iowa.

Nebraska, Kansas, Missouri and Illinois. It seems that there are hardly enough good jacks to go around and more could have been sold at good prices. The presiding judge of the court in which the estate of the late J. C. Ray, proprietor of the Lone Retreat Stock Farm, refused to appropriate or allow expenses such as the cost of transportation to and from the farm for prospective buyers and for the delivering of all stock to be shipped, on cars. This caused many to either refuse to bid or if they did buy, to buy at a much lower figure than if the usual courtesies had been extended. Colonels Harriman and Sparks explained the matter fully to the crowd and did much to relieve the situation by getting Manager Chamberlain to agree to see that all deliveries were made on condition the purchaser pay \$5 for cost of delivery. The top jack of the sale was the herd jack, Bryan, sold to Mr. D. D. Hamilton, of Marshallfield, Mo., for \$1,225. Everything sold at good prices, but not for as much as had they been sold under a guarantee of their future usefulness. Much credit is due Colonels Harriman and Sparks for the excellent manner in which they conducted the sale under the adverse circumstances. Following is a list of all sales and the summary:

JACKS.	
Bryan, thirteen years, D. D. Hamilton, Marshallfield, Mo. ....	\$1,225
Kentucky Chief Jr., six years, F. L. Frazier, Lawson, Mo. ....	950

J. L. OWENS CO.,  
Dept. 614. Minneapolis, Minn.

hay and general farm machinery was sold.

W. J. Wendt's Duroc Sale.

On February 27th at his farm south of Marcus, Iowa, the above sold thirty-nine head of sows and gilts, making an average of \$40. This is certainly a compliment to the quality of the offering, especially since it was mostly young stuff. A good part of the offering was taken by local buyers, though a few went to the visitors who hailed from different parts of northwest Iowa, Illinois and Minnesota. The appended list tells the story:

Lot.	Price.
14. Henry Valke, Marcus, Iowa ....	\$27.00

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany this order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

Do you wish to sell live stock, dogs or other pets, poultry, poultry supplies, machinery, new or second-hand, implements, musical instruments, merchandise or, in short, anything that the farmer wants? If so, the best way to accomplish your purpose is by inserting an advertisement in the classified department of this paper. Only five cents a word for an advertisement in the greatest group of farm papers in the world, with 190,000 guaranteed circulation, covering the states of Iowa, Wis., Minn., South Dakota, Ill., Neb., Missouri, Kansas and Oklahoma. For further particulars, see announcement at top of this page.

**EXAMINE A  
PEERLESS  
CREAM SEPARATOR**

See the many points of superiority it has over all other makes.

The Peerless has a combination hollow and disc bowl. This one feature alone means a saving of the price of the machine over other standard makes.

You cannot afford to use a cheap separator if you can get one for nothing. Write for Special Catalog No. 9.

Waterloo Cream Separator Co.,  
Waterloo, Iowa.

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## OVERFILLING THE CHURN.

When you have a large amount of cream on hand and are tempted to do it all in one churning, stop and think a minute. Think two or three times if necessary to prevent making the mistake of overfilling the churn. You have probably had the experience which such a mistake entails. The churn that is filled anywhere about two-thirds full or over is bound to result in slow work. It also results in heavy work.

It stands to reason that if the churn is too full there can be little agitation of the particles of butter fat. Cream should fall from one end of the churn to the other with a chug and a thud. This throws the particles of fat together with a great deal of force. It is bound to make them unite. A churn filled half full will do much better and quicker work than one fuller. Two quick, easy churnings are always productive of better results than one. The butter will come quicker and it is quite likely that there will be less butter fat left in the buttermilk. Where the amount of cream is sufficient to fill the churn half full, or even less, it certainly will make more pleasant work to make two churnings than one. Did you ever think of it in this way?

## AN ENLARGED BUTTER MARKET.

Dairy products have sold at profitable prices for several seasons. In many markets of the corn belt during the winter butter was retailed at prices ranging from thirty-five to forty cents per pound. Of course the man who made the butter seldom realized such attractive prices, but, as said before, brisk prices have been enjoyed for some time.

A special butter inspector at one of the central markets has recently called attention to the fact that the general improvement of the quality of the butter made on the farms would result in greatly increasing the demand. He says that the inferior quality of much of the butter made has the effect of educating the public against the use of this product. On the other hand, if all butter marketed could be made to come

## The Difference

Comes Out of YOUR Pocket

A common kind of "Bucket Bowl." Heavy, hard to wash, easy to rust.

If you don't know that Sharples Dairy Tubular Cream Separators are different, take no chances until you find out. "Bucket bowl" agents depend on catching the fellows who don't know. Don't let them take the difference out of your pocket. One difference is in the bowl.

## Shake The Insides Out!

Before you buy a separator shake the insides out of the bowl. It will show you how heavy, complicated, hard to wash, easy to injure, quick to rust, "bucket bowls" are as compared to Dairy Tubular bowls. Sharples Dairy Tubulars are different.

Nothing inside Dairy Tubular bowls but a small dividing wall of triple tinned pressed steel—no bigger than a napkin ring—good for a lifetime. Yet Tubulars have twice the skimming force of any other separator—skim at least twice as clean.

You have common sense—want to save your wife work—want to save yourself repairs and cream—so why not learn about this now? Our free catalog N-121 shows many other exclusive Tubular advantages of great importance to you. Also ask for free book, "Business Dairying," covering everything from calves to butter.

## THE SHARPLES SEPARATOR CO.,

WANTED—Men to do tile ditching. Must be able to furnish good reference and sober. Please state prices wanted on different depth ditch. C. H. Drake, Hazleton, Iowa.

## The Empire PROVES Its Claims!

We do not "claim" everything; we do not try to make you think that you will go into bankruptcy, if you do not buy the

# Improved Frictionless EMPIRE Cream Separator

but what we claim for it—the machine itself proves.

It's the sort of machine that appeals to men and women who are seeking real worth and substantial merit—the best value for their money—men and women who cannot be misled but who want cold, hard facts.

If you want the separator that will make the most dollars for you, we ask you to let us PROVE to you that

The Empire turns most easily.

The Empire requires fewest repairs.

The Empire is most easily washed.

The Empire lasts the longest.

The Empire gets the most good cream.

It is well worth your while to investigate—to put aside all prejudice—to give an impartial hearing to the Empire's claims of excellence. Other Cream Separators do good work, of course, but the Empire does the best work, and you want the best!

Send for new catalogue and proofs. No matter what separator you are using, you will be interested in the Easy Running Improved Frictionless Empire.

**Empire Cream Separator Co.**  
Bloomfield, N. J.  
Chicago, Ill.

up to a certain high standard the education would be in the opposite direction, and those who are now light consumers of butter would be found to greatly increase that consumption.

This expert says that the main cause of poor country butter is traceable to keeping the cream too long. In his phraseology the churn and the cow should be kept nearer together, because the keeping of cream over an unduly long period means the development of undesirable bacteria, in the presence of which it is impossible for the lactic

germs to properly develop. We are just coming into the season of the year when this doctrine is applicable. Unless one can keep his cream at a very low temperature it is never advisable to hold it over longer than three or four days. Those who make a practice of keeping their cream in a cellar for a week can never hope to be factors in enlarging the butter market by educating the taste of the consumers in the right direction. It means more work to churn twice a week than it does once, but under ordinary circumstances the cost of the extra labor will be fully covered by the increase in price.

We do not deny that where there is a goodly supply of ice or where very cold water is available at all times that it is never practicable during the spring or summer to keep cream longer than three or four days, but we do say that in the average cellar four days should be considered the limit. Keep in mind constantly that every pound of good butter you sell has the effect of creating a larger demand, while that which is off in flavor has a diametrically opposite effect on the market.

## FEEDING COWS BEFORE PARTURITION.

A subscriber at Bernard, Iowa, sends the following communication:

I would like to have you give me some advice through your columns relating to the feeding of cows, so that no trouble will be experienced after they drop their calves. Ordinarily there is danger of milk fever or in many cases the udder will become caked, and these things I believe are due to irrational methods of feeding.

We believe in somewhat liberal feeding of dairy cows up until within a few days of calving. We have found from experience that it pays to feed something else besides corn between the time the cow goes dry and calving date, and for this purpose nothing is better than bran or oil meal. A ration composed of corn-and-cob meal two-thirds and bran one-third will give excellent results, or corn-and-cob meal with two or three pounds of oil meal fed daily in addition. So much the better if good clover hay or alfalfa is available. By this method of feeding you will get cows in the pink of condition, but of course it is kept until the very day that the calf is dropped there is danger of the milk flow being a little to great.

In the case of the tried cows, and especially with the heavy milkers, we always cut down the supply of milk-making food. If you are feeding bran, leave it out of the ration and, likewise, if oil meal is being fed as a supplementary food leave it out and feed the corn-and-cob meal alone, and sometimes it is

advisable in the case of very heavy milkers to change from clover to timothy hay. By lessening the amount of milk-making foods one greatly lessens the danger of garget, caked udder or milk fever. Of course it is not advisable to feed heavily on corn, as that has the effect of heating the system and harm may come from this alone, even though the milk supply at first is not large.

We have known instances where cows were fed so heavily that it became necessary to milk them for days in advance of the calving period. When this is the case there is some danger that undesirable results will follow parturition. We would much rather lessen the milk flow in advance by cutting down the ration than run the risk of having trouble later on, with the possible chance of losing the cow.

Veterinarians sometimes recommend that in the case of a very heavy milker it may be advisable to give a quart of linseed meal from two to five days be-

fore the calving date, and this followed up with from one to two pounds of Epsom salts, together with from two to five ounces of powdered ginger within twelve hours after calving.

Of course it goes without saying that there is nothing better than exercise before the calving date. If cows can be made to walk half a mile or a mile to the stalk field or pasture this in itself will often prevent trouble.

#### Silage in the Dairy Ration.

To the Editor of The Homestead:

Much has been written about the value of silage in dairy rations. Some of these articles are beneficial, in which the facts are brought out, while others are an injury to the progress of this method of storing feed.

Some writers, either ignorantly or otherwise overdo the matter and make it appear that if you have silage there is no need of anything else. They make it appear that all that is necessary is to get the cow to consume vast quantities of the succulent roughness and the milk pails will be filled to overflowing. Manufacturers of silos and silage machinery, in their efforts to increase their sales, dupe the people into believing many things concerning silage that cannot possibly be made to materialize.

I remember quite vividly that a certain agent, representing a machinery firm, tried to sell me a silage cutter, and in the course of his argument he said "silage was equal to June grass." I know of two persons who were persuaded to build and fill silos last fall, mainly on the strength of what these agents told them, who are wofully dissatisfied now because they have been trying to make silage do the whole thing, which, as every experienced man knows, is a very ill-balanced affair.

Now, what are the facts? I hold the opinion that silage is a success if supplemented with other foods rich enough in nitrogenous matter to bring the nutritive ratio down to a balance not wider than 1:6. It makes better roughness than fodder or all hay because of its heavy water content, which makes it approach grass, so far as succulency is concerned. Understand we do not say it is equal in feeding value to "June grass," used alone, but it comes the nearest to it of anything yet discovered for winter feeding.

Mixed pasture grasses, in themselves furnish bulk, succulency, palatability and a balance, while corn silage furnishes the three first named, but is deficient in the latter. The nutritive ratio of corn silage is 1:14.8, which, in itself, is a very wide ration. Concentrated foods, rich in protein such as oil meal, gluten feed, bran, cotton-seed meal, or any other available concentrate mixed in with the silage, in the right proportion will bring the required result. The convenience of using silage is also worthy of notice. As compared with corn-fodder, we have on the one hand the very disagreeable task of hitching the team daily and hauling the fodder, digging it out of the snow and exposing one's self to the storms in order to get the tops and a few blades that the cows will eat. Then the additional labor of dragging out of the barn (if the cows are stabled as they should be) over half the weight in stalks the cows will not or cannot eat.

On the other hand, he who has pro-

## Timely Warning Against "MAIL ORDER" CREAM SEPARATORS

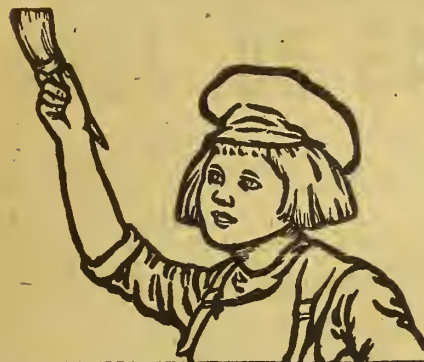

The "Farm Implement News" of Chicago quotes the following good advice to dairy farmers from a lecture by Prof. C. E. Lee of the University of Illinois State Experiment Station:

"I am not at liberty to give my preference, for I am not selling separators—if I were to name a separator manufacturer, either to you here in public or in private, I would lose my position—but there is one thing I desire to warn you farmers against and that is buying hand separators from the 'mail order' houses. Don't do it—you will regret it. The machines do not give results and they do not last. Our department receives hundreds of inquiries as to 'What's the matter with my separator? It doesn't do this or it doesn't do that,' and I tell you, gentlemen, that in every instance when we ask them to name their separator it is a 'mail order' house machine and almost worthless when it was new."

Don't waste your money in a trashy separator, made "cheap" to sell "cheap" that is going to WASTE instead of SAVE for you EVERY TIME you put milk through it, and which would be VERY DEAR EVEN AS A GIFT.

DE LAVAL Cream Separators are NOT that kind. A DE LAVAL catalog is to be had for the asking.

## Only the Rich Can Afford Poor Paint

If one is rich enough to repaint his buildings every year for the pleasure of having a change of color scheme, the quality of the paint used may cut little figure. But if it is desirable to cut the painting bills down to the least amount possible per year, it is of the utmost importance that the paint be made of the purest of White Lead and the best of Linseed Oil. There are imitations—hosts of them—in the form of alleged White Lead, and there are substitutes—another long list—in the form of ready-prepared paints.

We guarantee our White Lead to be absolutely pure, and the Dutch Boy on the side of every keg is your safeguard. Look for him.

vided silage does all his feeding under cover, distributing feed to a large herd in a few minutes. A food, sufficiently relished to insure the last vestige being eaten, up to thirty-five pounds per day.

As to the preparation of the two feeds I would just as soon hire a complement of teams and fill my silo of 100 tons capacity in one and a half days as to shock the fodder and haul it in by piece-meal with all the attendant inconveniences noted above.

Economy is a very important factor. Corn silage, as compared with hay, is about as follows: a good average crop of hay in this latitude is about one and a half tons per acre. Since hay contains about 86 per cent dry matter, we would have 2,580 pounds. Against this yield we have about 7,500 pounds of dry matter per acre of corn, or about three times as much as hay.

In an experiment at the New Hampshire Experiment Station, "The silage ration containing 16.45 pounds of digestible matter produced 21 pounds milk and the hay ration containing 16.83 pounds digestible matter produced 18.4 pounds milk. Calculating the quantities of milk produced by 100 pounds digestible matter in either case, we find on the silage ration 127.7 pounds of milk, on the hay ration 109.3 pounds or 17 per cent in favor of the silage."

Carrying the experiment of the above station a little farther, the difference in milk yield of my silo of 100 tons over hay would give me a total gain of 1,976 gallons at ten cents per gallon net, making me a profit of \$197.60. So it can easily be calculated that silage fed intelligently can be made to pay the cost of the silo in one year, with a herd of twenty cows besides the greater convenience and pleasure in feeding it and the better condition in which the cows will come through the winter season.

## VARIETIES OF CHERRIES TO PLANT

We have had a little experience in planting cherries, which may be of value to others. It has been to us, but it cost us considerable to learn.

The tales of the large, red sweet cherries which grew on the Ohio hills tempted us and we set out some Windsor Sweets and other varieties of that sort. They never seemed to do well in our prairie soil and the winter weather was too severe for them. Some of the trees lived a number of years and grew to considerable size. They even blossomed, but we got no fruit and finally their short existence came to an end.

We also planted a number of the "sour" varieties; Early Richmond, Montmorency, Orell, Bessarabian, Wragg, English Morillo, Ostheim and others the names of which we do not remember. Bessarabian made a fine upright growth, clearly outstripping all the others, but it never bore worth mentioning and one by one the trees split down in windstorms until none remained.

Wraggs and English Morillos (we could not distinguish between the varieties) grew well and soon came into bearing. They bore medium crops, but their ripening period was so irregular that the birds got practically all the cherries. Finally the cherry leaf blight struck us. These varieties seemed especially susceptible to it and before we had learned to combat it they had all succumbed.

We had two or three trees of Ostheim. These never bore well and had the same fault of irregular ripening as the Wragg and Morillo. The trees finally became affected with a kind of "Toadstool" growth; then wood began to rot and whole branches to die and break off until finally not one tree of the variety was left.

The Early Richmonds, Orells and Montmorencies came into bearing at about the same time and have borne good crops for several years, are, still good, thrifty growing trees and give promise of doing well for a number of years. There were other trees similar to them which gave the same results.

We have been taught that cultivated cherries may be divided into two classes, sweet cherries and sour cherries, and that the sour cherries are again to be divided into two sub-classes according whether the juice is light or dark. We believe this classification is correct and our experience has been that it is useless to plant any except the sour cherries, and of those only such as have light colored fruit or fruit in which the juice is light and watery.

## HANDLING TREES.

You have given your order for nursery stock and will soon receive a card stating date and place of delivery. At that time begins your responsibility.

Take three or four horse blankets with you when you answer the call, even more if your bundles are large and many. When your bundles are loaded, and even if the roots are burlapped, wet your blankets and cover the bundles so that wind and sun cannot reach the roots. This may seem like a small matter, but it is small or large, just in proportion to the number of miles you have to drive, and to start with it is as big as the traditional "elephant." When you reach home dig a trench, open the bundles and so place them that when covered all of the roots will be in contact with fresh earth. Wet thoroughly and heel in. If this is well done no space will be left where the drying winds can get down to the roots.

When taking to the field to plant, unless the weather proves cloudy and showery, it is best to have trees in wagon in tubs or barrels of water, only taking them out as they are set. At the very least the roots should be covered with the wet blankets.

With a sharp knife remove broken roots, and give the ends of all larger roots a clean smooth cut. The digger did its work rudely, and it is for you to bring a little care and intelligence to bear. Have the prepared hole big enough to give all roots a natural position. Think what that means and do it well, then fill with fine, rich earth and firm it with the foot. What

is the advantage of all this painstaking? Much every way, and not the least in this, if you do your part faithfully and well and your trees fail to grow you may know to an absolute certainty, that they had been abused before reaching you.

Then go back to your nurseryman for a replace of trees or a refund of money, and if he is an honorable man, and you stick to him you will get one or the other. Or if you do not, you will know one firm that it is best to let alone in future.

## SOWING ONIONS.

When spring comes the first seed the wide-awake truck farmer seeks to put in the ground is the onion seed.

The soil should be prepared in the fall by heavy manuring, plowing and harrowing. In all cases the manure should be not coarse, green and lumpy, but fine and in condition to mix readily with the soil. With this fall preparation the ground becomes settled during winter, and freezing and thawing pulverizes the lumps. The soil for onions needs to be fine, "like an ash heap" as we say.

Then in March may come a day or two when the surface is dry, even though the frost may be out, only three or four inches. This is the golden moment, and you must seize it. The seed being in hand, and the drill in good working order, let the work be done promptly, but carefully. Don't seed too thickly. That's ruinous. And don't seed too thinly—you had better not seed at all. It is only by taking a middle course that you can avoid destruction on one side and failure on the other.

You cannot hurry the season. The soil must be dry even if you have to wait longer than you like to. To run your drill in muddy ground is simply impossible.

One may grow a fair crop if compelled to prepare the soil in the spring, and seed late, but his chances are not so good. And we are speaking of the methods most likely to bring extra good results. The point to bear in mind is this: early sown onions, like early sown wheat, always give the best crop. The seed starts at a low temperature, and

**HOODOO** A new, round, 1 1/2 pound, well netted melon, with red orange flesh. This is the "Lope," you must have for profit next year. ## SEEDS THAT GROW

Best quality Garden, Flower and Farm Seeds, Alfalfa, Clover, Seed Potatoes. We will send free with catalogue a pkt. of new lettuce seed "May King" the best head lettuce ever introduced. Also have full line of Nursery Stock, Roses, Plants and Bulbs.  
**GERMAN NURSERIES, BEATRICE, Nebraska.**  
Box 12,

no late cold snap will injure it, or the young plants.

It is very important to give the onion crop a good start ahead of the weeds,

for thus the whole problem of cultivation is simplified.

The onion is a staple crop. As with other crops the yield and price varies with the seasons. Dry weather and poor culture makes a light crop, plenty of rain and good culture a full crop.

Five hundred bushels per acre, even if sold at thirty-five cents per bushel, makes a fair return for labor bestowed. But seven hundred bushels, at sixty cents, is better. And this last figure both in yield and price is often reached.

#### A STRAWBERRY LESSON

Many farmers and fruit growers may find it very instructive at this time of year, to compare a mulched with an unmulched strawberry bed. The unmulched, anywhere north of central Mis-

#### FANNING MILLS

We build both Side and End Sledge Cleaners for farm use. Let us tell you about the "Expert." It has stood the test for many years. Will grade your Oats and Barley, and is the very best in Timothy, Clover, etc. Select seed on the Double Test principle.

#### SMUT MACHINES

The Expert Smut Destroyer will stop the smut in OATS and BARLEY as well as wheat, and will increase your yield 5 to 10 bu. per acre. A boy can operate it. Write and see whether our claims are reasonable.

#### CORN GRADERS

We have the grader that is Expert in its work. Sacks all grades. Capacity 15 bu. per hour. Operator is seated. Folds for storage. Costs less than inferior machines. Write.

**WE CAN MAKE PROMPT SHIPMENTS.**

**KHERSON SEED OATS FOR SALE.** Big yielder, will not lodge or rust. 50 cents a bushel. Aye Brothers, Blair, Nebraska.

souri, will be found looking sere, brown and apparently lifeless.

But lift the litter from the mulched bed and you find the plants, about as fresh and green as in the fall.

The lifeless damaged condition in the first case is the result of alternate freezing and thawing. The green, healthy look of the mulched bed is because the mulch has kept the plants frozen and protected from sun and wind.

The unmulched plants are not entirely dead. In most cases there will be quite a growth when spring comes, but the crowns are so injured that only a few fruit stalks will be put forth. And the owners of those beds will be saying later, "This is a poor berry year." But those who have mulched beds—barring the accident of late frosts—will assert, "I never had a better crop."

The difference in yield between the mulched and unmulched will be about as one to three or four, in some cases worse.

Figure out the difference in value between one-third and a full crop, and note how well it pays to spend a dollar or two if need be for straw. The time to put on the mulch is November, but the time to see and realize fully the need of it is March.

#### A PRECAUTION AGAINST CODLING MOTH.

Many apple worms escape from the fruit and go into the pupa or inactive stage in the cracks and crevices in the apple barrels and boxes and other places in the cellar or cave. These will, if undisturbed, emerge about May 1st in the form of moths to lay eggs for next season's crop of worms. To prevent this the barrels should be examined and the cocoons destroyed, and the cellar or cave cleaned.

This is really very important as comparatively few moths are present at the beginning of the season, and since those which survived the winter get their start in life in late fall or winter apples, it is quite probable that the parents of practically the entire first brood of worms pass the winter in some friendly cellar.

Where orchards are close together little can be done in this direction except by co-operation of all the orchardists in the community.

#### Growing Celery.

To the Editor of The Homestead:

Celery is a relish which should be found on every table. Its value in making soups, salads and many other culinary creations is recognized, and its name frequently finds a place on the farmer's grocery bill, but very few farmers, indeed, have even attempted to grow it in their gardens. The majority of experimental efforts result in failure because the successful culture of celery, perhaps more than any other field or garden plant, depends upon the performing of several operations in exactly the right manner.

The first difficulty usually experienced is in getting the seed to grow. This cannot be remedied to any great extent except by being sure to plant enough seed, as but a small percentage can be made to germinate at the best. Often the plants which do start turn yellow and wither and die. This difficulty may be prevented, partially at least, by supplying sufficient water for the needs of the plant. The scientific works on celery growing say that celery seed should be planted where the water continually stands very near the surface of the ground. This condition may be brought about artificially more easily than it can be found naturally.

Early celery is usually started in the hot-bed. It is not best to plant the seed as other seeds are ordinarily planted on account of the difficulty of supplying sufficient moisture without "drowning" the manure. The better method is to plant the celery seeds in fine soil in a tight box made of thin wood or in a

# KHERSON SEED OATS.

THE NEW KHERSON OATS were originally imported from Russia by the Nebraska State Experimental Station, and have proven one of the surest croppers and largest yielders, as well as best sorts fully two weeks earlier than others. THEY DO NOT RUST OR LODGE as many other sorts do, and are Lincoln, Texas Red-Rust-proof and other extra early sorts. Prices 50 to 75c per bushel, bugs included. Write for our Big Illustrated FREE Catalog. A postal will bring it. Address,

**RATEKIN'S SEED HOUSE, SHENANDOAH, IOWA**

## WE BUY OLD BAGS

Send your grain, feed or cottonseed meal sacks to us and receive highest prices. We are paying some customers from \$10 to \$20 a month for second-hand sacks. Tell us what you have and we will gladly quote prices. Write today.

**ST. LOUIS BAG & BURLAP CO., 303 N. Main St., St. Louis, Mo**

tin pan or other such receptacle about four to six inches deep. This should be watered frequently until the water comes very near the top of the soil. If the plants are to be grown for late celery the same box treatment should be observed, but the use of the hot-bed is not necessary as the seed should be planted May 1st to May 15th, and by that time the soil and air are warm enough that the seed will grow in the open.

When the plants have grown to a height of about two inches, they should be transplanted to raise in the garden.

Methods of celery growing vary greatly, but for a small amount for home use we would recommend the following method:

In the first place the ground should be well covered with fine manure; three parts horse manure to one part hen manure makes a good mixture. The soil should then be thoroughly cultivated and all clods broken and weeds destroyed. A trench one-half foot deep should then be dug and the celery plants set in about six inches apart. For several weeks growth will be very slow, and in the meantime good culture must be given or the weeds will completely smother the tender young plants. When the celery finally begins to grow and spread it is able to take care of itself fairly well. As growth proceeds the stalks will spread out upon the ground. They should be gathered up carefully with the hand and loose earth drawn to them to hold them up.

The best way to blanch summer celery is by slipping a three or four-inch tile over each plant when the longest stalks have attained the length of about twelve inches. Late celery may be banked up with earth, but in the warm weather such treatment would induce rot in the earlier varieties. Not much blanching is necessary for winter celery until after it is dug, when it is transplanted to the cellar or cave and there kept in absolute darkness where the work of blanching will go on very rapidly.

It is generally supposed that celery can only be grown in very low, swampy ground. We have found this to be an error, however, as we have always grown it on a high, black, sand and clay loam without irrigation in any manner. Good cultivation was given however, and a complete dust mulch maintained which conserved the natural moisture of the soil and made it available to the growing plants.

#### Strawberries as Fillers.

To the Editor of The Homestead:

The value of the strawberry as a filler, or in other words, to plant in combination with other crops is often overlooked by growers, but it is a fact that there is no fruit that combines so well with others. One reason is that it comes in bearing so early, producing a full crop the second year while all the other small fruits either produce nothing till the third year as the grape, or only a small crop, as the raspberry and blackberry. It is possible, therefore, to take

## TREE LILAC - 30 FT. HIGH

A real tree, not a shrub. Never saw one? We have them for sale and many other kinds of fine Lilac. Send for catalog. Positively the finest in the Northwest. It fully describes and prices all kinds of Shrubs, Vines, Trees, Roses, Bulbs, Perennials, etc., and tells you how to plant, prune and care for trees, and all kinds of nursery information. Sioux City Seed & Nursery Co., 2113 Clark St., Sioux City, Iowa

**AGENTS** wanted to introduce Burbank's wonderful seedless plum—Miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. Oregon Nursery Co., Detroit, Michigan.

advantage of the early bearing of the strawberry and make it pay for the use of the ground and for the cultivation of these slower crops while they are coming into bearing. Another reason that makes the strawberry fit in so well with

all other fruits is the fact that it grows so small and close to the ground that it does not interfere with them nor they with it, and also the fact that it is so shallow rooted that it is easy to exterminate it the moment the other kinds call for all the room.

For example I have combined strawberries with grapes with great success and this plan is especially valuable for those who are crowded for room and have only a small place to plant. The grape rows can be laid off eight feet apart and the vines the same distance apart in the row. After the vines are planted, strawberries can be set in the row with them, three plants two feet apart between each two vines. Next a full row of berries can be planted between the grape rows which would make it just four feet from the vines. Planters who try this plan will find that the grapes grow off wonderfully fast under the extra cultivation demanded by the berries. Every time the berries are hoed of course the vines are hoed too and that is about twice the cultivation they generally get. Care must be taken not to allow the berries to spread up to and around the vines so that they cannot be hoed for that will check their growth. Do not let the runners take root closer than a foot of the vines and hoe the grapes with the same care as the strawberries. The result will be the thriftiest lot of vines you ever raised. The strawberries may remain two years or even longer since they do not interfere with the grapes. The first year the grape canes may be suffered to run along the ground, only two being allowed to grow and these trained to the right and left in the berry row, so as to be out of the way of the cultivator.

This same combination I have tested successfully with raspberries, blackberries and gooseberries and even fruit trees, but as I have said, if the strawberry runners are allowed to surround the other plants the result will be to stunt them and lose them a year's growth.

Missouri. L. R. Johnson.

#### SEEDSMEN AND CATALOGS.

##### DON'T PUT IN A GARDEN,

if you want to have any peace of mind this summer, unless you have got it poultry proof. In other words, either fence out the poultry and fence in the garden or else fence in the poultry. Either way accomplishes the same desirable result. Chickens like young lettuce and onion tops and cabbage as well as you do and they will rise just enough, earlier every morning to get there before you do, too. Don't kill the poultry, and don't live through the season without a garden, if you have dirt enough for both to exist in different places. Get some Musgrave poultry fence. Just the stuff. Write to the Musgrave Fence Company, Des Moines, Iowa, for description and prices. Mention this paper as per advertisement on page 19.

##### MONEY CAN BE MADE FROM THE ORCHARD.

No one would attempt to grow a crop of potatoes without using Paris green or London purple to protect them from the bugs, yet many fruit growers have the mistaken idea that after setting out the trees the work is done, except gathering the fruit and occasionally sawing off a few limbs. Wide-awake fruit growers are just beginning to realize that a judicious use of spraying solutions is absolutely necessary to secure a profitable crop of marketable fruit. Unless the insect enemies are to be allowed to empty your purse a relentless war of extermination must be carried on. Mr. Fruit Grower, you ought to get in thorough touch with this matter right now. A hook of great interest to fruit growers and farmers interested in more and bet-

CANE

THE MOST VALUABLE of all fodder plants for cattle and horses and of special value to dairy farmers. Send for descriptive circular and testimonials proving its value and telling how to grow and feed it both green and dry. Cheapest of all feeds for winter use. Some farmers sow 50 to 100 acres every year and it produces immense crops. Sample and large, illustrated catalog of farm and garden seeds free if you mention this paper.

IOWA SEED CO., Des Moines, Iowa.

5 VARIETIES of seed corn for sale at \$1.25 per bu., cured or shelled. Satisfaction guaranteed or money refunded. Alex James, Rt. 1, Shenandoah, Ia.

BROME grass seed for sale. I have a fine lot of seed for sale right if taken at once. Write me now. Geo. W. Schwab, Clay Center, Neb.

WRAGG NURSERY GUARANTEES

WE PAY FREIGHT. We Grow Our Own Stock and Guarantee it to be the best on the market. Why not order Evergreens, of which we make a specialty, for a wind break for your home? We guarantee lowest prices on everything in our line. Write for free cut-rate price list.

M. J. Wragg Nursery Co., 332 Good Block DES MOINES, IOWA

ter fruit, describing fully their prepared mixtures, can be obtained by writing today to the Quincy Spray Mixture Company, Box 213W, Quincy, Ill.

##### WHO SAYS ROSES?

That's a flower rather expensive and hard to get these days. They can't be grown except in greenhouses and when you have to pay \$2 a dozen, and a dozen keeps only one week, one can't afford to have them around all the time. A splendid rose offer is now being made by the Mother's Magazine in other columns. They are sending a beautiful picture of red and yellow roses 16x20 inches in size to everyone who sends ten cents in stamps for three months' subscription to the Mother's Magazine, a large illustrated family paper, full of interesting reading. Now, remember this is the offer: An elegant picture and three months of good reading all for a dime. Write for this generous offer to the Mother's Magazine, Elgin, Ill. Look for the advertisement on page 18 and mention The Homestead in your letter.

##### HARDY TREES, PLANTS AND SHRUBS.

One of the nursery firms which caters to the trade of northern planters is Strand's Nursery, of Taylor's Falls, Minn. This firm are extensive growers of the best and hardiest varieties of nursery goods for northern trade. Their neat little catalog should be in the hands of every grower of fruit, vegetables and ornamental trees. It has always been the policy of these agents to employ no agents and in this way they have been able to meet competition fair and square and supply customers with a high quality of goods at the lowest prices. They carry a full assortment of all leading varieties of their stock on hand. After looking over their catalog we feel quite safe in saying that they can furnish you with stock at very reasonable prices. Try these people if you are in the market for any of their stock.

##### HENRY FIELD'S SQUARE DEAL.

Mr. Henry Field has always made it a policy in selling seeds to sell only the best. His plan of selling only guaranteed seeds has made it possible for him to build up a wide and profitable business. Once a customer, always a customer, is the rule with those who plant Field's seeds. Just ask those who grow Field's seeds, secure a package and note the guarantee regarding the truthfulness of his seeds to name and purity. The recent investigations have revealed the fact that there is a startling amount of adulterated seed being sold. Mr. Field's record in this exposure was beyond reproach. His full assortment of grain seed, flower and garden seeds are described in his catalog. Write for it and before reading further see what Mr. Field says about adulterated seed on page 24. Mention this paper when writing and address your letter to Mr. Henry Field, Box 25, Shenandoah, Iowa.

##### A BEAN AND PEA THRASHER.

A bean and pea thrasher is probably just what hundreds of men have been looking for during the last few years. Beans and peas are one of the most valuable leguminous crops raised on the farm. Heretofore the necessary machinery for harvesting and thrashing the crop has not been available by the average farmer. In another column will be found an illustration of a perfected bean and pea thrasher. It is claimed to do the work without splitting the beans and peas; it separates them from the vines and pods and then shreds the vines for fodder. This thrasher will make it possible for a much greater acreage of these legumes than has heretofore been harvested. Here is an opportunity to grow more of a very valuable crop. "How to Grow and Handle Your Bean Crop Successfully" tells you all about it; it is free. Send for it today to J. L. Owens Co., Minneapolis, Minn. See page 24 for further particulars of this offering.

##### AN INVENTOR AND MAKER OF CORN GRADERS

is now offering to farmers and grain growers the result of his thirty years of experience. With the coming of every season we find more and more practical farmers supplying themselves with corn graders, fanning mills and smut machines. In fact these machines have come to be an absolute necessity with the grain grower who expects to make any more than a living. Nobody wants to work simply for his health. It costs just as much to sow and plant foul seed as pure seed. The best corn planter on earth cannot drop ungraded corn evenly. Only when there is a close uniformity between the corn grains will there be any assurance of an even stand. On page 11 will be found full particulars regarding a practical corn grader. The machine is simple and has a capacity of fifteen bushels per hour. The maker of this machine also sells a full line of fanning mills, smut machines and other machines for grain growers. These machines have been fully tried out on the best of farmers. If you are an intending purchaser write to Mr. Andrew Cleland, 80 Western Ave., Minneapolis, Minn. See page 11 for further particulars.

##### THE NECESSITY OF GRADING SEED.

Undoubtedly few farmers realize the importance of grading seed. New methods and ideas are slowly accepted by the average run of grain growers. We well remember the time when it was thought a foolish thing to bother fanning seed. The time has come, nevertheless, when no careful farmer thinks of putting foul seed into the soil. Now it is up to most grain growers to grade their seed. It is absolutely necessary in order to secure an even stand. An even stand covers the ground evenly, chokes out weeds and receives full value of rains and the plant food that is being liberated in the soil. We have walked over hundreds of fields of grain where there were bare patches as large as a blanket. Invariably these patches grew up in

weeds. During the harvest the weeds were bound in with the grain and thus the seed returned to the soil whether it went through the thrashing machine or whether the bundle was left in the field to rot. That an even stand of grain chokes out weeds needs no proof other than a little careful observation on the part of the farmer. If the increased yield is only a bushel or so to the acre, on the whole field this increase is sufficient to pay for a number of grain graders. Now, can you afford to go on and grow grain on high-priced land without getting the highest returns possible? In our columns will be found advertised a corn sorter that really sorts the corn and a grain grader and grass seed cleaner that are guaranteed to do high-class work. Now, these three implements are offered for the price that is often charged for one. Write today for prices and address your inquiry to the Hall Grader Company, Winfield, Iowa. Kindly refer to page 24 for this grand offer.

##### DON'T ALLOW "PESTS" TO DESTROY YOUR FRUIT.

Did you ever stop to think why you gathered so few perfect apples last year? More than likely the failure of your fruit crop was caused by a fungus, or the codling moth, which blighted the blossoms and young fruit as it was forming. They were your enemies last year—they will be this year. Study up

the subject and be prepared to give the pests a royal this coming year by spraying trees and vines at the proper time. This matter of spraying is no longer a question of policy or of experiment, but of stern necessity to farmers and fruit growers. The war against the de-

structive army of pests must be aggressive—exterminating—if you would save the fruit as well as the trees and vines which bear it. If you are at all interested in securing a better crop of fruit or vegetables it will be well worth your while to write the William Stahl Sprayer Company, Box 103-U, Quincy, Ill., for a copy of their free book telling all about spraying and how, when, where and what to do with.

##### THE STRAWBERRY MAN—J. L. TODD.

Below appears the likeness of Mr. J. L. Todd, of Woodward, Iowa, who now offers to supply our readers with the best and most productive varieties of strawberries at most

reasonable prices. For one dollar you can buy 300 plants, which will be enough to set out a large bed. Don't let the spring come and go without putting out a bed of this luscious fruit. Along with your shipment will be sent full instructions regarding planting and care of the bed. Remember the address, Mr. J. L. Todd, Woodward, Iowa. See page 11 for the varieties offered.

##### HARDY TREES AT HAMPTON, IOWA.

In 1869 the Bristow Nursery Company was established at Bristow, Iowa. Ever since that time they have been in the business of growing hardy ornamental and fruit trees and smaller stock. In 1899 this company moved to Hampton where at present they are carrying on a very successful business.

Their twelfth annual catalog is now ready for mailing. It contains a very full assortment of native and foreign varieties of this kind of stock that they have on hand. Their ornamental trees are their pride and they take special pains in packing, as will be seen by the illustration. They have a full assortment of evergreens and are prepared to furnish them at reasonable prices. If you have been intending to ornament your yard for several years, do not delay it any longer. Here is an opportunity which you should not miss. Write these people for anything in their line and see page 11 for further particulars.

##### MORE FROM HENRY FIELD.

Before you begin on this I want to tell you that I am paying for space here to tell you about myself and my seed business. You know of course that I am in the seed business. Been in it for years. The biggest and best seed business in the West, too. Now I want to talk to you about my seed business.

In the first place my seed business is different from any other I know of. I started as a market gardener. Raised to that business. I gardened a long time before I ever thought of going into the seed business. I learned a lot about seeds and seedsmen and I often thought of how I would do it if I were selling seeds instead of buying.

And all the time I was getting a little more into the seed business. The neighbors noticed that I had pretty fair luck with gardening and they kept coming to me for "some of the same seed" that I used. And they would want seed corn and seed potatoes and strawberry plants. So finally I made a business of it every winter. I didn't have any catalog then, but I just solicited the orders personally and delivered the seed in the spring. I was the whole thing myself from catalog to delivery wagon.

Well, it spread like the measles. I gave good stuff, "your money's worth or your money back," and it wasn't long till I had all the seed trade in this part of the country and was getting mail orders from outside, and had to turn the front room of the house into an office and the barn into a seed house.

That was several years ago, and as my business has practically doubled every year since, I now have a mighty big business, and a mighty nice business, too. I expect to be selling seeds for fifty years yet and I am going ahead on that idea. It's not this year's business I am looking at, but next year's and the year after, and ten and twenty years to come.

I believe it pays to give a square deal. A man's a fool that thinks people will believe a lot of exaggerated pictures and crazy descriptions. They may bite once, but that will be the end of it. I don't want that kind of customers.

I'm not trying to reform the whole seed business. That would be too big a job for me. But I have managed to do some good and have started some things that were big reforms in the seed trade. For instance, I was the first seedsman to push the sale of ear seed corn. I was alone in it at first, but now they are all in line. Later, I was the first to offer graded seed corn. So far as I know I was the first seedsman to print a guarantee on my packets. I am still practically alone in that. With possibly one exception I am the only seedsman to offer a guaranteed grade of clover and grass seed.

Now, here is where you come in. I want to get acquainted with you in a business way. I want to be your seedsman. Anything you want in seeds I can supply you. I grow all kinds, garden seeds, flower seeds, seed corn, seed potatoes, clover seed and all of the very best. I sell everything subject to test, and subject to your approval.

Write for my catalog anyway. It's worth having for the information it contains. If you do any gardening at all, you ought to have it whether you intend to buy any seeds or not. It's free, and I send samples of seeds and seed corn and flower seeds with it. I want to get acquainted with you and I don't know any better way than to have you get my catalog and read it through. Write for it. If more convenient for you, fill out this coupon below and send it to me.

And write me a letter. Tell me what you grow, and what you are making most money at, and what I can do to help you. Tell me your troubles. I've gardened a long time and maybe I can help you out some. Let's get acquainted whether we do any business this year or not. Address me this way: Henry Field, Seedsman, Box 25, Shenandoah, Iowa.

## Be Sure of Your Paint Before Painting

Send for our booklet, "Pure Paint," and learn how to be sure of your paint before painting, and how to avoid the ready-mixed compounds of worthless paint imitations that crack, scale, spot and fade.

## CARTER Strictly Pure White Lead

is free from all adulterants. Every atom is paint. Use it, and you will know what you are putting on, and save money on the cost per gallon, cost per yard covered, and cost per year of wear. Sold by reliable dealers everywhere. Can be mixed to any desired color.

Our booklet tells how to select paint for farm buildings, and shows six beautiful color schemes. Sent FREE. Address Dept. D,

CARTER WHITE LEAD CO., Chicago, Ill.  
Factories: Chicago—Omaha.

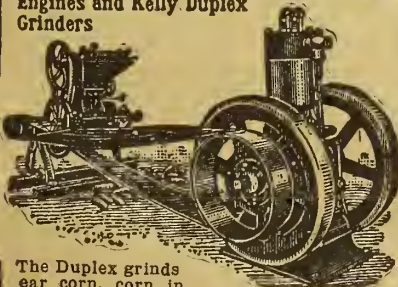

## PATENTS

If you have a new device which can be patented, it may make you a fortune if properly protected. Send sketch or model of your device for free opinion as to patentability. Among our clients who have made money out of their patents we refer you to the following: Wm. F. Gould, Des Moines, Ia.; Wm. H. George, Dexter, Ia.; H. H. Munson, Truro, Ia.; Franz J. Wood, Des Moines, Ia.; Gould Balance Valve Company, Kellogg, Ia.; P. H. Van Gorp, Pella, Ia.; Stocking & Mendenhall, Audubon, Ia.; Wm. V. Robinson, Des Moines, Ia.; Victor Landholm, West Point, Neb.; Samuel G. Scholz, Billings, Mo.; Benjamin F. Booth, Indianola, Ia., and many others we will name on request. Upon examination of your device we can tell you whether or not you can secure a patent. We have the largest and best equipped patent offices in the west. We also have Washington offices. As references we can give you The Homestead and many other papers, any bank in Des Moines, a large number of manufacturing concerns throughout the west, and other clients. If you have an idea, write us for full information as to how to protect it fully.

ORWIG & LANE,  
408 Crocker Bldg., Des Moines, Ia.

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

**MAKE MONEY**  
pulling stumps, grubbing, etc., and clearing land for yourself and others. Hercules Stump Puller is the best.  
Catalog FREE. Hercules Mfg. Co., Dept. B70, Centerville, Ia.

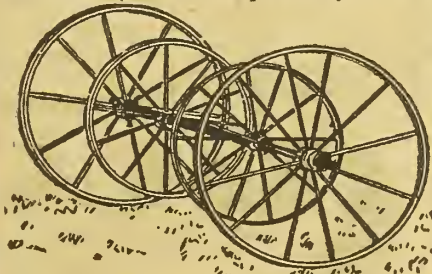

## HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

G. G. K., of Le Mars, Iowa, sends us a sketch of a portable hog chute. Undoubtedly it will be found very handy, as one man can move it about quite easily by carrying one end and pushing it about like a wheelbarrow. Any old pair of wheels with a two-inch tire may be used.

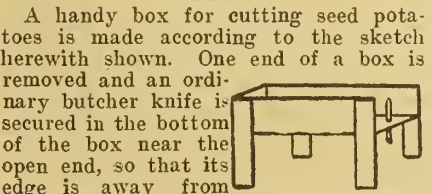

One of our subscribers requests a device for winding up barb wire, and we think in the illustration given, taken from an exchange, he may find something that will suit his needs. Procure two large buggy wheels and two smaller ones similar to those shown in the illustration. A steel rod may be used for an axle, so that the two inside wheels may turn independently of the

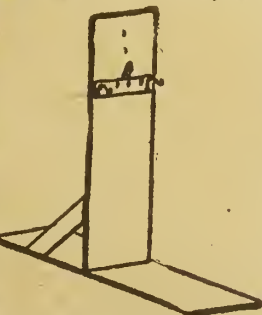

outer ones. Small strips of inch stuff are laid between the spokes around the axles of the two middle wheels. This forms a spool on which the wire may be wound. The size of the spool may be made to fit the amount of wire that is to be rolled up. It is often possible to roll a mile onto one of these spools, and this manner of taking up wire has the added advantage of being easily unrolled.

A handy box for cutting seed potatoes is made according to the sketch herewith shown. One end of a box is removed and an ordinary butcher knife is secured in the bottom of the box near the open end, so that its edge is away from the operator. The potatoes are pressed against this knife and are cut as desired. This plan makes it possible to do the work of cutting seed potatoes with more ease and rapidity than if one hand is used in manipulating the knife. This same correspondent, Matthias Marty, of Wisconsin, states that he has used a handy stand, to be used

in holding sacks and bags while they are being filled, for a number of years. The bottom piece and upright are made of two-inch stuff ten or twelve inches wide. Holes are made in the

top of the upright to fit the pin which holds the sack holder. This is for the purpose of adjusting the holder to the height of the bag, as it is very common to use both cotton and hemp sacks. The contrivance for holding the sack is made of an inch board six inches wide and the width of the upright. Nails are driven in the face of it on which the back of the sack is hooked, while the sides are placed over the ends of iron rods which extend away from the face of the back strip and on each side of the sack.

Women have a case for their fancy work, and there is no reason why the farmer who has a great many tools to carry around over his fields during the season when heavy farm machinery is in use should not have a more convenient way of carrying his tools than is ordinarily supplied in a crude tool box. In the attached illustration we have attempted to represent a canvas case or tool kit well suited to this need. This kit is made of the heaviest canvas and is partitioned off with pockets into which the different tools may be

## The Little Red School House

In order to supply the necessary moisture a large irrigation project is now under way which will supply water to the very richest portion of this great Canadian province.

The Canadian Pacific Railway Co. is building a vast system of ditches, which, when completed, will water about 1,500,000 acres of this rich land.

Land under this system of ditches is being offered at prices so low any man with a small amount of money can find a home there with the assurance that with one or two crops the land will be paid for.

On the vast irrigated tracts of Southern Alberta you can find a farm that will just suit you, and you can rest assured that if you farm it fifty years you will never have a crop failure.

Full information and particulars how to see the land, terms of sale and prices will be sent upon application to

IS FOUND in the rich farming country of Alberta, Canada, just the same as it is found on the prairies of the central or eastern states.

In fact, facilities for educating your children are just as good in Alberta as they are in any section of the United States.

Western Canada is keeping abreast of the times, and in the matter of making money from agricultural pursuits it is ahead of any other country on earth.

Live stock and crops can be produced cheaper there, and in larger quantities, than in any other part of the world.

The rich grasses to be found on the plains of Southern Alberta produce better and fatter live stock than any other grasses known, and with the addition of a little water almost any kind of grain or vegetable can be raised.

Canadian Pacific Irrigation Colonization Company, Limited,

71 Ninth Avenue, West, CALGARY, ALTA., CANADA.  
Sales Department, Canadian Pacific Railway, Irrigated Lands.

## THE BANNER RIDING ATTACHMENT.

This SAME attachment can be clamped to any right or left-hand, wood or steel beam, walking plow, lister, sod breaker, middle buster or harrow that is made. ONLY \$15.00 from your dealer or delivered by us to your station. WE WANT AGENTS. Write us for, terms, territory and full description.

THE BANNER PLOW COMPANY,

COFFEYVILLE, KANSAS

placed. It may be rolled up in a snug roll and strapped up to hang on any place about the binder, harvester, or

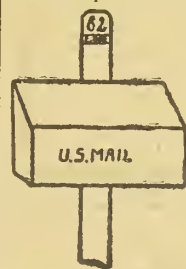

other large machine that needs attention so frequently. When any repair work is needed the outfit can be unrolled and you have every tool right at hand where you want it. Whenever you lay a tool down it is very likely that you will place it right in its pocket, consequently there will be fewer tools lost than if you threw them down on the ground or laid them on some part of the machine, where perhaps they might be forgotten and lost. The convenience of a case like this cannot be appreciated until you have tried one for a season.

"For twenty years," writes C. G., of Rock Island, Ill., "I have used a device for setting out trees and I find it a very splendid idea to keep the trees in line. After the rows have been staked out and marked, we lay the board shown in the illustration right over the hole where the tree is to be planted. The board is held in place by stakes driven into the notches at either end. The trunk of the tree is placed in the

notch in the middle, after which the earth is thrown in and tramped. When the hole is being dug the board, of course, is removed, but the pegs at the end preserve its position, so that when the board is replaced it will not be out of line. The board is commonly

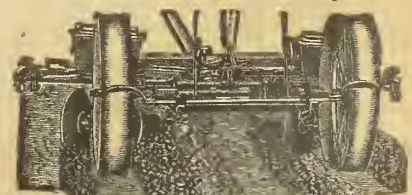

six feet long and we would not think of setting out trees without making use of it." The same writer contributes an idea regarding numbers on mail boxes. As the painted numbers soon disappear, they are not generally satisfactory. The illustration shows how the piece to which the mail box is attached extends over the top of the box. On this piece the number of the box is put in aluminum or metal letters. The name may also be inscribed on a metal band which

may be attached just below the numbers.

## KEMP DISK FURROW OPENER.

We herewith print an illustration of the Improved Kemp Disk Furrow Opener, manufactured by the Walker Manufacturing Company, of Council Bluffs, Iowa. In this day and age when increased yield means everything to the farmer, it behooves the up-to-date man to know what is best for him to use. This Kemp Disk Furrow Opener will

increase the yield from 15 to 25 per cent. It removes all clods, young weeds, trash of all kinds from the corn row and makes a clean, mellow seed bed in which to drop the corn. It produces a better stand and an increased yield by planting each hill the same depth. It can be attached to any make of planter and is easily and quickly put on. It will increase the yield from eight to twenty-five bushels per acre and will pay for itself in one day's planting. A scientific test made by the Kansas Experiment Station shows a gain of eight bushels more per acre by its use than corn planted in the same field without it. A free circular describing it in detail will be mailed by the Walker Manufacturing Company, of Council Bluffs, Iowa, provided you mention The Homestead.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## Poultry Notes for March.

To the Editor of The Homestead:

It is the season when it seems that spring ought to be here—and isn't. While the thermometer is not apt to hover as closely about the zero point as in January and February, yet the keen north winds are shivery, and often snow drifts make us imagine we are back in the earlier months of the year.

But the hens know that spring is coming, even if she isn't as yet visible. The robins told us long ago she was on the way, and the feathered family show their faith by shelling out the eggs needed for the incubation of the little chicks we so desire. Too often, alas! Biddy prefers to show her faith by laying eggs, rather than by becoming broody. Here is where the incubator comes in. The day is fast coming when the majority of farmers will consider the incubator as indispensable as the mower or the thrashing machine. Farm-folks are not apt to take up new things in a hurry, but they are progressive, and by giving them time to be convinced, and a few good crop years to give them ready money, no class of citizens are more ready and willing to avail themselves of labor and time saving devices.

Farm machinery has made possible an acreage of grain quite out of reach before their advent. Just so the incubator and brooder makes possible a far larger output of chickens than the old way of depending solely upon hens. It wholesales the work and the product just as farm machinery has done with the crops. These hatchers have been so improved and perfected that, given fertile eggs, the chances are all in favor of a large percentage of strong chicks.

How early to set the incubator must be a matter of surroundings. With a good brooder house, chicks can be cared for at almost any season. If outdoor brooders must be depended upon, the middle of March in the Central West, is quite early enough to start the lamps in our machines. With the brooder house, February, or even January (if eggs can be obtained) will answer as a starting point.

With the very early hatches, those arriving before March, we must expect a maximum of care. It is out of nature's season, and if we do things out of her usual time, we must make up by double vigilance. One thing, however, belongs very properly to early March. If the work has not been done before, look over the incubators carefully, making sure that they are in perfect order for beginning business when the time comes. Clear flues of all possible soot; put fresh wicks in all lamps, cleaning the inside of the lamps themselves in thorough fashion. If hot-water machines, test them to be sure there are no leaks in the pipes to cause vexatious delays at a time when every day counts for so much. Have everything perfectly clean and sanitary, and then you can await the time for beginning operations with a mind at rest.

How long can we save eggs for hatching with a prospect of a fair hatch? That depends. At this season, when the weather is cool, the eggs can be kept safely longer than in the hot weather. They should be turned daily, and kept in a uniform medium temperature. In the case of very choice eggs, it will pay to keep them a little longer for the purpose of utilizing all from special matings, even if the hatch is a little lessened. Three weeks is as long as it is wise to keep them, although eggs have been kept four weeks with moderate success. Since choice chicks are worth much more than those from common stock, there should be an attempt to utilize the early eggs from the valuable stock, if possible.

I can never forget my sensations when I had my first incubator hatch. I had trusted the precious white globes to the untried machine with fear and trembling. As dear old Aunt Sally said, "It seemed to be runnin' agin' Natur'!" Never, in all my life, did I study my Bible more carefully than I did the little book of instructions. I turned every egg by hand twice each day,

## HATCH ALL Incubators Will Hatch Your Eggs

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

## OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

marking them so I was sure that each one was lying exactly on its opposite side. I hardly dared allow myself a good night's rest, lest something should go wrong in the wooden box which held such possibilities.

When the temperature began to go up toward the end of the second week, and I had to keep turning the lamp flame lower and lower, I was worried enough at first, till I read something about "animal heat." Then it all flashed over me. Animal heat! That meant there was life within those eggs, life that would mean success and real, living chicks at the end of the appointed time. I walked on air, then watched over the brooding machine in my cellar with redoubled vigilance, if such a thing were possible.

Aunt Sally, the dear, honored hoary head in our family, was as excited as I was. To her it seemed something almost uncanny, and she felt almost as if I might be having dealings with a certain objectionable personage. On the eve of the twentieth day, when through the glass doors we could see that the eggs were pipping, she gazed, almost in awe. I did not go to bed till nearly midnight, and when I did sleep, it was to dream of chickens galore.

Early the next morning I hurried down to the incubator, only to find Aunt Sally there before me. She was fairly shaking with excitement. "Oh, look! look!" was all she could say. Drawing up a low box, I peeped in, and saw the glass of the nursery filled with little heads with bright eyes, seeming very comfortable and happy in the new, strange world. Looking above on the trays, there were little fellows making frantic efforts to free themselves from the detaining shells. Aunt Sally wanted me to open the door and help one poor baby who was lying apparently exhausted with the hampering walls still confining his limbs. But I had read that the door must not be opened; and although my heart ached for the wee morsel, I dared not endanger the lives of many others for his sake.

I had to go up stairs and get breakfast, for Ezra and the hands must get to the field early. In about half an hour Aunt Sally appeared, her face fairly radiant. "Oh, Sophie!" she exclaimed,

SHOEMAKER'S BOOK on

POULTRY

and Almanac for 1907 contains 220 pages, with many fine colored plates of fowls true to life. It tells all about chickens, their care, diseases and remedies. All about incubators and how to operate them. All about poultry houses and how to build them. It's really an encyclopedia of chickendom. You need it. Price only 15c. C.C. SHOEMAKER, Box 1215 FREEPORT, ILL.

GREIDER'S FINE CATALOG 1907

tells all about pure-bred poultry and describes 60 varieties. 10 beautiful natural color plates. Gives reasonable prices for stock and eggs; how to cure diseases, kill lice, make money. This valuable book only 10c. B. H. Greider, Rheims, Pa.

"that little chick got out all right, after all, and there ain't but mighty few eggs left that ain't either hatched out or

cracked. I guess your hatchin' machine is good for somethin' arter all."

It was funny, after breakfast, to see the men gather round that incubator, forgetting their haste to be in the field. The incubator soon grew to be an old story, as one hatch after another came off, but I can never forget the thrills and emotions of that first time.

Nebraska. Mrs. S. B. Titterington.

In the cold March days the eggs must be gathered frequently if desired for setting. A chilled egg is not likely to hatch, and even after it is spring by the calendar, we are apt to have pretty frosty weather. It is the careful attention to little things that brings success, and this is one of the "little-big" matters that means very much in the line of success or failure.

#### POULTRY PARAGRAPHS.

The ducks, too, begin their laying season in February. Ducks usually lay at night, and as a rule lay as many eggs as the average hen, but they confine their output to the months between

February 1st and September 1st. Early-hatched young ducks, however, very often begin laying about Christmas time or in January.

The geese generally begin laying this month. They have a very cute way of hiding their eggs, so carefully covering them up that one hardly suspects where they are. The writer confines the geese in a yard until they have laid.

Another theory that mated hens will become broody before unmated pullets has also proved incorrect. The past season an entire yard of unmated pullets became broody, while only one of the mated hens showed such signs.

Experiments, as well as chemical analysis, show conclusively that there is not enough lime for the formation of egg shells in the ordinary grain and green food as supplied to hens. It is necessary that crushed oyster shell be constantly within reach, so that the stock may help themselves at will.

Down in Maryland they use this bill of fare for fattening purpose: The last feed for one day is all corn, as much as they will eat; next day, boiled corn; third day, boiled buckwheat. Cornmeal mush, made as fine as possible, allowed to get cold, and then slightly warmed, is fed at noon. In the morning a little wheat is given. Green food is given daily, and clean fresh water and grit is always before them.

When the operator of an incubator has sufficiently mastered the condition of the air cell of an egg, he will be more successful in his hatches. When the air cell is too large, the machine needs moisture, when too small ventilation is the proper thing. Taking the measurement of an egg from the middle of the large end on the fifth day, it should measure about a quarter of an inch; tenth day, half inch; fifteenth day, five-eighths inch; nineteenth day, three-quarters inch.

#### POINTERS.

—Mr. W. J. David, of New Hampton, Iowa, can supply readers of The Homestead with Barred Plymouth Rock eggs at very low prices, as per advertisement which will be found on this page.

—Mrs. R. Van Der Wert, of Lacey, Iowa, can supply Homestead readers eggs from pure-bred Barred Plymouth Rocks for hatching purposes. Her advertisement appears on this page. Her prices will be right.

—Mr. C. J. Rose, of Ogden, Iowa, can supply readers of this paper with White Plymouth Rock eggs for hatching. They are from large-boned birds of the Fishel strain. Mr. Rose's advertisement will be found elsewhere in this issue.

—Mr. P. H. Thiel, of Renwick, Iowa, wants Homestead readers to write him for eggs from Single Comb Rhode Island Reds. They are unequalled for egg production, beauty or table use. See his advertisement on this page.

—Eggs from Single Comb White and Brown Leghorn chickens, each flock being kept on a separate farm, are quoted for sale by Mr. Geo. F. Blake, of Maquoketa, Iowa, in his advertisement that appears on this page of The Homestead.

—Mr. H. J. Anestad, of Slater, Iowa, is offering Barred Plymouth Rock eggs from pullets scoring 91 to 92½, and mated to cockerels scoring 91 to 92, for sale in his advertisement that appears on this page of The Homestead.

—Messrs. Aye Bros., of Blair, Neb., will be able to supply readers of The Homestead with 10,000 Barred Plymouth Rock eggs this season. They are from the Bradley Bros. and Judge Norval stock. See advertisement on this page.

—Mr. Roy Stacy, of Rochelle, Ill., can supply readers of this paper with Barred Plymouth Rock and White Wyandotte eggs from choice stock of both breeds. At the Chicago show Mr. Stacy made six entries and won first, second and third.

—Mr. F. G. Paul, of Laurel, Iowa, has some choice White Wyandotte cockerels and pullets which he is offering for sale in his advertisement that appears on this page. He also quotes prices on eggs which he will guarantee strictly fresh.

—Mrs. L. C. Reese, of Prescott, Iowa, is one of the best breeders of extra good Plymouth Rock chickens. She is now making a run on eggs and is making some special prices. Read her advertisement on page — and send her an order.

—Messrs. Aye Bros., of Blair, Neb., are offering Barred Plymouth Rock eggs of the Bradley and Judge Norval strains at \$1 per \$15 or \$4 per 100. This is one of Nebraska's good chicken farms and the boys will treat you right if you send them an order.

—Mr. Robert Holm, of Paton, Iowa, in sending change for advertisement found on this page, reports he is entirely sold out of Barred Plymouth Rock and Single Comb White Leghorn cockerels. He is now offering eggs for sale from these breeds.

—Mr. Burton J. Holt, of Pleasantville, Iowa, has an advertisement on this page in which he advertises eggs from fourteen of the leading varieties of poultry. His different breeding birds are very choice and from leading blood lines. He has some excellent bargains in eggs.

—Messrs. Slater Bros., of Monroe, Iowa, have been breeding Barred Plymouth Rocks exclusively for twenty-eight years. Their yards this year are headed by prize-winning cockerels. Their advertisement quoting

PAUL'S WHITE WYANDOTTES. THE KIND that lay well, weigh well, and win in the show room. Cockerels and pullets from one to five dollars each. Eggs, farm raised, 50c per sitting (13). Exhibition pen, \$1.50 per sitting. Eggs guaranteed strictly fresh. P. G. Paul, Laurel, Iowa

prices on eggs appears on this page of The Homestead.

—Mr. H. G. Padley, of Toledo, Iowa, quotes prices on Barred Plymouth Rock and Light Brahma chicken eggs in his advertisement that appears on page 15 of The Homestead.

—We call the attention of our readers to the new advertisement of Mr. George H. Lawshe, of Harlan, Iowa, who is offering Barred Plymouth Rock eggs for sale from stock of the Bradley Bros. strain.

—Mrs. Lem Wygic, of Clarksville, Iowa, can furnish Homestead readers with Light Brahma eggs, as per advertisement on page 15. She writes: "I have a nice flock of large, fine birds that have the range of the farm. I will fill all orders for eggs as promptly as possible."

—A change in the advertisement of Mr. J. M. Cameron, of Ottumwa, Iowa, offering Black Langshan eggs for sale, appears on page 15. Mr. Cameron advises us he has two good cockerels left which he will sell for \$2 each or the two for \$3. His hens and pullets are all sold.

—Plymouth Rock eggs from four grand pens are offered to Homestead readers by Mr. W. J. Applegate, of New Sharon, Iowa, in his advertisement on page 15. Mr. Applegate has been a breeder of Barred Plymouth Rocks for sixteen years and can please those who will favor him with an order.

—Mr. J. A. Penn, of Alta, Iowa, has a new advertisement on page 15 of The Homestead. Mr. Penn is now offering for sale twenty-five fine large Barred Plymouth Rock cockerels that he will dispose of cheap to close out. He is also quoting prices on Plymouth Rock eggs in the advertisement.

—Mrs. Ella Tharp, of Mt. Sterling, Iowa, has Rose Comb Brown Leghorn eggs for sale as per advertisement on page 15. Mrs. Tharp has been furnishing Homestead readers with these eggs for the past fifteen years. Her prices are named in the advertisement referred to. She also quotes prices on White Holland turkey eggs.

—Mr. E. E. Healy, of Bedford, Iowa, has for sale a few choice Barred Rock cockerels (no culls) that he is offering at a very low price. He has been raising Bradley Bros.' strain for a number of years. He also offers sixteen eggs for \$1; 100 for \$4. If in need of a good cockerel write him. Look up his advertisement on page 15.

—Mrs. E. C. Turner, of Griswold, Iowa, is offering eggs from White Plymouth Rocks in her advertisement found on page 15. Mrs. Turner breeds no other variety of chickens and she has one of the finest flocks of 200 pure White Plymouth Rocks. They have the run of the farm and therefore the eggs are sure to be fertile.

—In furnishing new copy for his advertisement found on this page of The Homestead, Mr. F. L. Morse, of Floyd, Iowa, writes: "I have some very fine, well-developed Orpington cockerels, both scored and unscored, that I will close out very reasonably. They are a splendid lot and I am anxious to get them off my hands."

—Mr. C. L. Cole, of Geneva, Iowa, who has an advertisement on page 15 of The Homestead, writes: "I will sell my last Mammoth Bronze turkey tom, weighing thirty pounds, for \$5; the balance of my Single Comb Brown Leghorn cockerels, at three for \$2 or six for \$3.50. These birds are nicely marked and more than worth the money."

—Mr. J. T. Prim, of New Providence, Iowa, in furnishing copy for his advertisement found on page 15, writes: "I still have five Mammoth Bronze turkey hens and one tom for sale on which I will make special prices. I have had fine trade this winter. I consider The Homestead a good advertising medium. In Barred Plymouth Rocks I have Gardner and Dunning strains."

—Mr. F. E. Wadsworth, of Alta, Iowa, is offering Barred Plymouth Rock cockerels and eggs for sale in his advertisement on page 15. He writes: "I have several high-scoring cockerels I will sell at half price for the next ten days to make room. Those in need of good cockerels will get their money's worth by sending at once, without writing first, as it is getting late in the season."

—Mr. O. H. Stilson, of Corwith, Iowa, has an advertisement offering eggs from Black Langshans on page 15. In furnishing copy, he writes: "I have the best lot of chickens in the state and can satisfy anyone on quality. I have been breeding Black Langshans for fifteen years with a view to reaching the top in quality. I have sold over sixty cockerels this spring and could have sold more if I had had them."

—Mrs. Mary Pierce, of Nevada, Iowa, is offering some very fine line bred Barred Plymouth Rock eggs for sale on page 15. She has eggs from three matings—a cockerel mating, a pullet mating and a field mating. Those in need of good eggs write her for prices. She also has a forty-pound yearling Mammoth Bronze tom, first-prize bird at Ames, Iowa, score 97, and a young tom for sale. Her prices will be right.

—In furnishing copy for his new advertisement on page 15 of The Homestead, Mr. Jasper Lacey, of Neoga, Ill., writes: "We still have twenty-five fine large Mammoth Bronze turkeys, well marked and fairly raised. They are of both sexes and are from our first prize winner at St. Louis and a grandson of the World's Fair first prize winner and from hens scoring from 95 to 97 points. We are pricing them very low to move them at once."

—Mrs. J. W. Bloxham, of Grundy Center, Iowa, writes: "I am nearly sold out of poultry, but have fifteen Silver Laced Wyandotte cockerels, also three White Wyandottes yet that I will sell at bargain prices if taken soon. I can also furnish eggs from Light Brahmas to those wanting them. I have always had splendid results from my advertisement in your paper and have never found it necessary to advertise in any other." See advertisement on page 15.

—Messrs. J. L. Slick & Son, of Lanark, Ill., have been breeding Barred Plymouth Rock chickens for twenty years and many of our readers have secured their foundation stock from this firm. They are pricing their eggs from high-scoring birds at \$1.50 per fifteen and any reader of The Homestead who wishes to secure a setting of eggs that will prove satisfactory in every way, will do well

to write Messrs. Slick & Son as above, kindly mentioning The Homestead.

—Mr. M. T. McEvoy, of Emmetsburg, Iowa, is quoting prices on Rose Comb White Leghorn eggs in his advertisement on page 15.

—Messrs. Henry Schlatter & Sons, of Lawler, Iowa, in their advertisement that appears on page 15 are quoting prices on eggs from their Ringlet strain of Barred Plymouth Rocks and their Missouri King and Giant strains of Mammoth Bronze turkeys. They state that their Barred Rocks have been more thoroughly selected this season than ever and that they have size, heavy bone and fancy markings. Their Mammoth Bronze turkeys are a grand flock and have won many prizes in the show rings this season.

—Mr. and Mrs. S. M. Compton, of Newton, Iowa, breeders of White Plymouth Rocks, White Holland turkeys, White Pekin ducks, White Embden geese and White guineas, writing in regard to their advertisement which they have recently had in The Homestead, say: "We are about sold out of stock. We have had a splendid trade this winter and have used no other paper than The Homestead to advertise our stock. We have our flocks and pens all mated and will try to have something better than ever to offer Homestead readers next winter."

—Mrs. H. L. Jones, of Montezuma, Iowa, is offering Barred Plymouth Rock and Single Comb Brown Leghorn eggs for sale in her advertisement on page 15. She writes: "My Barred Rocks are of the Thompson and Russell strain. They are large boned and well barred in all sections. The Single Comb Brown Leghorns are of the Bright strain. I have been breeding for laying qualities as well as high-scoring points, having won five firsts and three seconds on birds that scored from 92 to 94. I can fill orders promptly and will guarantee satisfaction."

—Mr. O. J. Viland, Slater, Iowa, advertises his famous Eclipse Barred Rocks on page 15. He writes: "The pens I have mated this year from which I will fill egg orders are composed of a lot of grand birds. The male bird is a son of the first hen at Chicago and is the finest pullet breeder I have seen. The females are all well barred to the skin, clear, yellow beaks and legs, bay eyes and typical Rock shape. They make an excellent mating and I have taken special care to insure fertility." If you are looking for something very fine you should patronize Mr. Viland.

—Mr. Johnson Allen, of Earlville, Iowa, is offering eggs for sale from standard-bred White Wyandottes in his advertisement that appears on page 15. In furnishing copy Mr. Allen writes: "I have a fine lot of birds and with the free range that they have the eggs should prove very fertile. I received letters from patrons last year stating every egg they received from me, unbroken, had hatched a live chicken. This appears to me to be unusual, as some had been shipped quite a distance. My birds are good shape, color and size and I think should prove satisfactory to all purchasers of eggs."

**THE GREATEST OFFER YET.**

To be successful every incubator user needs a good brooder. When the chicks come off you should have the brooder at hand and be prepared to take good care of the chicks or you may lose most of them. Realizing that the brooder is as necessary to success as the incubator, the Wisconsin Incubator Company, Box 71, Racine, Wis., have perfected an incubator and brooder that they can sell for \$10 for the two machines, when ordered at the same time. The immense business they are doing this season is an indication that poultry raisers appreciate this remarkable offer, and know a good thing when they see it. As the hatching season is almost upon us, you should lose no time in writing to the Wisconsin Incubator Company for their catalog describing these machines. See advertisement on page 15.

**UNCLE SAM AND INCUBATORS.**

There are a great many Uncle Sams in the poultry business and probably a great many who have incubators. If every Uncle Sam was as careful to inform himself on the merits of the incubator as the Uncle Sam we have in mind, we think there would be less complaint about poor hatches and faulty incubators. One of the government experts on poultry breeding and artificial incubation has made exhaustive tests of this make of incubator and his full report is embodied in the Farmers' Bulletin No. 236. This is for free distribution and a copy may be secured by writing to the Department of Agriculture, Washington, D. C. In this bulletin one of the best poultry experts in the country says the Sure Hatch incubator hatched the surest of the lot. That certainly sounds pretty good to the makers of the "Sure Hatch." The makers of this incubator have issued a large book telling all about their machines besides giving practical information on raising poultry for profit. A copy of the "Sure Hatch" book may be had by addressing the Sure Hatch Incubator Company, of Fremont, Neb., or Indianapolis, Ind. Kindly refer to page 14 for their advertisement and mention this paper when you write.

**A MODEL POULTRY FARM.**

Few people realize the great advance that is being made in poultry culture as a science. Poultry enthusiasts—hen men—are constantly devoting time and money to the improvement of their favorite breeds in a way which brings most amazing and gratifying results. Breeds whose average performance was once too little for great profit are now so marvelously improved by the skill of modern poultry fanciers that they take first rank as money makers. No establishment has won more remarkable success in breeding and developing fine poultry than that of Mr. B. H. Greider, of Rheems, Pa. Mr. Greider gives to the "new poultry culture" a long and successful experience as breeder and fancier. His mammoth plant is constantly being improved and enlarged in order that his host of patrons may get only the strongest and most prolific strains of prize-winning stock. Anyone interested in poultry, either as a pastime or business, should see this model poultry farm. At any rate let Mr. Greider send you his handsome catalog. It gives a world of information about different breeds that no lover of poultry can afford to miss. Drop a line to Mr. B. H. Greider, Rheems, Pa., enclosing ten cents, and this valuable book will be sent you. See advertisement on page 14.

POULTRY.

\$2.00 per bottle.

MACK BROS. & CO., Spencer, Ia.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### LAMENESS.

I have a sorrel gelding horse that has been in poor condition since November. He seems to be sore in front legs or shoulder. I had his teeth filed a month ago and he don't get any fatter nor eat well. Is fed on corn and prairie hay. I work him. Is shod all around. Don't work him hard. He is ten years old. Can you tell me what to do for him?

On general principles give this horse the treatment for worms so often prescribed here and after clipping hair from hoof-heads of fore feet, blister well with cerate of cantharides, and if this does good, repeat the blister in three or four weeks. It is possible that he has worms and has been foundered.

#### BLADDER WEAKNESS.

I have a fine thoroughbred Duroc Jersey gilt seven and one-half months old. There has been a continual drip of urine from her for about two months. I was told that kidney worms was the trouble. Copperas was prescribed and I have given her about three teaspoonfuls. Seems like the dripping is worse today than ever. Will you please give me the cause and the remedy?

It is improbable that kidney worms have anything to do with the trouble, and a great deal more likely that there is a partial paralysis of the neck of the bladder. Chances of recovery are poor, but treatment would consist of giving nux vomica (fluid extract) in increasing doses, commencing with three drops twice daily and increasing a drop or so daily until muscles are seen to twitch involuntarily, at which stage go back to first dose and repeat.

#### WORMS.

I have a horse I bought a year ago which has worms of a pinkish color about the size of a common watch key one and one-half inches long. I have tried tobacco, jimsonweed and two different kinds of formulas of a veterinary. Have used syringes and soap suds, but cannot effect a permanent cure. Would it be advisable to use turpentine? If so, how? Can you give me a formula that will effect a permanent cure?

As horses constantly reinfect themselves with worms when fed hay from low, wet ground or when pastured in such places, a permanent cure cannot be guaranteed. After starving horse for eighteen hours, give him two ounces of turpentine shaken up in a pint of raw linseed oil. In feed night and morning for a week, mix one dram of dried sulphate of iron; then skip ten days and repeat.

#### SCOURS.

I have a steer I judge about eighteen or twenty months old that has been scouring for five or six weeks past. Have been feeding alfalfa hay and clover and timothy mixed and of late some fodder with corn in it mornings. When feeding hay alone I gave fourteen head one-half bushel of shelled corn per day. I have now taken the steer away from the bunch and fastened him in a double stall in the barn. He droops his ears and is getting very poor. He eats one-half gallon shelled corn morning and evening and a very little prairie hay. Does not drink much water. Manure smells badly. What can I do for him?

You did the right thing in isolating the steer, as he may have tuberculosis. This could be quickly ascertained by testing with tuberculin. Stop feeding corn and substitute whole oats and prairie hay. Unless he has tuberculosis we would treat by giving him a pint and a half of raw linseed oil containing half an ounce of laudanum, one ounce of turpentine and twenty drops of pure beechwood creosote, and follow with half the dose next day. After that give twice daily in feed a tablespoonful of a mixture of equal parts powdered wood charcoal, hyposulphite of soda and ground ginger root.

#### SWELLINGS.

Can you tell me the cause of my yearling heifer's death? The first intimation I had of anything wrong was when I found her in the pasture with bunches on her head in different places; also one large swelling in the flank running up on the sides, girdle fashion, which was hard. The heifer ate fairly well and did not have any cough, but discharged a little from the nose. She was in the pasture up to the time I put her up for care and treatment. The day before she died she was taken with scours and died in great pain.

You should have stated how long the heifer was sick before death ensued. If the attack was sudden and she died inside of two or three days we would suspect either anthrax, blackleg or haemorrhagic septicemia. In the first disease the swellings do not crackle when handled and blood flows from natural

## Chief Cause of Hog Losses

This exposure shows stomach and intestines taken from a twenty-five pound shoat, full of intestinal worms.

This shows liver of same shoat, with worm in Bile Bladder, X mark showing location. The duct through which worm has come was split with a knife to show the worm.

GENTLEMEN:—I received the Iowa Worm Powder and tried it, and it is surely a wonderful medicine. Had I gotten some of it three months sooner I would have saved lots of my shoats. They were dying rapidly, but since feeding your Worm Powder I have not lost any. They passed lots of worms. I lost over 150 shoats before I heard of this remedy. Everybody told me they had the cholera and I thought so, too, until I cut a shoat open after reading your advertisement in paper. I will now be able to save 100 head of my shoats. Enclosed find \$5.00 for some more Iowa Worm Powder.

Yours truly,

JOHN MANING.

**FREE!** To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing. Address Dept. A.

# Great Reduction Cream Separators

Low Prices  
Strictly  
High  
Grade

We have now put the prices of Cream Separators down to the lowest point ever reached for high grade machines. We are enabled to do this at this time by reason of the very large demand and great volume of sales, and because of improved machinery, factory short cuts, modern methods and our usual liberal policy of giving our patrons all the benefits possible on everything they buy of us. This is done for your benefit, and we want YOU to consider this as a personal reduction made to induce you to put off no longer the making of all the profit you can from your cows, to settle the matter once for all in your mind that right now and here is the greatest opportunity ever offered you to secure a high grade, guaranteed Cream Separator at a great cash saving in price, for the very least money a cream separator of this high quality was ever put on the market.

Reduced Prices:

Capacity per hour.		
Hawthorne No. 1, 250 lbs. milk	\$39.50	
Hawthorne No. 2, 350 " "	\$42.50	
Hawthorne No. 3, 500 " "	\$45.50	
Golden Harvest No. 4, 350 " "	\$41.50	
Golden Harvest No. 5, 500 " "	\$44.50	
Golden Harvest No. 6, 650 " "	\$48.00	

We also sell the Little Marvel, capacity 175 lbs. milk, for \$27.00.

These prices are obtainable only of Montgomery Ward & Co.

They are spot cash prices, and every one sold at these prices is fully guaranteed to give perfect satisfaction in every way. If after thirty days' use you find any cause for complaint, write us fully all about it. If we fail to satisfy you in every way we will write you where to ship it, and will refund every dollar you paid for the machine, including your freight. Under this positive guarantee you are safe in trusting your order with us. You will find our Cream Separators to be the closest of skimmers, easy to handle, easy to clean. World's Fair winners and money makers for you right from the start.

A Montgomery Ward & Co. Cream Separator adds the profit of one cow to every four cows in your herd.

And at our reduced prices any of our machines will soon pay for itself and give you a regular, steady profit well worth your while to consider. Do either one of two things today. Either send your order right in to us for a Cream Separator, or send to us for our Special Cream Separator Catalogue.

WE ARE READY to assist you to make all the profit there is in your cows. We make it easy for you, by our greatly reduced prices. Take advantage of this reduction at once. Order your Separator sent you today.

### WITH THE EDITOR.

"We're invited to spend Sunday with the Eliots," said Tom Little the other evening after dinner.

The Littles occupied a flat away up near the roof in a big apartment house in the city while their friends lived in a pretty place in a suburban town some miles out in the country. The two families were old time acquaintances, the men office companions and the women relatives. One would have expected Mrs. Little to smile upon hearing her husband's words, but a frown darkened her pretty face and she said, "I don't want to go out there one little bit, Tom, and I don't believe you do either. It was simply horrid last time. I remember we talked about it as we came home—you said that if people had to 'fuss,' they might at least have the grace to do it in private."

Tom Little made no reply, but as he was smoking his after-dinner pipe his silence did not discourage his wife and she continued:

"If there's one thing more disagreeable than another it is to be a guest in a house where husband and wife pick and nag at each other. I remember that last day it was first one and then the other, when it wasn't the two together. It began almost as soon as we arrived, at lunch. It wasn't nice to have things get cold, of course, but it was far worse to hear Marion's icy voice remarking that it was one of Harry's little ways to keep the meals waiting, and it was frightful to see the look Harry gave her. It gave me cold shivers. It was all over in a moment, of course, but before the atmosphere was well cleared it clouded again. You remember how little Mary came in screaming and her father said it was ridiculous to insist upon bathing the child's hands if it made her cross like that. Now I wouldn't pretend to say how they should train that child, but I don't think the lunch table is the place for acrimonious discussions as to the best methods of child training. And the worst of all was the feeling they gave me that they were at outs, not about one thing, but about everything. I suppose most couples have their little differences now and then, but Harry and Marion seem to be perpetually fussing and not to care whether others know or not. That, I think, is perfectly dreadful. If people have bad tempers and are unhappy in each other, they might at least spare their friends. I'm surprised at Marion, for she always prided herself upon her good breeding. I'm afraid she must be awfully unhappy to forget herself as she does lately, but while I'm sorry for them, I can't excuse them inviting us out there and then making us uncomfortable."

There was a pause and then removing his pipe, Tom asked, "Well, what are we to do about the invitation?"

"Oh, we must go, I suppose, if not this time then the next, but I wish we could get out of it."

"Say, Pet"—Tom took so long to complete his sentence that Mollie rose and took possession of her favorite seat upon his knee, saying, as she kissed him, "Well, what comes next?"—"Let us go and take lessons while there in what not to do. I contradicted you rather sharply at the Peters' the other night. I remember, and you snapped me up rather short at father's last week."

### HOME AND HOMEMAKING.

#### LITTLE HELPS BY THE WAY.

That which we have we prize not to the worth While we enjoy it; but being lack'd and lost,

Why, then, we rack the value, then we find The virtue that possession would not show us.

—Shakespeare.

There's always love that's caring, And shielding and forbearing, Dear woman's love to hold us close and keep our hearts in thrall; There's home to share together, In calm and stormy weather, And while the heartflame burns it is a good world after all.

A good deal of the world's happiness depends upon how our everyday lives are lived. To quote Lillian Whiting, in her "World Beautiful": "Each one of us owes it to ourselves, to our friends, to society in general, to live up to our best spiritual possibilities,

# Amatite Should cover every FARM BUILDING

If you are looking for a substantial and satisfactory ready roofing you will find that Amatite answers your requirements better than any other.

You will also find that it costs *considerably less* than most of its competitors. Other roofings add to their cost every year or two, because *they require constant painting*. Amatite costs *nothing* to keep up. It has a *real mineral surface* on the outer side, which

takes the place of the usual waterproofing coat of paint. You do not have to examine your Amatite roofs every year for leaks, or paint them after a hard winter. Amatite will protect your buildings thoroughly and perfectly year after year, winter and summer, without any attention or bother after it is once laid.

If you have roofings now on any of your buildings that require painting every year to keep them in good repair, the cheapest thing to do is to cover them over completely with new roofs of Amatite as soon as they begin to leak. Amatite is easy to lay and costs so little that it is better economy to put it on and be free from bother, than to worry along with the kind of roof that requires constant attention.

**FREE SAMPLE** Let us send you at once a **SAMPLE OF AMATITE** and a Booklet of information about it. We want you to see how much better it is than the kind that has to be painted.

Address nearest office of the  
**BARRETT MANUFACTURING CO.**  
New York, Chicago, Philadelphia, Cleveland, Cincinnati, Boston, Minneapolis, Kansas City, St. Louis, New Orleans, Allegheny.

not only now and then, once or twice a year, or once in a season, but every day and hour."

Our todays and yesterdays  
Are the blocks with which we build.

### THE LIMIT.

Pat—What he yer charge for a funeral notice in yer paper?

Editor—Fifty cents an inch.

Pat—Good heavens! An' me poor brother was six feet high.

### MEN DON'T CHANGE.

Dad (severely)—And look here, Ethel, you mustn't encourage that young man to stay so late every night. It's disgraceful. What does your mother say about it?

Ethel—She says men haven't altered a bit, dad.

### VERILY, HOW?

A mistress said to her maid one day, "You must absolutely stop that perfectly awful habit, Sarah, of always trying to have the last word."

"But how am I to know when you have nothing more to say?" answered Sarah.

### KEEPING YOUNG.

The following story of how one woman kept young is told in an exchange: She was as fresh in color as a girl, her hair without a touch of gray, her face without a wrinkle, and she felt, I am sure, as she certainly looked, far younger than I. So I asked her, finally:

"How do you keep so fresh and young, with all your great family?"

She looked at me a moment and then laughed her merry little laugh. "You see," she said, "I haf my von little naps."

"Your what?" I asked, puzzled to understand her.

"My von little naps," she repeated.

"But, tell me, I do not understand," I said.

"Vy so," she said in her pretty broken English, "about twelf o'clock, or maybe von or maybe two, as you like it better, I takes de baby, whichever iss de baby, and I goes to de room and takes my naps."

"But if the baby won't sleep at that time?" I objected.

She shrugged her shoulders, "Oh, he sleep all right."

"But there are so many things to do while the baby sleeps," I went on.

"I vil haf my naps," was her smiling answer.

"But," I urged, "suppose something happens to the other children while you and the baby are asleep?"

Then she did stare at me.

"There could nothing happen to dose children vorse dan I not get my von little naps," she said, indignantly.

I gave it up. This closed the argument.

And the writer hands on the advice to all other tired mothers to try the little naps, even if it upsets to a degree methodical housekeeping. Method is good, but, if it comes to be a whip which makes rest impossible, it should be dropped.

### HELPFUL SUGGESTIONS.

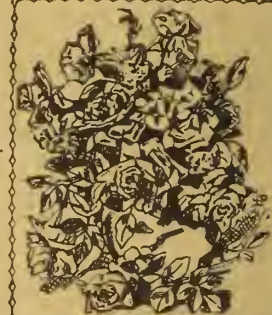

When you are frying eggs, put a sprinkling of flour in the pan. The egg will not sputter and will brown better.

If you will set the dishpan with its ears at front and back, instead of at the sides, as you stand facing it, there will be fewer nicked teacups.

If the kettle of stew, beans, preserves, or whatever you may be cooking, becomes scorched, set it off immediately into a pan of cold water and the flavor will not be spoiled, as would surely be the case were you to empty it at once, in the usual way.

When your scissors are dull and you haven't any way of getting them sharpened, try this: Hold in the left hand a common

## FLOWERS GIVEN AWAY

This handsome picture of a most magnificent bouquet of red and yellow roses, with 14-in. gold border, given absolutely free with every three months' trial subscription to **The Mother's Magazine** at 10 cents. The Mother's Magazine is the handsomest large illustrated home and family magazine published artistically illustrated, colored covers and 40 pages of reading every month. The picture is 16 x 20 inches in size and is reproduced in many beautiful colors. It will add much to any dining room or parlor. Ready for the wall when received. Send 10 cents to-day (stamps or silver) for the magazine three months and ask for picture number 655. Both will be sent you at once. Money back if you are not delighted.

Address, **THE MOTHER'S MAGAZINE, Elgin, Ill.**

Send your HIDES to

## BAYER TANNING CO.

**Des Moines, Iowa.**

sewing needle and cut on it with the scissors, allowing it to slip along the blades a dozen or more times. You will be pleased and surprised at the result of this very simple operation.

### CANDIED ORANGE PEEL FOR PUDDINGS AND CAKES.

Cut the peel in strips, soak in salt water twenty-four hours. Put on to boil in cold water, change the water once and boil until tender. To the peel of six oranges, add one pound of sugar, and a very little water. Boil until the peel has absorbed it all. Spread on platters, sprinkle with dry sugar, and stir several times as it dries.

### OYSTER PATTIES.

Scald as many oysters as you require (allowing two large ones for each patty) in their own liquor. Cut each in four pieces and strain the liquor. Put two tablespoonfuls of butter and two of flour into a thick saucepan; stir them together over the fire till the flour smells cooked, and then pour half a pint of oyster liquor and half a pint of milk into the flour and butter. Stir till it is a thick, smooth sauce. Put the oysters into it and let them boil once. Beat the yolks of two eggs. Remove the oysters for one minute from the fire, then stir the eggs into them till the sauce looks like thick cus-

tard. See that this mixture is hot before filling the shells. Bake shells of rich puff paste in patty tins and also small rounds for covers; heat the shells and fill with oysters, put on the covers and set in the oven for five minutes. They should be served immediately.

#### AMONG OURSELVES.

Sometimes I hesitate as to which topic should have first place on the program. This week I have decided to give it to the discussion of Sunday baseball, and as the subject is one which is of special interest to men we shall hear men first. Mr. H. L. Kelley will be followed by Double Star:

I am very much interested in those boys who wish to go to ball games on Sunday instead of to church. They are doubtless good-hearted youngsters, but as father and mother "have to consider Sunday as their day of rest" why the boys have to consider it as their day of recreation, don't they? Boys must have recreation and if they can get more real joy and refreshment out of a Sunday ball game than any other way, why is it any worse than to rest by staying at home and having "comers and goers?" Not that I am for Sunday ball games, but I believe in fair play and—in boys. I have several of my own and an interest in all the neighbors' boys. But say, now, father and mother, are you quite sure you wouldn't

My lamp-chimneys sometimes get broken, but seldom or never break. There is a great difference.

My Index is useful to every one who owns a lamp, and it is free.

get as much rest by going to church as you do by staying at home? I am not one of those who are good because they love to be and just can't help it. Hardly a Sunday goes by that I don't long to stay at home and take it easy, but I never come home from church without feeling how good it was to be there and how glad I am that I went. Someway we get so absorbed in the work and the cares of the week-day life that we need to get away from it and get our minds on something else to regain our equilibrium and it is in church that we learn that "man does not live by bread alone, but by every word that proceedeth out of the mouth of God." Then we can look on our cares, our disappointments and failures in things material and say, "It doesn't matter so much after all; God's in His heaven, all's right with the world." Now for the boys. Tell them kindly that you do not approve of Sunday games and give them the reason. Boys like to know why. If necessary give them a little more time for play week days. Tell them you believe it your duty to attend church and ask them to help you plan the work so that you can go. Don't let them drift away. Cultivate their friendship by showing an interest in their boyish schemes. Keep hold of them; they are worth working for.

In your "Among Ourselves" I notice Mrs. Custer County and Mrs. Massey object to boys collecting for a game of base ball on the Sabbath, as Mrs. Custer County says it is usually a collection of toughs. I differ from her on this point especially. I have been manager of a ball team, composed of farmer boys, and at a game the crowd consisted of farmers. Boys labor through the week and what harm is there done if they enjoy themselves in a friendly game of ball on Sunday, when they haven't the time to play on week days? It gives a boy something to think about during the rest of the week besides work. I say a boy who enjoys himself at a game of base ball on Sunday may not be the good story book boy, but he can at least be a good, honest and Christian young man, so let the boys play the national game, by all means, and they will take more interest in their work, besides feeling contented in every way. Sooner let them go and play ball than stay at home and read ten-cent novels.

And now Mrs. Kiowa County will give Mrs. Custer County her views upon the matter:

Mrs. Custer County does not want her boys to go to base ball games on Sunday. Neither would I. She wants them to go to church. Most assuredly they ought to go to Sunday school and church. She says, "Do not ask me to take them, for I cannot, after doing for a big family and lots of company." Now, of course she cannot if she must do all the work alone. But, my sister, let me tell you I was raised in a family of seven children and my father and mother always took us to Sunday school and preaching on Sunday morning, sometimes driving quite a long distance to get there. On Sunday morning my parents would say, "We will all do our work and get to Sunday school on time." Each one had a part, and "many hands made light work." And mother and father had no more to do than the rest. My husband was reared in a family of eight children and his parents took the children to church; all the children helped get the work done so they could go. In our own family of three children—two daughters and a boy who makes his home with us—each one helps on Sunday, as well as other mornings, even our five-year-old girlie, and we never think of being absent if all are well. I will speak plainly, for you ask plain advice. I do not see how you can expect your sons or your daughters to attend church regularly, while you and father say you must have Sunday for a day of rest. Were I to predict for your family I should say none of your boys will be church goers in after life. You are not setting them such an example. Let the children all realize that father and mother are not made of iron; that by all helping bear the burden no one need stay at home to let the rest go. I have been a Sunday school teacher for nearly fifteen years and the great trouble in all schools seems to be that the parents will not bring the children and after while they find to their sorrow that the children will not go at all. No, sister, never give up to letting the boys go to Sunday ball games. But show them the better way of the whole family going to church and, mark my word, you will be a happy family.

We rarely have three finer talks consecutively than these. I commend the arguments adduced to the very careful consideration of the circle. Each speaker makes points worth noting; I would draw attention to three. Young people need healthful sport, everyone needs to get away from the material and into touch with the spiritual things of life. With children the great teacher is practice; it is not what the parents advise, but what the parents do which the children heed.

"One of the Boys" has something to say about Sunday baseball, and we should like to give him the privilege of the floor, but he must first lift his mask. No one but myself need know his identity, but it is a rule that no one address this circle who is unwilling to trust the chairman of the circle with name and address.

The friends sometimes come to me asking for help in the matter of finding a household helper upon whom they could depend for companionship as well as assistance; one who would stay with them and gradually become a member of the family. I wonder if "A Homeseeker" and such might not confer with mutual benefit:

In looking over some back numbers of our paper I came across Mrs. Dean's letter. I would like so much to shake hands with her and speak the kind words she misses so

## A Shady Transaction

If anybody sold you some lumber and if upon careful examination you discovered that it was really not solid timber but merely short pieces spliced together you would call it a shady transaction. That is about the kind of a proposition you are up against when you buy cut stay fence.

It's really not a first-class, full strength product. About half of its strength is wasted—sacrificed to convenience and speed in manufacture. Our stay wire is NEVER cut. It runs continuously up and down across the fence for many rods without an end, thus preserving and utilizing ALL the strength and service there is in the wire.

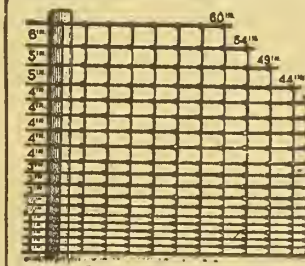

**30 Days Approval.** Let us prove to you that Advance Fence is the best made fence on earth. We offer to ship you all you need on 30 days approval. We want you to examine it carefully and compare its construction with other fences. You may stretch up a part or all of it and turn your stock against it. In fact give it any kind of a test you wish.

Then we will let you be the judge—absolutely. If you do not like it send it back and it won't cost you a cent as we will pay freight both ways and refund to you every cent you paid. We know that Advance Fence will please you or we would not dare make this liberal offer.

**We Prepay Freight** and guarantee safe delivery of shipment. You take no risk whatever. Write for our Free Fence Book and Prices.

**Advance Fence Co.,**  
34 Old St., Peoria, Ill.

## Cancer Cured at Home

I have so perfected my **Mild Combination Treatment** that patients may use it at their home with as good results as though it were applied at my offices. I will gladly furnish to every sufferer positive and indisputable proofs that my treatment does cure Cancer. I will furnish ample evidence of my integrity, honesty and financial and professional ability. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—write for my book, "Cancer and Its Cure." It will cost you nothing and will tell you how you can be cured at home. Address,

**DR. O. A. JOHNSON,** SUITE 371, 1233 GRAND AVE. Kansas City, Mo.

Have you a friend suffering from Cancer? Do them a favor they'll never forget by sending them this ad

often in her work. I am quite similarly situated and know how to sympathize with all such, but, dear, sister, if the kind word is not spoken do not be cast down or think your employer heartless. Oftentimes it is only thoughtlessness. They may not realize how kindness is appreciated by those less fortunate than themselves. Being somewhat past middle age and alone and recently thrust upon the world by the loss of property, I have been trying to make the best of it. For the first time in my life I have no one to lean on and have done pretty well in leaning on myself. I suspect God saw that I was too much of a vine and it was better He would teach me to be an oak. If so, I am trying to learn the lesson well, looking on the bright side of life as I journey through it. Truly one feels lonely at times in this big world without something to anchor to. When I have felt thus I turn my mental eyes within and find company and comfort there which is an anchor sure and steadfast. "The kingdom of God is within you," blessed assurance, wonderful comfort. While introspective, I do not feel like a pilgrim and a stranger, for I have the sweet companionship of the King of Kings. I have found some roses, as well as thorns, in the way as I began my self-supporting efforts. One of my thorns is my employer's carelessness in keeping the contract with me, also in falsifying. I am sorry to say that some do not consider breaking a contract and lying to their hired help is anything to their discredit. I love to work and find much comfort in it, but I am now longing for that material haven called home, and hope some kind soul who needs companionship and a helper is in a position to offer such. I am weary of changing about and would deeply appreciate a permanent and pleasant home. I am afflicted with partial deafness, but that can be overcome by the use of an apparatus that I am intending to get as soon as possible. It is not a trumpet. I would prefer to locate in Kansas or Missouri, but if the niche God intends me to fill the remainder of my time is located elsewhere I shall endeavor to be content, knowing "He doeth all things well." I have learned several useful lessons since I have been touching elbows with the world. In all the vicissitudes of life there are experiences that will benefit us if we look on the right side of them. Sister Dean, and others, let us be diligent in our work, persistent in effort, having faith in God and ourselves, and the road to the goal will be brighter.

It seems too bad that when so many are seeking just what "A Homeseeker" has to offer that she should not bless and find blessing at the same time. I will gladly lend my services to this end. The helper in my own home is rather deaf, but I do not find her affliction at

## The Iowa Gate - FOR THE FARM -

By sliding this ring back the largest hogs may pass under

**AND** have the run of two lots. Or raise your gate to drive hogs through, then your larger stock cannot get out. **RAISING THE GATE** is simple enough but very handy your gate swings on uneven ground or when the outer end drags. **IOWA** gates will raise up for winter use—are not bothered by wind, rot, or fire. Are easy for women to handle but strong enough for any stock.

**CHEAPER THAN WOODEN GATES** and will outlast a dozen. Write today for our circular.

**IOWA GATE CO.,** 9TH ST. CEDAR FALLS, IOWA

all the inconvenience I expected, so hope Homeseeker's deafness will not be considered an insuperable objection.

Let me say thank you to the friends who are rallying to my call for book talks, and let me present Mrs. Lawrence, to whom books and a taste for reading have been a daily joy this winter, when, because of an accident, she has been shut in:

What a delightful privilege to own a library ticket! What a feast of good reading for winter evenings is included therein. In our home we have just finished reading a good old book, "The Opening of a Chestnut Bur," by E. P. Roe. This story was not new to the mater, but was chosen because of its charm in being alike interesting to the boy of twelve and the young daughters in the household, as well as the older members. In the simple story natural human life is beautifully portrayed. A young man, morbid and broken both in spirit and in health, finds himself after years of struggle in a large city in the quiet home of his childhood. Par-

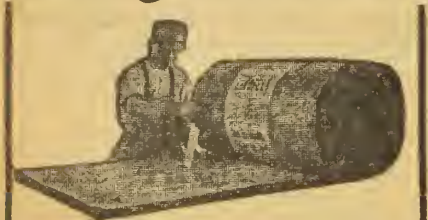

ents are long since gone, but a very dear friend of the young man's father owns the place and gives our hero a warm welcome. The beautiful horse life of this family stirs even his sluggish conscience, and though their religion and faith is never thrust upon him, yet there is an influence, an undercurrent that he cannot resist. The daughter in this home is a very lovely character and we, like our hero, must fall in love with her. Altogether it is a book worth your while. Of the newer fiction we would suggest "Richard Carvel" and "The Crisis," both by Winston Churchill. They deal in turn with the Revolution and Civil War of our country. One understands the conditions of our country better at that time after reading these historical novels.

Mrs. Lawrence's chat about "The Opening of a Chestnut Bar" recalls an incident of my early girlhood. I used to read this story aloud to a woman who had much work and few pleasures. She had no taste for literature, but she loved a good story and used to look forward all week to the coming Saturday morning when she knew that my coming could be counted upon rain or shine.

General discussion of the advisability, or otherwise, of marriage where the contracting parties are far apart in age is closed, but we shall hear Hayseed

## Going to Build?

If you are planning to build have a care in the selection of materials. Don't let price get the better of quality.

## LINOFELT

will cost you a little more than building paper but it will keep your house warm and comfortable and save about a third on your fuel bills. It's a great deal cheaper to build a warm house once than heat a cold one all the time.

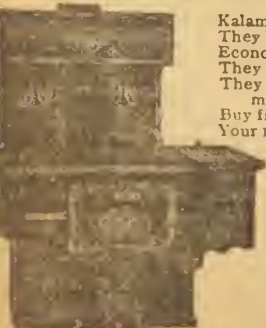

If you are planning to build this year let us send you a sample of Linofelt, together with reports of scientific tests of its efficiency.

Linofelt is made of a degummed flax fibre, stitched between two sheets of rosin-sized building paper, and is absolutely the best non-conductor of heat and cold known. Actual test has proven it to resist the passage of heat 44% more than the best building paper.

Write for booklet and sample of Linofelt. Just the thing for Barns and Poultry Houses.

**Union Fibre Company**  
16 Harvester Ave., Winona Minn.

## "A Kalamazoo Direct to You"

Kalamazoo are fuel savers.—  
They last a lifetime—  
Economical in all respects—  
They are low in price and high in quality.—  
They are easily operated and quickly set up and made ready for business.—  
Buy from the actual manufacturer.—  
Your money returned if everything is not exactly as represented.—  
You keep in your own pocket the dealers' and jobbers' profits when you buy a Kalamazoo.

### WE PAY THE FREIGHT.

We want to prove to you that you cannot buy a better stove or range than the Kalamazoo, at any price.

We want to show you how and why you save from 20% to 40% in buying direct from our factory at factory prices.

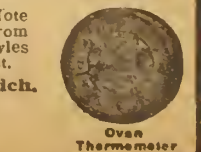

If you buy \$5, or \$10, or \$40, worth saving

For All Kinds of Fuel.

Oven  
Thermometer

on a point connected with it which was suggested a few weeks back:

A young girl might marry an old man because he has some money (which turns the most of our heads to a certain extent) with the thought that when she became his wife she would invest it to suit herself. Then if "hubby" don't turn it over quick she would dub him a chronic crank and ask for a remedy. If the wife loves the husband as she should, I don't think she would be asking the public for a remedy for his crankiness. She would approach him with love and kindly talk the matter over with him. If a man isn't something out of the ordinary he will likely listen to you, but be reasonable in your demands. We all have our faults and they must be overlooked, especially between husband and wife. We can see others' faults so much easier than our own. Now, I am not upholding the "old man" nor anybody else, but I think where both parties try to do what is right and do not expect too much of the other, that married life can be a success.

A few remarks by The Old One along this line are marked by good common sense:

So much has been said about unsuitable marriages I would like to say a word. I think the discontent arises not from disparity of ages, but from want of love. I know of as many that disagree who are about one age as those whose ages differ. One scarcely ever meets two who are of one mind, but if we truly love the one man if we can't bring him to our way of thinking we must let him have his way because we love him so. I do sympathize with June Bug and Aunt Violet, also their husbands. Where one has married for money or position one finds out alas, too late, one has sold one's birthright for a mess of pottage.

In this discussion much has been said about marrying for love. Now for the general good I propose that we have some little talks about love. What is love? What are its elements? How is it to be recognized? How distinguished from mere transitory liking?

Mrs. A. H. is waiting to make a request:

May I come to ask how long to boil and how to finish up a cow's horns for an ornament on the wall, in which to screw hooks to hang scissors and other small articles upon. I remember seeing something in this paper some years ago about this, and I ask of those who know how to do it to please let me know through our Home Department at once. Thanks to our editor and sisters for our Home Department.

Dressmaking and Millinery, No. 561.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

In preparation for Easter, and of course, too, for the time to follow, our thoughts are for the new hat or bonnet, and although we do not usually fashion these for ourselves or for the older members of the family, such "manufacture" is undertaken for the babies and for the very small girls. In few other articles of dress is there so great a difference between the price of the material and that of the ready-made that it is worth while considering, and if one has the time, and in these that is a trifle, she will do well to prepare these at home.

The pattern numbered 5574 and shown herewith provides for two styles of the child's bonnet, the one-piece and the two-piece caps. The one shown in the larger illustration and the one in the lower right hand corner are the same, the latter being without the revers. This consists of the head portion and the crown. These are joined and there is a short seam at the back. If the revers are used they are joined to the cap at its front edge. Any mode of decoration may be used, but there is nothing nobbler or more stylish than embroidery done on the material. Ruchings of ribbon or of lace or even of the material may be used, but the laundering is always to be taken into consideration when a "wash" bonnet is to be made. The one-piece cap is shirred to form the crown, and

is a small item. This design is especially adapted to the use of embroidered edging or the narrow flouncing, and for summer one of the very sheer swisses or batistes is charming. When this is used the revers are omitted. White silk of the wash kind is in-

**TRY**

**BUFFALO CALF**  
**SHOES FOR WEAR**

The reason we say we are "The Western People" is so you'll know it. That means to us, and it will mean to you, that in our "Buffalo Calf" Shoes we "deliver the goods" that when you buy a pair of your dealer that pair of "Buffalo Calf" Shoes WILL WEAR as we say they will.

That means that no leather, either for uppers or soles, that is tanned from calf skin or steer hides is more durable than you'll find in our "Buffalo Calf" Shoes. Positively and absolutely none is better, and most is not so good as ours, no matter how high leather prices may be.

First of all, our "Buffalo Calf" Shoes are designed for wear—for a work shoe. That is, for a man who has to give his shoes rough usage. You can choose from many styles to just fit your foot. Each style fits comfortably and takes less time than others to "feel good" on your feet.

You'll get the most worth in wear in "Buffalo Calf" Shoes.

Write us a postal for a sample "Buffalo Calf" leather tag. If your dealer doesn't carry "Buffalo Calf" Shoes, write us.

**Bentley & Olmsted Co.**

**CYCLONE DISH WASHER**

Sent on free trial. A Wonderful Labor Saving Invention.

**SAVES** drudgery of washing dishes; often solves the servant girl problem. In one minute washes and polishes a machineful of dishes without placing hands in water, without spilling any water on floor. Will not break the most fragile piece of china.

Made of galvanized steel, will last for years. Easy to operate. Easy to clean. Made in 4 sizes—for families, boarding houses, restaurants, and hotels. We want you to try it before you buy it because if you try it you will buy it. Write today for full description, price, and our free trial plan. We pay freight.

**Z. S. & C. L. RANDLEMAN, MANUFACTURERS,**  
117 Grand Ave., Des Moines, Iowa.

expensive and is easily laundered. If warmth is to be considered in making such caps a lining of soft silk is advisable, and it should be put in so that it is readily removed when the cap is to be washed, or when it is so warm that it is no longer needed. While this pattern is put up in

sizes only up to two years it may be used for three and four years by enlarging slightly, but this must be managed by the user, as I cannot undertake to alter the patterns. Note, then, that No. 5574 is cut in sizes for children of six months, one and two years of age. Give age when ordering.

No. 5602 shows a fancy over-waist, or it may be simply termed a waist cut with low round neck and to be worn with a separate yoke or gulfame. As has been mentioned, these waists are very popular, and there is great variety in their designs. The front and back portions of the waist are tucked to deep yoke depth, these being then joined to the shaped band. The elbow sleeves are

similarly tucked and joined to a band. There are cuff extensions, but these are separate, although they may be joined if preferred. The chemisette is separate, and whatever is used for the yoke is faced on this. Then if desired the lining material may be cut from beneath, making the yoke transparent. The waist closes invisibly at the back, as do many of the season's waists. Pattern No. 5602 is cut in sizes for a 32, 34, 36, 38 and 40 inch bust measure. Give size when ordering pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

The International Sunday-School Lesson.  
First Quarter. Lesson XII. Isaiah xxviii, 7-13. March 24, 1907.

### Woes of Drunkenness.

Ephraim occupied a fertile territory, stretching across the heart of Palestine from the Mediterranean to the Jordan. In the midst stood Samaria, the capital, on a commanding eminence. The tropical luxuriance of the valleys hung about it like the bacchanalian garland on the brow of the banqueter. And its exuberance was as evanescent; for its glorious beauty was a fading flower. Destruction was at hand.

The capital, court, and people were enslaved to drink. Under its subtle delusion they were in perfect ease. With the proverbial stupidity of the drunkard, they felt perfectly safe, trusting in the mountain fastness of Samaria. With sense of justice blunted by the use of intoxicants, and their basest passions inflamed, they oppressed the poor and crushed the needy. With the insatiable thirst which the use of alcoholic liquors always begets, they kept crying, "Bring, and let us drink"—the Samaritan equivalent to our modern bacchanal, "Here's a health to you." (Amos vi, 1.)

But the judgments of God are abroad. The irresistible Assyrian, Shalmaneser, mighty and strong, is God's instrument of wrath. He looks upon Samaria like a peculiarly tempting morsel; like a fig ripe

in June, so rare and succulent that one swallows it as soon as it is in the hand; does not even think of laying it aside to preserve it or eat it at his leisure. His coming will be like a tempest of hail, a destroying storm, a flood of waters; figures peculiarly impressive in that latitude, where in an hour the driest water-course becomes an awful current. This prophecy had its literal fulfillment 721 B. C., in the ninth year of Hoshea, king of Israel. The country was ravaged by the Assyrians under Shalmaneser, and Israel deported into the cities of Assyria and Media. (2 Kings xviii, 9-12.)

The prophet now turns from Israel to Judah. He contrasts the imperishable crown and diadem, glorious and beautiful, rewards of piety, on the brow of Judah; the righteous and faithful residue, with the fading garland of voluptuous pleasure on the brow of drunken Ephraim. God shall help Judah's judges on the bench and her warriors at the gate. This has been aptly called a Messianic pendant to the foregoing picture of Samaria's fall.

But Judah, too, is not free from this degrading sin. Even her priests and prophets are infected with it. And the people will not endure the prophet's rebukes. Listen to their drunken scoffing: "Does Isaiah presume to instruct us? Does he take us to be just weaned, that he adopts such a childish way? Here and there, with no set order, and conning his words over, as if we were still in our primers,

"Tzav lat-zav, tzav lat-zav,  
—Quv laquv, quv laquv."  
Ewald says: "We must conceive the abrupt, intentionally short, reiterated, and almost childish words of verse ten, as spoken in mimicry, with a mocking motion of the head, and in a childish stammering tone."

The prophet rejoins: "Ah! if you will not let me teach you, then the Assyrians and Babylonians shall, and their foreign accent will seem more like stammering and twaddle than my instructions." If they had only hearkened to the prophet's voice, they might have found rest from warlike preparations, and that more blessed rest which comes from

# HONORBILT

## SHOES FOR MEN

The highest degree of style, fit and workmanship are embodied in these splendid shoes. There are none that equal them in appearance and wearing quality at the price. They are

### BUILT ON HONOR

That's what the name means. That's what a trial will prove. By all means wear "Honorbilt" shoes. Demand them of your dealer—INSIST. Sold everywhere. If you cannot get them write to us.

We also make the "Western Lady," and the "Martha Washington" comfort shoes and a full line of men's, women's and children's shoes. Our trademark is stamped on every sole.

**F. Mayer Boot & Shoe Co.,**  
Milwaukee, Wis.

obedience to the Divine precepts. But the Lord's work was offensive to them from its very simplicity. They rejected it; so, like a drunken man, the nation tottered and stumbled to its ruin.

### Analysis and Key.

1. Tropical luxuriance of Ephraim. Exuberance evanescent—fading flower.
2. Capital, court, populace enslaved to drink. Stupidity of the drunkard exemplified. Sense of security—poor oppressed.
3. Judgments against Israel. Shalmaneser an instrument. Samaria ripe to be devoured. A tempest of hail—prophecy fulfilled 721 B. C.
4. A Messianic Pendant. Under picture of Samaria's fall. Faithful residue of Judah.
5. Judah not faultless. Prophet's accusation. Degrading sin of drunkenness.
6. The charge resented. Drunken scoffing.
7. Prophets rejoinder. Foreign accent of invaders. More like stammering than prophet's repeated charges.

### The Teacher's Lantern.

The Prophet Isaiah appears in a new role. He is par excellence the temperance reformer of his age. He is the model for every age. He is not intemperate in his attack upon intemperance. Yet for moral earnestness he is not surpassed.

Drunkenness is usually insolent. It was ribald and abusive toward the prophet. But this did not deter him. He warded off the sneer with a terrible denunciation.

Canaan was the bridge between Syria and Egypt. The world-powers of that age coveted it. Possession of it was a strategic necessity. It could be used either as a thoroughfare or a buffer. But the Israelites might have held the country against all comers. Its mountainous character was a natural defense. Horses and chariots (the artillery of the ancients) could not be used there.

But drunkenness was the real foe both to the northern and southern kingdoms. It led to their overthrow. They were "overcome of wine" literally, wine-smitten. They were hit as with a hammer, stricken to earth. Israel never rose again, and Judah a mere shadow of former grandeur.

The luxurious refinement of the kingdom of Israel and its crimson-clothed nobles as described by Amos, makes one think of the palaces and villas of Pompeii as they have been brought to light by extensive excavations—"summer and winter houses, ivory palaces, gardens, vineyards, fig-orchards, olive-yards, melody of viols, beds of ivory, fragrant ointments and wine by the bowlful" is the prophet's inventory. This cultivation of aesthetic effects for eye and ear and palate is not in itself reprehensible. But a halt must be called when the beneficent Giver is forgotten in the greedy enjoyment of the gift. And the proportion of life must be maintained. To lose that proportion, even in perfectly

## Fertile Farming LANDS

**LOUISVILLE & NASHVILLE RAILROAD CO.**

LOUISVILLE, KY.

innocent things, is to be intemperate. Intemperance of any kind tends to lower the moral tone. Intemperance persisted in ends in total loss of moral tone. The Man becomes a Thing. This is in a sense the unforgivable sin. For the human is the temple of the Divine, and when the temple is ruined the Divine must make His exit.

In our day, as in Isaiah's, some priests and prophets err in vision through drink or other forms of intemperance. But discrimination must be made between the genuine and the professional priests and prophets. There is a spurious officialism which counts for nothing in the cure of souls.

There are ninety texts in the Old Testament which refer to the sin of drunkenness, and many more in the New Testament. The Bible is a red lantern swung across the path of youth.

### BARGAINS IN FARM LANDS.

If you want to learn about exceptionally rare bargains in South Dakota farm lands or unusual business opportunities in the new towns in the magnificent new country being opened up by the Minneapolis & St. Louis R. R. extension write for beautifully illustrated descriptive pamphlet on the "New Empire," the farmer's and stockman's paradise. This pamphlet will be mailed free. A postal card will do it. Write at once before edition is exhausted, to A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

### CHEAP RATES TO THE PACIFIC COAST.

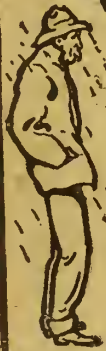

Commencing March 1st and continuing until April 30th the Iowa Central Railway will have on sale reduced one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los Angeles and San Francisco are run via Kansas City and the popular Santa Fe System. Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

### CHEAP ONE-WAY RATES.

Every Tuesday during March and April, the Minneapolis & St. Louis R. R. will sell cheap one-way excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. Rate is \$14 to most North Dakota points. Buy tickets at 512 Walnut St., or Union Station. For further information write W. K. Adams, Dist. Pass. Agent, Des Moines, Iowa.

## I Stand Back of Huttig's Rubber Roofing

WITH A WRITTEN, PERSONALLY SIGNED, LEGALLY BINDING GUARANTEE.

Yes, sir,—I can afford to stand back of my roofing because it stands back of me, and makes my word good as gold.

I GIVE you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt.

Asphalt comes from the Island of Trinidad. A large part of it is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad

Asphalt, which protects every particle of fiber. Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap. Now, here's how I feel about it. If you have use for roofing—

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and to your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Anyway, write for a big, free sample of my roofing and let me send you my booklet B and special Ironclad Roofing Guarantee. Write me personally, and do it to-day.

**HUTTIG MANUFACTURING CO.,**

707 East Second Street, Muscatine, Iowa

**H. W. Huttig**

PRESIDENT.

## ADVERTISING NOTES.

A beautiful book on western Canada is offered free to those who are interested in lands of the North. When writing, address your inquiry to Mr. Asberry Singleton, Gladstone, Manitoba, Canada.

Buy one of those Wright Stock Feeders before April 1st, as the price must go up on and after that date. The advertisement appears on page 24. It should interest every man who raises pigs, chickens or sheep.

Every reader of The Homestead should provide themselves with the "New Ideal" Seed Corn Tester, manufactured by the Ulrich Seed Corn Tester Company, of Atlantic, Iowa. No up-to-date corn grower can afford to be without one. A free illustrated circular will be sent to all Homestead readers if they only write for it.

On page 11 of this issue appears the advertisement of Mr. Fred I. Slocum, of Dexter, Iowa, who is offering 300 Senator Dunlap strawberry plants for \$1. These plants are of the very best variety for this territory and are guaranteed to be perfectly satisfactory. Mr. Slocum sold many plants through The Homestead last year and they gave perfect satisfaction in every case.

The Jewell Nursery Company, of Lake City, Minn., is one of the largest nurseries in the Northwest. They are in the field for a number of good agents. They guarantee good pay for this work and their capital of \$500,000 is certainly strong enough to back up any offers which they make. This firm was established in 1868. Any person looking for a good position in this kind of work should get in connection with this company. See page 11 for their notice.

The Gateway Nursery Company, of Le Mars, Iowa, are making a great run on their pure-bred seed corn, sold under the Holden test. They have a number of special offers, among which is Reid's Improved Yellow Dent, Yellow Special, White Pearl, Iowa Silver Mine and Minnesota No. 13. They also sell all kind of nursery stock, such as fruit trees, ornamental trees, shrubs and evergreens. Write for their free illustrated catalog which will be sent on application, provided you mention The Homestead.

If you are the owner of a valuable mare that you have been unable to get in foal, but want to be sure of doing so this season, and not lose another year of her life as a breeder, or if you own a stallion whose services are in demand, and you do not want to have him covering the same mares two or three times during the season, and probably without beneficial results finally in many cases, you should purchase a Safety Impregnating outfit with which impregnation is practically certain at every service. For sale by I. O. Crittenden, 35 Fox Bldg., Elyria, Ohio.

Actual selling of real estate has been reduced to an exact science. The up-to-date organizations selling real estate today conduct their business along lines that most strongly appeal to the buying public. To do this there must be unquestioned integrity behind the selling plan and ability to work up and make quick sales. This is the method of the Real Estate Salesman Co., 412 Brace Block, Lincoln, Neb., who will gladly answer inquiries and give information as to their unexcelled methods. See advertisement on page 27.

Pure seed corn is often very hard to obtain, and when one does obtain it, he needs assurance that it is the best. Where a firm devotes seven farms to the culture of seed corn—far enough apart to avoid crossing—it stands to reason that their product must be as perfect as nature can make it. The old established firm of Messrs. W. W. Vansant & Sons, of Farragut, Iowa, need no lengthy introduction to our readers. Iowa seed corn cannot be equaled by any other. A request from our readers will bring Messrs.

## What are you going to do with the boys?

Keep them on your farm to share an income that is already too small, or are they going to hire out to a neighbor to work all their lives for some one else? Perhaps they are thinking of going to the city to join in the mad rush for existence. Why don't you

### Send them to the Southwest

where in a few years each of them can become independently rich?

It will take only a few dollars to start them—good land is so cheap in the Southwest. If they are hustling fellows, they will soon be doing so well you'll want to sell out and join them.

It's much easier to make a good living in the Southwest than in the older states. You can get from 10 to 20 acres in the Southwest for the price of one where you live and the land is just as good. You can raise as big or bigger crops there and can get better prices for all you raise. Markets are good and schools and churches are abundant. The climate is healthful—the summers no warmer than elsewhere and the winters are so mild no heavy shelter is needed for stock—they have good range the entire year. Contrast this with your climate and see who has the best of it.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

**JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines**

1413 La Salle Street Station, Chicago

or

1413 Frisco Building, St. Louis.

Vansant's catalog and information of interest. See advertisement on page 10.

#### BUGS, BLIGHT AND POTATOES.

A poor combination you will say. We agree. A losing business. Yes, sure. They don't grow very well in the same patch. One or the other of the three must be supreme. They are all sticklers for staying on the ground. As a rule they all die together unless man and a good sprayer comes on the scene. Then the bugs go and the blight gets a back set. The pota-

toes recuperate and stand a chance of making profitable returns. Prepare for this unfortunate circumstance which is liable to confront you this summer. Get an Iron Age Sprayer. Different sizes to suit your price and need. Write for catalog; it describes diggers, cultivators and planters. Address Bateman Manufacturing Company, Box 148, Grenloch, N. J. Please mention this paper.

#### FENCE IN THE YARD.

So many people are opposed to a fence

about lawns, schoolhouses and churches because the average fence is a homely affair. If they should happen to see a good line of Cyclone fence they would probably change their ideas. This fence combines beauty with service and long life. It will retain its position as long as the posts hold it up. If you want to know more about this fence see page 24 or write to the Cyclone Fence Company, Waukegan, Ill.

#### AGENTS WANTED.

The Banner Plow Company, of Coffeyville, Kan., are manufacturers of the Banner riding attachment which is so eagerly sought for over the entire United States and foreign countries. Their advertisement on page 13 of this issue is well worth your notice if you are interested. They want agents to handle their attachment. Better write them for particulars. Please mention this paper when writing.

#### GEO. C. HUNTER OFFERS A BARGAIN.

Mr. Geo. C. Hunter, 317 I. L. & T. Bldg., Des Moines, Iowa, has probably offered the readers of The Homestead some of the greatest bargains ever offered in our columns. In this issue on page 26 he is offering a 560-acre, well-improved farm for but \$67.50. Considering the location, etc., this is one of his leaders. The farm is gently rolling, all suitable for cultivation, all fenced and cross fenced, has plenty of water, with windmill and gas engine for power, is near good railway town and school. Write him for particulars if you are interested in a bargain in a farm of this size. Write today and mention The Homestead.

#### CYCLONE DISH WASHER.

The Cyclone Dish Washer is a very simple device for washing either dishes or vegetables. It does away with the dish rag and drudgery and saves many minutes three times each day. With one of the machines you can wash a large amount of dishes in one minute, and not touch your hands to the water or get any of it on the floor. It will not break the most delicate china, as they are fully protected by a wire rack which incloses the water heater. This water heater revolves very rapidly, throwing the water with great speed against the dishes which are around the edge of the basin, thus removing all the dirt. What lady would not be glad to be saved this distasteful duty of washing dishes? Many testimonials are being received each day. Among them is one from Mr. H. H. Schnoor, Jr., of Scribner, Neb., who says: "Your dish washer washes the dishes to perfection and cannot be beaten. It is a good one." Another, Mr. R. R. Morris, of Clarinda, Iowa, says: "We find that your dish washing machine does all you say it will do, and does it perfectly." The prices for the different sizes are easily within reach of everyone. Messrs. Z. S. &

## BEFORE YOU BUY A MANURE SPREADER

SEE that its frame and sills are made of oak; that it has a ball and socket joint on front axle to prevent racking and twisting and steel braces and steel truss rods to guard against warping and sagging. See that the apron does not run backward and forward on hilly ground but insist on a positive and continuous apron drive.

"A boy can run it"

See that it is practically automatic and so simple that any boy who can drive a team can run it as well as any man and control its every operation without leaving the seat. The

#### Appleton Manure Spreader

has all these improved features and many others equally important. Write to-day for free catalogue and special prices and terms.

APPLETON MANUFACTURING CO.  
39 Fargo Street, Batavia, Ill., U. S. A.

## A SPEEDY WIRE STRETCHER

The Automatic Steel Lever Stretcher draws 40 rods of wire tight in one pull, and always past end post. A daisy splicer and staple puller. Priced at \$1.25. Illustration booklet free. Agents wanted. OTTO SCHWIEN, Box 104, Davenport, Iowa.

DR. HARTMAN  
OWNED BY  
J. F. COOKE & CO.  
LEXINGTON, KY.

Messrs. J. F. Cooke & Co., of Lexington, Ky., have at their branch barn at Newton, Kan., twenty-seven registered jacks for sale. They are the largest breeders and importers of jacks and jennets in the United States. Write for catalog to Messrs. J. F. Cooke & Co., Lexington, Ky., or Newton, Kan. When writing please mention this paper. See advertisement on page 35.

C. L. Randleman, of 117 Grand Ave., Des Moines, Iowa, will be glad to send you one of these machines on approval for you to test in your own home if you mention this paper. Write today. Their advertisement appears on page 20 of this issue.

**THESE PEOPLE BUY HAY AND GRAIN.**

More and more producers of farm produce are coming to sell their grain, hay, etc., direct to commission firms, thus avoiding at least one or two middle men. In this issue will be found the advertisement of the J. J. Considine Company, 99 North Jefferson St., Chicago, Ill. This firm buy hay and grain direct from farmers and offer to pay the highest market price. If you have any hay or grain to market soon and want to get a good price for the same just write to this firm for quotations. Kindly mention this paper when you write and refer to their card on page 6.

**TRY THIS CORN GRADER AND SORTER.**

When it doesn't cost you a cent to try a corn grader and sorter, you should certainly accept the opportunity. We realize as well as the manufacturer that farmers have not yet come to know the importance of grading their seed corn. The more even and uniform the stand of corn, naturally the better the crop. A little study will soon show the average corn grower that there is a big margin for an increase of yield. Any plan which in itself offers the prospect of reducing this margin should be worthy of trial. The corn grader is only one of the steps in artificial selection of seed; it is one of the most important steps, too. No corn planter was ever made that will drop uneven kernels evenly. "How to Grade Seed Corn" is a book which tells all about Owen's Seed Corn Grader and Sorter. Write to the J. L. Owens Co., Minneapolis, Minn., for this book which is listed on page 24.

**BUCKEYE HOLLOW CEMENT BLOCK MACHINE**

is a good, practical face-down machine for the use of farmers, masons, etc. It is low enough in price so that everyone can afford to have it. It makes a good, strong block and is very convenient to operate, and has the best features of the most popular block machines. It makes the block "face down," permitting richer mixture to be used for facing. The pallets are provided with hand holes for carrying away the blocks. Wood pallets may be used, but we advise iron ones, as wood is liable to warp and crack the blocks when setting. The parts are easily and quickly changed. It makes perfect blocks, for unless the machine is square every way it will not lock up. The machine can be operated, if necessary, by one man, although to work it up to its utmost capacity, three men can be used, one to mix the material, one to tamp and operate the machine and one to carry the blocks away. If you are interested in such a machine that can be purchased at a big bargain, see the advertisement of the United Cement Machinery Manufacturing Company on page 6 of this issue, and write them for particulars

**500**

**Catarrh**

**Treatments**

**To be**

**Given**

**Away**

**Free**

You are troubled with that loathsome and dangerous disease, Catarrh. You have longed for relief. You have wanted to be rid of the hawking, spitting, the foul breath, the constant annoying discharge from the nose, the disgusting dropping of mucus into the throat. You have been told a cure was impossible. You have tried doctors and various methods only to meet with failure.

I come to tell you that CATARRH CAN BE CURED. Right in your own home by means of an easy, painless, unfailing method, you may be cured. You can rid yourself of all the discomforts, the annoyances, the loathsomeness of Catarrh. The disease is all of these things, as you will learn by sad experience, if you have not already done so. It always has a small beginning, but it encroaches, steadily, persistently, relentlessly, until the vital organs of the body are attacked, and you face pain, lingering torture and death.

I have cured thousands. I can cure you if you come to me before it is too late.

I have decided to distribute 500 free treatments **ABSOLUTELY WITHOUT CHARGE**, to Catarrh sufferers. I want you to see my method, know what I have done for others. My life has been spent in the study of CATARRH, its Causes and Cure. Now I offer to share with you my experience and knowledge on the subject. I have been successful. I want YOU to profit by my success by taking advantage of my offer—a free treatment for Catarrh, gladly given to sufferers from the disease.

Don't delay. Write immediately. A postcard, with your address upon it, sent off NOW will secure one of the free treatments. An envelope containing your address put in this mail will bring you what you have longed for, but despaired of—a cure for Catarrh. Tomorrow may be too late. Be one of the fortunate people to get one of these free treatments for Catarrh. Write right now.

**Catarrh Specialist Sproule 475**  
**Trade Building, Boston.**

at 100 First Nat'l Bank Bldg., Waterloo, Iowa.

**TWENTY DAYS' TREATMENT COMPLETELY CURED HIM OF PILES.**

When one of the most prominent bankers in Kansas City testifies that he has been cured of piles it certainly proves that the system of treatment is right. Read below: "Kansas City, Mo., May 24, 1902. Drs. Thornton & Minor, Dear Sirs:—You may refer to me at all times. For nearly twenty years I suffered with piles; after twenty days' treatment by your Dr. Minor, I was completely and most effectually cured, and am sound as a dollar today, thanks due to you exclusively. Yours very truly, Wm. Huttig, Vice-President Fidelity Trust Co." **TEN THOUSAND ACRES OF WYOMING LAND.**

On page 27 of this week's paper will be found the advertisement of the O'Keefe Real Estate Company, of Omaha, Neb., who are offering a tract of 10,000 acres of Wyoming land adjoining the U. P. railroad. This is nice, smooth land and is being rapidly taken up by the best farmers in Iowa, Illinois, Missouri and Wisconsin. The adjoining land is being sold to a German colony and is being rapidly settled up at double the price asked for this. There is a great prospect for investment in this land. Write the O'Keefe Land Company, of Omaha, about this at once and kindly mention this paper.

**WHY GIVE HIDES AND FURS AWAY?**

It is generally a hard proposition for the hunter or trapper who markets a small amount of hides and furs, to know just where to sell. Quotations on this line of goods are exceedingly variable and it is seldom that the local buyer pays as high prices for animal furs and hides as he can afford. Competition gives him full sway in the market and he takes your pack at just about his own prices. Minneapolis, Minn., is a great market for hides and furs. A great many trappers ship direct to that place and are often able to obtain 10 to 50 per cent more, spot cash, for their trapping than by selling locally. We would advise anyone having a shipment of furs on hand, whether large or small, to write for price lists, market reports and information regarding tanning of hides to Messrs. Andersch Bros., Dept. 19, Minneapolis, Minn.

**HOW STRONG ARE YOU?**

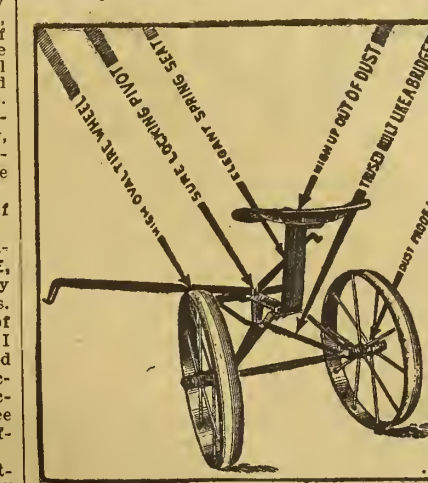

That is the question which the shoeman who sells the Buffalo Calf shoe will ask you when you are being fitted. This "make of shoes has attached to them a small leather test tag cut in the form of a Buffalo calf. If you can tear this piece of leather in two with your fingers, you will have won a pair of shoes. This strip of leather is of the same kind as that from which the shoes are made. Buffalo calf is a leather that is carefully tanned and made to wear. In making the Buffalo Calf shoes, service and utility are given special attention. Nearly every dealer handles this brand of shoes which is made by Bentley & Olmstead Co., of Des Moines, Iowa. Next time you buy a pair of shoes, be sure to ask for Buffalo Calf and try this test. Here is a chance to get a pair of shoes for nothing, providing you are strong enough. See page 20 for more about this buffalo tag.

**PEERLESS CREAM SEPARATORS.**

There is no more important feature in favor of any machine than that it will accomplish more with less work than its competitor. This is true only if the grade of work is equal or better than that of the other machine. The Waterloo Cream Separator Company, of Waterloo, Iowa, claim that their Peerless Cream Separator will skim more-milk with the same amount of labor than its competitors, and at the same time will do it better. The reason for this is the fact that they have the only machine that has a combination of the hollow and disk bowl. That means double capacity, or a smaller bowl for the same amount of work. This insures easier turning, less wear, easier cleaning and better cream—it doesn't break down the large fat globules. It "skims to a trace." Write them today for their free catalog No. 9, their guarantee and special terms. Please mention The Homestead.

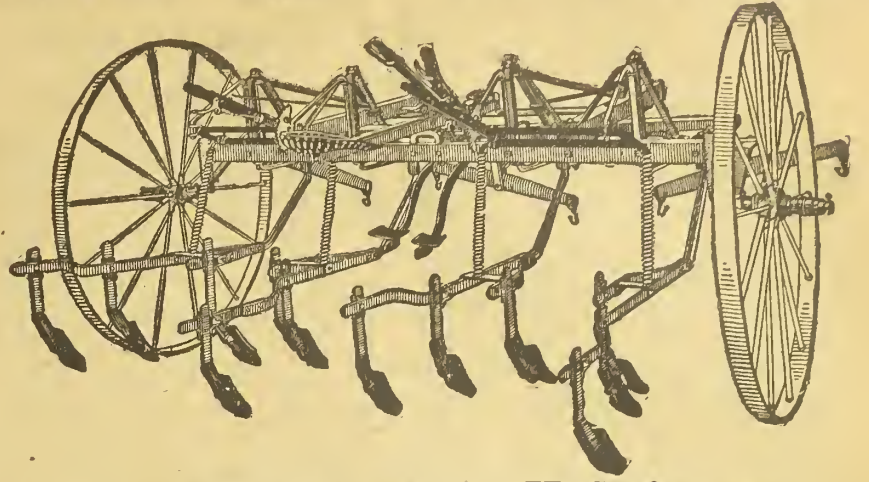

**THE GALLOWAY BIKE HARROW CART.**

This paper is glad to be able to call the attention of its readers to the Galloway Bike Harrow Cart. Mr. Galloway's harrow cart is probably not a new thing to many of our subscribers and we know that there are a lot of them owning one. On all sides words of praise are heard for Galloway's cart. The Galloway harrow cart ought to be a good one, as we know that Mr. William Galloway was the originator of the two-

wheel cart. It was his first manufacturing enterprise and he has made a big success of it. His customers speak glowing words of praise about it in his booklet which he sends to any interested farmer on request. Every farmer ought to own a harrow cart. It is without question a most needed implement on the farm today. With one a farmer can save all that hard work and drudgery of dragging behind the horses in the dust while harrowing. Just read Mr. Galloway's advertisement on page 25 and note the very low price which will buy one of these carts

**Save the Wages of One Farm Hand**

**Help! More Help!**

That's the cry with every farmer—can't get help just when you need it, and when you do get a good man he wants all your profit for his wages. Ever hear of the Hon. David Rankin, the man who solved the problem of the scarcity of farm hands? Where other farmers hire two men to plow with two single row plows, David Rankin, the largest corn grower in the world, gets the same work done with the help of one man and the

**"MIDLAND" TWO ROW CULTIVATOR**

W. R. Clifton, of Waco, Texas, said: "With a Midland Two Row Cultivator, one man and three mules can do the work of two men and four mules."

Mr. Clifton saves as much in wages on his one Midland Two Row Cultivator as Mr. Rankin saves on each of his, and Mr. Rankin cultivates at times as much as 1800 acres in one day.

**MIDLAND MFG. CO.**

Our catalogue fully describes the Midland Two Row Cultivator and also contains some very interesting articles on corn cultivation.

Your name and address will bring you a copy free.

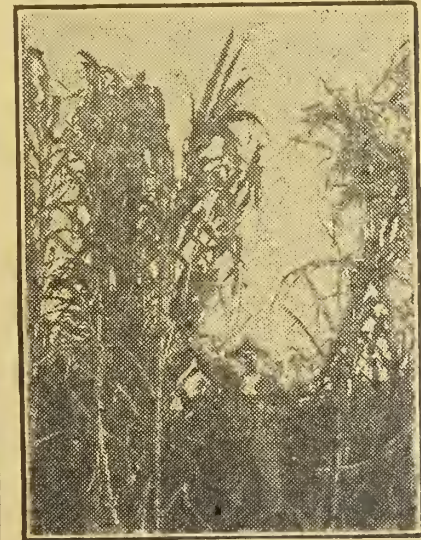

You will enjoy looking at the photograph (3 feet long) of one of Mr. Rankin's farms, showing the largest corn field in the world.

**102 Main St., Tarkio, Mo.**

and then write him for his booklet or send in your order at once. Mr. Galloway does one thing that we publishers like to see, and that is he puts up his bond, in no small amount, either—\$25,000—as a guarantee not only on his cart, but of good faith and insurance for the farmer that sends in his cash with order. Just note the illustration of the harrow cart shown here. It pretty well describes what his cart is like and is only one of several shown in his booklet. He says he's got a new proposition this year. A bigger inducement than ever for every farmer to own a harrow cart. Why not just see what his offer is? Write him today and tell him you saw his advertisement in this paper. He always likes to know what paper brings him the most business as well as friends. Address the William Galloway Company, 105 Jefferson St., Waterloo, Iowa.

**HIGHER QUALITY AND LOWER PRICES FOR STANDARD CREAM SEPARATORS.**

With the demand increasing yearly for cream separators on dairy farms throughout this country we wish to again bring to the attention of our readers the fact that the standard high-grade Davis Cream Separator

**Iowa Corn 19 Feet High.**

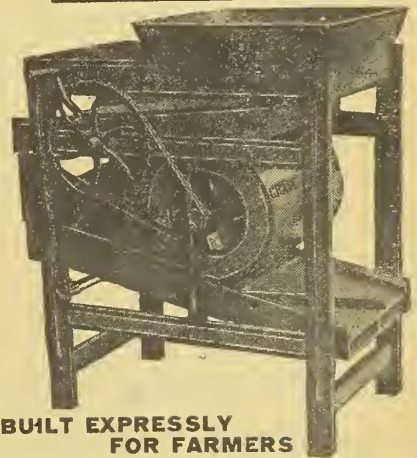

This remarkable photo is sent us by Henry Field, the seedsman, of Shenandoah, Iowa. It is a picture of some corn he grew on his trial grounds from seed imported from Old Mexico.

Mr. Field conducts extensive trial grounds in connection with his seed business, and has done some valuable work in the way of testing corn and other seeds. This Giant Mexican corn he does not consider of any great practical value in itself, as it is too late for our climate, but he thinks it may be of great value in cross-breeding experiments owing to its great vigor, drought-proof qualities and ability to stand up in spite of wind.

He has secured two bushels of seed for this year's experiments, and authorizes us to state that he will send a small packet of it free to any of the readers of this paper who wish to experiment along the same lines. Be sure and mention this paper, and while you are about it, better ask for his catalogue. He sells all kinds of seeds and seed corn, and is one of the few seedmen who guarantee seeds true to name.

See advertisement on page 24. The address is Box 25, Shenandoah, Iowa.

**THE HAWKEYE Grain Grader and Cleaner**

**BUILT EXPRESSLY FOR FARMERS**

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

- It will clean and grade seed corn.
- It will clean and grade seed wheat.
- It will clean and grade seed oats.
- It will separate oats from wheat.
- It will separate timothy from clover.

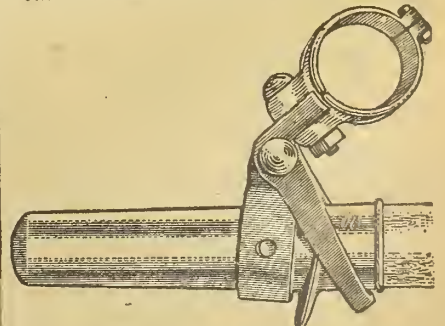

In short, it will do any work required of a fanning mill and grade seed grains besides.

If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by **PARSONS HAWKEYE MFG. COMPANY, NEWTON, IOWA.**

is now sold straight from the factory at real factory prices. It is now possible to get the highest grade cream separator at a very small cost over cost of manufacture. This plan is more fully explained and separator carefully described in the new "Money Saving Catalog No. 54-L" just issued by the Davis Cream Separator Company, 118 North Clinton St., Chicago, Ill. A copy will be sent free to any reader of The Homestead if they will address as above and mention this paper. It will mean money in your pockets and it is advisable to act right now while the matter is fresh in your mind. See advertisement on page 8.

**THE STORY OF A RUNAWAY.**

Every reader of this paper is interested in any device that prevents injury in case of a runaway. The Zeigler Automatic Lock Neck Yoke Center is a safety device which

supports the pole in all emergencies. Breaking singletrees or dropping traces cannot let the tongue down. This is a splendid thing for everyone who owns a buggy or carriage

# OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

## CLIPPINGS FROM THE SHEARS.

The demand for good breeding stuff is great, and from all indications will be for a good while. The man who has pure-bred stuff to sell now is lucky.

Better buy a ram now when you can get the choice from among several. In the fall only the tail-enders will be left.

Make your flocks better by building up continually. If new stock is purchased get something better than you had before. Always use a pure-bred sire.

Sheep need good nitrogenous food more than anything else. Alfalfa, clover hay and oats for grain supply just such food.

Good treatment of the ewe in winter time is good treatment of the lamb.

The average weight of the fleece of 1907 was 6.61 against 6.39 the previous year.

It is well to have shelter where the flock can go during the cold rains and have a dry place to lie.

Ice-cold water is detrimental to the best thrift and health. It should be sufficiently warmed to at least remove the chill.

Each ewe should have at least twelve square feet of space in the barns or sheds.

Success at lambing time means constant attention and looking after the little things.

If there is considerable wool about the udder and flanks, it is a good practice

to remove it before the lamb is born. It can be done without danger to the ewe if she is handled carefully.

Don't let the cattle run in the sheep sheds. It is poor policy toward the sheep. Also remember that a pig in the lambing lots is dangerous to both ewe and lamb.

## Resuscitation of Chilled Lambs.

To the Editor of The Homestead:

A lamb well chilled immediately following birth is a doubtful proposition, but not a forlorn hope. The first step generally in reviving it is to get some warm milk into it. An attendant to assist you is almost necessary. Catch the ewe and let the assistant hold her by standing on one side of her, placing one hand under and about her neck, and with the other hand grasping the stifle of the hind leg opposite him, lift it upward and backward. This exposes the teat and udder well. Now place the lamb beneath the ewe and with one hand take it about the head in such a manner that you can hold its mouth open with the fore-finger. Use the other hand to milk slowly into its mouth. Keep the mouth upward and if the lamb does not swallow, remove the finger from the mouth and close it a little. A little effort will usually induce it to swallow.

If the lamb is too far gone to swallow, you have one more resort if you act quickly. Take the lamb to the kitchen and place it in a vessel of water at 100 or 105 degrees Fahrenheit, keeping the water at this temperature for some time. Immerse the lamb all but the head and rub the body. When the lamb begins to live up, take it from the water and rub thoroughly dry. Have some fresh milk warm and with a teaspoon get a few teaspoonfuls down it. Keep the lamb clear away from direct heat, but cover it with a cloth or rub occasionally. Presently, feed some more milk, and when it has recovered sufficiently to stand and walk about, the lamb may be returned to the ewe. But see that it sucks and it may be necessary to assist it a few times, but it will soon care for itself.

As to the extent to which a lamb may be chilled and still recover, the following will generally hold: Once the nose and exterior of the mouth become cold, hope is past, but as long as the nose is warm there is a chance.

Subscriber.

## John Justice's Duroc Sale.

In response to summons to the sale a good crowd of buyers gathered at the farm of the above breeder February 15th, near Ankeny, Iowa, and took the offering at very fair prices. Nothing sold below a quarter of a hundred and the average was \$36.10. Below is the story of the bidding:

Lot.	Name	Price.
1.	Geo. McKellip, Ankeny, Iowa....	\$44.00
2.	A. T. Sundell, Paton, Iowa....	50.00
3.	H. E. Haulman, St. Charles, Ia.	42.00
4.	Menifee Bros., Polk City, Iowa....	38.00
5.	Jno. Kaltenheuser, Elkhart, Ia.	39.00

# Wanted Today 1,000,000 Farmers TO INVEST ONE CENT IN A POSTAL CARD

Address it to me.  
Say on it.  
"Send me your SPECIAL 20,000 Bike Harrow Cart proposition."  
You will be glad afterwards, if you do it today.  
Yes, sir!  
It will pay you big.  
I am going to build and sell just 20,000 Bike Harrow Carts for 1907 at a price so low you can't afford to walk. Besides give you a chance on a proposition to get the best harrow cart ever built on two wheels for nothing.  
To sell 20,000 carts is a big undertaking, but my proposition is doing it.  
It's a little out of the ordinary.  
Get in on this 20,000 cart deal while it lasts.  
It only costs you one cent to get it.  
I then leave it entirely to you if it is not just a little bit the most interesting harrow cart proposition you ever heard of.  
Drop me a postal if you don't write another one for six months.  
Don't buy a harrow cart anywhere, of any kind, make, or brand, or at any price, until you get my proposition.  
I leave it then entirely to you to be the judge.  
I know there is no harrow cart built regardless of price, today, that will begin to equal the Bike and meet your requirements like it. The "Proof of the Pudding" which I send free with my proposition proves that.  
It is a high wheeler with positive lock—just right for rough and hilly ground, will turn anywhere without interfering with levers or sections or shaking the driver to pieces.  
I have built and sold more harrow carts than all other manufacturers put together and know what is required to make a perfect harrow cart. Sold direct from Factory to Farm. Write me today. It's interesting.

## A Record-Breaking Sale.

The dispersion sale of the herd of Duroc Jerseys owned by Messrs. John M. Morrison & Sons, at College View, Neb., on March 15th, proved the most sensational sale ever held of this breed. The year 1906 has been a record breaker for unusually high values, and prices for all kinds of hogs have gone skyward. Previous records have time and again been shattered, until we thought the limit had been reached. The Morrison sale, however, proved the finale of them all, and with the closing chapter is to be recorded the greatest sale of Duroc Jerseys that has ever been known. Breeders from everywhere were at the ringside. Iowa and Nebraska were well represented, as was also Kansas and Missouri, while others had come from Illinois and as far south as the Indian Territory. Grizzled veterans in the cause of the red hog were there, as was also the more aggressive of the younger breeders. It was undoubtedly the most representative gathering of Duroc Jersey breeders that has ever been brought together. Many well-known breeders who were unable to be present sent bids to Colonel Callahan and the various newspaper representatives. No. 9 was the first to be sold and she went to Mr. Jno. L. Williams, of Bellaire, Kan., at \$205. A few others were sold and then the great sow, Alix 11, was brought in. She was started at \$200 on a mail bid from Kentucky, and then she leaped to \$500 on a bid from Mr. Arthur Vail, of Hume, Mo. Others dipped in and Mr. Vail came back again with another \$100. When Messrs. George Blessing, Homer, Neb.; J. A. Ollis, Jr., Ord, Neb.; M. S. Moats, Randolph, Neb., and John Lyden, Belden, Neb., took a hand, she was not long reaching the \$1,000 mark, and then began the most aggressive fight ever witnessed for the possession of a Duroc Jersey sow. When she reached the \$1,500 mark that veteran breeder, Mr. Smith Brown, of Waterloo, Neb., took a hand, and on she went. Messrs. John Lyden and M. S. Moats dropped out after bidding \$1,800 on her, and then it narrowed down to Mr. Smith Brown, Mr. Vail, Mr. Ollis and Mr. Geo. Blessing. Mr. Vail stayed to the last and Mr. Blessing secured her at \$2,200, the highest price ever known to be paid for a Duroc Jersey sow. Alix 11 was bred by Messrs. Manley & Co., of Lyons, Neb., and was farrowed the property of Mr. Austin Renshaw, of Blair, Neb. She was raised by Mr. Renshaw and shown by him, winning first and sweepstakes at the leading state fairs, and was afterwards bought by Messrs. Morrison & Sons. The other sensational feature was the sale of the one-half interest in Kan't Be Beat, the well-known boar at the head of the herd. He was started at \$200 and then jumped to \$1,000, and then steadily rose to \$1,500, when the bidding took an aggressive form, and at \$100 at a time he gradually went to \$3,025, and was purchased by Messrs. Geo. Briggs & Son, of Clay Center, Neb.; Hopkins Bros., Atlanta, Neb.; Wm. Sanstead, Holdrege, Neb., and Gilbert Van Patten, Sutton, Neb. Mr. Smith Brown, of Waterloo, Neb., was the man who forced the bidding to this unheard of price, and was associated with Messrs. Fred Steinbaugh, of Yutan, Neb., and Arch Brown & Sons, of Waterloo, Neb. From this time on everything went at high prices, and anything bred to Kan't Be Beat sold well. The average on thirty-three and one-half head (meaning the one-half interest in Kan't Be Beat) was \$343.14. The sows averaged \$266. Three world's records were broken, the high average on sales, highest price on boar and highest price ever paid on sow. Col. T. C. Callahan cried the sale and never did better work in his life. Below is a complete report and prices paid: Kan't Be Beat 10239 (A.) (one-half interest), Geo. Briggs & Son, Clay Center, Neb.; Hopkins Bros., Atlanta, Neb.; and Wm. Sanstead, Holdrege, Neb. \$3,025  
Alix 11, Geo. Blessing, Homer, Neb. 2,200  
Miss Bob, W. A. Kirkpatrick, Lincoln, Neb. 500  
Van's Lady, J. E. Joines, Clyde, Kan. 330  
Faust's Pride, Smith Brown, Water-

## IRON AGE Four-Row Sprayer

Most practical, rapid, economical sprayer. Protects potatoes and other crops from bugs and blight. Sprays under high pressure. Write for new 1907 Iron Age Book that describes Potato Planters, Cultivators, Diggers, and complete line of Farm and Garden Tools.

A SHAVING soap should soften the beard and soothe the face. Common soap won't do this, but it will irritate and smart, and quite likely poison the face. If this means anything to you insist on getting

# Williams' Shaving Soap

"The only kind that won't smart or dry on the face."

Send 2c. stamp for a TRIAL CAKE of Williams' Shaving Soap, or 4c. for a Williams' Shaving Stick, trial size, enough for 50 shaves. Address

THE J. B. WILLIAMS COMPANY, Department A, GLASTONBURY, CONN.

## Moats &amp; Sons' Duroc Sale.

Messrs. M. S. Moats & Sons, of Randolph, Neb., held a very successful sale of bred Duroc sows at their farm February 19th. The offering was in excellent condition and the quality was generally good all the way through. The top of the sale was on Challenger's Lady, a daughter of Duroc Challenger, and being bred to the show boar, Crimston Critic, for an early litter made her a desirable animal and was one of the cheap sows of the quality sold this season. Mr. Smith Brown was the buyer at \$225. No. 1 of the catalog would have sold much higher had she not broken service, and was bred very late. As it was, she sold to Messrs. Edmonds, Shade & Co. for \$100. The entire offering of forty-five head made an average of better than \$52. This firm have an excellent herd and we expect good things from them next year. Below is a list of sales of \$40 and upwards:

Lot.	Price.
1. Edmonds, Shade & Co., Kingsley, Iowa	\$100.00
2. Carl Hansen, Herman, Neb.	80.00
3. B. R. Miller, Randolph, Neb.	75.00
4. H. C. Hall, Brunswick, Neb.	68.00
5. B. R. Miller	57.00
6. J. H. Parker, Randolph, Neb.	55.00
7. E. F. Larue, Lyons, Neb.	75.00
8. Smith Brown, Waterloo, Neb.	225.00
9. Manley & Co., Lyons, Neb.	52.00
10. Wm. Lessman, Wayne, Neb.	65.00
11. Ray Stobber, Randolph, Neb.	48.00
12. Jno. Lydon, Belden, Neb.	43.00
13. W. Stageman, Randolph, Neb.	46.00

21. Jno. H. Tryon, Lyons, Neb.	40.00
22. Jno. Volkert, Randolph, Neb.	41.00
23. Clark & Tryon, Wausa, Neb.	40.00
24. Edgar Taylor, Pierce, Neb.	40.00

## Stone's Duroc Sale.

Mr. W. J. Stone, of Lyons, Neb., held his annual bred sow sale at his farm near Lyons, February 28th. The local crowd was not as large as usual on account of the Gleason Short-horn sale just a few miles distant the same day. But the offering was good and the result of the sale was very satisfactory. The top of the sale was on No. 1, Proud Addie, a yearling daughter of Proud

Advance out of Royal Blossom 5th, the three times sweepstakes sow. Proud Addie was the top of the Edmonds, Shade & Co. sale last spring and was purchased in partnership by Edmonds, Shade & Co. and Manley & Co. We are informed that Messrs. Manley & Co. will keep the sow this spring. A few days before the sale she became lame and was unable to walk sale day, which undoubtedly caused her to sell for much less than she would have sold on her feet; \$600 was her selling price. The sale averaged \$68.60. Below is a list of over \$40:

Lot.	Price.
1. Edmonds, Shade & Co. and Manley & Co.	\$600.00
2. W. W. Robins, Lyons, Neb.	100.00
3. W. H. Hensel, West Point, Neb.	53.00
4. L. E. Schuler, Hooper, Neb.	50.00
5. Geo. Boskirk, Pender, Neb.	100.00
6. W. H. Hensel	50.00
7. Wm. Bigelow, Lyons, Neb.	65.00
8. Jno. Lydon, Belden, Neb.	98.00
9. Jno. H. Tryon & Sons, Lyons, Neb.	55.00
10. T. A. McMahon, Craig, Neb.	80.00
11. F. Backus, Oakland, Neb.	105.00
12. Geo. Nordyke, Allen, Neb.	170.00
13. Geo. Boskirk, Hubbard, Neb.	40.00
14. Same	40.00
15. Same	50.00
16. Same	45.00
17. Same	42.00
18. W. C. Hemtzman, Lyons, Neb.	40.00
19. C. Wallace, Wisner, Neb.	53.00

## Geo. Blessing's Duroc Jersey Sow Sale.

The first annual sale of Mr. Geo. Blessing, at Homer, Neb., was very successful and was well attended. The offering was in nice condition and an average of \$53.74 was made on thirty-nine head. Messrs. M. S. Moats & Son secured No. 1 of catalog, which was the bargain of the sale. Below is a report of the entire offering:

Lot.	Price.
1. M. S. Moats & Sons, Randolph, Neb.	\$110.00
2. Same	55.00
3. F. A. Gossard, Ponca, Neb.	45.00
4. W. H. Ryan, Homer, Neb.	60.00
5. Blevius Bros., Dakota City, Neb.	50.00
6. Louis Goodsell, Homer, Neb.	60.00
7. Blevius Bros., Dakota City, Neb.	45.00
8. Manley & Co., Lyons, Neb.	55.00

## The Tryon Duroc Sow Sale.

One of the best attended sales held this year in northeast Nebraska was that of Messrs. John H. Tryon & Son, near Bancroft, Neb., on February 27th. Breeders were there in goodly numbers from Iowa, and the Nebraska contingent was very strong. Sows bred to Junior Jim averaged \$211.78. The top was Manley's Profit, a daughter of Orion out of Miss Profit 2d by Dandelion. She was purchased by Messrs. Robbison Bros., of Lyons, Neb., at \$815. The entire offering averaged \$115.30 on forty-one head. Below is a list of those selling for \$50 or over:

Lot.	Price.
1. W. W. Robins, Lyons, Neb.	\$120.00
2. Jno. Lydon, Belden, Neb.	100.00
3. C. Wallace, Wisner, Neb.	128.00
4. Edmonds, Shade & Co., Kingsley, Iowa	50.00
5. J. C. Clark, Stanton, Neb.	70.00
6. F. E. Garret, Lohrville, Iowa	135.00
7. S. B. Cummings, Tecumseh, Neb.	190.00
8. W. A. Peterson, Lyons, Neb.	60.00
9. Jno. McLaughlin, West Point, Neb.	68.00
10. Robins Bros., Lyons, Neb.	815.00
11. J. C. Clark	63.00
12. B. F. Preston, McLane, Neb.	97.00
13. M. C. Larson, Bancroft, Neb.	53.00
14. W. H. Hudson, Glidden, Iowa	90.00
15. W. W. Robins	150.00
16. W. A. Peterson	170.00
17. Hugh Robins, Lyons, Neb.	105.00
18. L. H. Cantine, Quimby, Iowa	125.00
19. C. Wallace	150.00
20. Ed Galliger, West Point, Neb.	60.00
21. B. F. Preston	55.00
22. W. Tighe, Lyons, Neb.	50.00
23. C. F. Kirk, Ponca, Neb.	500.00
24. H. C. Hall, Brunswick, Neb.	225.00
25. M. S. Moats & Sons, Randolph, Neb.	50.00
26. W. J. Stone, Lyons, Neb.	100.00
27. H. C. Stone, Brunswick, Neb.	125.00
28. J. C. Tighe, Stanton, Neb.	75.00
29. Jno. Galliger	60.00
30. T. A. Gossard, Ponca, Neb.	95.00
31. W. A. Staples, Glidden, Iowa	110.00
32. G. Butler, Bancroft, Neb.	50.00
33. N. Nelson, Bancroft, Neb.	55.00
34. E. F. Larue, Lyons, Neb.	60.00

## Peterson's Duroc Sale.

Mr. W. A. Peterson, of Lyons, Neb., was the last one of the Logan Valley circuit to sell, his date being March 2d. His offering was in good condition and well merited the attention it received. Many of the gilts were of late farrow which accounts for the average being no higher. Many good prospects were sold in this offering, and of the popular families. Several daughters of Dandelion were included and they were the best sellers and we regret to announce that the old hog has quit service, so these were the youngest things ever to be sold sired by him. The sale was a good one, making an average of \$48. Below is a list of sales over \$40.

Roofing troubles! End them with Congo. Leave the old roof there and just lay Congo Roofing over it. It won't cost much; it won't take long.

Everybody who tries Congo likes it the first year; likes it better the second year; is proud of it the third year and gets more enthusiastic after that the longer he waits for it to wear out.

A sample is pretty good evidence. We will send you one free. Ask for it.

**BUCHANAN-FOSTER COMPANY,**  
PHILADELPHIA,

1033 Monadnock Building, - San Francisco.

THE OLD RELIABLE  
..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gear-lug. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

Col. J. L. Luther cried the entire circuit without assistance on the block and did very satisfactory work. We think the circuit will be the same dates next year with the addition of Robbins Bros.

1. Anton Peck, Hartington, Neb.	\$68.00
2. S. M. Ramsey, Lyons, Neb.	50.00
3. Aug. Wellper, Lyons, Neb.	70.00
4. Thos. Dolan, Lyons, Neb.	41.00
5. G. A. Johnson, Oakland, Neb.	53.00
6. S. A. Nelson, Oakland, Neb.	75.00
7. Thos. Dolan	53.00
8. Elmer Reed, Lyons, Neb.	100.00
9. W. J. Stone, Lyons, Neb.	75.00
10. Jno. A. Anderson, Oakland, Neb.	58.00
11. Jno. H. Tryon & Sons, Lyons, Neb.	50.00
12. Anton Peck	50.00
13. Chas. Preston, Lyons, Neb.	49.00
14. S. W. Swanson, Stanton, Neb.	67.00
15. Geo. C. Blessing, Homer, Neb.	60.00
16. E. E. Burns, Laurel, Neb.	50.00
17. S. A. Nelson	53.00
18. Wm. Reed, Lyons, Neb.	57.00

## Geo. Karschner's Sale.

The sale of Duroc Jersey bred sows made by Mr. George Karschner, of Wilcox, Neb., was a very successful event. The entire offering was sold at an average of \$48, with a top price of \$145, paid by Messrs. A. A. & W. G. Karschner for Lot 1 in catalog, a fine two-year-old sow by Robert J. 33.75 and out of a daughter of Improver 2d. The attraction of the sale was the great hog, Journal 3d, first-prize hog at the Kansas State Fair in his class. Sows bred to this hog seemed in good demand. Below is a list of those selling above \$35:

Lot.	Price.
1. A. A. & W. G. Karschner, Wilcox, Neb.	\$145.00
2. A. W. Cox, Bladen, Neb.	67.00
3. F. G. Halberg, Axtell, Neb.	75.00
4. F. D. Huffman, Ragan, Neb.	51.00
5. Same	43.00
6. Same	44.00
7. W. R. Mullin, Abilene, Kan.	60.00
8. J. B. Lane, Wilcox, Neb.	40.00
9. Hopkins Bros., Atlanta, Neb.	82.50
10. A. W. Cox	35.00
11. M. P. Maryne, Bladen, Neb.	45.30
12. Wm. Sanstead, Holdrege, Neb.	79.00
13. J. H. Graves, Bladen, Neb.	40.00
14. F. D. Huffman, Ragan, Neb.	43.00
15. Same	35.00
16. Wm. Sanstead	45.00
17. T. M. Anderson, Oberlin, Kan.	43.00

## FAMOUS BOOK FREE TO EVERY READER.

By special arrangement with Dr. W. O. Coffee, the well-known eye, ear, nose and throat specialist, of Des Moines, Iowa, all readers of this paper can write to the doctor and get one of his new, 128-page books free of charge. This book tells all about the different eye and ear diseases. Gives the symptoms and causes of each. How all eye and ear troubles, including ordinary deafness and falling sight can be cured at home by a simple and inexpensive remedy. Book also tells how to live, diet, bathe, exercise, etc., to prevent eye and ear diseases and numerous other facts which everyone should know. If you want one of these books, simply write the doctor a letter or postal card and mention this paper. The book will be sent by return mail free of charge. Address Dr. W. O. Coffee, 340 Century Bldg., Des Moines, Iowa.

Few people of this state of Iowa realize that in Des Moines is located one of the largest map concerns in the United States.

## BARGAINS IN MAPS.

The Kenyon Map Company have forty-three traveling salesmen on the road all the time and cover every state in the union. In this issue on page 6 they are offering a wonderful bargain in the way of three beautifully colored maps for sixty cents. These maps are no cheap affairs, but would be an ornament to any wall in the best homes in the country. Every town, down to the smallest hamlet is on the map, the population of which is given from the 1905 census. They are printed in seven colors on tough, heavy paper and bound at both top and bottom with heavy metal strips. They are printed distinctly so that, even the railroads can be traced without any difficulty. Owing to the fact that they print these maps by the thousands they are able to make the surprising offer of three for sixty cents. This includes a map of your own state, one of the United States and one of the world. Should you prefer, you can substitute a map of any other state for the one of the world. If you are not perfectly satisfied with your purchase when you see the maps you can return them and your money will be refunded. Mention this paper in your letter today.

## Lands and Homes For Sale.

**No. 1525** 360 acres bottom farm, price \$45.00 per acre; 260 acres line fur alfalfa and corn; 40 acres growing alfalfa; lots of timber, running water; modern, finely finished house with bath room, piped for hot and cold water, furnace heat, cistern and two wells; barn, 20x36; hen house, corn crib and granary, cow shed, 3 small alfalfa fields, fenced hog tight; 100 acres in pasture, 4 wires; other improvements, 2 miles from Stockton, county seat of Rooks County, Kansas; price \$45.00 per acre.

**No. 1526** 400 acre stock farm, 100 acres suitable for farming, (60 acres in cultivation), frame house 1½ story, 14x13 with ell 10x14; barn, 20x30 ft.; granary and cattle sheds, feed lot and scales, timber and running water; joins the above 360 acres. Price of the 400 acres \$6,000.00. Price of the 760 acres \$22,000. I have 37,000 acres of Rooks Co. land listed for sale from \$8.00 to \$45.00 per acre. Write me for lists and county maps. C. H. Dewey, Stockton, Kan.

## 560 ACRES AT A BARGAIN

I AM offering an especially good bargain in a 560 acre farm, and will give good terms on it, too. The farm is exceedingly well improved, all suitable for cultivation, gently rolling, plenty of water with windmill and gas engine power, near good railroad town and school. All fenced and cross fenced. Price \$67.50 per acre. This is a genuine bargain and will not last long. Write today for particulars. Geo. C. Hunter, 317 Iowa Loan & Trust Bldg., Des Moines, Iowa.

**FOR SALE OR EXCHANGE:** 300 acres Mer county, Missouri, improved, good land. 246 acres Henry county, Missouri, good new improvements, productive soil. Write for description and price. Box 151, Independence, Iowa.

**FOR RENT OR EXCHANGE** 640 Wilkin Co. Minn., about ½ plow land, fair 5-room house, large barn; share rent or willow, for other property, live stock or merchandise. Will give good deal. Box 81, Independence, Iowa.

**IOWA LAND CHEAP** 300 acre farm, 4 miles from city, good improvements, good timber, a snap. Must be seen to be appreciated. \$25 per acre. Theo. Kerndt, Lansing, Iowa.

The Kenyon Map Company have forty-three traveling salesmen on the road all the time and cover every state in the union. In this issue on page 6 they are offering a wonderful bargain in the way of three beautifully colored maps for sixty cents. These maps are no cheap affairs, but would be an ornament to any wall in the best homes in the country. Every town, down to the smallest hamlet is on the map, the population of which is given from the 1905 census. They are printed in seven colors on tough, heavy paper and bound at both top and bottom with heavy metal strips. It is surprising how many of our farmer friends are investing in northern and Texas lands. Many of these farmers are leaving their old homesteads where they have lived since childhood to take up the more strenuous lives of those in these unsettled districts. If you are one of those people who has decided to move to some point north or south, or to the coast, address L. Lock Box 299 and they will quote you wonderfully low rates on freight. This is an old and reliable firm in which you can place the greatest confidence. Write them today. Their advertisement appears on page of this issue.

When you buy roofing you expect it to last, don't you? You don't want to be incessantly patching little leaks after every rain. Isn't this just what you are doing now? You have had some experience with tin and shingle roofing.

Are you satisfied with their lasting qualities? BEACON-ITE is a long wool fibre thoroughly saturated with a secret preparation that makes it absolutely water-tight.

It will not rot or rust. By buying direct from the mills and putting it on yourself (we furnish all necessary nails and cement free), Beacon-ite is the most inexpensive roofing you can buy. If you want a roofing that will last and need no patching, write to-day for FREE samples of BEACON-ITE.

BEACON-ITE MILLS, Dept. 4, St. Louis.

An Only Daughter  
Cured of Consumption

When death was hourly expected, all remedies having failed, and Dr. H. James was experimenting with the many herbs of Calcutta, he accidentally made a discovery, which cured his only child of consumption. His child is now in this country and enjoying the best of health. He has proved to the world that consumption can be positively and permanently cured. The doctor now gives this recipe free, only asking two two-cent stamps to pay expenses. This herb also cures Nausea at the Stomach, Night Sweats, and will break up a fresh cold in twenty-four hours. Address Craddock & Co., 1032 Race St., Philadelphia, Pa., mentioning this paper.

BUY A SILO  
AND SAVE MONEY.

Read what Mr. T. E. Gunder of Ames, Iowa, says:

"In regard to the Silo I bought of you last year, I put about 100 tons of corn in it. I have enough ensilage to feed thirty cows six months giving them a liberal feed. They are making \$15.00 a week more than they did last winter, and my feed is not near so expensive. I would not think of getting along without a Silo any more than I would without a barn. Everything on the place likes ensilage. Tell the farmers to buy them; they are all right."

Write today for a copy of our Free Book.

**H. C. HARGROVE,**

316 E. Walnut St., Des Moines, Iowa

CLOVER \$8.25, Timothy \$2.00 per bushel, f.o.b. Mitchellville. Polk county grown and reclaimed. Sacks 21 cents extra. Order at once. Reference, Citizens State Bank. McKEE, CRAIG CO., Mitchellville, Iowa.

# LANDS AND HOMES FOR SALE

## The American Northwest

Produced, during 1906, such an abundant crop that the railroad facilities were inadequate to haul it to market. That tells a story that certainly is credit enough for any section. The stories of a hard winter and hardships, particularly in North Dakota, were not well founded. There was so much freight to haul into and out of that state and the state had grown so productive and prospered so rapidly that the means for transportation could not possibly develop as fast as did the energetic people of North Dakota. That state has been maligned more than any other country, yet has made such strides in the advancement in every line that it was impossible to keep pace with the development of that state. Farm lands are rapidly advancing, and I am here to say, editorially, that there has been no recession in the prices of farm lands in the American Northwest on account of the weather or inadequate railroad facilities, but, on the other hand, prices have steadily advanced, are advancing, and will still further advance to a figure double the present prevailing prices.

I would like to impress upon you the fact that our own state, Minnesota,

has been neglected, and that today she offers more of the rich bargains and more satisfactory investments than are to be found anywhere else in the world. Do not lose sight of the great possibilities of our own state while in search of an investment and a home.

If you have five hundred dollars, one thousand dollars, two thousand dollars, five thousand dollars or ten thousand dollars, and you want it working, consult us on our "Half-Profit" contract. It will make you money—often from 20 to 100 per cent on your investment, and it is safer than any savings bank in the world.

A man has not lived up to the measure of his opportunities unless he owns a piece of mother earth.

I would be glad to explain anything in the nature of a land investment that you may want to know, and I think I am an authority on land, land values and land investments. I would be glad at any time to give you the benefit of my information and experience.

# Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No  
Capital, and Now Employs Nearly  
One Hundred Clerks and  
Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned In  
Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

## Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5425, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

ket fixtures. Been in use only six  
months. Oak cooler, built like front with French  
mirrors. Address, Box 205, Ottumwa, Iowa.

## The Steele Short-horn Sale.

The sale of Mr. C. R. Steele, at Ireton, Iowa, on March 12th, proved a great drawing card, and not since the days of old have better prices been realized. It was another evidence of good cattle and a liberal amount of printers' ink, and this combination brought the crowd. The two days' sale netted him \$20,140 or an average of \$180 on 112 head. Dora Marr 6th, a Erosky Dorothy, topped the sale at \$525, and was bought by Mr. F. O. Loudon, of Oregon, Ill. The top on bulls was \$350 for Banff 6th, a yearling son of Lord Banff 3d, and was bought by Mr. O. S. Olsen, of Laurens, Iowa. Mr. T. R. Davidson, of Randolph, Neb., bought Prince Victor 258985, a son of Earl Victor and out of a daughter of Fitz Eustace, at \$300. He was one of the best propositions in the sale. Messrs. Carey Bros., of Deuver, Colo., were good buyers, as were also Messrs. Geo. H. White, Emerson, Iowa, and George Allen, Lexington, Neb. Cois. George P. Bellows and Carey M. Jones cried the sale. Below is a report of those bringing \$100 and over:

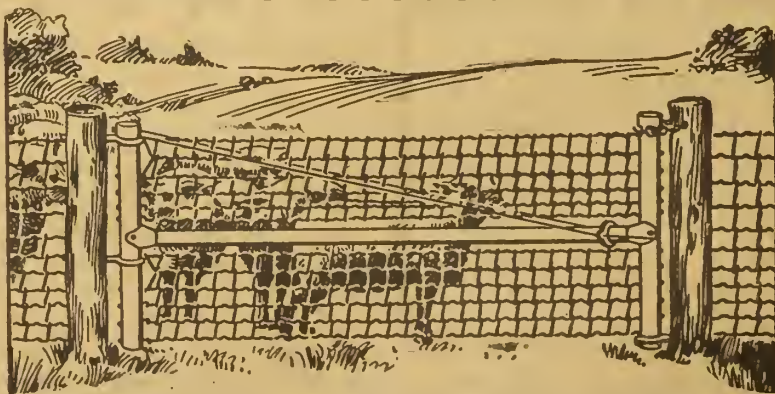

Imp. Coral Countess and c. c., Geo. H. White, Emerson, Iowa	\$385.00
Miss Clarence, two years, H. H. Powell, Linn Grove, Iowa	400.00

Diamond, ten months, P. Camlin, Carns, Iowa	100.00

## Ben M. Bell's Poland China Sale.

Mr. Ben Bell, of Beattie, Kan., held another successful sale of those big-boned Poland China bred sows on March 16th, selling fifty-three head at an average of \$46.30. These were sows that were bred for late litters, mostly for May and June farrow. No high prices were paid, the top being \$85, paid by Mr. W. E. Long, of Ozawie, Kan., for a fall yearling. Mr. Jno. Warner, of Beattie, Kan., was a heavy buyer, taking several bunches of three at good, round prices, one lot of three going to him at \$50 per head and another at \$60 per head. Mr. C. McCoy, of Beattie, Kan., was also a heavy buyer. Mr. W. A. Prewitt, of Asherville, Kan., bought a bargain or two, as did Mr. A. B. Garrison, of Beattie. Practically everything went to Mr. Bell's neighboring farmers, which shows how his hogs are appreciated by the farmers of one of the greatest hog-producing counties in Kansas. These farmers know the kind Mr. Bell breeds and have confidence in them as money makers for pork purposes, as well as for the breeder. With a top of \$85 and a bottom of \$30 shows the evenness of the offering. Col. T. C. Callahan did effective work on the block. Following is a list of all sales:

	Price.
1. G. W. Smith, Parnell City, Neb.	\$82.50
2. F. M. Jones, Beattie, Kan.	61.00

The farm gate question is of vital interest. Every farm that has only one harvester, rake or planter, often has a dozen gates. The harvester and rake are each used in its season, but the gates are used the whole year round. Most of them are only makeshifts. The fact is, the gate should be carefully made. They should be stronger than any fence, because cattle give them harder use. Good gates are so hard to make from the poor lumber we get these days that it seems iron and steel must be used in the farm gates of the future. What you want on your farm is good gates—gates of which you may be proud. Besides, when your stock gets out and tramples down the corn and growing grain, is the poor gate economy? You pay out hundreds of dollars for machinery because they save you work and trouble. Then why not buy gates that will save you hardship and grief? The Iowa Gate, made by the Iowa Gate Company, Ninth St., Cedar Falls, Iowa, seems to have solved this trouble. It is stated that 50,000 have been put out in the last few years. The users not only find them strong and durable, but light and easy to handle. They are made from special high carbon steel tubing. A twelve-foot gate can easily swing with several men hanging on it. But besides, Iowa gates will swing either way, will raise over uneven or sloping ground. In the winter the entire gate can be raised over any snow. They certainly give a farm a fine appearance, and, being so low in price, we believe it would pay all our readers to write the company for their literature. You take no chance in ordering from the Iowa Gate Company, because they not only guarantee their gates, but guarantee that you will be satisfied with your purchase. Write them for their new twenty-page catalog. Remember their address is Ninth Street, Cedar Falls, Iowa. See their advertisement on page 19 of this issue.

## Porter's "Meadow King" Hay Carrier

Has wide open mouth, with swinging fork pulley. With this Carrier you can fill the mow closer to the roof of barn than with any other Hay Carrier. The throat of the Carrier has a very large opening, which permits the pulley to approach with a swinging load, and the load can swing in either direction when locked in the Carrier.

J. E. Porter Co., - Ottawa, Ill.

## FARMERS AND STOCKMEN

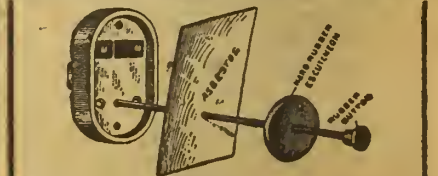

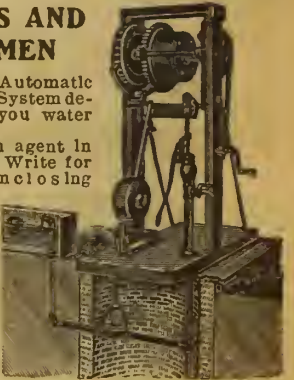

The Myers Automatic Water Supply System designed to give you water at all times.

We want an agent in each County. Write for information, enclosing Postage for reply. Address,

Myers Pump & Mfg. Co.,

Beals Bldg. 9th & Wyandotte, Kansas City, Mo.

What town wants our Factory?

The want of the telephone user is met in the J. W. Pedigo Arrestor or Disconnecter. Write to the inventor today and get his circulars and prices.

J. W. PEDIGO, Lucas, Iowa.

## FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

THIS machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE, Blandinsville, Illinois

## The Omaha Angus Sale.

The sale of Aberdeen Angus cattle held at Omaha, Neb., on March 12th and 13th, under the management of Mr. Hal T. Hooker, of Maryville, Mo., was not largely attended and many good bargains were picked up. The top of the sale was \$500, paid by Mr. Charles Smith, of Edholm, Neb., for Lot 1, Blackbird Benton, the three-year-old show bull consigned by Messrs. C. D. Hooker & Son, of Maryville, Mo. Mr. Smith

# PILES

## FISTULA--NO MONEY TILL CURED

C. B. Hawkins, Dry Goods Merchant, Canton, Mo., writes: "March 15, 1902. With the utmost pleasure I take of your cure for Fistula and Piles. I am cured, well and sound. secured a great bargain in this bull, as he has proven an unusually good breeding bull. The top female of the offering also came from Messrs. Hooker & Son's herd and was Lot 2, Blackbird of Cherokee 19, that sold for \$185, going to Messrs. Christian & Lang, of York, Neb. Several buyers took from three to a car load, Mr. Charles Smith being the heaviest buyer. Some very thin cattle were offered, and these sold low. The consignors to the sale were Parish & Miller, Hudson, Kan.; Oliver Hammers, Maivern, Iowa; Wheatley & Ward, King City, Mo.; C. D. Hooker & Son, Maryville, Mo.; Davis Bros., Maryville, Mo.; N. M. Pettit, Overton, Neb.; R. L. Milton, Stafford, Kan.; J. B. Robinson & Co., Maryville, Mo.; J. H. Mayne, Council Bluffs, Iowa. Colonels Woods, Igo and Harding conducted the sale in a very satisfactory manner. Following is a list of all sales over \$100:

13. Wm. Fasburt, Alton, Iowa. ....	50.00
14. Snider Bros., Le Mars, Iowa. ....	46.00
15. C. R. Steel .....	40.00
16. Q. Irwin, Ireton, Iowa. ....	63.00
17. Jno. Smieder, Remsen, Iowa. ....	42.00
20. R. H. Perry, Carroll, Neb. ....	73.00
21. Jno. Heeron .....	42.00
26. Wm. Linsey, Merrill, Iowa. ....	40.00
29. P. Leebouts, Alton, Iowa. ....	48.00
39. C. R. Steel .....	55.00
40. C. H. Runger, Sheldon, Iowa. ....	40.00
45. Chris Grotewell, Larchwood, Ia. ....	51.00
48. Jno. Heeron .....	45.00
49. C. H. Runger .....	45.00

Many of the sows were bred late or the average would have been much better.

### OKLAHOMA LANDS \$15 TO \$40 PER ACRE.

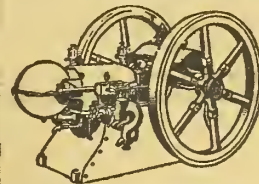

Mr. A. J. Waidock, of the firm of A. J. Waidock & Co., of Oklahoma City, Okla., a practical farmer and real estate dealer, in starting his advertisement in this issue states that he has several good farms for sale that would make more money for you than the best lands in Iowa, Missouri and Nebraska. At present he is personally farming 1,500 acres of land near Tuttle in the Chickasaw Nation with excellent results. This land produced for him last year as high as eighty bushels of corn, ninety-seven bushels oats and sixty-seven bushels of barley to the acre, and at present he is preparing ground for the sowing of 400 acres of alfalfa, which

is grown in that section in abundance. There is no state in the union which affords the farmer better investment for his money than the new state. Mr. Waldeck will take pleasure in showing you the farm which has produced for him such remarkable acreage as shown above and he has similar lands for sale which are just as productive as this one. The prices range from \$15 to \$40 per acre. It will pay you to look up his advertisement in this issue on page 27 and he will be pleased to send you map and any information you desire. The better way is for you to go and see for yourself or write him today. Kindly mention this paper when writing.

### OUR NEW STATE.

#### Fascinating Facts For Farmers.

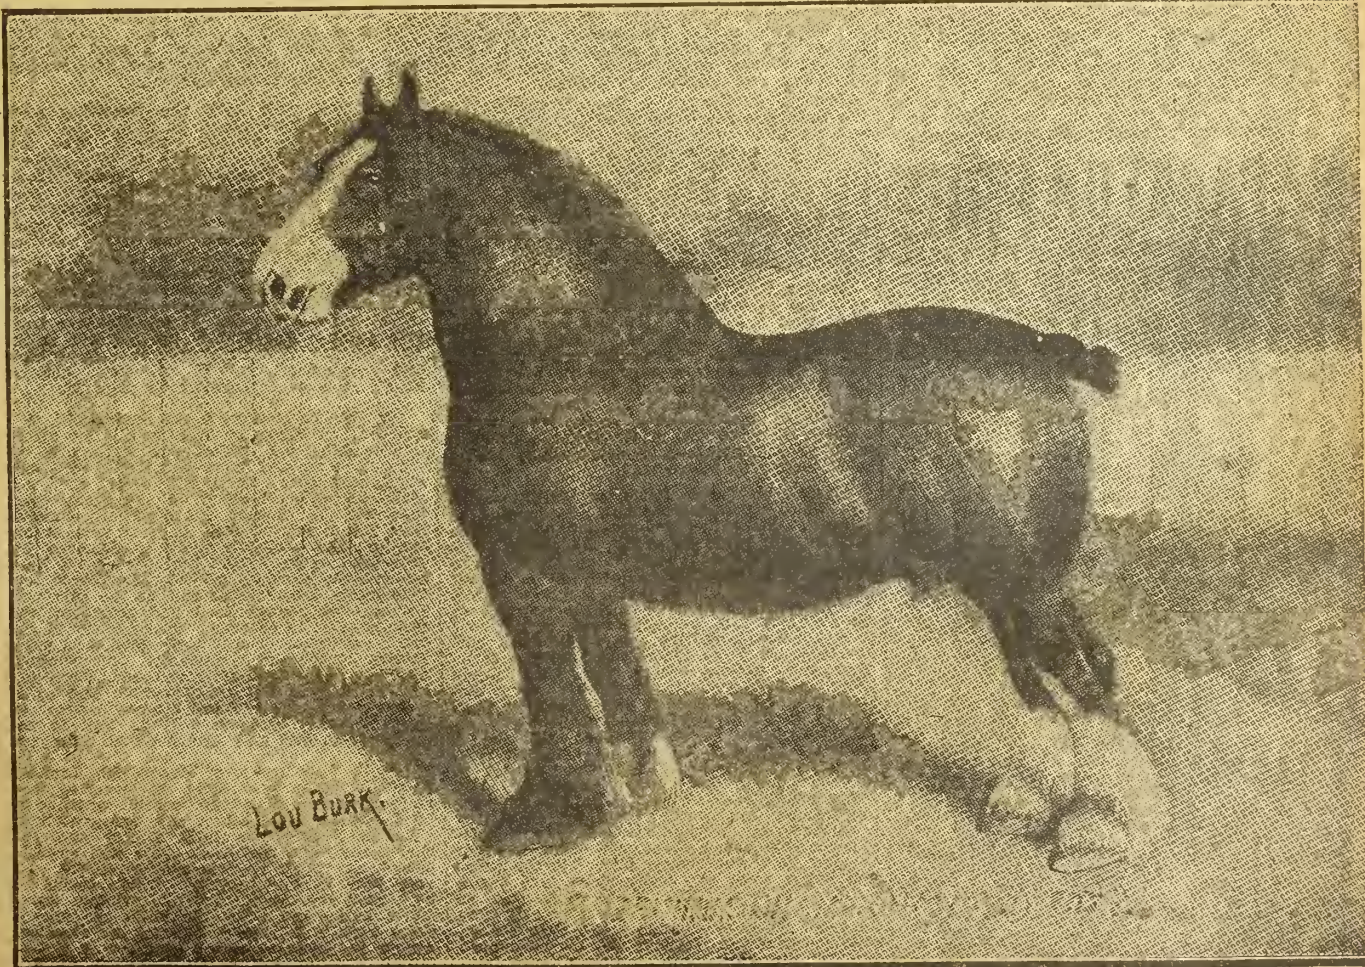

In the transition from federal rule to state government, the Indian Territory joins the sisterhood of commonwealths possessing the advantages that no other territory upon its entrance into the Union, ever offered the settler. Rich agricultural lands, a mild climate, plentiful rain fall, a net-work of railway, gold, silver and lead; biggest oil fields in the Union. Our entire surface is underlaid with a fine strata of coal. What else could a homeseeker want?

The Weekly New-State Tribune tells you

all about it at \$1 per year. Send twenty-five cents in stamps for sample copy and county map of the new state of Oklahoma. Address New-State Tribune, Muskogee, Ind. Ter., Dept. 12.

### HOMES IN THE NORTHWEST.

Why not settle on the government land, or low-price farm lands that are improved, in South Dakota; thus staying near at hand instead of journeying to a distant region where the climatic conditions and social surroundings are widely different? Special low rates are in effect the first and third Tuesdays of each month to all South Dakota stations on the North-Western Line. It will pay you to investigate. New lines are opening up extensive territory to development, creating the chance of a lifetime. Ask your ticket agent to give you full particulars, with maps, pamphlets, and complete information regarding railroads rates and the steps necessary to secure government land free.

Imported Shire stallion owned by Trumans' Pioneer Stud Farm, Bushnell, Ill., and Kansas City, Mo. The entire lot of stallions to be sold at auction on Wednesday, March 27th, have been imported by Messrs. Truman and are worthy representatives of the stallions to be found in their barns at either Bushnell, Ill., or Kansas City, Mo.

# I Am the Paint Man

## 2 Full Gallons Free to Try—6 Months Time to Pay

### I Guarantee Freight Charges.

I AM the paint man. I have a new way of manufacturing and selling paints. It's unique—it's better. It revolutionized the paint business of this country last year.

Before my plan was invented paint was sold in two ways—either ready-mixed or the ingredients were bought and mixed by the painter. Ready-mixed paint settles on the shelves, forming a sediment at the bottom of the can. The chemical action in ready-mixed paint, when standing in oil, eats the life out of the oil. The oil is the very life of all paints.

Paint made by the painter cannot be properly made on account of lack of the heavy mixing machine.

My paint is unlike any other paint in the world. It is ready to use, but not ready-mixed.

My paint is made to order after each order is received, packed in hermetically sealed cans with the very day it is made stamped on each can by my factory inspector.

I ship my thick pigment, which is double strength, freshly ground, in separate cans, and in another can, I ship the pure, old process Linseed Oil—the kind you used to buy years ago. Any child can stir them together.

I sell my paint direct from my factory to user—you pay no dealer or middleman profits.

### My \$100.00 Cash Guarantee

I guarantee, under \$100 Cash Forfeit, that the paint I am offering you does not contain water, benzine, whitening, or barytes—and that my Oil is pure, old-fashioned linseed oil and contains absolutely no foreign substance whatever.

I guarantee the freight on six gallons or over. My paint is so good that I make this wonderfully fair test offer:

When you receive your shipment of paint, you can use two full gallons—that will cover 600 square feet of wall—two coats.

If, after you have used that much of my paint, you are not perfectly satisfied with it in

every detail, you can return the remainder of your order and the two gallons will not cost you one penny.

No other paint manufacturer ever made such a liberal offer.

It is because I manufacture the finest paint, put up in the best way, that I can make this offer.

I go even further. I sell all of my paint on six months' time, if desired.

This gives you an opportunity to paint your buildings when they need it, and pay for the paint at your convenience.

Back of my paint stands my Eight-Year officially signed, iron-clad Guarantee.

For further particulars regarding my plan of selling, and complete color card of all colors, send a postal to O. L. Chase, St. Louis, Mo. I will send my paint book—the most complete book of its kind ever published—absolutely free. Also my instruction book entitled "This Little Book Tells How to Paint" and copy of my 8-year guarantee.

**O. L. CHASE, The Paint Man.**  
Dept. 27 St. Louis, Mo.

**NOTE—My 8 Year Guarantee Backed by \$50,000 Bond.**

reasonable price should write Mr. Rogers at once.

Messrs. C. W. Daws & Son, of Harlan, Iowa, are offering four good young Scotch bulls for sale. They also have a few other good young bulls which they are pricing very reasonable. Write them or go and see these bulls.

Mr. A. B. Clark, of Wayne, Neb., will make a public sale of Short-horn cattle at that place on June 1, at which time he will sell a lot of good females and a good bunch of bulls. We will call our readers' attention to what Mr. Clark will sell in due time.

Messrs. Hart Bros., of Osceola, Iowa, importers and breeders of draft stallions and mares, in remitting for advertising already done, say: "We have had a good sale this winter and our third importation is now in our barns and are all in good condition." See their advertisement on page 38 of this issue.

Mr. L. R. Kune, of Adrian, Mich., has Jersey bulls, cows and heifers for sale as per advertisement found on page 36. Mr. Kune's herd has been established from the best blood and contains many of the best individuals. Visitors are always welcome and correspondence in regard to his stock is solicited.

Mr. A. R. Campbell, of Independence, Iowa, has forty yearling Hereford bulls, also cows and heifers. These must be sold to make room. Mr. Campbell states in his advertisement on page 36 that there are no better at any price and that he can give Homestead readers bargains. He also has a young Percheron stallion for sale.

Messrs. P. S. & S. Barr, of Davenport, Iowa, have a change of advertisement on page 36. They offer a few good Shorthorn and Polled Durham bulls and heifers for sale; also one good Poland China boar, eleven months old, in good breeding shape. They report a good trade in both cattle and hogs this season.

Mr. G. M. Scott, of Rea, Mo., has twenty-five black jacks, ranging in age from one to six years, that he is offering for sale in his advertisement on page 35 of this issue. Mr. Scott makes the announcement that the jacks are as good as are bred and that he makes a specialty of breeding for size, head, ears, bone, feet and constitution. Write him or visit him and inspect his stock.

Messrs. J. Crouch & Son, proprietors of the Lafayette Stock Farm, of Lafayette, Ind., writing under recent date, say: "We had a large importation of Belgian and Percheron stallions and Belgian and Percheron mares arrive March 18th. We now have over 200 head of high-class stallions and mares in our barns and can suit anyone in need of stallions or full-blooded imported mares of any of the above breeds." Their advertisement appears on page 40.

Messrs. J. L. Slick & Son, of Lanark, Ill., have for sale two excellent Percheron stallions that are right in every way. One is a three-year-old, black, and the other is coming three and is a beautiful gray in color. These gentlemen are engaged in the breeding of Percherons and are pricing these stallions right. If any of the readers of The Homestead want a good stallion ready for service, they should write these gentlemen at once for prices and description, kindly mentioning The Homestead.

Messrs. Taylor & Jones, of Williamsburg, Ill., write us regarding their late sales as follows: "Our new importation of stallions reached our barns Saturday, March 9th, safe and sound and each horse is on his feed and ready for sale. This importation is by all odds the best lot we ever imported. We have recently sold to Mr. N. M. Stoner, of Mt. Comfort, Ind., an extra good two-year-old imported Shire stallion. Mr. John Braucht, of Aledo, Ill., buys one of our best American-bred two-year-old Percherons. Mr. Louis Long, of Cowden, Ill., bought a very fine three-year-old imported Shire stallion, and Mr. M. C. Pantlen, of Stanford, Ill., gets an American-bred Percheron that will be a credit to him and his people. Messrs. Wilson & Wheligan, of Regina, Canada, get a fine American-bred Shire stallion. Mr. James Auld, of Wakefield, Kan., after visiting leading importers, bought the best coming three-year-old imported Percheron stallion we ever owned. Not only was this horse the best Mr. Auld could find, but the price was below what the crack show men asked for such a horse. Dr. W. C. McMackin, of Raleigh, N. C., gets an exceptionally fine imported Hackney stallion. Dr. Tait Butler, state veterinarian, Raleigh, N. C., purchased one of our very best American-bred two-year-old Percheron stallions and a three-year-old Percheron mare for the agricultural college of that state. Dr. Butler knows a horse when he sees him and is awake to the class of horses to breed. Mr. John M.

Anthony, of Pleasant Plains, Ill., buys one of our best imported Percheron stallions."

Mr. N. A. Lind, of Rolfe, Iowa, is offering some splendid young Short-horn bulls for sale.

Messrs. James Wilson & Sons, of Avoca, Iowa, well-known Polled Durham breeders, write as follows: "We have had a good demand for Polled Durham bulls, and have a few nice ones now on hand. We have just sold a very fine bull to Mr. W. H. Bullinger, of Carroll, Neb. His sire is Marshal of Orange and his dam is Moss Rose of Elm Grove. We will make a public sale of one, two and three-year-old heifers on October 30th, at which time we will sell some of the best Polled Durham heifers ever sold at public sale." Anyone wanting a young Polled Durham bull should write Messrs. Wilson & Sons at once. They will treat you right.

Messrs. Manley & Co., of Lyons, Neb., write as follows: "We now have an extra good lot of fall boars for sale sired by Proud Advance and Junior Jim, and out of Orion and Dandelion dams. This is the same combination in blood lines that has produced the great sow, Alix II., that is the highest-priced Duroc Jersey sow in the world, and Proud Lady, that has been one of the best money makers of the breed. These pigs are growthy and have good length and plenty of bone. These are fit to head good herds and we are pricing them right. There is as much prospect for these as there was in Alix and Proud Lady at the same age. Tell Homestead readers to write us about these at once."

Messrs. Manwaring Bros., of Lawrence, Kan., breeders of Berkshire swine, in remitting for advertising, write: "Our hogs are doing well and pigs are commencing to arrive. Our recent sales are fifteen head of gilts and boars to Mr. C. E. Sutton, of Lawrence, Kan.; three gilts to Mr. John R. Hodel, of Savannah, Mo.; one boar to Mr. Allen Kratz, of Michigan Valley, Kan.; three gilts to Mr. Wm. McConnell, Linwood, Kan.; one gilt to Messrs. Raymond Bros., Lawrence, Kan. We purchased a fine young sow at the Harris & King sale, sired by Lord Lee and bred to the \$1,000 boar, Baron Duke 92d. We are looking for a good pig crop this spring. Have a few pigs of November and December farrow for sale."

We have just seen the following testimonial which we print, as it may be of interest to some of our readers. The firm manufacturing this remedy is the Agricultural Remedy Company, of Topeka, Kan.: "Agricultural Remedy Co., Topeka, Kan. Gentlemen:—In regard to your inquiry concerning the package of Anti-Scour I purchased of you I desire to say that I have not had an opportunity to use it on my pigs, but did use it on some calves that were scouring and one of them died before I got to use it, but on the others two doses cured them sound and well. If my pigs are troubled at any time I shall not hesitate to use Anti-Scour and shall always have it on hand and recommend it. W. A. Hoy, Auburn, Kan." See advertisement on page 17.

Mr. W. C. McGavock, of Springfield, Ill., writes: "Preferring to give all my attention to one good auction rather than to divide it on two, I have abandoned the sale at Kansas City, April 3d to 5th, and will make an unusual effort on the great event that will be brought off at South Omaha, May 1st to 3d. Omaha is, just now in my opinion, the best sale place in America for pure-bred cattle of the best breeds. I have secured the services of Colonels Woods and Bellows as auctioneers, and as the sale will be thoroughly advertised and promoted, the success of it is assured. The quality of the cattle consigned is absolutely good, and more entries of the same character are solicited. Aberdeen Angus, Short-horns and Herefords will be sold in the order named, and as it is the last auction of the season to occur at South Omaha, breeders will do well to remember the fact and send me their entries."

Mr. F. A. Murray, of Mazon, Ill., breeder of Polled Durham cattle, in ordering the re-insertion of his advertisement, which will be found on page 38 of this issue, writes: "We have passed a mild winter and yet spring time and the green grass will be well-comed, as rough feed is getting scarce and very high in this locality. There seems to be a good demand for Polled Durhams, especially bulls, and after the bulls are placed there usually follows a demand for females. Among recent sales were a good cow, a three-year-old heifer and a yearling bull to Mr. Ed Elchhorn, of Elchhorn Bros., West Point, Iowa. Mr. Elchhorn was looking for something good and was not long in picking them out after visiting other herds and making his second trip to our farm. They brought good

prices, but will prove a good investment in their hands, as they seem to be practical cattle men. I still have a few hulls and several females to spare and will make bargain prices on them, to make pasture room, if taken soon."

Mr. A. O. Stanley, of Sheridan, Iowa, breeder of Short-horn cattle, writes: "I wish to report that the Short-horn bulls consigned by me to the Sioux City combination sale, March 8th, were fairly well appreciated by the breeders present. Scottish Banker, sixteen months, went to Mr. J. L. Ruby, of Beresford, South Dakota, at the top price of the sale, \$225; Belmont 3d, twenty months, to Mr. J. R. Porter, of Carroll, Neb., at \$175, and was surely a bargain; Redmont went to Messrs. Schwab & Osborn, of Danbury, Iowa, at \$215. They were the three top in the sale and all sired by Rosemont 182902 and out of dams by Valley Knight and were a wonderful even, thick-fleshed lot. The fine Hereford hull, Vulcan, consigned by Mr. Jesse Engle, of this place, a son of Imp. Ross, was the top of the entire three days' sale, going to Mr. W. W. Clark, of Yetter, Iowa, for \$260. He would have been an attraction in any sale and will surely do his buyer lots of good." See advertisement on page 34.

A few very good Poland China sows bred for March, April and May farrow are offered for sale on page 38 of this issue by Messrs. J. L. Slick & Son, of Lanark, Ill., and will be priced worth the money. There is not as much danger in buying a sow well along with pig and having her shipped as there is buying a sow just bred, so that any of our readers who want pigs to farrow the last of this month or the very first days of April will do well to write these gentlemen at once. Their herd represents the best blood of the Poland China breed, and Messrs. Slick have for many years been supplying many of the readers of this paper with Poland Chinas, and have yet to receive the first complaint. Satisfaction is guaranteed and we take pleasure in recommending this firm and their stock to the readers of The Homestead. Write them at once if needing bred sows. A few late fall boar pigs are also offered for sale. They weigh from sixty to 200 pounds and are sired by Prince Charming, one of the best sons of the champion boar at the Iowa State Fair, Prince Alert, others sired by Challenger, a full brother to many of the winners at the leading shows. These boars can be shipped at once and the express charges be very small, and the boar grown along until fall. There are a number of show prospects in this bunch of boars.

## SEPARATOR FREE

FOR A 1975 TWO MONTHS' TRIAL

WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have received the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER. \$19.75 buys our wonderful 1907 model Dundee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dundee, is guaranteed the best separator made, regardless of name or price, and is sold at a small part of the price others ask for high grade separators; and we guarantee our Economy to have greater capacity, to skim closer, skim cold milk, run easier and not get out of order, wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you from the day you receive it, and will always furnish you any needed repair or part in the years to come, promptly and on a few days' notice.

**PRICES NOW GREATLY REDUCED.** OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a Catalogue and all your new offers, and our great 1907 cream separator proposition will go to you by return mail, free and postpaid. We have two big cream separator factories and can sell you a machine on a two months' free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save), at a lower price than you ever thought possible. If you buy from us you get our free Profit Sharing Certificates and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address: **SEARS ROEBUCK & CO., CHICAGO**

Write for prices and other information to the above named gentlemen as announced in their advertisement on page 38 of this issue.

Mr. Aubrey Smith, of Keosauqua, Iowa, has 300 head of native steers weighing 950 pounds, which he wishes to sell by April 1st. For a quick sale he will give the buyer a bargain. See advertisement on page 32.

Clover and timothy seed grown in Polk county, Iowa, which has been re-cleaned, is offered for sale in the advertisement of Messrs. McKee-Craig Company, of Mitchellville, Iowa, which appears on page 26 of this issue.

Messrs. Judy & De Lashmutt are offering a registered Percheron stallion for sale on page 32 of this issue. They write that this animal is a good, heavy-boned horse, a good breeder, has lots of quality and if not sold before April 10th, will be used by themselves this season.

Mr. A. F. Hager, of Avoca, Iowa, has some choice young Hereford bulls ranging in age from eleven to twenty-four months that are well bred and good individuals, which he is offering for sale in his advertisement on page 32 of this issue. He also has for sale the imported bull, Islam 145736.

Those who expect to rod any of their farm buildings will find the Sweeney Grub Company, of Cresco, Iowa, ready to submit them a good proposition. They guarantee their work and put up only a first-class article. Write for particulars to this firm or see their advertisement on page 29. Please mention The Homestead when writing.

#### YOUNG CLYDESDALE STALLIONS FOR SALE.

Anyone in the market for young Clydesdale stallions should get in connection with Mr. A. Bailey, of Anita, Iowa. One of the stallions is a two-year-old and the other two are three years this spring. Their breeding is given on page 38. Mention The Homestead.

#### A GOOD SHORT-HORN BULL FOR SALE.

Anyone wanting an extra good young Short-horn bull should write to Mr. C. R. Warren, of Glenwood, Iowa. He offers to sell Banner's Victor 242584, the second-prize yearling bull at the Iowa State Fair. He is a roan, just past two years old, an extra individual and a bargain. Write Mr. Warren or go and see this young bull.

#### BANNER'S VICTOR 242584 FOR SALE.

A splendid two-year-old Short-horn bull is offered for sale by Mr. C. R. Warren, of Glenwood, Iowa. He is the second-prize yearling bull at the Iowa State Fair in 1906, is a roan in color, a most excellent individual and a grandson of old Cumberland. Mr. Warren owns his sire and can therefore spare him. Write or go and see him.

#### PUT THIS IN YOUR 'PHONE.

Soon the season for electrical storms will be here and those who have telephones in the house know what an annoyance it is to have the 'phone crack and pop. There is always more or less danger of lightning following the wire to the house and doing much damage and even killing people. A good lightning arrester is advertised in our columns, and those who are cautious and fore-handed will investigate this device for preventing damage from lightning. Write for particulars to Mr. J. W. Pedigo, Lucas, Iowa. Please mention The Homestead when writing.

#### H. L. REED HAS GOOD BRED GILTS FOR SALE.

We wish to announce to those interested in Duroc Jersey bred gilts that Mr. H. L. Reed, of Sumner, Neb., has a number of good ones on hand that he will price right if taken at once. They represent the most noted families known to this breed and are in the proper condition to do the purchaser good. The dams of these gilts are daughters of such noted boars as Orion, Top Notcher, Echo King, Ohio Chief and other noted boars. If you are in need of anything in this line write Mr. Reed and see what he has to offer.

#### PIKE COUNTY JACK FARM'S GREAT JACK AND JENNET SALE.

On Thursday and Friday, April 11th and 12th, at the Pike County Jack Farm, which is located near Bowling Green, Pike county, Mo., the Pike County Jack Farm Company, owned and managed by Mr. Luke M. Emerson, will hold a two days' sale of jacks and jennets. For this sale seventy-five of the greatest jacks ever owned at the Pike County Farm will be sold. The man hunting for jacks should get busy, as there are not enough in the country to supply the demand this spring. Twenty-five jennets will also be sold. Some of these will have jack colts at foot and all will be in foal. The writer is going over to Bowling Green and next week we will tell you what we

see there. Write today for a catalog and address the Pike County Jack Farm, as per advertisement on page 36. Also kindly remember to say you saw the advertisement in this paper.

#### JAS. A. & S. E. NIBLO'S SALE OF PERCHERONS AND SHIRES.

The sale of Percheron and Shire stallions and mares to be held at Milan, Mo., on Tuesday, April 24, by Messrs. Jas. A. and S. E. Niblo, is one at which buyers will set the price, as these gentlemen have sold their farm and must now close out their breeding stock. These gentlemen also sell a Mammoth black jack, seven years old, and said to be one of the best jacks in Sullivan county, Missouri. Messrs. Niblo have bred draft horses for several years and must quit just at a time when their stud had gotten to such a size as to make their breeding business very profitable. The man wanting good, clean horses should be on hand. See page 39 for their advertisement and write for catalog.

#### A. H. BRETT'S PERCHERONS AND CLYDES.

The above well-known breeder is now offering some splendid bargains in stallions at his farm in the edge of Mason City, Iowa. Six Percherons, mostly two and three-year-olds, and either blacks or grays, are on hand and will be priced very reasonable, considering quality and individuality. No one can afford to miss this offer if a stallion is wanted. Two of the Clydes are young—one and two years old. They are marked right and promise to grow into big horses when mature. Three Clyde mares are also being offered, bred to Heir of Fame, a first-class imported stallion. Write for further particulars to Mr. A. H. Brett, of Mason City, Iowa. Mention The Homestead when you write and see page 39 for the advertisement.

#### THE SHANNON CITY ANGUS SALE.

On Wednesday, April 3d, Mr. T. A. Stevenson, one of the oldest breeders of Aberdeen Angus cattle in southern Iowa, and Mr. S. G. Smith, his son-in-law, will make a public sale at the Smith farm, two and one-half miles south of town. Mr. Smith is closing out his herd owing to the health of his wife, and he will sell everything, including herd bulls. There will be thirty-five head in the sale, fifteen of which will be bulls. The cattle will be in their every-day clothes and have not been pampered nor fitted especially for this occasion. They are therefore in the best possible shape for those who buy from them. They are selling their three-year-old Trojan Erica bull, Elidure 73161, and he will be one of the bargains in the sale. He is a Black-bird topped Trojan Erica, a good individual and a splendid breeder. Whoever gets him will get a good bull, and one that will do them a lot of good. There will also be three good Pride bulls in the sale, and an extra good Maggie bull. The bulls are a growthy lot, baying plenty of size and bone and are ready to go out and do service. One of their extra choice

## Poultry Breeders All Tell the Same Story.

NO ADVERTISING MEDIUM SO PRODUCTIVE OF RESULTS AS THE HOMESTEAD—SAMPLE REPORTS ON ACTUAL RESULTS.

Mrs. O. W. Thomas, of Manchester, Iowa, breeder of Silver Laced Wyandotte chickens, writing under date of March 8th, says:

"The advertisement I gave you a short time ago for your paper gave me excellent returns. I can recommend The Homestead as a splendid advertising medium."

Mr. George A. Bonewell, of Grinnell, Iowa, breeder of Barred Plymouth Rock chickens, writing under date of March 9th, says:

"Our cockerels are all sold. We received about \$100 in one week for birds. Have had to return a good many orders we could not fill."

cows is Bonnie G. V., a five-year-old daughter of Blackbird's Eclipse by old Moon Eclipse. This has been one of their best cows, both individually and as a breeder. There are several Pride cows in the offering. One of the best of these is Lady Pride G. V., a four-year-old daughter of Blackbird's Eclipse. She belongs to the Clova strain of the Pride family, and is a very stylish and very thick cow. There are several other nicely-bred Pride cows and heifers in the sale, and one of these has a bull calf at foot. There are several other good and very choice females in this offering, and we want to say to Homestead readers that they will be able to secure some splendid bargains in this sale. Write to Mr. T. A. Stevenson, Shannon City, Iowa, for catalog, and please mention The Homestead.

#### NO CHANCES AT STAKE

to the man looking for a land bargain in the American northwest. It is not always the country whose praises are sung on every hand that offers the best inducements to the man looking for a quarter or half section, or even triple or quadruple that amount. During the past winter there have been some unfavorable things said about Dakota and Minnesota lands. The cry of a car shortage indicates either of two things; first, an actual shortage of cars from lack of transportation facilities, or second, immense crops that have required an unusual number of cars to move these farm products to market. The first probability is partly true, but the second is the significant one. That these reports have frightened a goodly number of land seekers from investigating these lands is no doubt true. That the wise land seeker has and will profit by such a condition is still more likely to be true. The buyers who get on the ground now will get the snaps and bargains. With the passing of another season Dakota and Minnesota lands will experience an increase in value. A good healthy increase in all probability, too, both for the investor and for the country. If you have five hundred, a thousand or several thousand dollars on hand get a good piece of dirt in your own name. Write to Lund's Land Agency, Minneapolis, Minn., for all you want to know about investments

# Robust, Healthy Men

in these lands. Kindly mention this paper and see page 27 for more about the proposition.

#### DE CLOW'S JACKS AND STALLIONS.

A great many buyers of jacks and draft stallions of the different breeds are flocking to Cedar Rapids, Iowa, to see DeClow's array of good horses. A letter from the firm states that at present there are on hand fifty-five jacks and they are as good as were ever in the barns. Fresh importations regularly

any of the latter day imported bulls. The other bull is Brawith Lad 262337, a son of Morning Joy and out of a Cruickshank Brawith Bud cow. Mr. Vaughn will be pleased to make prices on any of the fifteen young bulls to Homestead readers. His herd now comprises more than 100 head of as useful Short-horns as can be found. He has recently sold a nice young herd of eight heifers to Mr. Wm. Novak, of Oxford, Iowa. Mr. Novak is certainly to be congratulated on his purchase of eight choice females from the Wildwood herd. Mr. Vaughn's announcement can be found on page 37 of this issue.

#### LAST CALL FOR C. E. CLARKE'S SHORT-HORN SALE.

Last week we promised to give our readers in this issue of The Homestead particular mention of the female offering in this important sale. Of special interest is the fact that twenty-eight of these animals were bred by Mr. Clarke himself, at least two-thirds of them being out of imported dams. Mr. Clarke is frank to say that it is as representative and choice a lot as he has ever produced. Knowing his reputation as a great breeder and his eminence as a judge of good animals, the value of this information is apparent. An exceptional opportunity is here offered to secure foundation stock of superior excellence, individuals whose quality and personal merit mark them for winners at the leading shows of the coming season. The purchaser of the pure Scotch cow, Fairplay 6th, will secure a prize. An international winner, with a bull calf by Imp. Prince of Leithall 151733 at foot, and in calf again to the great March Knight, she is one of the most desirable things in the sale. She is out of Imp. Fairplay 4th and sired by Bapton Ensign 172542, whose record as a great sire is one of the most notable in America today. Seven other daughters of this bull are also in the sale, of the Roseblush, Broadbooks, Ury, Mysie, Graceful, Duchess of Gloster and Fairplay families, and all are safe in calf to March Knight. Considered from any standpoint they are of superior merit and would be of great usefulness and value in any breeding herd. Meadow Lawn Nellie 2d, a fine show heifer of the family that has produced many of the Meadow Lawn prize winners; Graceful, out of a family noted for show animals, and 47th Duchess of Gloster, a typical representative of this popular family, should receive especial consideration from the buyer who is looking for the best. The three imported cows in the sale are worthy of close attention. Pine Blossom, with a red show heifer at foot and bred to March Knight, is very desirable, and Jeannette, with a daughter of March Knight at foot and in calf again to him, is a good value for any buyer. Circe, sired by the great Scotch bull, Prince of Fashion, and in calf to the pure Cruickshank bull, Nonpareil Stamp 188487, should go to one of the best herds. About one-half of the offering are heifers and they are a superior lot. In quality and conformation they are splendid representatives of the type of Short-horn that Mr. Clarke has found so successful in the show ring and in the breeding herd. Four individuals finer than those featured on the cover page of the beautiful sale catalog can scarcely be found in any herd. They are literally "bred in the purple," quality stands out at every point, and the breeder who can secure one of them will be indeed fortunate. Queen's Daisy, a half-sister of the head herd bull, March Knight, is a Miss Ramsden heifer that will attract attention, and the many representatives of the noted Broadbooks family are sure to be strong favorites in the bidding. May Blossom 2d by Imp. Pennan Diamond 27589, out of Imp. Piltivie Blossom, in calf to Knight Commander, one of the best bulls in the sale, should not be overlooked. By all the signs she should make a good one. The Scotch-topped animals are richly bred and of superior quality. Among these is a daughter of Imp. Red Knight 157136, sire of the grand champion females of 1906 and 1906. At the sale she will have a calf at

foot by the Cruickshank bull, Baron Mysie. The animals cited are fairly representative of the general excellence. To appreciate it fully you should make a point of being present at the sale. You can well afford to postpone important engagements to be there. If you have not done so already, write at once for a catalog and kindly mention The Homestead.

#### AN IMPORTANT SHORT-HORN SALE.

The forthcoming sale of Short-horns to be made by Mr. Andrew Chrystal, of Marshall, Mich., should attract the attention of every reader of this paper interested in good Short-horns. Mr. Chrystal has one of the best herds to be found in this country. In laying the foundation for his herd no expense was spared and nothing but the best bulls were used in the herd. Mr. Chrystal imported and used in his herd the noted Scotch bull, Lovat Champion, a bull which Mr. Duthie had reserved for use in his own herd. Lovat Champion now heads the well-known herd of Short-horns owned by the Flynn Farm Company, of Des Moines, Iowa. Imp. Beaufort Victor was another of the good Scotch bulls which Mr. Chrystal imported and used in his herd with very good results. The females represent the best and most profitable families of the breed and the draft from this noted herd will be worthy the attendance of the Short-horn fraternity throughout the entire country. Full particulars will be given in these columns in the issues preceding the sale. Plan to attend this noted sale if interested in good Short-horns.

#### THE SIOUX CITY HEREFORD SALE.

One of the best Hereford sales that will be held this year will be that of Messrs. Edmonds, Shade & Co. and Stanton Breeding Farm Company, at Sioux City, Iowa, on April 3d. The cattle that go into this sale will be the select from two well-known herds. This is not a combination sale, but on the other hand is a breeders' sale, and no two herds in the West are better known than the two mentioned above. They will sell twenty head of bulls and twenty cows and heifers, and we want to say to our readers that there are none better than will be offered at this time. There are bulls in this sale that are fit to head the best herds in the country, and the cows and heifers are the best that have ever been sold in the Northwest. This is a joint annual sale from the Stanton Breeding Farm, of Madison, Neb., and the herd of Messrs. Edmonds, Shade & Co., of Kingsley, Iowa. The sale is made at Sioux City, Iowa, to save expense to buyers. These two firms stand behind their cattle with the strongest guarantee and the cattle that they will offer at this time are as good as have ever been put through a sale ring. Watch future issues of The Homestead for particulars and write Mr. J. A. Shade, Kingsley, Iowa, for catalog.

#### NINE CRUICKSHANK SHORT-HORN BULLS FOR SALE.

On page 37 will be found the new announcement of those veteran breeders of Short-horn cattle, Messrs. S. H. Thompson's Sons, of Iowa City, Iowa. The senior Mr. Thompson was one of Iowa's early breeders of Scotch Short-horns, having started in the business about the time or soon after Uncle Daniel Cookson, of West Branch, Iowa, brought out the first Cruickshank Short-horns from the Hon. Jas. I. Davidson, of Balsam, Ont. This was about the time that Mr. Davidson made his first contract with Mr. Amos Cruickshank, of Sittytown, Scotland, for the annual output from the Sittytown herd, and in fact these were the best Cruickshank cattle produced at that time as a whole that have ever crossed the water. The elder Mr. Thompson secured some of the pick of the earlier imported cattle, including the Victoria, Princess Royal, Mysie, Rosemary, Avalanche and Alexandrian families. Some very superior cattle have come from the Thompson herd. Many great herd bulls have been produced and developed on their farm and at this particular writing they have nine red bulls of good, long ages for sale, a number of which are splendid individuals, thick-fleshed, low-down, masculine-looking fellows that are only awaiting an opportunity to get into good herds and prove a bonanza to the buyer. We noted one choice Victoria sixteen months old by Ringmaster, whose pedigree cannot be excelled in the world. He traced to Imp. Victoria 51st, recognized as the best Victoria cow that ever crossed the water. His stall companion is another red Victoria, about the same age and traces to Imp. Victoria 73d, considered next to Victoria 71st. This bull was sired by Fearless King, winner of second prize as a calf at the Iowa State Fair and sold to Thompson's Sons at \$650. This bull was sired by Fearless Victor and is a wonderfully low, thick, massive bull with tremendous quarters and promises to make a great herd bull. The dams of both the above bulls were sired by the greatest bull ever used by Messrs. Thompson, old Victor Mysie 2d. We noted also a seventeen-months-old red bull, a Miss Ramsden. He was sired by Ringmaster and he is a full brother to the great bull, Raphael, and he by Victor Mysie 2d. This Miss Ramsden bull is a very long-bodied, smooth bull, with an unusually smooth shoulder, good in the crops and chine, and is unquestionably the making of a great bull. He may possibly not mature quite as early as the two Victoria's previously mentioned, for the reason that he is cut out for a much larger bull. His companion in the stall is a beautifully-bred Princess Royal sired by Ringmaster and out of a Victor Mysie 2d dam. We noted another splendid bull, full of quality, seventeen months old, a Mysie. He, too, was sired by the Iowa State Fair winner, Fearless King. This bull is a splendid handler, possessing a very soft, mellow skin, with a fine, furry coat and promises well for the future. Next to him stands a sixteen-months-old bull, also sired by Fearless King and out of Imp. Vinette 13th, a Violet Bud. To someone who is looking for an infusion of fresh blood from across the water, this bull will be found worthy of consideration. There are two yearling bulls, a Lavender, by Fearless King, and also one Scotch Beauty bull by Ringmaster, that are attractive fellows and are at this time about twelve months old. A full brother to the Beauty bull has been used extensively in the herd until a younger bull was of sufficient age to do the work. This two-year-old bull is also offered for sale. He was sired by Flora's King and he by Rosewood. The latter two bulls are out of Flora Archer by Imp. Golden Archer, and

trace to Imp. Beauty by Heir of Englishman. It is a pleasure to The Homestead to recommend to its readers this old reliable firm who have stood the storm of Short-horn depression and enjoyed the wave of prosperity following. This firm are in every sense of the word breeders of Short-horn cattle and are not and never have been speculators to any extent. It has been many years since we have seen as good a lot of bulls on Messrs. Thompson's farm as at the present time, and any breeder who visits the herd with this idea of purchasing one of these bulls will have the opportunity of seeing one of the best herds of Scotch cows in America. They are the big, broad, table-backed sort, standing on very short legs, and we omitted to say that of the nine bulls offered at this time, only one but what is much shorter in leg than the average bulls of the line of breeding usually possess. Messrs. Thompson Bros. rarely fail to sell a man a bull who will come to the farm and see what they have, and we must say that the prices they are asking for these bulls is considerably less than we expected they would ask, in fact is 33 1-3 per cent less than is usually asked by many breeders for this class of bulls. Each and every one are reds and no flaw can be found in their pedigree.

#### ANSTHEY'S HEREFORD SALE.

On April 4th, at South Omaha, Neb., Mr. Geo. J. Anstey, of Massena, Iowa, will make a public sale of Hereford cattle, and he has selected the cream of his herd for this event. Mr. Anstey is one of Iowa's well-known Hereford breeders, and has been breeding the whitefaces for the past twenty years. He has selected twenty-five splendid young bulls and twenty heifers, and they are the best lot that has ever come from his herd. These are mainly sired by Albany 60437, an Anxiety 4th-bred bull, formerly used with much success in the Anstey herd. Then there are some that are sired by Keep Ahead 107728, a son of the great Keep On, while others are sired by Sidney 1st 161307, a low-down, thick-fleshed bull now used in the Anstey herd. There will also be a few in the sale sired by Fairview Tom 3d, a grandson of old Corrector. The heifers will be bred to Sidney 1st and Beau Shadeland 10th 207380, a son of the noted show and breeding bull, Beau Donald 28th. Hereford breeders and farmers and ranchmen will find about what they want in this sale. The heifers are the pick of what he has on the farm, and are all sired by Albany, Sidney 1st and Fairview Tom. These are nearly all bred to his Beau Donald bull, and most of them are granddaughters of old Corrector and Keep On. They are a nice, smooth lot, with neat heads and horns and will make good cows, and it will be a splendid opportunity to secure some choice heifers. The bulls are a most excellent lot and we cannot too strongly urge buyers who want males to come to this sale. They are growthy, well developed, unusually good in head and horn, and carry a wonderful lot of bone. Mr. Anstey never sent a better bunch of bulls away from his farm. They are all yearlings and coming twos, and there are several extra good ones among the lot. Among the best of these are three that anybody can well afford to buy. These are all sons of Sidney. One is called Duke of Fairview and is out of Sparkess 3d, an imported cow. He is a well-developed fellow and is good in his lines, both top and bottom. Sankey 2d is an April 24th calf, and is out of Sasnae, considered one of the best breeding cows on the place. He is a low-down fellow, very thick and low in the thighs, carries a well-sprung rib and has a good head and a nice horn. He is one of the good young bulls in the offering. Another cracking good bull is Lord Hlewer 3d out of Lady Hewer 4th, one of Mr. Anstey's old standbys. Here is the making of an excellent sire. The rest of the bulls are sired by Albany and Fairview Tom. The Albany bulls are an especially good bunch. It is as good a bunch of Hereford bulls as has been sold in South Omaha in a long while. It will pay anyone who wants Herefords to attend this sale. Write Mr. George J. Anstey, Massena, Iowa, for catalog and kindly mention The Homestead.

#### FIRST ANNUAL SALE OF THE DAVIESS COUNTY, MO., SHORT-HORN BREEDERS' ASSOCIATION.

Among the sales of Short-horn cattle listed for this spring is the one to be made at Gallatin, Mo., on Friday, April 5th, by the Daviess County Short-horn Breeders' Association. This association was organized last fall and the breeders who are members of it expect to hold annual sales. For the coming sale the following breeders have contributed cattle. Mr. C. J. Feurt, of Pattonsburg, Mo., disperses his entire herd, consisting of seven bulls and nineteen cows and heifers. This is one of the older herds of Daviess county and is sold to settle the partnership of father and son. Several head of Scotch cattle, both cows and bulls, are included in Mr. Feurt's offering. Mr. R. E. Maupin, of Pattonsburg, Mo., sells three head, a yearling Scotch bull and two Scotch-topped heifers. Mr. J. V. Goodbar and Mr. Geo. Goodbar, of Gallatin, Mo., sell two bulls and two cows. One yearling bull is

### PUBLIC SALE OF ABERDEEN-ANGUS 35 HEAD 15 BULLS AND 20 FEMALES

To be held at the residence of S. G. Smith, 2 1/2 miles southeast of Shannon City, Iowa, and 3 1/2 miles northwest of Tingley

Wednesday, April 3, 1907, at 1:00 O'Clock

In making this public sale of Angus cattle, we do so with the full assurance that the breeding of the stock is all right and that the quality and merit of the offering will be beyond question. Mr. Smith on his part is closing out on account of his wife's health.

The cattle will all be sold in just nice stock condition, in their every day clothes. We are offering good typical animals chosen from the following families—Trojan Erica, Prides, Minas, Maggies, Titanus, Belle and Parrothens.

Write T. A. Stevenson for catalog, and come to the sale, where you can buy good cattle at your own price.

Capt. W. W. Stewart, Auct. T. A. Stevenson, S. G. Smith, Shannon City, Iowa

KANSAS CORN AND ALFALFA has made many a man independently rich. In our columns are to be found some splendid bargains in Kansas lands and if any of our readers are in search for this kind of real estate we would advise them to turn to page 26 and see what Mr. C. H. Dewey, of Stockton, Kan., is offering. In the way of stock and grain farms he has something that certainly reads well. Prices are moderate, as a perusal of the two farms offered will convince you. Write for particulars and mention this paper.

Some Good Short-horn Bulls for Sale.

The Homestead takes pleasure in calling attention to the numerous good young bulls offered for sale by Mr. G. H. George, of Monticello, Iowa. Mr. George at this time finds himself with a good supply of young bulls and an overplus of Scotch herd bulls. His herd not being large, he has no use for the three herd bulls now doing service. A good three-year-old red bull is offered for sale in Stone King 228716. He is out of Lady Smith by Village King and traces directly to Imp. Fair Queen 4th. The Fair Queens belong to Mr. Cruickshank's celebrated tribe known as Mary Ann (by Sillery), sometimes called Miss Gibson. Stone King's sire was by Imp. Curbstone and he by Imp. Craibstone. He is a ton bull in breeding condition, of the true Scotch type, and possesses as good a bull's head and horn as anyone would wish to see. Certainly this bull should find a place at the head of some good herd, as he is well qualified to fill such a position. His dam, Lady Smith, is probably one of, if not the best, Scotch cows in Mr. George's herd. Hence Stone King is a worthy son out of a great dam. Among the young bulls are two splendid roans, straight Scotch and full brothers. One is a two-year-old, the other a yearling. They are Raspberries and among the top sires on the dam's side we note the most excellent Cruickshank bulls, Imp. Confessor, Imp. Royal Barmpton and Imp. Breadalbane. The sire of these bulls is Scotch Consul 181231, he by Imp. Consul and out of Violet 3d by Lord Granville. Imp. Violet 3d will be remembered as the most excellent cow purchased of Messrs. Peden Bros., of Spencer, Ind., for \$500, at Mr. N. A. Lind's last sale. Imp. Consul is the bull that Mr. H. F. Brown purchased at Mr. W. D. Platt's Chicago sale for \$1,515. These two roan bulls whose breeding we have given are certainly a worthy pair. Their handling qualities are all that could be desired in the Short-horn. The younger one is our preference and we believe is the making of a very choice Scotch herd bull. His beautiful, smooth, even laid shoulder, closed closely on top, gives him show-yard character. He has a beautiful head and horn and his body is as smooth as an apple. He has a wealth of rich fine roan hair and a good covering of flesh under it. This bull should be looked after by someone who is particularly anxious to secure a first-class Scotch herd bull. Mr. George has also two good red yearling bulls. One is called Beauty's Baron and is out of Beauty's Pride, tracing to Imp. Beauty 15th by Heir of Englishman. The other red bull is Matchless Boy and traces directly to Imp. Likely by Charleston. Both the above bulls are sired by Scottish Consul, which, by the way, is one of the good Scotch herd bulls of the middle West. There are very few bulls that possess as much feeding quality or that are as low down to the ground as Scottish Consul. Aside from these good qualities he is as smooth as can be made from the crops to the tail setting. His evenness of top line and his hip flesh qualities catch the eye of the critical observer at first glance. This splendid bull is assisted in service by the three-year-old roan show bull, Ring-Master, a bull that was exhibited at the International at Chicago, 1905. He weighed at twenty-five months of age 1,900 pounds, and has all the scale that could be desired. His dam is Imp. Scottish Ringlet, sired by Scottish Victor and he by Scottish Archer. Scottish Ringlet was bred by Mr. James Durno, the breeder of Imp. Choice Goods. Ring-Master's sire was Golden Victor, a splendid red Cruickshank bull, sired by Luverne. Luverne was a Brawith Bud, sired by Imp. Pro Consul. Golden Victor was out of the great show cow, Emma 17th, that the writer stood by and witnessed her selling at auction for \$1,530. Hence Golden Victor belongs to the famous Cruickshank family of Emmas that were so prominent in the herd of the late W. S. Marr, and comes from the same family and ancestry as did the famous Potts twin show heifers that captivated the judges at all shows in America in their day, they being out of Imp. Emma 3d by Young Englishman. Mr. George would sell this bull to an appreciative buyer, and from a remark he dropped to the writer, we believe that he can be bought for a much less price than he is really worth. There are few as good Scotch herd bulls doing service at the present time as Ring-Master. Mr. George will be pleased to make prices on any of the young bulls referred to, or either of these two three-year-old herd bulls. His announcement can be found in The Homestead on page 36.

Last Call for J. H. Eno's Dispersion Sale.

Regarding the closing out Angus sale which Mr. Eno will make at his farm two miles southwest of Havelock, Iowa, March 27, 1907, and which we mentioned in general last week, we will say that in our visit to this herd we found some splendid specimens of the breed. Mr. Eno has always been well located to give his herd the best of attention and on sale day it should present a very good appearance to buyers. The object has always been to lay a good foundation for future breeding and among the catalog numbers will be found some breeding originating from some of the best herds in the country. The families represented are the Princess, Queen Mother, Pride, Easter Tulloch, May Flower and Jeanette. Of this number thirty-six head are either registered or eligible to registry. Some of the young stuff is still unregistered. Those looking for probable herd headers should find it worth their while to look up the breeding of the four young bulls that are offered. These are from nine to twelve months old, out of the best cows on the place. They are sired by Cottonwood Floyd 45416. Much of the young stuff is bred to him and he has filled the capacity of herd bull for the last year. His sire is Cottonwood Gay Bird 31327 and his dam is Finery. In himself he is a very good individual and any one of the good heifers or cows that are offered, bred to him, should prove a very profitable investment. The bulls are sappy fellows and promise to develop into large, well-proportioned animals. Among the mature females will be five pure-bred cows with calves at foot by the herd bull, Miss Barton 32316 by Invincible Black Bird 22282 is a fully matured cow and has raised splendid calves right along every year for Mr. Eno. She is one of the best cows in the herd and now has a nice heifer calf

three months old at foot by the herd bull. Her last year's calf is Bouten Dick, a yearling in February. He is a growthy, blocky fellow and shows himself to be well bred. Another one of her calves is Miss Barton 2d. She is well worth looking over, too. Lakeside Queen 3d 78113 is a three-year-old in May. Her dam is Lakeside Queen 42814, bred by Mr. William Miller, of Storm Lake, and by the noted bull, Cranewood Black Knight 39477. This cow has a heifer calf at foot by Baron Inca 58611, a bull that is too well known to need further comment. Another splendid one is Perry Princess 30725. She has proven a splendid producer and mother and is a dam of one of the young bulls. She is a great, roomy cow. Another is Pride of Fashion 2d 88769, sired by Baron Inca out of Lakeside Pride 42812. This heifer will be three in October and has every prospect of making a splendid cow. There are others just as good as these that we might mention, among which is Bouten Geraldine 2d 79279, the dam of one of the most attractive bulls in the sale. The Poland China offering of which we made mention last week should attract buyers looking for good hogs of Perfection breeding. Ten old sows will be offered which have proved splendid breeders and Mr. Eno would never let them go had it been possible to have kept them on the farm. Havelock is in northern Pocahontas county, on the Chicago & Northwestern, just east of Laurens. Free entertainment will be furnished those from a distance, and we can assure anyone who expects to attend the sale that they will receive the very best of treatment and will see some very serviceable, well-bred stock. Write for catalog at once and plan to attend the sale. See Mr. Eno's announcement on page 35 of this issue.

A Most Excellent Herd of Short-horns.

Homestead readers for a number of years have been more or less familiar with the Wayside herd of Short-horns owned by Mr. Geo. H. Burge, of Mt. Vernon, Iowa. Mr. Burge is what may be termed a self-made man, and by sheer dint of energy, good judgment and plenty of hard effort, has succeeded in building up one of the best herds of Short-horn cattle in the state of Iowa. Mr. Burge is a man who has had an object in view in building his herd; he has had a model to work to in the way of the typical Short-horn. The type of Short-horns produced at Wayside are the low, thick, easy-keeping sorts. At the present writing Mr. Burge has thirty-one Scotch females. The remaining seventy head of cattle are Scotch topped, possessing the same type as do the straight Scotch. It was a great stroke of good fortune when Mr. Burge secured Acrobat and produced his phenomenal bull, Money Musk. Money Musk is unquestionably the greatest herd bull that Wayside has ever used. He is the sire of numerous prize winners, as well as being a prize winner at the Iowa State Fair a number of times himself. He is one of those low, thick, meaty bulls that respond with a pound of flesh when given a pleasant look, and he stamps this great feeding quality on all of his offspring. Mr. Burge has had a splendid trade on young bulls this winter and spring. However, he still has for sale one Scotch bull of the Raspberry family and two other splendid Scotch-topped ones. One is a Blossom with five Scotch tops; the other is a Young Mary out of the same cow that produced the Iowa State Fair winner of 1900. Mr. Burge finds himself in the position for the first time in years to be able to offer the public fifteen or more good Scotch-topped females. He can make up a small herd for a breeder in connection with the sale of a bull at a very attractive price. His present herd bulls are Money Musk, above referred to, and Hopeful Knight. The last named belongs to the Campbell Bloom or Thessalonica tribe, sired by the great show and breeding bull, Gallant Knight. Gallant Knight has for years been considered one of the most prepotent sires among all the Cruickshank bulls in America. We certainly believe that in Hopeful Knight Mr. Burge has secured a good bull to cross on Money Musk heifers. Some of these females that are offered for sale are bred to the above bull. It has been noticeable that almost every breeder of Short-horns in search of good cattle that visits the Wayside herd, buys something before leaving. So attractive are the great lot of breeding matrons and the herd bulls that the lover of good Short-horns is captivated with the type of cattle produced at Wayside. After passing through the herd critically and examining all of the young stock, one is impressed with the idea that Mr. Geo. H. Burge is certainly in the right place. If he continues for the next ten years to make the progress that he has in the past ten, he will be classed among the breeders of the present day as the Cruickshank, Marr, Renick or Vaile of the past decade. The Homestead is always glad of the opportunity to recommend Mr. Burge and his cattle, for he is certainly producing the type of Short-horns that are in demand. See page 37.

Hendershot Still Selling Jacks and Stallions.

The recent sale held by Mr. O. P. Hendershot, at Hebron, Neb., was a decided success, and the quality of the offering so impressed buyers that Mr. Hendershot has decided to offer some more of the good ones at his stables, but at private sale. At present he has a score of fine jacks for sale at prices that are certainly taking, considering the excellence of the individuals. They are just as good as were sold in the sale, we believe. Mr. Hendershot has the welfare of his customers in mind and will do all he says he will. In stallions he has several black Percherons that weigh around the ton mark and some above. They are sound and of the right type, as it is not the policy of this stable to sell blemished horses. There are also a few Clydesdales for sale. All the offering is of an age that will be profitable to buy for the farmer who wants to own his own horse or for a company. We can cheerfully recommend buyers to Hebron and feel that Mr. Hendershot can fill your bill as good as anyone. Visit his stable or write him. Refer to page 39 for advertisement.

Mr. John Carrow, of Ottumwa, Iowa, is advertising a number of stockers and feeders for sale in his advertisement, which will be found on page 32 of this issue of The Homestead.

C. E. CLARKE'S

Short-horn Sale

to be held at

South Omaha, Neb., Wednesday, March 27, '07

55 - Head--12 Bulls, 43 Females - 55

Best Draft of Short-horns that will be offered this year  
10 Pure Scotch Bulls--10 Cows with calf at foot  
3 Imported cows

Several winners of first honors at the International Show heifers and calves that will make winners

No choicer lot of Short-horns was ever included in a public sale. NINETY PER CENT are pure SCOTCH, descendants of the most noted and popular families and richly bred. Bulls are sons of the great March Knight, Nonpareil Stamp and grand champion White Hall Marshall. Best lot individually ever together in a sale ring. Breeding and quality will satisfy the most discriminating buyer. Will make show animals and herd headers of first class. The females are of exceptional value and highest personal merit. Cows are regular breeders and safe in calf to the best Meadow Lawn bulls. The heifers are daughters of March Knight, Imp. Pennan Commander and Bapton Ensign. Many are of the famous Broadhocks family and promise to add new laurels to the name. The majority have been bred to Bapton Nonpareil, a son of Bapton Ensign, that will win International honors, and Choice Knight, one of the most prominent sons of grand champion Choice Goods. Breeders who wish to secure strictly high-class animals to enrich their herds should not fail to be present. Kindly mention The Homestead and write at once for a catalog.

ANOKA SHORT-HORNS

HARDING'S 5th ANNUAL SALE,

Waukesha, Wisconsin, Wednesday, April 10th.

A FEW REASONS FOR ASKING YOUR ATTENTION AND PATRONAGE

Ten bulls will be sold which are suitable to head the best herds.

Forty cows and heifers, the equal of which in individuality and blood lines are seldom found in more than one or two sales in a year.

A liberal number well gone in calf to WHITEHALL SULTAN 163573, others bred to WHITEHALL KING, ANOKA SULTAN and RED SULTAN, bulls regarded to be of wonderful promise.

Five bulls of the offering are better individuals than I have sold in any previous sale. They are strictly show animals.

In no previous sale have I offered as much of the blood that is producing the best show cattle of the present time, as in this one.

The offering is mostly the get of WHITEHALL SULTAN, WHITEHALL MARSHAL, WHITEHALL KING, MARQUIS OF ZENDA, VILLAGE CHAMPION, LORD LOVELY.

5 Imported Cows and one Imported Bull included in the sale.

I would like to have you apply for catalogue (illustrated) as I may not have you on my list.

F. W. HARDING, WAUKESHA, WIS.

Auctioneers, Cols. F. M. Woods and Geo. P. Bellows.

Attention is directed to H. F. Brown's sale at Minneapolis, on April 9th and H. S. Bright's at U. S. Y., Chicago, on the 11th. My date is the 10th and anyone wishing to attend all three can do so. Mention this paper in writing for catalogs.

## The Hereford Event of the Season

THE ANNUAL JOINT OFFERING FROM THE WELL KNOWN HERDS

**STANTON BREEDING FARM CO., Madison, Neb., and  
EDMONDS, SHADE & COMPANY, Kingsley, Iowa, at**

**Sioux City, Iowa, April 3, 1907**

In the New Live Stock Sale Pavillion. Sale Called at 1:00 P. M.

**20 High Class Cows and Heifers**

A few with calf at foot including some of the winners of 1906 and twenty bulls of outstanding merit among which are many herd headers and were first prize winners. This is the greatest offering that the breeders and farmers of the Northwest have had the privilege of attending in late years.

There will be a grand lot of bred heifers by Beau Donald 7th, Columbus 35th, Climax, King Edward, Brick Mason, Imp. Passport and other great bulls.

An excellent lot of young cows with fine type of character and most successful blood lines bred to some of the greatest bulls of the breed—Imp. Albany, Rex Maximus, Climax, Columbus 35th, Beau Donald 7th, and King Edward. A grander lot of young bulls and heifers was never offered to the public at one sale. Every animal is fully guaranteed. Write for catalog to either of the above firms. Cols. F. M. Woods and F. F. Luther, Auctioneers.

**C. R. Thomas, Clerk.**

**J. A. SHADE, Mgr., Kingsley, Iowa.**

**W. G. SWINNEY, BOIS D'ARC, MO., OR D. R. MILLS, DES MOINES, IA.**

### A. H. Brett's Big Sale of Short-horns.

This will be our last opportunity to direct attention to the very important sale of Short-horn cattle and Percheron stallions to be sold by Mr. A. H. Brett, of Mason City, Iowa, on March 28th. In the last issue of The Homestead particulars were set forth relative to the many good Scotch cattle listed for this sale. Inasmuch as there are 150 head of Short-horn cattle to be sold, this being the largest sale ever made by Mr. Brett, it will be necessary for a very large crowd of breeders to assemble, or else some great bargains will be in store for those who do attend. It can be safely stated that among the twenty pure Scotch cattle offered are many of show-yard character coming from animals of national repute. It is needless to enumerate these choice cattle again, as we went into detail in The Homestead of March 14th, relative to this choice offering. It is sufficient to say that Mr. Brett is putting forth every effort to make this sale attractive from every point of view. It is a well-known fact that Mr. A. H. Brett has been a very liberal buyer of the very best Short-horns at many of our leading sales. Coupled with this fact is his past career as a national breeder of Short-horns on the Willowdale Farm. Mr. Brett has endeavored during all these years to keep at the head of his herd the best Scotch bulls that money would procure. We presume that the catalog has been in the hands of Homestead readers before they will have read this article. One of the attractive features of the sale is the fact that such a large percentage of the cows have calves at foot, or are just ready to drop calves. The two Scotch bulls recently used at Willowdale were Prince Victor and Hampton's Marshal, the last named being a worthy son of Imp. Merry Hampton. Perhaps no bull in recent years has commanded the attention of the Short-horn world as did Imp. Merry Hampton. When selected in Scotland by Mr. C. B. Dustin's representative, Mr. Noring, it was learned that this was the best bull that could be purchased in all Scotland at that time. Several American breeders had figured on this bull, but the price was so long that it remained for Mr. C. B. Dustin to bring this bull to America. It was on Mr. Dustin's farm that this bull achieved his greatest prominence. It was there that he sired Hampton's Best, the phenomenal Short-horn bull at the head of Messrs. Bellows Bros.' herd at Maryville, Mo., and Merry Marshall that Mr. C. A. Saunders paid \$1,205 for at auction in Chicago. Hampton's Marshal being a brother to this bull adds prominence to Mr. Brett's herd and will certainly be a great feature at the forthcoming sale for the reason that there are so many of his daughters in the sale and cows bred to him. Mr. Brett has perhaps never had any other herd bull that he has thought as much of, or that has brought him a greater degree of prominence among Short-horn breeders. In addition to this cattle sale at the same time and place will be sold a registered Clydesdale mare, Sally MacGregor, a six-year-old bay mare weighing over 1,600 pounds, bred to Royal Herl. The remainder of the horse offering is seven Percheron stallions of serviceable age and ready to go on the stand this spring and

earn a good year's fee. Mr. Brett will be pleased to furnish Homestead readers with a catalog of this sale, if they have not already received one, as well as any other particulars that they may wish to know. Remember the sale will be held in town and will be conducted so that everyone may have a chance to secure some of this choice offering. The hotel accommodations and railroad facilities are superb at Mason City. Mention The Homestead when writing for catalogs. See page 39.

### Paradise Stock Farm Angus.

On page 36 in this issue will be found the advertisement of the Paradise Stock Farm, owned by Mr. W. F. Eckles, of Green City, Mo. Mr. Eckles breeds Aberdeen Angus cattle and is a staunch friend and firm believer in the doddies. His herd was founded some years ago on stock that was purchased with a view of raising the best. Individuality was the guiding star and stock with as much scale and quality as possible was bought. Good, reliable families were drawn on and as a result Mr. Eckles has enjoyed a trade in both bulls and females that would be pleasing to many an older breeder. The double Pride bull, Pride of Albion 5th 53114, now five years old, was secured as herd bull and many fine things got by him are found in Mr. Eckles' herd. Pride of Albion is one of the largest bulls of the breed and with all his size he has an amount of quality that is rarely found in a bull with this scale. He is an exceptionally well-quartered bull, carries a fine back, good lines and is set plenty low on legs that are short and put on about right. Mr. Eckles has a great many daughters of this bull that he wishes to retain in the herd and for that reason he now offers Pride's Albion 5th. Some man wanting a herd bull and one that is absolutely sure should go and see him and his get. Mr. Eckles would not part with him but for the fact that he cannot use him longer and retain so many of his daughters. As a sire he has made good to such an extent that he merits an appreciative buyer. In 1904 it was a daughter of this bull that won first in calf class at the St. Louis World's Fair, at the Kansas State Fair and at the Oklahoma City live stock show. In 1906 another calf won first at Nebraska State Fair and at the Hutchinson live stock show. Mr. Eckles invites prospective buyers to come and see him and his get. A number of his sons are also offered by Mr. Eckles, also a son of Perfection 5th a Gardner-bred bull. These are all from good families and promising fellows. For use on the daughters of Pride's Albion Mr. Eckles bought Home Dale King 2d at Mr. G. W. Fink's dispersion sale. Home Dale King 2d was got by Home Dale King, he by the great Black King of Woodlawn. His dam, Pride of Homedale, was also by the same sire, making him a fine-bred Blackbird on a Pride foundation. Home Dale King 2d will undoubtedly prove a good cross on the daughters of Pride's Albion. A few females would also be priced right, some bred to Pride's Albion, others by him and bred to Home Dale King 2d. Mr. Eckles' Paradise Stock Farm joins the town of Green City, Mo., and he invites prospective customers to visit the herd. See page 36 for Mr.

Eckles' advertisement and when writing him kindly mention The Homestead.

### Harding's Short-horn Sale.

Rarely does one have the opportunity to secure at auction Short-horns of the breeding and individuality that are found in the draft from Anoka herd to be sold at the breeding farm of Mr. F. W. Harding, at Waukesha, Wis., on Wednesday, April 10th. This herd of Short-horns have done much toward placing the breed in the enviable position which it now holds in this country. The show record of Anoka herd for the past few years demonstrates the fact that the individual excellence and breeding of this herd are unexcelled. Mr. Harding's principal herd bull, Whitehall Sultan, needs no introduction to the Short-horn fraternity. He has won numerous championship honors and is the sire of champions in competition with the best herds of this country. An instance of this character is found in the son of Whitehall Sultan, Whitehall Marshall, champion at the International, 1905 and 1906, as well as various state fairs. Whitehall Marshall was recently sold at the highest figure paid for a Short-horn bull since the Mills dispersion sale. Several of his get are listed in this sale. The bulls now in use in Anoka herd, Whitehall Sultan and three of his sons, Whitehall King, Anoka Sultan and Red Sultan are a quartet unsurpassed on this continent. Whitehall King has been in use for two seasons past. His get, both bulls and females, are of the same good type which the Sultan breeding has produced, the type which have proven winners in American show rings. Several of the cows are safe in calf to the service of this bull, and those who wish to add valuable females to their herds may be assured of something good in the get of Whitehall King. He is a massive, well-finished bull of show-yard merit. Anoka Sultan, to whom many of the females are bred, is a bull of superior merit. He resembles his noted sire in many respects more closely than any of his get. A wonderful head, with masculine characteristics so prominent in the get of Whitehall Sultan, good, level lines, a bull of great scale, and yet all the points so well covered with flesh as to make him a wonderful show bull. Red Sultan is another of the good sons of Whitehall Sultan to which many of the females are bred. As his name indicates, he is a beautiful red in color and is of strictly show-yard character. He resembles his sire in many respects and is one of the thickest-fleshed bulls the writer has seen. The females bred to these noted bulls should attract the attention of the Short-horn breeders throughout the entire country. A number of the cows will have calves at side sale day sired by Whitehall Sultan, while others are well along in calf to him. A better lot of females, both in point of breeding and individuality, has never been offered to Short-horn breeders. In no previous sale has Mr. Harding offered as much blood that is producing the best show cattle of the present time as in this one. Not one animal has been listed but what will prove a valuable addition to any herd, while a number of them have already proven their worth as show-yard material in the shows

of the past season. The bull consignment is a notable one. Ten bulls have been listed, every one of which is suitable to head the best herds. Mr. Harding is modest in the claim that he is listing five bulls superior to any that he has sold in any previous sale. They are strictly show animals in every respect. Practically the entire offering is made up of Scotch blood and individually good enough to please the most discriminating breeders. In our next issue we will have more to say regarding the offering individually, but we urge our readers to apply for catalogs at once, which contain many illustrations of this noted offering. Look up the advertisement on page 33 of this issue and plan to be present at this noted sale. Kindly mention The Homestead when writing for catalog.

### Trumans' Stallion Sale.

We wish to again call the attention of our readers to the public sale of imported Shire and Percheron stallions which will be held at Kansas City, Mo., on Wednesday, March 27th, by Trumans' Pioneer Stud Farm. Thirty head—twenty Shires and ten Percherons—have been selected for this occasion. These stallions have been at the Kansas City stables for some few weeks past and are not a lot of cheap horses selected for the occasion, but are some of the best which this firm have imported. In fact, the bulk of this offering was imported in December. When Messrs. Truman concluded to open a branch stable at Kansas City, it was with a view to offering good stallions to the people of the Southwest, and that their object has been clearly carried out will be seen by those present on sale day. We wish to emphasize the fact that these horses are to be sold to the highest bidder without reserve of any kind. This firm have been engaged in the importing business since 1872, and in all that time have always conducted their business along right lines as is clearly evidenced by their hundreds of satisfied customers throughout the entire country. The senior member of this firm resides in England in the heart of the Shire breeding district and has the opportunity to secure the best horses bred in that section of the country at all times of the year. He has selected a lot of horses which will please the most discriminating buyer. We take pleasure in recommending this firm to our readers and wish to assure all who attend the sale on Wednesday of next week, that they will be well treated and well pleased with the offering in every way. The sale at Kansas City does not in any way affect the business in Bushnell. No horses have been shipped from there to Missouri for this sale. There are now in the barns at Bushnell as good a lot of horses as Messrs. Truman have ever imported to this country. Those of our readers who have not as yet secured a stallion should visit either the barns at Bushnell or Kansas City before making selection and we are sure that they will find at either place stallions which will suit them in every way. The beautifully illustrated catalog will be sent to all who write for it as per the advertisement on page 40 of this issue. Kindly mention The Homestead when writing.

# Kansas City Short-horns and Herefords, April 2d to 4th—Big Breeders' Three Days' Joint Sale. Short-horns April 2d, Herefords April 3d to 4th.

A big breeders' three days' joint sale will open at Kansas City, Mo., in the stock yards sale pavilion Tuesday, April 2d, with Short-horns; Wednesday, April 3d, with Herefords, and reaching the grand climax on Thursday, April 4th, with the Swinney dispersion of Clover Leaf Herefords, the latter event being entirely separate and distinct, but arranged to follow the other dates for the convenience of those desiring to attend both sales with only one trip and one expense. OPENS WITH SHORT-HORNS APRIL 2D.

Consignors from four states have listed cattle as follows: David Jay & Son, Blakesburg, Iowa; C. B. Claypool, Marshall, Ill.; Jason Kinne & Son, Liberty Bell Herd, Hamilton, Mo.; John Regier, Whitewater, Kan.; W. A. McMehe, Walnut Grove, Mo.; R. J. Conneway, Elk City, Kan. Others desiring to join should address D. R. Mills, sale manager, Des Moines, Iowa. About fifty head of strictly high-class cattle, including such popular families as Butterflies, Bracelets, Secrets, Young Phyllises, Young Marys, Rose of Sharons, Matildas, Minnas, Lady Elizabeths, etc., are being cataloged. About one-half of the consignments are big, strong bulls, six or eight of them being pure Scotch, good ones, while the elegant list of Scotch-topped young females are well worth looking after. A pedigree of remarkable breeding is that of a pure Scotch bull in Mr. McMehe's consignment, same being the red two-year-old Orange Butterfly Godoy 227147. Seven of this bull's immediate sires and also seven of his dam's were bred by Mr. Amos Cruickshank and he is hard to beat individually. Another pure Scotch bull is Mr. Claypool's Royal Seal 231758, of the veteran, S. F. Lockridge's breeding, and by Golden Lancaster 182847, belonging to the famous Brawith Bud family, and which Mr. Lockridge claimed to be the best bull he ever bred. Five of Royal Seal's dams were bred by Mr. Cruickshank, and he is a half brother to Mr. Leonard's great bull, Golden Crown—a show bull and fit to go to the head of a good herd. Another sample of the good things listed is Mr. John Regier's pure Scotch, red, two-year-old bull, Wittekind 259624, of Mr. T. J. Wornall's breeding, sired by the famous Marr Missie-bred Conqueror, sire of most of the Wornall show cattle the past few years. Mr. Regier paid Messrs. Wornall \$400 for his dam and Mr. Wornall pronounced her the pick of his herd at the time. Messrs. Jason Kinne & Son's Liberty Bell herd is splendidly represented in this sale with excellent individuals of both sexes, largely of Mr. George Bothwell's breeding and by such sires as Grand Victor, Golden Laveur, Chief Violet 4th, etc., of which extended mention will be given later. Messrs. David Jay & Sons are sending a car of big, stout bulls that are bred in the purple, in fine shape and ready for service. Of these the pure Scotch Orontes is an outstanding individual that will command attention. There are also some Bracelets and Young Phyllises in this consignment that are especially attractive, as are also the bulls listed by Mr. Conneway. The above are only a few samples of the large number listed. About ten more good ones can be added if pedigrees are forwarded at once. For catalogs and entry blanks address D. R. Mills, Des Moines, Iowa.

## OPENING OF HEREFORD EVENTS AT KANSAS CITY, APRIL 3D.

The opening of the greatest Hereford event of the season takes place at Kansas City, April 3d, followed by the Swinney dispersion April 4th. The catalog is ready and may be had upon application to D. R. Mills, sale manager, Des Moines, Iowa. Fifty head are listed for Wednesday's sale from breeders of three states, as follows: Clarence Dean, Weston, Mo.; Chas. Peagan, Charleston, Ill.; Chas. H. Hartung, Van Horne, Iowa, and H. L. Libbey, LaPlata, Mo., and others desiring to join at once. Many superb bulls and a splendid array of females are listed. The car load consignment of Mr. Hartung are bred in the purple and were selected at the Chicago International last December, as the nucleus for an up-to-date herd of modern Herefords, but on account of change of plans he reluctantly disperses them in this sale. They represent Dandy Rex, Beau Donald, the prize-winning Masquerader by Lamplighter, etc., and are good enough to go anywhere. Mr. Clarence Dean has been a regular exhibitor at the Royal and has good cattle. He is sending a car load of granddaughters of Beau Brummel, Columbus, Java, Weston Stamp, etc., together with his great young herd bull, Shadeland Diplomat 2d 166177, weighing 2,600 pounds at three years, a prize winner at the Royal, which he will exhibit, as some of the heifers are bred to him. Mr. Peagan is making a dispersion sale of twenty head of coking good ones, descendants of old Beau Brummel and Columbus 39th, half brother to the famous \$10,000 Dale. His fine consignment includes some splendid bulls and many superlative females, of which extended mention will be given later. A few more good ones will be listed in the supplement if pedigrees are forwarded at once. Don't fail to attend this sale and remain over for the dispersion of the Clover Leaf Herefords the following day. For catalogs and entry blanks address D. R. Mills, sale manager, Des Moines, Iowa.

## SWINNEY'S HEREFORDS AT AUCTION.

The Hereford dispersion to be held at Kansas City, Mo., on Thursday, April 4th, the third day of the big breeders' joint sale by Mr. W. G. Swinney, of Bois D'Arc, Mo., will be a sale that breeders can well afford to attend, as there will not be another such opportunity offered soon to buy as many well-bred cattle and as many grand good individuals. There is not an unprofitable cow listed, as Mr. Swinney never allowed this kind to accumulate at his Clover Leaf farm. The herd bulls that are now in service are Brigadier, the prize-winning son of Lamplighter, and Dale Jr., a son of the champion Dale, for which Mr. Swinney paid \$1,500 when a calf. Thus it may be seen that the herd bulls are right. In females the herd is one of the strongest in America, from the standpoint of individual excellence as well as from a pedigree standpoint. We wish to call attention to

the five daughters of that great sire, Beau Brummel. Where are five daughters of this great bull to be had outside of this dispersion? Every one is a good one. One of the choicest of these five great cows is Rosetta, a six-year-old, that sells with bull calf at foot by Brigadier, and is rebred to Dale Jr. Rosetta is a good, evenly-bull cow with a fine head and horn and is a flesh carrier. She is best described as a modern Hereford and good all over. Another good one is Daisett 15th with heifer calf at foot by Dale Jr. and rebred to Brigadier. Daisett 15th should be appreciated by someone who wants an absolutely good one. Miss Beau Brummel, out of a daughter of Muscatelle by Andrew, and her four months heifer by Brigadier, will be found fine things to add to any herd. She is safe in calf to Brigadier. Miss Beau Brummel is a four-year-old. Lady Stanway 7th is out of a daughter of Don Quixote, a full brother to Don Carlos. She is seven years old and safe to the service of Brigadier. Few more reliable cows are found and she should be appreciated by some critical buyer. There is another daughter of Beau Brummel in the sale, but we have not her name. She, like the others, will be found one of the right kind to add to a herd. There are a whole lot of good ones by Brigadier, others by Andrew, Swordsman 3d, Jurymen and Meadow Lad. Individual excellence has always been looked after by Mr. Swinney and those who will send for a catalog will see that the breeding is all that could be desired. Write for one today and arrange to attend the sale if you can use a high-class female or two or want a herd bull. There are fifteen good ones in the sale, all weighing from 1,200 to 1,500 pounds, and bred along Anxiety lines; a few are by Dale Jr., the best cross Mr. Swinney has found on Anxiety-bred females. Attention is called to the big, Short-horns and Hereford sales at the same place on Tuesday and Wednesday. This joint arrangement was made for the convenience of buyers desiring to take in all three events with one trip and one expense. See page 34 for advertisement and when writing Mr. Swinney kindly mention The Homestead.

## High-Class Herefords to be Sold.

What is considered one of the greatest Hereford attractions of recent years will be the sale of the Stanton Breeding Farm Company and Messrs. Edmonds, Shade & Co., at Sioux City, Iowa, at the stock yards sale pavilion on Wednesday, April 3d. The class of cattle which these two firms produce is known to stand in the front ranks, both as to blood lines and breeding character. The very best bulls and dams have always been maintained in their herds that money could buy and this sale will be the very tops of their produce. We want to impress upon the readers of this paper that there will not be an inferior animal, either male or female, in the sale. We make this statement for the reason that there has been some inferior stock contributed in the general combination sales. These two firms have been firm in the belief that the breeders and farmers will appreciate an offering such as they are making at Sioux City and they hope to have an appreciative crowd at the sale. The consignment will include twenty bulls of outstanding merit, conformation and breeding and twenty choice, young, bred heifers and cows with calves at foot. Mr. Mortimer includes in this offering the best lot of ten bulls and ten cows that has ever been produced on the Stanton Breeding Farm, a lot of Beau Donald 7th, Brick Mason and Climax heifers. One of the good ones they are offering is Donald Climax by Beau Donald 7th, dam by Climax, bred to Rex Maximus. She is very heavy and even from end to end, deep, wide and thick-fleshed, a splendid heart girth, with lots of scale and substance. One of the very best things in their offering is a 1,600-pound cow, got by Hobert, a half brother to Woods Principal, grand champion steer at the International Live Stock Show, 1903. She is a grand good cow and would make an attraction in any herd. One of the best bulls that has been produced on their farm is Don Donald got by Beau Donald 7th, dam Duchess of Bedford 20th, and a Lord Wilton-Anxiety-bred cow. This is a young bull fit to head any herd, at twelve months old, weighing 1,000 pounds, splendid color, scale and substance and is a half brother of Prairie Donald, junior champion at the International in 1903, and sold in the International sale for \$1,500. The other bulls are a good, strong, growthy lot of popular blood lines and run from fourteen to sixteen months of age. The principal herd bulls are the great Beau Donald 7th, considered one of the best breeding bulls in Nebraska, also Climax and the great show and breeding bull, Rex Maximus. Messrs. Edmonds, Shade & Co.'s offering of ten young bulls and ten young cows and bred heifers, including all of their 1906 show herd, except their herd bulls and aged cows, is without exception the strongest lot that was ever produced on the Shadeland Stock Farm, some of which will not be equalled in any sale this season. One of their best young bulls is Shadeland King, first-prize bull in the under year class at the Interstate Fair, 1906, by King Edward, champion bull at the same fair. He will make a bull of wonderful scale and finish when matured. He is a mellow, thick-fleshed fellow, heavy coat and good markings, with an extra good middle and heart girth. Another good one in the offering is Oakland, by Sir Albany 9th by Imp. Albany, and his dam is Delight 3d, second-prize heifer at Interstate Fair, 1905-6. Oakland is a prospect for a yearling show bull for next year. Another very good young bull is Sir Admiral by Sir Albany 9th. His dam, Zephyr, is by Freen Lance and is a full sister to the great show cow, Delight. Prince Edward is another of the good ones by King Edward and out of Columbus Locket, second dam Imp. Kensington Locket. They are also offering three choice grandsons of Corrector, sired by Sir Hesiod by Corrector, out of a Hesiod dam. Their offering of bred heifers are by Columbus 35th, King Edward, Imp. Passport, including the first-prize yearling heifer at the Interstate Fair, 1906, Lady Passport by Imp. Passport, bred Nov. 8, 1906, to King Edward; Edward's Lassie, first prize under year heifer Interstate Fair, 1906, by King Edward, sweepstakes bull Interstate Fair, 1906; Shadeland Queen, second prize yearling heifer at the Interstate Fair, 1906, by Imp. Passport. One of their great show heifers, Columbus Belle,

JACKS.

..... DeCLOW'S .....  
JACK & HORSE SALES

I have fifty-five jacks on hand at this writing, the largest and best ones in the United States. Public sale advertisements are rather alluring to prospective customers, but those who attend sales, please remember that if they fail to buy they should come direct to my place. I have the largest number of large, fine, big-boned, heavy-set, tried-out jacks of any man in America. No other man has as large a number as I have on sale, and you can get what you want. My prices are lower than those of any other man in the business. Also remember, I am selling big, fine, ton stallions every day at prices ranging from \$900 to \$1,250, each. I will prove to you that no other importer is offering such bargains. A list of my sales of jacks and stallions in the past few days appears below:

## Jacks for Sale.

### 25 Black Jacks

FROM 1 to 6 years old, as good as are bred. I make a specialty of size, heads, ears, bone, foot and constitution. Write or come at once.

G. M. SCOTT, Rt. 2, - REA, MO.

## KENTUCKY BRED

### 75 Kentucky Bred and Imported Jacks For Sale.

We have more good Jacks than any two firms in the United States. Come and see, or write for catalog. Mention this paper.

J. F. COOK & CO., Lexington, - Kentucky. Or Branch Barn, Newton, Kansas.

by Columbus 35th, bred August 13th, to Sir Albany 9th, is a heifer of wonderful substance, mellow, thick-fleshed and full of quality. She is a winner in any company. They also offer two young show cows, with calves at foot. One is Rachel Randolph by Imp. Randolph, with heifer calf at foot by Columbus 35th and Columbus Lynn, by Columbus 35th, with a bull calf at foot by Sir Albany 9th. There will also be several choice heifers bred to the \$6,000 Imp. Albany, one of the greatest show and breeding bulls of two countries, that recently has been put at the head of their herd. Some are bred to the grand old bull, Columbus 35th, considered the best living son of Columbus; also to King Edward, sweepstakes bull Interstate Fair, 1906;

the undefeated bull in class in South Dakota and Nebraska State Fairs, 1904, and Interstate Fair for four consecutive years; also Imp. Passport, the grand champion bull over all breeds and ages South Dakota State Fair, 1904. There has not been a better offering sold at public sale of late years than will go through this sale. If any of our readers are wishing to add some choice young cows to their herds or are in need of a herd bull, or those that are contemplating starting a herd and want some good foundation stuff, we earnestly request them to be present on the above date. Catalog giving full description of the entire sale offering may be had by addressing Mr. J. A. Shade, Kingsley, Iowa, and mentioning The Homestead.

# PUBLIC SALE OF 50 REGISTERED

# SHORT-HORN CATTLE

**AT MASON CITY, IOWA, MARCH 28TH**  
**7 PERCHERON STALLIONS AND ONE CLYDESDALE MARE---ALL REGISTERED STOCK**

On the above date I will sell, included in the 50 head, twenty head of pure Scotch cattle, among which is Imp. Zoe 5th and Roan Ribbon. Each of these two famous cows have calves at foot. Will sell ten head of young bulls. A great many of the cows in this offering have calves at foot. The first twenty head cataloged are the choicest that I have ever offered. The females will be bred largely to Hampton's Marshal, one of the best sons of Imp. Merry Hampton. A brother to this bull sold for \$1,000. Imp. Roan Ribbon is a daughter of Imp. Red Ribbon 2d, which I sold in 1902 for \$1,000. She has a splendid cow calf at foot by Prince Victor and is rebred to Hampton's Marshal. The sale will be held in Mason City where all can be made comfortable. Address for sale catalog,

**A. H. BRETT,**

MENTION THE HOMESTEAD

**MASON CITY, IOWA.**

## HORSES.

## Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

**Watson, Woods Bros. & Kelly Co., LINCOLN HOTEL BUILDING Lincoln, Neb.**

## TAYLOR & JONES'

**New Importation**

**ARRIVED MARCH 9TH.**

Our barns are now filled with imported and home-bred PERCHERON, SHIRE and BELGIAN STALLIONS. Don't you know that PUBLIC SALES of stallions only indicate a cheap lot of trash, or that the sellers are men who CAN'T DO A BARN BUSINESS? Did you ever know a merchant to sell groceries at auction? Would you buy a gold watch at auction? We use no slick salesmen to sell our horses. They are good enough and our reputation so clean that we are selling more horses than ever before, which proves our prices are the lowest, our horses the best and our manner of doing business is satisfactory to our patrons. For catalog address,

**TAYLOR & JONES,**

BOX 68,

**WILLIAMSVILLE,**

**ILLINOIS.**

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding studies, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landshaftwart O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the finest and best the old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

**OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.**

## PUBLIC SALE OF REGISTERED Percheron and Shire Stallions and Mares

AND ONE MAMMOTH JACK

**At Milan, Mo., Tuesday, April 2, 1907**

### PERCHERONS

Mark Me 41579, color black, star, eight years; a sure foal getter; over 75 living foals last year. Admiral Togo, coming two years, color bay; will make ton horse. Senator Warner, coming yearling, black; Minnie 25240, gray mare; Zella 25242, sorrel mare; Mollie Belle 50185, black mare; Fanny Belle 30181, black mare.

It will pay anyone wishing to buy good breeding stock to come to this sale, where you can buy as good horses and mares as at one of the sales made by some of the large dealers, where you pay for their name. They buy from the farmers, double their money and you pay it. Come and buy from first hands. Everything sells without reserve. Send for catalog.

**Jas. A. and S. E. Niblo, Milan, Mo.**

MILAN IS ON THE O. K. AND C. B. & Q.

### SHIRES

Imp. Hoebing Craftsman 6358, color mahogany bay, seven years, a sure breeder and a horse importers sell at \$1,200 to \$1,500. Sweet Marie 8093, sorrel mare; Daisy Bell 8188, sorrel mare; Dorothy 8112, bay mare; Tom Curtis, a black Mammoth jack and one of the best jacks in Sullivan county.

## PERCHERON IMPORTING COMPANY, CHARITON, IOWA.

YOU want an imported stallion of purest breeding. With a short back upheaded, gentle and handsome. We have them. We pay the freight and return fare. We guarantee and insure every horse. We give you a square deal at a low price. GUIN ARE THE BEST. NEW IMPORTATION IN AUGUST. Blacks and dark grays. On main line and branches of Burlington Route.

**CHARLES R. KIRK,**

**CHARITON, IOWA.**

## MILLER'S IMP. PERCHERONS AND FRENCH COACHERS.

Among the Percherons are coming three and four-year-olds that weigh 1,900 pounds. They have the quality and bone; all dark colors. I am selling these stallions at the barn door at from \$700 to \$1,200. Nothing better brought over this year. I also have some first-class Mammoth jacks. Come to my barns and let me show you, or write me describing what you want. If I cannot fill the description I will say so.

Also fine litter of smooth-coated fox terrier puppies \$3 to \$7.50 each.

**S. J. MILLER,**

**KIRKSVILLE, MO.**

## ARE YOU IN THE MARKET FOR A STALLION OR JACK?

**O. P. HENDERSHOT HAS 20 KENTUCKY AND SPANISH JACKS AND 10 PERCHERON STALLIONS.**

The jacks are from 14 1/2 to 16 hands high, from two to five years old, and as good as the best. The stallions are Percheron, French Draft and Clyde, from two to five years old, weighing from 1,800 to 2,000 pounds, sound and of the right type. I will pay all your expenses to my place and return home again if the jacks and stallions are not as good or better than you will expect to see. Not a second animal in the whole lot, every animal fully guaranteed.

**O. P. HENDERSHOT, : : : HEBRON, NEB.**

FOIL sale, 4-year-old registered Shire stallion, right in every way, good bone, weight between 19 and 20 hundred. W. S. Spear, Stanwood, Iowa.

PERCHERON AND SHIRE STALLIONS. Prices from \$200 to \$600 each. Address: E. Fugler, Yates Center, Woodson Co., Kansas.

HORSES.

## Trumans' Champion Stud

We wish to announce to the PROSPECTIVE BUYERS of STALLIONS that we have at the present time in our stables at BUSHNELL, ILL., upwards of 100 OF THE VERY CHOICEST SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS and we are offering them for sale at VERY LOW PRICES, taking the EXTREME QUALITY of the HORSES into consideration. We have rising THREE-YEAR-OLD stallions weighing up to 2,130 pounds and MATURED STALLIONS up to 2,300, full of QUALITY with MASSIVE, HARD, CLEAN BONE AND GOOD FEET. The best of these great breeds always to be found and our prices are the lowest. If you are in need of a Stallion of the above breeds or contemplate buying, write us. BARN AT FARM.

**A FEW CHOICE SUFFOLK FILLIES FOR SALE.**

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND." Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER" "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE." "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 75 Percherons, Belgians and Coachers 75

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

KEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holer." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. ### THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props.  
Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equaled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

WHOLE NO. 2593

### BACK TO THE FARM.

On the streets of one of our large western cities, a few days ago, the writer met an old farmer. He looked quite like "a fish out of water," and the conversation which followed showed that his appearance did not belie his situation. He said that, after making a great success on the farm, he had removed with his children to the city; that at first, while he had the education of his sons and daughters to look after, he had been reasonably content; but after a few years, when the young people had finished their schooling, gone into business for themselves and married, he began to find city life intolerable.

"I hate the noise, the dirt, the smoke and the perpetual excitement, hurry and worry," he exclaimed. "I long for the country. I am going out to the farm again. I shall surround myself with the things I like—horses, cattle, hogs, chickens, etc.—and spend my old age under the clean sky, in quiet and content. My wife held out for a long time, desiring to be near the children; but last week she decided for the farm, and, thank God! we are going back."

The experience of this good friend was typical. No life is sounder, sweeter or better than that of the farm. He who has known its joys, may be happy amid other surroundings if provided with congenial occupation; but when he has nothing to do, the changed situation becomes unbearable. The city has its attractions and advantages; but for real living, and rational enjoyment of God's good gifts to man, give us the farm every time. It is the best place to live, the best place to grow old and the best place to die.

### OIL MEAL FOR FINISHING STEERS.

The following communication has been received from a subscriber, Mr. J. E. Sellars:

I would like a little advice relating to the feeding of oil meal to steers. I have a bunch of two and three-year-old steers that weigh about 1,150 pounds. I have been feeding them corn fodder and kafir corn since the last of November, and recently they have been getting shredded fodder, snapped corn and oat hay. Would it pay to buy oil meal at \$1.65 per 100 for these steers and, if so, how much should be fed daily? It is my intention to market them about the 1st of August. Of course, they will be turned on grass just as soon as the grazing is good.

If these steers were to be finished in the dry lot, we would have no hesitation about advising the use of oil meal, but it is doubtful if it will pay to buy oil meal at \$1.65 per hundred and feed along with corn while the steers are running on grass.

Good grass is almost a balanced ration in itself, and its laxative effect is such as to keep the system in a state of almost perfect health. Corn alone throughout the central West is the cheapest and undoubtedly the best grain to feed to fattened steers while they are grazing. Not but what two pounds of oil meal daily might result in making still larger gains, but in our opinion corn and grass would make the cheaper gains.

Of course, there might be instances where, on the last end of the feeding period it might be advisable to use a little oil meal. Steers that weigh 1,150 pounds now will be rather heavy by August, and they will have to be fed skillfully if they make good gains until that time.

If they seem to tire of the corn and come almost to a standstill, it might be advisable to add a little oil meal to their ration, but in no case would we advise

feeding more than two or three pounds daily per steer.

### AGAINST COMBINATIONS OF GRAIN DEALERS.

A bill has been introduced in the general assembly of Iowa by Representative Stillman to prohibit agreements, contracts, combinations, trusts, pools or associations of grain dealers for fixing the prices to be paid for grain, dividing the profits of the business or doing anything to prevent the free operation of the law of competition in such transactions. It is of interest to farmers generally as showing the present strong trend of both state and national legislation in the direction of a "square deal" for the producer.

The bill seems to have been very carefully drawn, and its prohibitions apparently cover the entire ground. It applies alike to individuals, firms, partnerships, corporations and associations; forbids all the forms of combinations which grain dealers have heretofore entered into or which the wit of the trust-builder may hereafter devise and is very clear and specific in every detail. It makes those guilty of entering such combinations or trade agreements liable to the injured party or parties for the full amount of damages sustained in consequence of such unlawful acts, together with a reasonable attorney's fee to be fixed by the court in every case of recovery and to be taxed as part of the costs in the case, the property of the offender to be liable for the entire amount of the judgment.

The penalties imposed include either

fine or imprisonment, or both, in the discretion of the court, and are applicable to any person, trust, combination, pool or association, or any director, officer, lessee, receiver, trustee, employee, clerk, agent or person acting for or employed by them or any of them. The offense is declared to be a misdemeanor and the fine is fixed at not less than \$500 nor more than \$2,000 and the imprisonment is not to exceed six months in the county jail. The grand juries of the state are charged with the duty of inquiring into and ascertaining if there exists any pool, trust or combination in their several counties, or if the law is violated in any way.

### GENEROUS FEEDING.

The kind and amount of food that an animal receives determines more largely his future size, vigor and usefulness than any other thing in its environment. Only good grain and forage will make bone and muscle. There are other influences that aid. The breeding represented by the pedigree is merely a potential factor. The best kind of an engine without a careful fireman is no better than a dinky. The animal of the richest breeding facing an empty feed box is in no better position to make his owner money than the scrub. Add to this the necessity of shelter, healthy stabling and other things essential and it must be conceded that all are of second consideration in the care of the animal.

It is impossible to build a good, substantial house out of the same amount of material that a rickety structure requires. It matters little how careful and

well drawn the plans, it takes just so much lumber, mortar and stone. No architect would think of using inch lumber for studding. Likewise in the growing of stock no man should ever expect to have an animal come to maturity with the possession of qualities above the average no matter how carefully blended the blood of noted animals have been in his breeding, if the beast has never seen a full feed. The kind of soil on which a kernel of corn is planted determines its yield more than any other single factor, or set of factors, generally speaking. The kernel is never planted on the surface where it can receive a maximum amount of air and sunshine, but beneath, in close contact with the supply of nitrates, phosphates, etc. So with the young, growing animal. Planted between a musty strawstack and a stalk field he is well supplied with exercise and sunshine, but unless this part of his management is supplemented with some good corn, oats and bran there is little hope for his future. Too many farmers are inclined to stint the feed-box in order to fill the grain elevator. The importance of feeding the young and growing animal generously cannot be emphasized too strongly for the reason that the foundation of the mature animal cannot be too thoroughly constructed. The more nearly every part of the body is supplied with the right kind of material in proper amounts, the more nearly each part can approach perfect development. Each and every organ in the anatomy of the beast must do its full share of work in building up the different parts. The part is no better than the material from which it is made. To produce good big bone it requires plenty of bone-making food. To produce a mellow skin and furry coat it takes plenty of flesh-making food. Yet in view of the great demand for animals that are well developed men will starve the heifer calf till it arrives at the age of two years with the frame of a yearling and a calf at foot to further burden her growth. Others will allow the colt to come to maturity scarcely knowing the taste of good oats, while the pig crop is left to grow bone on fat-making foods.

So many think only of the present in their breeding operations. We have often wondered if the value of heredity was appreciated. A man will show you through his herd, say of cattle. He points out to you several generations of some family of which he is justly proud. Every generation has proven easy keepers and always kept in better condition than the rest of the herd on the same amount of food. One's first query is why in the world does not this farmer cull his herd and make them all of this kind? The second, why this difference between the feeding qualities? Our explanation is that the ancestors of this particular family for perhaps a score of years or several score had been generously fed. Not necessarily kept fat, but their appetites had known hunger only of the healthy kind. This trait of keeping in good flesh, possessed by each succeeding generation, finally becomes a fixed character, and therefore becomes characteristic. Thus we have families in every breed of stock that are noted for their easy-feeding qualities or their tendency to lay on flesh rapidly when given the chance. Such individuals taken into a scrub herd soon demonstrate their superiority. Of course if subjected to scrub conditions for several generations this characteristic becomes lost. If this is true, then why cannot this quality of easy keeping be developed, and intensified by generous feeding, even on the

### THE GALLOWAY WAGON BOX MANURE SPREADER. THE SPREADER FOR EVERY FARMER.

The Galloway Spreader Fits any Farm Truck.

The wagon box manure spreader idea has long been in the minds of many farmers. It has remained for Mr. William Galloway to produce the first successful wagon box manure spreader ever put on the market. Readers of The Homestead are not unfamiliar with the name of William Galloway, as he has been advertising in the columns of this paper for the last three years. The Galloway harrow cart may be seen on thousands of farms in Iowa today. It is not surprising that Mr. Galloway should be the first manufacturer of a successful wagon box manure spreader. He is a farmer himself and has gone through all stages, from farming to traveling salesman for implement houses, in the retail and wholesale implement business, up to the manufacturing of farm implements, all of which he is now selling direct from his large factory to the farmer. No one could be better posted or appreciate the merit of such an implement as his wagon box manure spreader. He knows just what the farmer needs in this line, the sort of conditions which a machine of this sort is used in and what will be required of it. The words of his customers tell best the real merit of the Galloway spreader and the wonderful success it is making. The Galloway Wagon Box Spreader is made in two sizes, and will fit the standard narrow tread farm wagons or trucks and the wide-tread trucks. It is a thoroughly adjustable machine, and very simple in construction. They are light in weight, as there are no extra working parts to them. It is no trouble to put on or take off the Galloway spreader from a pair of trucks. A complete description showing by illustrations every special working part is given in the Galloway free booklet. Send for one today. Every reader of The Homestead, whether he is in the market for a manure spreader now or not, should have one of Mr. Galloway's wagon box manure spreader booklets. They contain much information on the subject of manure spreading that is of value. The Galloway Wagon Box Manure Spreader is being sold direct to the farmer at one-half the usual price asked for a spreader. We would urge every reader of The Homestead to send for this booklet. See his advertisement on page 13 and get his free catalog.

average farm? This is something worth thinking over.

Only by generous feeding can maximum results be secured. The evil of scanty feeding is that an animal does not get a chance to show what it can do. We fail to see why any man should be skeptical on this point. It may cost \$10 more, say, to feed a colt generously up to maturity, but his superiority over a less favored animal will more than return the value of the feed, to say nothing of the greater value for breeding purposes of the well grown animal. With a vigorous, rugged constitution, sound digestive powers and active eliminative organs such an animal is ready to impress characteristics of value on its offspring if used for breeding or be a profit to his owner to whatever other end intended.

There is no one thing that is so essential to the success of the feeder or breeder as generous feeding. By generous feeding we do not mean feeding the young calf a pail of milk every feed; two gallons skim milk a day is better. It does not mean turning young stock to a full bunk every other day, neither does it mean feeding corn or any other one grain exclusively.

It does mean to feed enough of good food in variety and quantity, especially to the young animal, to make it something that will excite your admiration rather than pity. A normal animal reciprocates both good and ill treatment. The former kind is profitable in the extreme. Lack of substance and a bare loin go with an empty feed box. Generous feeding promotes growth, health, and insures profit.

## County Fair Rules and Regulations

BY R. J. KINZER, KANSAS AGRICULTURAL COLLEGE

As the time is at hand when county fair organizations should be getting out their premium lists for the fall fairs, a few suggestions regarding the rules and classifications would possibly not be out of place. Many counties in the state are holding very successful annual fairs with classifications and premium lists that are thoroughly up to date, but there are other fairs which are merely existing, and when one is familiar with the loose and unbusiness-like methods in which they are conducted, it is surprising that they are able to exist at all.

Before publishing a catalog or premium list, the board of directors should agree on a set of rules and regulations broad enough to cover all the questions that are likely to arise during the fair. Such rules should be plainly written, leaving no chance whatever for a difference of opinion as to how they should be interpreted, and the management of the fair should see that these rules are enforced and observed to the letter. It would not be a bad plan to state on the cover page of the premium list that all rules and regulations will be enforced, and that no one need ask for any special privileges. Such a statement would, perhaps, save the secretary and superintendent much worry and bother.

Some associations advertise that they will furnish hay and bedding free of charge to all live stock exhibitors. If it has been advertised that this will be done, the superintendents of the various live stock departments should see to it that there is plenty of both hay and straw on hand at all times, and that the exhibitor has suitable stalls for exhibiting his stock so that they may be comfortable, and at the same time be easily accessible for the inspection of those who attend the fair. Complaints are frequently heard from visitors that they are unable to see the stock owing to the fact that they are in crowded quarters or poorly lighted barns. These are things that the management of the fair should look into long before fair time, for those who attend the fair and pay their admission, are entitled to every consideration that can be accorded them.

The date on which entries should close in the live stock department especially, should not be later than six o'clock in the evening of the opening day of the fair, and this rule should be strictly observed. I have known cases where the entries have not been closed until the second or possibly the third day of the fair, and breeders living near the fair grounds, have visited the fair on the first day or perhaps the morning of the second day, and found some classes were not well filled, or possibly not filled at all, and have gone home and brought in stock and entered it in these classes, that was a disgrace to the owner and to the fair association to have it on the grounds. They have also asked to have the judging delayed until they could get their stock in. Oftentimes such animals are entirely unworthy of a premium at all, and are simply brought to the fair because there is nothing else in that class and the owner thinks there is a chance to win a prize without competition.

This is also an injustice to the exhibitor who has gone to some pains to fix his stock up for exhibition, and who perhaps has moved it a considerable distance. This can be overcome by positively closing all entries by six o'clock on the opening day of the fair, and requiring that all animals that are in-

tended to compete for prizes be on the grounds at that time, and they should by all means be required to remain on the grounds until the fair closes. In the horse classes, more especially in the light horse classes, there is a tendency to ascertain the time when such classes will be judged, and the owner simply drives his horse or team on the ground at that time, and then takes them home again. Such entries as this are of no value to the fair or to the visitors, and they should never be permitted. All stock that are entered for competition should be required to remain on the grounds from the time the entries close until the fair is over, unless possibly in the case of a lack of suitable stall room, stallions are allowed to be taken off the grounds after six o'clock in the evening and returned by seven o'clock in the morning.

If, after an animal has been exhibited and possibly won a prize, it should be taken away and not returned, the fact should be reported by the superintendent of that department, and any prize money or premium that such an animal has won should be withheld from the owner.

The state is now pretty well stocked with pure-bred animals of all kinds, and certificates of registration should always be required at the time of making entry. The date upon which the ages of the various classes are to be based, should be plainly printed on the preliminary classification list. Very frequently animals are found entered in the wrong class, and this difficulty can be overcome if the date upon which ages are to be based has been published and the certificates of registration are required to be presented with the entry applications, and it will also eliminate any possibility of grade animals being entered in the pure-bred classes.

If the entries are positively closed at six o'clock on the opening day, and there should be no exception to this unless it be on account of the inclemency of the weather, it will give the secretary and superintendent of the respective departments time to make up their premium books so that everything will be in readiness when the time arrives for judging. Small premium books should be provided for each breed. At the time an exhibitor makes entry, he should be assigned a number, and this number takes the place of his name, and all entries he may make, no matter whether it be in the live stock department or whether he is exhibiting in other departments, in whatever class he makes an entry this number should appear. Never give each entry that he makes a separate number, as it is not at all necessary, and oftentimes is very confusing.

Some associations have a rule that there must be two or three animals competing in any class before a premium will be awarded. This is not justice to an individual exhibitor who may have an animal that is very worthy; it is not his fault that the other entries are not present, and such a rule should be excluded from all associations. On the other hand it is a good plan to have a rule that no unworthy animal or article where the classes are not well filled shall be awarded a premium.

A pen or roped enclosure should be provided in which the judging may take place, and everyone except the superintendents, judges, and the attendants of the stock, should be excluded from this ring during the time the judging is taking place. It should be required that all

cattle and horses that are exhibited must be thoroughly halter broke. The average-sized pen which is provided for hogs is usually entirely too small for the judge to make a thorough inspection of the hog, and some place outside the shed with convenient gates or openings should be provided for judging hogs. If a shed is constructed with a double row of pens and an aisle through the center, whenever it is possible it is always more convenient to take the hogs out through the back side of the pen so that they will not interfere with the visitors who may be in the sheds at that time.

A rule cautioning the exhibitors never to interfere with the judges or have anything to say to them relative to their exhibits when they are being judged, should be included among the other rules. If a team is to be shown in harness, it should be definitely stated whether the harness is to be taken into consideration or not. This has often caused dissatisfaction when the award was made, as some exhibitors have spent considerable time in fitting up a good harness when it was not the intention that the harness should have anything to do with the award.

Around the hog and sheep pens especially, the management should provide for ample disinfecting.

Most county fairs provide for only two prizes. In localities where there is likely to be a large exhibit of stock, the same amount of money, divided into three prizes will often prove more satisfactory and insure better filled classes than when it is given as two prizes. Each breed should have a classification of its own, and never require all draft horses to be shown in the same class, or all beef cattle to be shown in the same class, or all black hogs, or all red hogs, as is sometimes the case.

In all the larger fairs the date for computing ages is the first day of September for cattle, and March 1st for sheep and hogs, and if such dates were adopted by all county fairs it would often save many disputes and much dissatisfaction. The classification lists of the various breeds should contain enough classes to accommodate animals of all ages. In some associations we find a very limited classification, and in others a larger classification than is necessary. The following classification will usually be found ample for the average county fair.

For pure bred horses each breed should have the following classification: Stallions, four years old and over; stallions, three years and under four; stallions, two years and under three; stallions, one year and under two, and stallions under one year.

Mares, four years and over; mares, three years and under four; mares, two years and under three; mares, one year and under two, and mares under one year.

This classification should be provided for all breeds, both light and draft horses, that are common in the county or locality that are likely to be represented at the fair. If there is to be a large exhibit of horses, it is sometimes advisable to offer a prize for the best three or five head brought by one exhibitor or for the best three or five colts the get of one stallion.

For cattle there should be classes for: Bulls, three years old and over; bulls, two years and under three; bulls, one year and under two, and bulls under one year.

Cows, three years old and over; cows, two years and under three; cows, one year and under two, and cows under one year.

A herd of five head consists of a bull and four females. This can usually be made for any age, or a classification for an aged and a young herd may be provided. There should also be a class for two animals, the produce of one cow, and for three or four animals, the get of one sire. This classification will answer for both beef and dairy breeds, but each breed should have its separate class, and in the hog department each breed should also have a classification with classes for: Boars, two years old and over; boars, one year and under two; boars, six months and under one year, and boars under six months.

Sows, two years and over; sows, one year and under two; sows, six months and under one year, and sows under six months.

An aged herd should consist of a boar and three sows over one year, and a young herd of a boar and three sows under one year. There should always be a class for the best litter of five pigs

Holland Engine Co., Dept. 4, Cedar Rapids, Ia.

**\$21 Farmers' Cement Machines**

These machines are complete and guaranteed to give satisfaction. UNITED CEMENT MACHINERY MFG. CO., 100 First National Bank Bldg., Waterloo, Iowa.

and for the best five pigs sired by the one boar.

In counties where sheep are to be exhibited, each breed should also have its own classification which should run: Ram, two years old and over; ram, one year and under two, and ram under one year.

Ewe, two years old and over; ewe, one year and under two, and ewe under one year.

Best pen of five lambs and flock to consist of ram and three ewes.

One of the most common errors found in the average classification list is the requirement that entries must be made before animals are eligible to compete in the championship classes. Such entries are not at all necessary, and are never required in the larger shows. The first prize animal in each of the respective classes, that is, the first prize stallion of any class should compete for the championship of the breed. The same with the mare classes, cattle, and hogs, and if it is so desired, a senior and a junior championship may be provided for. In such a case, all animals over two years old would compete for the senior championship, and all under two for the junior.

It is seldom, if ever, advisable to have a sweepstakes class between the different breeds, as it is usually hard to get a judge who is not more or less partial to some breed, and no matter what his decision might be, it is more often unsatisfactory than otherwise. The superintendent of each class should make a note in his premium book of the winner of each class, and when the individual classes have been judged, he should call out the first prize winners of each class to compete for the championship of the breed, and the exhibitor should never be required to make entries for this class.

## Farm Furrows

Turned by a Practical Farmer.

There is a great deal of money in some schemes, but too often it is hard to get out.

The safest kind of whiskey is that which is bottled—with the cork on tight, and there to stay.

Some eastern scientists have discovered the weight of the soul by taking weights of bodies just before and after its demise. What next?

A leaky wooden tank can be made as good as new by lining with galvanized iron. If the tank is small, take it to the tinner; if large, take the tinner to the tank.

A Babcock tester is a necessity to a dairy farmer. If properly used it will pick out the robbers and leave only the cows that pay a profit, and, besides, it adds interest to the work.

When the first rain of the season falls, close the drain pipe into the cistern. The winter's accumulation of dirt and silt that has collected on the roof is more desirable in the yard than in the bottom of the cistern.

I would rather groom a horse than sharpen the disks on the disk harrow; but the latter job is one not to be neglected unless one cares to waste time taking the work to town and waiting indefinitely for it to be done.

The burning of a straw stack in the neighborhood of evenings is as seldom an occurrence now as it was common fifteen years ago. Then most any night one could see a half dozen around the horizon. The burning of a stack now is an event to be celebrated by the young folks.

There is a time when a man should be concise with his words and again too much conciseness makes very hard reading. At one of the winter sales a breeder sent a bid on one of the animals, with the following instructions: "Here is my bid of \$50 for No. 1. Don't make the mistake of a hundred."

The farm barn yard that has good drainage and keeps dry a good share of the time should certainly be the choring place of a happy farmer. If there is anything that is disagreeable in wet weather it is to have to keep one eye on the path ahead of you when floundering around in the barn yard in order to keep from getting mired.

It seems that everybody has his own ideas about the road drag. A great many people try to make both the drag and the work a complex subject. It seems to me that it must be a dense person indeed who cannot see that the drag in itself is only a simple affair and that the best results are secured when it is used when the road is still a bit muddy.

I often wonder if there is not a great deal of time wasted in trying to bring up orphan stock. I used to like to putter around with the little pigs that happened to be left motherless, but I cannot remember now that I ever had much success. With lambs it is considerably different, and some of the best sheep that I have ever raised have been brought up on the bottle. Nothing less than a skilled animal nurse can bring up the orphan colt.

There is altogether too much floundering around in the business of stock breeding. If people would only use a little more good common sense. For instance, how in the world can any neighborhood hope to produce a uniform lot of horses when every breed from roadsters to draft horses are represented? Some men in the course of their experience have had every breed of cattle on their place. Undoubtedly, the term "breeder" is wrongly applied in the

## TO GET THE MOST AT HARVEST TIME WITH THE LEAST EFFORT

That's what you want—the best harvest results at the least expense of time and labor.

When your grain and grass ripen, you are too busy to waste any time on needless work or on delays and breakdowns.

Every minute counts.

That's the reason you buy harvesting machines—to save time and labor.

And the better the machine, the surer you can be that it will save time and labor—that it will go right through the harvest without a stop or hitch or delay, from start to finish.

You want to be sure now, that you are ready for harvest.

Be sure that you have a machine that will cause no trouble at your busiest time.

Be sure that your machine will get all the grain you have grown, with the least possible waste.

Be sure that it will be easy on your team, that it will give you long service, that you can get repairs for it easily and quickly when repair parts are needed—in short that you can depend upon it at all times.

You cannot tell a great deal about a machine by looking at it.

But its record—its performance in the field—what it has done for the men who have bought it and used it through a number of years—that tells a story which means everything to you.

Of the many types and styles of harvesting machines put on the market in the past thirty to forty years, there are a half-dozen that have always stood head and shoulders above the others.

Why? Why have the

**Champion, McCormick, Osborne,  
Deering, Milwaukee, Plano—  
HARVESTING MACHINES**

always been such great leaders? Why have farmers purchased them in so great numbers? Why are they used the world over, wherever grain and grass are grown? Why do they hold the supreme position they do?

You know the reason.

There can be but one reason, and that is this:

They have always done good work—they have satisfied their users—they have proved by a generation's use that they can be depended upon.

Their popularity and their reputation have not come by chance.

They have earned their reputation by their work in the field.

They have won their popularity by deserving it. And it is impossible to get a higher endorsement than that.

Today, these six lines of harvesting machines, the International line, are more popular than ever before, because they are better than ever before.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, ILL.**  
(INCORPORATED)

**International Line:**—Binders, Reapers, Headers, Header Binders, Corn Binders, Corn Shocks, Corn Pickers, Huskers and Shredders, Corn Shellers, Mowers, Hay Tedders, Hay Rakes, Sweep Rakes, Hay Loaders, Hay Stackers, Hay Balers, Feed Grinders, Knife Grinders, Cream Separators, Gasoline Engines, Pumping Jacks, Manure Spreaders, Weber Wagons, Columbus Wagons, Bettendorf Wagons and Binder Twine.

majority of cases. A breeder in the highest sense of the term is uncommon indeed.

The steer that is putting on fat will be found somewhere about the yard in the sunshine lying down and placidly looking on at the rest of the world. It is a peculiar habit of steers that are in heavy flesh to give a kind of low groan after taking their fill at the feed

box. This is more common, however, in the show stall than in the feed yard.

There is some good advice that might be given regarding the selection of new varieties of fruits and other products of the farm. It is all right to keep one's eyes open for something new which promises to be of merit. Only in this way can the farmer keep up to date in the matter of selecting the crops that

he grows. I don't believe in purchasing every new thing that is glitteringly held up to the public. I do believe, however, that one should always be on the lookout for new varieties which may be purchased and tried out in a small way on one's farm until their merit has been thoroughly tested. If they should then prove of value one has gained a great deal. If they are worthless there is little loss.

## THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

### SOWING CLOVER AND TIMOTHY.

The following communication has been received from a South Dakota subscriber, Mr. K. Ulrikson:

I am planning to seed down 100 acres of clover and timothy this spring, and I would like to know if it would be better to sow with a drill than to put it in broadcast, and how much seed should be used per acre. It is my intention to put some of it on fall plowing with barley and some on corn stalk ground with early oats.

A good deal depends on how one is equipped in the way of machinery for sowing the crop. If the oat and barley crops are sown with a drill without a grass seeder attachment in front, it might be a good plan to sow the grass seed after the seed bed is prepared and before the grain is drilled in. As a general thing, the disks or spouts of the drill throw enough soil to cover the grass seed, and there is this advantage in that method that it puts the clover and timothy plants in the space between the rows of grain.

If the grain is to be seeded broadcast, then about the only thing that one can do is to sow the timothy and clover seed either at the same time that the grain is seeded or afterwards, but before it is harrowed in. As a rule, the harrow, which is used for covering the small grain, will not cover up the timothy and clover seeds too deeply. In our opinion there are more mistakes made by covering grass seeds too shallow than are made by covering too deeply.

As to the quantity of seed, this depends a little on conditions. However, a good mixture is from eight to ten pounds of clover and four or five pounds of timothy seed per acre. If both crops germinate well and come through the first winter, clover will largely predominate the first year, the second year the crop will be about half timothy and half clover and after that timothy will large-

## FOR SALE

Circular containing large pictures of different style trucks with full description.

ly take possession of the land. If it is desired to obtain hay that is uniformly mixed timothy and clover, then it would be advisable to sow about equal parts of the seed of each.

### SORES BIG AS A PENNY

Covered Head and Neck---Hair All Came Out---Suffered 6 Months---Used Cuticura Costing \$1.50.

### CURED IN THREE WEEKS

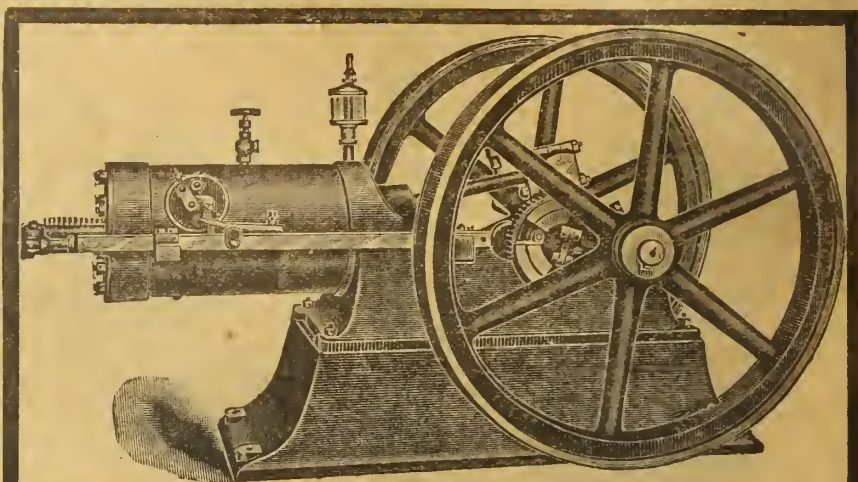

"After having the measles my whole head and neck were covered with scaly sores about as large as a penny. They were just as thick as they could be. My hair all came out. I let the trouble run along, taking the doctor's blood remedies and rubbing on salve, but it did not seem to get any better. It stayed that way for about six months; then I got a set of Cuticura Remedies, and in about a week I noticed a big difference, and in three weeks it was well entirely and I have not had the trouble any more, and as this was seven years ago, I consider myself cured. I used one bottle of Cuticura Resolvent, one box of Cuticura Ointment, and two cakes of Cuticura Soap. Mrs. Henry Porter, Albion, Neb., Aug. 25, 1906."

#### A WONDERFUL COUNTRY

and a progressive people inhabit the Indian Territory. Its resources are great and opportunities for profitable investment appeal to all who acquaint themselves with the facts. Atoka, I. T., is the oldest town in the Choctaw Nation and the place where all the treaties have been entered into by and between the Indians and the government as represented by the commission to the five civilized tribes. Thousands of investors and homeseekers are now invading every nook and corner of this beautiful country, and as fast as lands become alienable there is someone on the spot asking for a chance to buy, hence competition that makes it hard on the stranger to the location of such lands as may be on the market, and the peculiarities of the Indian owners. All of this the Indian Land Bond Company understand and are prepared to overcome, by reason of their acquaintance with the people and all conditions prevailing in the Choctaw and other nations. These gentlemen have been located at Atoka, I. T., ever since the opening, and know personally every valuable tract of agricultural lands on the market, and are in position to purchase at reasonable prices, hence their ability to offer the land bonds, which insures the holder thereof the right of selection of all the lands in the series, which attracts unusual attention among the homeseekers, as well as the one who might prefer to draw 6 per cent on the face of the securities offered. The special feature in this proposition is the fact that the holder of any bond is given the option of holding his bond for ten years and taking the interest at the rate of 6 per cent, or taking the land represented by said bond, at any time, in lieu of the money. The Indian Land Bond Company have their inspectors and purchasers in all parts of the Nation and are acquiring the cream of the bargains offered. They are thoroughly acquainted with the merits of the lands in question, and are men of unexceptional ability and honesty of purpose. They are large owners in their own right and are recommended by the strongest financial institutions of the Nation. All who desire information relative to lands, timber, coal, asphaltum or minerals of any kind that may exist in Indian Territory, can rest assured that they will get the best and most reliable information relative thereto by writing this company. The oil and gas development is as yet in the pioneer stage, but thousands of leases are being taken within a radius of twenty miles of Atoka, and several rigs for deep wells are now being placed, and within a few weeks the territory will be tested. Many experts, including that of the Standard oil people, are in the field. All of this and many other reasons convince us that the Indian Territory is the place for men who have \$500 or more to invest, as lands and all securities will certainly become more valuable as the country develops. Their advertisement appears on page 23 and should be read by all who are interested in safe and sound investments.

#### THE MANAGER OF SMITH'S RED POLLED SALE WRITES:

"Having just spent three days with the Geo. H. Smith herd of Red Polled cattle at Chillicothe, Ohio, I will say that in comparison with those which came out to leading shows last year Mr. Smith has as good a bunch of fifty head of this breed as any man or firm in this country. It should suffice to say that No. 1, Nun, was a cow good enough for the veteran, Capt. Hills, of Ohio, to import, but add to this fact that she produced to the service of Imp. Eyke Dandy a daughter as superior a dual animal as Nun-such, and something of unusual merit confronts us. A sister of Nunsuch is Nuntella by Rowdy Rod, the 1904 International champion. Then there is Newborn Spot, imported

**THE** greatest engine proposition ever offered to the readers of The Homestead. We build a complete line of stationary, pumping and portable engines from 2 to 30 H. P. ### Buy Wright's Stock Feeder Before April 1st.

It saves a great amount of feed and labor, and helps develop a more uniform lot of pigs. Everybody who has tried it says a good word for it, experiment stations, hog raisers, sheep men, etc. Many of them say it more than pays for itself every year. No wasted feed. No runs when this feeder is used. Every pig has his place and gets his share of the feed; and the best of it all don't cost much. I really ought to have more money for it, but have been able to make favorable arrangements for material and therefore have decided to give my patrons the benefit, and on all orders mailed me on or before April 1, 1907,

**The Old Price of \$10.00, Freight Prepaid,**  
still holds good. This includes the right to manufacture other feeders for your own use; worth this amount in itself. Positively no orders filled at this price after April 1st. Order at once if you want the feeder. You'll never regret the investment. Booklet illustrating and describing the feeders if you want it. Address all correspondence and orders to **C. A. WRIGHT,** Rosendale, Mo.

This is it—Invaluable for Feeding Pigs, Sheep and Calves  
Also breeder of registered Duroc Jersey Hogs.

## PIPE

at less than one-half Price

We offer one million feet of iron pipe all sizes, also lumber, structural iron, roofing, farm machinery, boilers, etc., at less than half the original cost. We guarantee everything we sell, and refund your money if you are not thoroughly satisfied. References: Merchants-Laclede National Bank, or any commercial agency. Write today for complete catalog and prices.

**ST. LOUIS WRECKING & SUPPLY CO.**

**3867 MANCHESTER AVE., ST. LOUIS**

by Capt. Hills, safe in calf to Popular, one of the best-bred bulls along dairy lines in the breed; and Spotless Maid, out of Newborn Spot by Popular, a milk wonder, producing from twenty-six to thirty pounds at a milking after her first calf. Great things are expected from her next calf. Partia 2d, bred by Mr. J. W. Martin, of Wisconsin, and sired by the Omaha champion, produced the two champions, Rowdy Rod and Water Boy, and Red Princess, one of her produce in the sale, has prospects superior to both. Partia 3d is a full sister to these champions. Anne Darre, a champion at the 1901 International, is in her prime, while her dam, Portulacca, and her daughter, Popular Aune by Popular, are among the choice ones. Others worthy of your careful attention are Queen Bird, dam of champion heifer, Miss Gay, a \$405 prize; Princess 2d, an exceptional producer, likewise Daffodil. Popular Rose is the best show proposition I know of today, and is sired by Popular. Treasure is another high-class young cow with the best

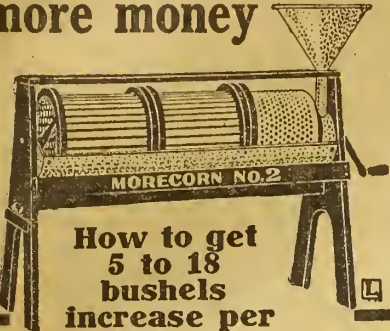

milking strains behind her. Boquette is a carrier of champion blood of several shows, while another that could not be priced at private is Popularity. Pacatella, the herd bull, is generally too well known to need comment. He is a champion and a getter of champions, which are profitable producers in turn. Popular, before mentioned, can stand on the merits of his get. Superlative describes him. Here is an opportunity of opportunities. Write for catalog to Mr. Geo. H. Smith, Chillicothe, Ohio. Kindly mention The Homestead in your request.

#### CHEAP ONE-WAY RATES.

Every Tuesday during March and April, the Minneapolis & St. Louis R. R. will sell cheap one-way excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. Rate is \$14 to most North Dakota points. Buy tickets at 512 Walnut St., or Union Station. For further information write W. K. Adams, Dist. Pass. Agent, Des Moines, Iowa.

## More corn means more money

**How to get 5 to 18 bushels increase per acre**

You know as well as we do that if your planter drops too many kernels in the ground at one time, they cannot obtain the proper amount of nourishment from the soil. That means stunted stalks, stunted corn—**dollars out of your pocket.**

Again if too few kernels are dropped by the planter, the stalks will bear good ears of corn but you lose the yield from the missing stalks. Any good planter will drop two, three, four, five or as many kernels as you want, provided you sort them first with the

### Morecorn Sorter.

It sorts every kernel not only for length and width but for thickness, this is impossible to do by hand sorting. Even a hair's breadth makes a difference in this wonderful machine.

If you sort your seed corn with the MORECORN SORTER, then set your planter to drop 3 kernels, it will drop 3, no more, no less, 100 times out of every 100.

This means 5 to 18 bushels of corn increase for every acre. Does this interest you?

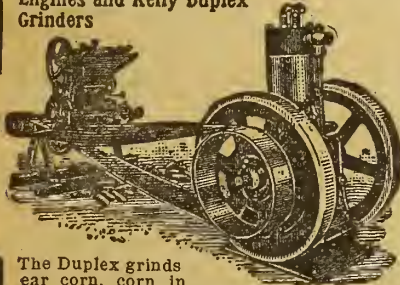

If it does—and it certainly should—sit down while you are thinking about it and ask us to send you our FREE literature.

**Monarch Self Feeder Co.**

95 Main St. Cedar Falls, Iowa

### THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

### OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

#### LAW QUESTIONS CONSIDERED.

##### DESCENT IN NEBRASKA.

A Subscriber, Royal, Neb.—A filed on a homestead, and died two years afterwards. B, his wife, proved up at the end of five years in her own name. What right to the land has her only child?

Answer—If B should die without marrying again, the child would inherit the land as heir of its mother unless she willed it to someone else.

##### DESCENT IN IOWA.

An Iowa Subscriber.—A and B are husband and wife. The wife owns the farm, the deed being in her name. Suppose she should die without a will, leaving no children, how would the farm be disposed of according to the laws of Iowa?

Answer—The surviving husband would get half of it and the deceased wife's parents the other half; in case one of the parents was dead, the other would get the half; in case both parents were dead, the half would go to the deceased wife's brothers and sisters.

##### WILL—CHILDREN.

A Nebraska Subscriber.—In case a father should regard some of his children as unworthy, can he lawfully disinherit them entirely in his will—cut them off without anything, or must he leave them a certain amount in order to render his will valid and binding?

Answer—A father can by will entirely disinherit any of his children. If he makes a will and by mistake omits to mention a child, that child can get its share as his lawful heir, but if the will shows an intention to cut off any child from sharing in the estate, it will stand.

##### FAILURE TO FURNISH PEDIGREE.

A Subscriber, Wausa, Neb.—About November, 1906, I bought a boar pig from a man in Le Mars, Iowa. He guaranteed the pig to be a breeder and agreed to furnish a certificate of its pedigree. I am in the thoroughbred business and have bred my thoroughbred sows to this boar, but the seller has not furnished the certificate of its pedigree, though I have written for it several times. What can be done about the matter?

Answer—You can bring suit against the man who sold you the boar, and recover whatever damages you can prove on account of his failure to furnish certificate of pedigree as he agreed to do.

##### HOMESTEAD ENTRIES.

A Subscriber, Moline, Mo.—A single man, and a single woman, each entered a homestead in South Dakota. How soon afterwards can they intermarry and hold possession of the homesteads they entered?

Answer—Each one must reside on and cultivate the homestead entered for a period of five years from the time of entry, so that final proof may be made and receipt issued, or after fourteen months of such residence and cultivation, the claims can be commuted and purchased by the parties at the government prices. If each party fulfills these conditions, they may marry at any time.

##### FIXTURES.

Mr. D. Hollander, Orange City, Iowa.—(1) Is a common stock water tank which is in use on a farm, but stands on top of the ground, not attached or fixed on foundations, a fixture going with the farm on a sale, or is it merely personal property? (2) Do the hay fork and rope of a hay carrier in a barn belong to the premises, or can they be moved as merely personal property in case of sale?

Answer—Both of these are close questions and difficult to answer without knowing more about how the articles are fixed and used. When parties contract for the sale and purchase of farms they should by all means have a distinct and definite understanding about just such things. The article mentioned in the first question, we think is merely personal property and does not belong to the farm. We are in some doubt as to the rope and fork of the hay carrier.

##### OBTAINING A PATENT.

A Subscriber, Sigourney, Iowa.—Please give me some directions about obtaining a patent, and state approximately the cost of it?

Answer—You must make written application for the patent, accompanied by affidavit, to the commissioner of patents at Washington, D. C., and file in his office a written description of your invention, and if of a mechanical nature, proper drawings of it. The description and claim must be signed by you, and attested by two witnesses, so also the drawings must be signed and attested. You must pay into the commissioner's office at the time of filing

## Protects and Beautifies

Protects because it is a perfect weather-proof, elastic and fire-resisting roofing.

Beautifies because its lasting deep red color enhances the appearance of the building.

### THE ONLY PERMANENT ROOFING WITH A PERMANENT COLOR

Combines all the features of Ruberoid Roofing—the standard for 16 years. Does not crack, rot or corrode. Suitable for all buildings.

Color guaranteed for five years.

Write for samples and prices.

**THE STANDARD PAINT COMPANY,** Sole Manufacturers

GENERAL OFFICES 100 WILLIAM STREET NEW YORK

BRANCHES: CHICAGO CINCINNATI ST. LOUIS PHILADELPHIA KANSAS CITY ATLANTA BOSTON

### THE OLD RELIABLE „Anti-Friction Four Burr Mills..

Double the Capacity of other Mills. TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

## CLIP YOUR HORSES IN THE SPRING

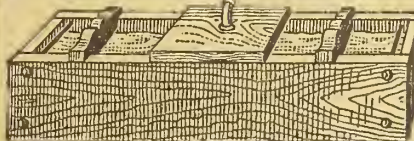

WITH THIS NEW STEWART CLIPPING MACHINE

Clipped horses look better, feel better, work better, and are less liable to take cold. Don't let your horses stand all night with a heavy, damp coat of hair on. It weakens them and they lose flesh. If clipped they dry quickly, rest well and their food does them good. Price \$6.75 Only 6=

**WE GUARANTEE THIS MACHINE FOR 25 YEARS** It is built strong with file hard cut steel gears enclosed and running in oil. There is little friction and practically no wear. All progressive farmers and horse-owners now clip in the Spring, and this is the machine to do it with. Order one now. Send \$2.00 with your order and we will ship C. O. D. for the balance. Write for our big new catalogue, which shows the largest line of clipping machines in the world. It is free. Send today.

CHICAGO FLEXIBLE SHAFT COMPANY, 234 Ontario Street, CHICAGO

**\$100 Reward \$100**

### The ONLY HOG and SHEEP WATERER.

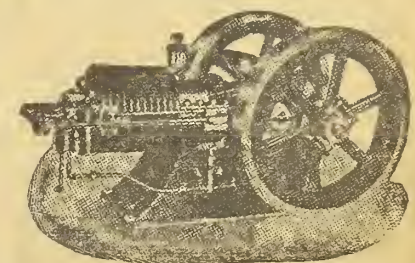

The ONLY will not run over or clog and will run all winter. If it fails we will forfeit \$100.00. Write and ask us about it. Enclose 10 cts. for booklet on hog-raising. Write to-day.

Price \$5.00. Worth twice it. ONLY MF. CO., Hawarden, Ia.

these papers \$15, and if the patent is allowed, \$20 more within six months after it is allowed. These are all the fees required at the patent office, but should you have to employ a draughtsman to make your drawings, and a patent attorney to prepare your description and application, their fees would amount to at least \$25 and if the invention should be very complicated, much more than that. Scarcely any person without experience is competent to obtain a patent without the assistance of a patent attorney.

#### HOMES IN THE NORTHWEST.

Why not settle on the government land, or low-price farm lands that are improved, in South Dakota; thus staying near at hand instead of journeying to a distant region where the climatic conditions and social surroundings are widely different? Special low rates are in effect the first and third Tuesdays of each month to all South Dakota stations on the North-Western Line. It will pay you to investigate. New lines are opening up extensive territory to development, creating the chance of a lifetime. Ask your ticket agent to give you full particulars, with maps, pamphlets, and complete information regarding railroad rates and the steps necessary to secure government land free.

### GADE AIR-COOLED GASOLINE ENGINES

Sizes 2, 3 and 6 H. P. We keep our cylinder cooler than it can be kept by water or oil. We have no frozen up water jackets or burst cylinders in cold weather like the old styled water cooled engines. Write for catalog and price list.

GADE BROS. MFG. CO., North Iowa Falls, Ia.

### FOR SALE.

One Peerless 16-Horse Engine, one Peerless Separator, Self-feeder and Wind Stacker, also one Joliet No. 2 Cornsheller.

THIS machinery is good as new. Will sell for half its cost when new. Will sell for cash, or write what you have to trade.

W. R. HAINLINE,

Blandinsville, Illinois

**\$25 ON 5 TON**

IS WHAT YOU CAN SAVE We make all kinds of scales. Also B. B. Pumps and Windmills. BECKMAN BROS., DES MOINES, IOWA.

## ADDITIONAL FIELD NOTES.

## CHEAP FENCE POSTS.

Timber is getting so scarce that the question of durable fence posts is every day becoming a more serious problem with the farmer. Cedar is getting so scarce and high as to make it almost impossible to use it, and other lumber of whatever description, must be expensively treated or it rots out in no time. Considering these facts our readers will be vitally interested in the proposition offered by the Moore Post Mold Company, 327 E. Third St., Sterling, Ill. They have an inexpensive mold, which makes it possible for anyone to make fence posts from cement, which will last a lifetime, during rainy days and at odd moments, at a cost of nineteen cents each or less. These posts have holes for stringing the wires and if properly made according to directions will become stronger year by year, having all the qualities of the best granite. The Moore Post Mold Company will gladly answer any questions regarding their product which our readers may ask of them. See advertisement on page 18.

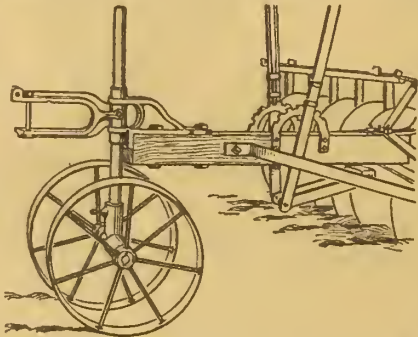

## OKLAHOMA TWENTY-FIVE CENTS—BUY FARM NOW.

Railroads are now making special low rates the first and third Tuesday of each month to Lawton, Okla. People are going there from every state, some to start new homes on land purchased and others to buy farms. Still others from the North and East are renting farms because they can get better terms, free pasture, live cheaper and

gain an opportunity to buy land of their own. There is still time for men to buy or rent farms and put in crops this year because planting cotton, broom corn, kafir, alfalfa, cow peas, potatoes, etc., will continue until June 1st and some of the crops are planted after small grain is harvested during June. Even crops of corn have made good returns from ground where oats were raised and that is the proper time to put in cow peas. This crop has proven to equal clover to fertilize the ground and makes a much better crop for feed. All stock does well with cow peas and hogs fatten on it. Over 5,000 land seekers are getting back money bid on claims in that country recently and many of these are securing these special offers in farms. Powers Land & Loan Co., the old reliable firm, of Lawton, have automobiles, men, teams and time to show special bargains, some of which can be bought on easy terms, and have farms to rent for prompt acceptance. Write for price lists, terms, etc. Send twenty-five cents to Mr. James M. Powers for Oklahoma Book describing soil, climate, crops, rainfall, school, church and social conditions and valuable information about this new state, county and famous city of Lawton. When writing please mention this paper.

## THE NEW TONGUE TRUCK

for disk harrows and other machines seems to fill a long-felt want. The disk harrow, one of the most useful machines on the farm, has always been very hard on the horses that are required to pull it. The constant vibration of the tongue has proven a source of irritation, especially to a high-bred team and the twist of the collars around the horses' necks in making the turn at the end of the field is also another severe strain. To eliminate these hardships a tongue truck was invented doing away with the stiff tongue, coming direct from the harrow, and eliminating all of the constant vibration and difficulties in turning. A horse as well as a man can do more work and do it better when unhampered by inconvenience. The

tongue truck is therefore a source of profit to the farmer. Every new tool which has been invented for increasing the capacity and lightening the labor of the team has been an economical investment for the farmer, and the tongue truck is not the least of these. A tongue truck which can be attached to any style or make of machine puts the user of the disk harrow (already owned by him) in a position to convert his old style harrow into an up-to-date and modern machine. A truck which can be adjusted to the different makes of machines can be very readily attached to any other machine from which it is desired to relieve neck weight or oscillation of the tongue, such as a mower or seeder. The truck advertised on page 17 of this issue can be adjusted in this way. The manufacturers of this truck inform us that they are receiving inquiries and orders in great numbers and that farmers in general seem to regard it in the most profitable light. An article of this kind that really does the good that this does, we believe is a genuine blessing to the farmer. The high-class horses which the farmer of today uses demand the very best of care and consideration and the farmer well knows that he will be fully repaid by their increased good health and working capacity.

## OUR NEW STATE.

## Fascinating Facts For Farmers.

In the transition from federal rule to state government, the Indian Territory joins the sisterhood of commonwealths possessing the advantages that no other territory upon its entrance into the Union, ever offered the settler. Rich agricultural lands, a mild climate, plentiful rain fall, a network of railway, gold, silver and lead; biggest oil fields in the Union. Our entire surface is underlaid with a fine strata of coal. What else could a homeseeker want?

The Weekly New-State Tribune tells you all about it at \$1 per year. Send twenty-five cents in stamps for sample copy and county map of the new state of Oklahoma. Address New-State Tribune, Muskogee, Ind. Ter., Sept. 12.

## BARGAINS IN FARM LANDS.

If you want to learn about exceptionally rare bargains in South Dakota farm lands or unusual business opportunities in the new towns in the magnificent new country being opened up by the Minneapolis & St. Louis R. R. extension write for beautifully illustrated descriptive pamphlet on the "New Empire," the farmer's and stockman's paradise. This pamphlet will be mailed free. A postal card will do it. Write at once before edition is exhausted, to A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## EXCURSION RATE TO PACIFIC COAST.

Daily during March and April, the Minneapolis & St. Louis R. R. will sell one-way excursion tickets to points in Montana, Idaho, Washington, Oregon and British Columbia at \$15 less than regular rate. Ticket offices 512 Walnut St., and Union Station. For further information address W. K. Adams, D. P. A., 512 Walnut St., Des Moines, Iowa.

## SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## AND Is Going Up In ALBERTA

You know how many times you have missed opportunities by putting off—The man who takes advantage of his opportunities is the man who gets rich and makes his money easy.

You have heard how people are making money in the rise of land values in Alberta, Canada. Perhaps some of your neighbors have gone there and invested, and if they have they have made money.

But have you taken advantage of the great opportunities offered there?

Land in Alberta is constantly rising in value—it is not very high yet, but it is going up again this year and next year.

## Why?

Because in Sunny Southern Alberta is to be found as good land as lies out of doors—Because thousands of farmers from the United States and other countries are going in there and taking it up every year—Because enormous crops of almost all kinds of grain and vegetables can be raised there and sold at high prices—Because it is the greatest cattle, sheep and hog country on earth—Because almost every profitable product of the farm can be raised at the lowest possible cost and

sold right at home—Because dairying is more profitable there than in almost any other spot on earth.

Aren't those reasons sufficient to convince you that land is going to continue to rise in value in Alberta.

People have just begun to learn what a great place western Canada is—They have just begun to learn that it is not the coldest country on earth, but has a fine climate both winter and summer.

People have just begun to learn that there are good schools in which to educate their children, and that the neighborhoods are made up of much the same class of people that they have surrounding them at home in the United States.

You can buy Southern Alberta land cheaper right now than you will ever buy it again.

Write for our literature which tells you all about our irrigated, non-irrigated and combination farms containing both irrigated and non-irrigated lands. We will tell you how to take a fine trip through Alberta at a very low cost, and we will tell you how to buy as good land as there is in Alberta on terms so easy that anyone can own a farm.

MANLOVE AUTOMATIC GATE. Send stamp to secure valuable souvenir free. Manlove Gate Co., Milton, Ind.

# Corn and Potato Scoop Forks

WITH this fork you can handle potatoes, onions and other vegetables and fruit without bruising or injuring them.

It is by far the best corn scoop made. Does not stick into the ears and shell off the grains. It screens out shelled corn, dirt and snow, leaving your corn clean.

Notice the flat blunt ends of the tines. They protect whatever is being handled. The straight tines load the fork easily. And the capacity of the scoop is just right.

Look at the handy "hang." If you ever own one of these forks you will never part with it. "Ask your Dealer for this fork. If he hasn't it, please send us his name and we will see that you are promptly supplied."

ASK YOUR DEALER FOR  
**TRUE TEMPER**  
TOOLS.

with it. It will outwear a dozen old style scoops.

This fork belongs to the famous True Temper line of Forks, Hoes, Rakes, Weeders, Hooks, Cultivators—all kinds of Farm and Garden Hand-Tools—

"The best tools you have ever bought at the same prices you have always paid."

Write for our FREE, illustrated book, "Tools and Their Uses."

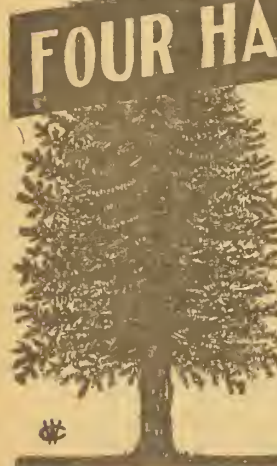

It will give you some helpful suggestions, and show you how to save money on tools.

and show you how to save money on tools.

1335 American Trust Bldg.,  
Cleveland, Ohio

## BLIZZARD BELT FOUR HARDY EVERGREENS FREE

We grow our "Blizzard Belt" Evergreens in ten million lots. To advertise them and prove that they are healthy, well rooted and vigorous, we offer to send four fine sample trees 3 years old, free to a limited number of property owners. Mailing expense 5 cents, which send or not as you please. A postal will bring them. Last year we distributed 500,000 of these sample evergreens and gained thousands of new friends. This year we have

### Reserved 600,000 Trees

for this free advertising distribution and if you want your share of them write at once for they will go fast. W. H. Gibboney, Mandan, North Dakota writes: "Please accept thanks for the sample evergreens. They are doing fine." This is but a sample of thousands of letters. Our catalogue containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens, etc., with a mine of valuable information for fruit growers, is free for the asking. Write to-day.

THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.

## SEED CORN

The Iowa corn crop is worth more money than all the mines in the United States. Will it pay you to spend 50c per acre to increase your yield 25 bu.? It will.

We can furnish you seed corn that has breeding back of it. "Why?" "Because:"

We have been breeding the best varieties for years.

We have a \$14,000 equipment for handling it. We have experts to grade it and select the best. We have 1,200 acres of the best land in Iowa county devoted to its growth.

We have graduates of Agricultural Colleges in

our employ who have conducted an Experiment Station.

We have made frequent shipments to the Department of Agriculture at Washington, D. C.; which proves our ability to produce the best type of seed; in fact, we have spared neither time nor money to make the seed the best that can be produced.

Send for our 1907 illustrated catalog which gives full information as to our method of handling seeds of all kinds. Send for it today. IT IS FREE.

A. A. BERRY SEED CO., Box 52, CLARINDA, IA.

## SEED CORN 146 BU. ACRE.

**DIAMOND JOE'S BIG WHITE**—A strictly new variety; none like it. It is the Earliest and Best Big White Corn in the World—because it was bred for most Big Bushels, not fancy show points; because grown from thoroughbred inherited stock; every stalk bears one or more good ears; because scientifically handled, thoroughly dried and properly cured and had the most rigid examination. Big Seed Catalog FREE. It tells about all best farm, grass, garden and flower seeds grown. Send for it today. Address,

RATEKIN'S SEED HOUSE,

SHENANDOAH, IOWA

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### HORTICULTURAL PARAGRAPHS.

By burning the garden and orchard rubbish you destroy unseen, but numerous insect enemies. For that reason burning is better than hauling to some out of the way corner.

A Marshall county, Iowa, truck farmer last year had a gross income of \$2,000 from nineteen acres cropped with onions, cucumbers and cabbage. When grown and sold, as they may be, intelligently, these products pay.

Lettuce is another plant not easily killed. Most growers have noticed that the self-sown plants are much earlier than those raised from spring seeding. This fact hints very strongly of the advantage of late fall sowing.

The dry fruit mummies hanging to the trees, especially the plums, have in them the seeds of future trouble for you. They are full of the germs of fungous diseases. For a dime a boy may be hired to pick and destroy what would otherwise cause you a \$10 loss later.

Get the peas in early. They germinate at a low temperature and a late frost will not hurt them. The sweet peas in the flower garden are no exception to the rule. If the seed is sown as soon as the soil is dry, you will be able to pick bouquets a week or two before your neighbors.

You can hardly get the raddish seed planted too early. It starts quick and young plants are sometimes killed by a late frost. Still, it is such an advantage to gain a week's growth with this vegetable that it is wise to take the chances. But have plenty of seed ready so that in case they get nipped you can re-plant without loss of time.

We once paid a pretty price for a blue plum tree. It never bore anything but Black-Knot, with which it infected all its neighbors. We found the only safe way to combat this disease was to cut out the diseased parts as soon as discovered and burn them. This worked all right on all except the original tree, which we never got entirely free, and finally in a moment of wrath we applied the ax to its roots and put an end to the source of trouble.

We have planted a great many apple trees which have not lived up to our expectation and are on our black list. Among them are Iowa Blush, Pumpkin Sweet, Longfield, Roman Stem and McMahon. Others which are all good quality, but have proven poor yielders for us are Plum Cider, Pewaukee and Salome. Grimes Golden has not borne very well for us, but as the quality is so very good we would advise planting in hope of getting a few.

Among the things not to be forgotten in ordering seeds, one that we consider of much importance is sweet corn. Few farmers have large enough quantity or great enough variety of roasting ears. We would suggest the following list: For early, Peep of Day; for second early, Early Minnesota, followed by Country Gentleman, and then two plantings of Evergreen at intervals of about two weeks. These will provide roasting ears for the season and corn to dry or can for winter use.

Nothing so brightens the home on a dull winter day as a window full of house plants. They require some attention, to be true, but they amply repay for all they receive. We recently visited in a home where there was a large bay window full from top to bottom of beautiful plants, mostly in bloom. There were geraniums, fever fuchsias, lilies, stars-of-Bethlehem, nicotines and begonias, besides many others beautiful for their foliage only. Such a home can more easily be a home of sunshine, for flowers have a power of their own for dispelling darkness and gloom.

### A NEW SPRAYING CALENDAR.

The experiment station of the Iowa State College has just issued Bulletin No. 89, which is a spraying calendar dealing with orchard and farm crops enemies. It treats of the various fun-

## A BIG GARDEN

The year of 1906 was one of prodigal plenty on our seed farms. Never before did vegetable and farm seeds return such enormous yields.

Now we wish to gain 200,000 new customers this year and hence offer for 12c postpaid

gous diseases and insect pests of the orchard and smuts of barley, wheat and oats. The various formula have all been tried and can be safely used. Some of these are for the use of bordeaux

## Do You Want to Farm it Right?

Then sow our Hardy and Reliable Northern Grown Seeds most productive everywhere. We make it a specialty to grow from pedigreed Seed Stock, on our own farms, right here at Faribault, Minn., all the Standard varieties of Seed Grain, Seed Corn and Seed Potatoes. We also offer novelties of wonderful productivity, of our own origination. Try our Canadian Giant Oats, a giant account of stiff straw and enormous yield. Our Canadian Chief Wheat, produces large, plump grain and heavy crops. Having such heavy chaff, it resists smut, rust and blight better than other kinds. For 10c, we will send a sample of pedigreed Seed Grain, also sample of Faribault Jewell Corn, earliest, largest, best yielding Yellow Dent Corn. Spring catalog, English or German, free. Write for it. Farmer Seed Co., Wm. Kusker, Mgr. Box 14, Faribault, Minn.

## NEW KALEIDOSCOPE NASTURTIUM

**FINEST floral novelty of the season.** A prolific bloomer; every plant bears flowers of a dozen different colors, ranging from creamy white, yellow, orange, red and pink, to an intense crimson maroon shade. Many are also splashed and striped with other tints. To find out how many flowers this wonderful nasturtium will produce, we are offering

**\$25.00 in Cash Prizes**

to the persons growing the greatest number on one plant. If you mention this paper, we will send a regular 15c packet of this seed for three 2-cent stamps, with privilege of competing for prizes. Large, illustrated catalogue of Flower, Vegetable and Farm Seeds, Plants, Bulbs, etc., FREE.

**IOWA SEED CO.,**  
DES MOINES, IOWA.

## SPRAYING FRUIT TREES

is no longer an experiment, but a necessity. Prevents wormy fruit by destroying all insect pests and fungus diseases. Every farmer, gardener, fruit grower or grower should write for my free catalogue, describing 21 styles of Spraying Outfits, and containing a full treatise on spraying fruit and vegetable crops, and much valuable information.

mixture, paris green, the various arsenical poisons, kerosene emulsions and the formalin treatment of wheat and oats. In every case they have been tried and, therefore, can be safely used with benefit.

This bulletin may be obtained by applying to C. F. Curtiss, Director of Experiment Station, Ames, Iowa.

### LEAD ARSENATE FOR SPRAYING.

The following inquiry comes from a subscriber at Ute, Iowa:

I wish you would tell how to make arsenate of lead, a spray for apple trees, as I have quite a few and am bothered with worms. Is disparine the same as arsenate of lead? Let me know where I can get it or how it is made and used.

We use the following formula for preparing lead arsenate: Arsenate of soda, five ounces, lead acetate (sugar of lead), twelve and a half ounces; water, fifty gallons.

Dissolve the arsenate of soda and the acetate of lead separately in earthen vessels in a little hot rain-water. When both are completely dissolved mix and stir thoroughly and add to fifty gallons of water. In using the mixture be sure to keep it well agitated.

Arsenate of lead is used for the destruction of biting insects, such as the codling moth and the canker worm. The codling moth is the worst insect enemy the apple grower has to contend with, as it is the insect which is responsible for the great majority of wormy apples. The canker worm eats the leaves and when present in great numbers often completely defoliates the trees.

The first spraying should be done just as the blossoms are falling and should be very thorough. The larva of the codling moth enters the apple just after it has formed at the blossom end. If there is a little lead arsenate there for him to eat his career terminates.

The second application of spray should be made about two weeks after the first, and the third two weeks later. The fourth and last should be made the last week in July or the first in August.

Disparine is a trade article of which the principal ingredients are probably those composing lead arsenate. Being a trade article it naturally comes higher. It has proven very satisfactory in our experience with it, but we would hesitate to say that it does better work than lead arsenate. Its use is to be commended where one does not wish to bother with the preparation of other arsenates.

It must be remembered that disparine, lead arsenate, paris green and all other arsenates used for spraying are very poisonous and must be kept out of the reach of children and animals.

### Poor Pruning.

To the Editor of The Homestead:

A few summers ago I saw an orchard that had been pruned with an ax the previous year. If any one had done as poor a job trimming out my grove of despised second-growth post oak, he would have had to quit as soon as I found it out.

An ax is a poor tool with which to prune an orchard. I know of no better tools than a sharp saw and a knife with a keen edge, the one for the large limbs, the other for small limbs and water sprouts.

Besides the usual removal of cross branches, those that are too low and water sprouts, there is this spring in many orchards the added work of taking off branches that were broken by the heavy crop of last year. Much care should be used in taking these off so as to leave a smooth surface close to the trunk or large branch where they are removed. A stub six inches or a foot long will never amount to much, if anything, as a bearer of fruit. It only disfigures the tree and induces disease and decay. Take off the broken limbs as you would any other that you want out of the way.

A good way to have a smooth cut where a large branch has to be removed, is to cut it off a foot or more from where you wish, then cut off the stub that is left. In this way you run no risk of having the branch tear the bark down as it falls. It also often enables you to get closer to the tree or large limb with your saw than you could any other way.

The wounds made in removing branches an inch or more in diameter should be painted the day they are made.

We paint smaller wounds, as the

## Fire or Kiln Dried SEED CORN

OUR leader is Brown's Choice, which we years ago developed from Leaming stock. Reid's Yellow Dent, Iowa Silver Mine and Yellow Rose, the latter one of the best early (90-day) varieties, are the others. We grow all the corn we sell. We ship in the ear or shell and grade it as desired. Our seed will please you. Try it. Samples free.

**JOHN E. BROWN & SONS,** MITCHELLVILLE, IOWA

spring winds check the wound so soon, and you never know the coming day's weather, therefore, it is best not to "wait till tomorrow" before covering the wounds. White lead and oil make the ideal paint for this purpose. As we have but a few hundred trees we buy the mixed paints that come in half gallon cans. They are ready to use as soon as stirred thoroughly.

When burning the brush it must be far enough from the trees to prevent the heat from injuring them.

**Kimmund, Ill. W. B. Lloyd.**

**Pruning Cherry Trees.**

To the Editor of The Homestead:

A few days ago we passed a cherry orchard which had been severely pruned in January. This same orchard was pruned in the same month two years ago and so far has shown no bad results from the operation. It has borne

good crops the last two years. The general advice is not to trim cherry trees and we believe that it is in the main, good. Of course, where

## One SEEDSMAN Who GUARANTEES His Seed True to Name

Clipped from Breeders' Gazette Feb. 20th

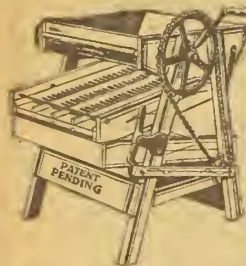

This clipping in connection with the list of exposures of adulterated seeds, make mighty interesting reading.

For 12 years I have carried a guaranty of purity, genuineness and germination, on the seed I sell, and I propose it shall stand 50 years more. I have faith enough in my seeds that I am willing to back it up.

This guaranty has helped me in building up the best seed business in the west. I sell all my seeds subject to a guaranty of Government Standard or better. I sell subject to your test and approval. I will ship on approval. I sell all kinds of seeds, seed corn, grass seed, garden seed, small grain, and all on the same terms. Write for catalog and free samples, or send along your order for shipment on approval.

**HENRY FIELD,**  
Seedsman

Box 25, Shenandoah, Iowa.

## SEED CORN

I HAVE an early yellow seed corn to sell. About ten days earlier than Reid's Yellow Dent and as pure a corn, I can give history of this corn for 70 years. I sell seed corn in the ear only, and guarantee satisfaction or your money back. 70 pounds of ears will shell 61 and 62 pounds of corn.

My "Improved Pride" corn was planted in seven counties by the Agricultural college last year in county experiment work.

Next week I will give you the names of these counties and the record. Write for testimonials of the "Improved Pride" corn. This is a corn that won sweepstakes at Carroll Farmers Institute a year ago and \$10 in gold for best 5 ears at Farmers bank in November.

**G. GREGORY, - - - RALSTON, IOWA**  
Half mile from town. Reference: Ralston Savings Bank.

## GOLD MEDAL SEED CORN

FROM stock that won the \$2,000 Burg wagon. 300 bushels Reid's Yellow Dent home grown and kiln dried, \$2.00 per bushel in ear, or \$1.75 shelled. Satisfaction guaranteed. Twenty years' experience. **W. P. CODD, - - - AMES, IOWA**

## 300,000 RED CEDARS.

WE MAKE a specialty of growing Red Cedars from seed and we are the largest growers in the United States. Write us for price list. **GARLAND & FOWLER, - - - AFTON, IOWA**

**SEED CORN** Pink Large Yellow Dent and Reid's Yellow Dent seed corn for sale by **H. F. WILKINSON, Mitchellville, Iowa.**

there are cross limbs and where the head is too thick we should not hesitate to do the necessary trimming, but wholesale slaughter is likely to work great havoc, as rot may start in the wood where the cut has been made, which will eventually destroy the tree.

In this orchard not enough time has elapsed since the first pruning to determine whether this will be the result. In that orchard the first mistake was made when the trees were planted, for they were set twelve feet apart each way. The pruning has been done to keep the trees from crowding. I believe it would have been better when it was seen that the trees were too close together, instead of cutting them back, to have cut out every other tree. In the long run the orchard would have been better for that treatment.

There is always a temptation to plant trees too close together. It is true the little switch that is set out does not need much room, but the planter must have in mind the great tree that it is to become some day.

Franklin Brown.

## AMONG THE SEEDSMEN.

Kherlan oats are offered for sale by Messrs. Aye Bros., of Blair, Neb.

Seed corn sold under the Holden test is advertised for sale by the Gateway Nursery Company, of Le Mars, Iowa. They also have all kinds of nursery trees and plants for sale.

## HOW'S THIS FOR YELLOW CORN?

In this issue of The Homestead Mr. G. Gregory, of Ralston, Iowa, makes an announcement regarding his supply of seed corn that should be investigated by all growers of corn. He states that he is now ready to supply parties with "Improved Pride" yellow corn in the ear at moderate prices. This corn is claimed to be ten days earlier than Reid's Yellow Dent and is as pure as any corn bred. This corn has been winning good opinions from planters. Write for prices and turn to this page for the advertisement.

## THE CLOVER MARKET.

During the past two weeks the demand for clover seed has been unprecedented and the supply in all the leading markets is practically exhausted except of the foreign seed, which is not desirable. Letters have been received recently from prominent dealers from St. Louis, Toledo, Milwaukee, Chicago and Kansas City, stating that their supply of home-grown seed was practically gone now. Owing to a favorable crop in some parts of the state, the Iowa Seed Company were able to purchase quite a number of carloads and they still have a limited amount of home-grown seed on hand. Prices have advanced, however, and the Anchor brand or best grade of red clover is now worth \$11.25 per bushel; the choice grade, \$10 per bushel, with the outlook favoring further advance soon. Alsike is much cheaper, the Anchor brand of it now selling for \$10.50 per bushel. Readers of this paper are invited to write to the Iowa Seed Company, of Des Moines, Iowa, for samples of clover, timothy or any other farm seeds they may desire and they will be forwarded promptly if you mention The Homestead.

## CHEAP VALUABLE FEED.

The average farmer has yet to learn the value of roots for stock feeding. In this respect, farmers of the old country are far ahead of those in this country. In nearly every community one may find a farmer who pays some attention to root crops. The turnip and rutabaga are very rapid-growing root crops and suitable for growing on almost any corn belt farm. There is always a few small patches about the farm yards or in the fields which lie idle a good share of the year. There is no crop so suitable to these patches as a root crop, especially one like the rutabaga. This root can be planted late in the season and still mature a good crop of succulence as many root crops do late in the season. They can be left in the ground until the advent of cold weather, then stored in a root cellar to be fed in the winter when there is a scarcity of feed of this nature. Unusual results have been secured with the rutabaga seed grown by Northrup, King & Co., seedsmen, 60 Bridge Square, Minneapolis, Minn. On page 9 they quote prices of their prize seed, and also offer to send you some valuable booklets on farm subjects free. Be sure to use their full address when writing.

## A UNIFORM STAND.

This is the ideal toward which the progressive farmer is striving. The method of doing this is the greatest question that confronts the farmer of this territory, as corn is his chief product. The question of testing the seed corn has been agitated continually for some time, but there is a question of selecting proper seed that precedes this. How best to sort the seed corn is the question. There have been many machines put on the market recently, but few are giving satisfaction. In fact, so many fail so far short that the farmer who has tried them has lost confidence in the practicability of a machine for this purpose. The Monarch Self Feeder Company, 95 Main St., Cedar Falls, Iowa, have a machine in which they have the greatest confidence. It is a machine that has been thoroughly tested by the best corn experts and pronounced the best one on the market. The principles upon which the Monarch Sorter works are right and its work is of the very best character. It is not an experiment, but the result of years of experience. It is a simple, well-made machine that will last a life-time. The No. 1 sorts for width, length and thickness. The first drum is perforated. This drum takes out the small and narrow kernels that should not be planted. The second drum is slotted to take out the flat kernels that are one-eighth inch and thinner. The third drum is slotted and will take out the flat kernels over one-

## SUCCESSFUL TOOLS

These Chisels have carved their way to fame. To-day, those who know tools pronounce the Keen Kutter the perfect Chisel Success. Tempered nearly to the handle; hand whetted; sharp and ready for use; handles of selected white hickory with leather heads.

## KEEN KUTTER QUALITY TOOLS

are all successful tools—tools that have won their way by hard, honest, true work. Every step in their success has been reached by sheer force of merit and quality. Keen Kutter Tools include—Saws, Chisels, Bits, Gimlets, Awls, Planes, Hammers, Hatchets, Axes, Drawing-knives, Pocket-knives, Screw-drivers, Files, Pliers, Glass-cutters, Ice-picks, and a full line of Farm and Garden Tools. For 37 years Keen Kutter Tools have been sold under this mark and motto:

SIMMONS HARDWARE COMPANY, St. Louis and New York, U. S. A.

## My 2-in-1 Harrow Makes a Perfect Seed Bed in HALF THE TIME

BECAUSE it does the work of both a Spring Tooth and a Spike Tooth Harrow at one time and at one operation. Because, you see, my harrow is BOTH HARROWS IN ONE. If you have to go over your field four times now—you'll only have to go over it twice with my harrow.

J. R. Naylor, a practical farmer who invented this great time-saving 2-in-1 Harrow.

even better seed bed when you use my harrow, and you can follow right along with a planter. That means if it rains overnight you haven't got your work to do over again.

On newly broken sod you can work across the furrows (instead of with them) and not pull up a single sod or choke the teeth. You can prepare new ground with my harrow in a THIRD the time you can working the old way—using two harrows separately.

One lever instantly adjusts my harrow so you can use the spring teeth alone—or the spike teeth alone—or both together—or you can throw all the teeth up out of the way so that the frame will slide along the ground like a stone boat.

When a live farmer knows about my harrow he wants it. I can name, off-hand, twenty places near my farm in Cass Co., Mich., where you'll find good spring tooth and spike tooth harrows out in the barnyard with grass growing up around them.

The farmers have thrown them away and are using my harrow alone—and they're MAKING MONEY by doing it.

## HOW I CAME TO INVENT THE 2-IN-1 HARROW.

I always had the same trouble you've had in getting my ground ready.

It seemed like there ought to be some way around it. So my brother and I got busy one winter AND SOLVED THE PROBLEM.

This is the way we figured:

A spring tooth harrow wants to keep digging in all the time. That keeps the frame pressed hard on the ground and it's a tough pull on the horses. A spike tooth wants to keep jumping up all the time, you have to put some heft on the top to keep it down. The horses have to drag the heft as well as the harrow.

So we made a 2-in-1 harrow—spring and spike teeth together. That season we used it on our farm and it worked just as we figured it would.

The spikes kept the springs from digging in too far, and the dig of the springs kept the spikes down to their work—and once over (except on extra bad ground) left a smooth, even, perfect seed bed.

That's why my 2-in-1 Harrow was easier on the horses than either a spring tooth or spike tooth alone and SAVED OVER HALF OUR TIME getting ready for planting.

The best proof of how really good my harrow is lies in the actual fact that every harrow I have sold has since sold from two to five more.

My Harrow is such a really wonderful thing and such a TIME and MONEY saver for the farmer that I expect each harrow I place will keep on selling others in the neighborhood. So I have decided to make a

5 VARIETIES of seed corn for sale at \$1.25 per bu., eared or shelled. Satisfaction guaranteed or money refunded. Alex James, R. 1, Shenandoah, Ia.

eight inch to seven-thirty-seconds inch. The thicker, irregular shaped and hutt kernels that will not pass through the planter plate are passed out at the end of the third drum. This gives four distinct assortments of corn from the top cylinder. The corn that should be planted is passed into a second lower cylinder where it is assorted according to length. The machine has a large capacity and is guaranteed to do all and even more than is claimed for it. Every farmer is interested in such a machine, therefore every farmer will do well to write them for their literature. Remember, satisfaction is guaranteed.

## Pays for Itself Many Times.

Delany's Seed Corn Sorter saves time in planting because it removes the dirt and chaff and irregular shaped kernels which tend to clog the planter.

It increases the yield per acre by improving the work of the planter.

It costs less than other sorters and does better work because good seed will not fall over as in continuous flow machines.

It will grade from 2 to 3 bushels of seed an hour and will last a life time.

Hundreds of satisfied farmers use it.

Send for free Seed Corn Booklet C, showing our line of Sorters.

## VETERINARY MATTERS.

**PROFESSIONAL** Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### POLYPUS.

I have a black mare twelve years old that has had a growth in her nose for two or three years. It affects her breathing. Will sometimes break and bleed, then is some better for a while. What can be done to help her?

The only remedy in such a case will be to have the polypus (tumor) removed by operation, which can only be done properly by a qualified surgeon and then it proves a success.

#### DIARRHEA.

Could you please tell me what is the matter with my chickens? They have a yellowish diarrhea and in about two days they die. I examined them and their liver was about as large again as it ought to be. What is the cause? Is it contagious, and can it be cured. I feed them corn, oats, wheat and sometimes bran, and give them plenty of fresh water.

Scouring is present as a symptom in many diseases of chickens and is a prominent symptom of fowl cholera, so that all affected chickens should be isolated and the houses, roosts, etc., should at once be disinfected and whitewashed. It would be better still to change entire flock onto new ground; lessen the grain ration; burn chickens that die. Mix a few drops of carbolic acid in drinking water and in feed a few grains of dried sulphate of iron and ground ginger root.

#### ABSCCESS.

I have a two-year-old mare colt. About ten days ago she got hurt on the inside of her hind leg close to the stifle, on a stick, I think. When I noticed it it was swollen to about the size of a small bowl, was soft, and I greased it with lard where the sore was. When I took off the scab it looked like there was a small hole in her leg like she had been ruptured, but it was not sore. I have been putting hot water on her leg and rubbing it with liniment, but it is swelling all the time, both up and down. She is not lame, but is getting tender where the swelling is, and it is getting hard. Am afraid it is going up into her body.

This is a case for the veterinarian, as the stifle region is dangerous and as an abscess apparently has formed and pus must be liberated by lancing, a sur-

geon should be called in to do the work. Meanwhile foment the part twice daily with hot water and inject peroxid of hydrogen.

#### WORKING STALLION.

What do you consider is the best method for exercising draft stallions? Would there be any objections to a tread power or a sweep feed mill? I believe a stallion for best results should be made tired once a day. I would like your opinion on the subject.

A tread power or sweep is a poor place for a stallion, any horse for that matter, but there is no reason why a young stallion should not be taught to do all kinds of farm labor and when so used he will certainly be a far better and more prepotent sire than when kept pampered in idleness. It is difficult or impossible to teach an old stallion to work, so that such horses are best exercised by allowing them a yard to run in and giving them halter exercise daily.

#### GARGET.

Could you tell me what to do for my cow? About two years ago she came home and one of her teats looked like a knife had been sunk in it. It gave blood for a long time. She finally got all right. Last year her teat was not what it ought to be. Now she has her second calf. She is almost dry. Her bag is swollen up and hard. We had a man to look at it. We would like to have it lanced, but he said not. He gave us some medicine, but it did no good. In case of blood poison what would you do? Will she be good for milk if she gets well? She is six years old.

It will be too late to save the udder and lancing will do no good unless it is known that pus is present. Cow should be fattened for slaughter if she is otherwise in good condition and no milk can be had from udder. Twice daily foment the udder with hot water; then rub well with camphorated oil or lard. Strip away any fluid that can be got from teats.

#### BULLNOSE.

What is the matter with my pigs? There is a small lump comes on the side of their noses, and then gets larger until it is about the size of a teacup. Then it breaks out in a big sore, and I have never had one to get well yet. I have six that way now. I would like to know what it is. Is there any cure for it?

This disease, which is considered incurable, also goes under the name of "snuffles." It apparently is due to some germ and is usually associated with a form of rickets, affecting the entire bony frame of the animal. Affected animals should be isolated. If they fail to respond to treatment they should be killed and burned and all premises they have occupied should be disinfected and whitewashed. Treat by opening and scraping out each abscess or ulcer; then swab daily with tincture of iodine applied freely and also painted on all tumors. Feed milk, middlings, bran, flaxseed meal and dried blood meal. Mix lime water freely in all food and drink.

#### LOSS OF HEIFERS.

I have lost six three-year-old heifers, and on opening I find in every case they have calves in them. I also find in every case from five to six pails of water in the uterus. I believe from appearances that the calves are drowned. The heifers act stupid and refuse to eat a few days before dying. I had them dehorned in October. Would that have anything to do with it? They have been fed on straw, corn stalks and some corn. I have quite a number left that I am afraid of losing in the same way. Please give me cure and treatment.

Death of unborn calves in these cases may be due to the sickness which occasions death and that may be corn stalk disease, so-called, or some other disease of the digestive organs induced by affected food. "Dropsy of the amnion," the condition of the uterus alluded to may not be the cause of death, but

## The Acme Harrow

Well pulverized soil is the most important requisite of a good seed bed. No field—no matter how rich—is well prepared for seed unless the ground has been thoroughly pulverized. Does the old fashioned spike or spring toothed harrow do that? It does not. It does tear up the grass, weeds and trash the plow buried, and which should stay buried. What you need is the **ACME All Steel Riding Harrow**—the only harrow built on scientific principles. Flat steel spurs go ahead of the Acme coulters or teeth, crushing and leveling every clod.

### Try the Acme FREE.

Then the coulters like long plowshares follow, turning the soil both ways and mixing it. When they get through with the soil is as fine as a Harrow can make it and presents all its food to the seed. Think how much easier on the team the Acme Harrow is! The old harrow dragged bluntly against the soil. The Acme cuts smoothly through. Then the Acme is very convenient to move from one field to another, as a lever raises the coulters from the ground. One man can put the harrow in a wagon or sled with ease. The Acme is the lowest priced harrow made and is built to last. Write for free book, "A Perfect Seed Bed," written by distinguished agriculturists. A postal to me and it will come.

DUANE H. NASH, Box 44, MILLINGTON, N. J.

## HORSE OWNERS! USE

### CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from horses. Impossible to produce scar or blemish. Send for circular. Special advice free.

merely incidental to the sickness referred to. It is possible where the dropsy alone exists to tap the amnion by way of the vagina and by drawing off the fluid at least save the life of the cow. Have an investigation made by a qualified veterinarian.

Schneider Bros. Sale at Grand Junction, Iowa.

March 6th, the day on which the above sale was slated, opened with very undesirable prospects. Slippery rails and slow roads kept many away. However, Col. F. F. Luther, with his ringmen, picked bids quite freely from the crowd. Delay in starting, combined with the large number of stock to be sold, reduced prices considerably, and many buyers secured snaps. Mr. J. A. Penn, of Alta, Iowa, one of the sensible breeders in the northwestern part of the state, paid the top price, \$67.50, for a splendid gilt that would be considered a fine addition to any herd. A part of the bulls were sold, though the demand was not strong, and as it was growing late, no more were offered. Mr. W. J. Schalldorf paid \$102.50 for No. 1; Mr. J. Jesinsky, \$72.50 for No. 8. It was certain that breeders did not appreciate the best part of the offering or many more would have turned out. The sale resulted in the following prices:

Lot.	Price.
2 J. H. Bherns, Ft. Dodge	\$ 45.00
4	45.00

## Ring-Bone

There is no case so old or bad that we will not guarantee

**Fleming's Spavin and Ringbone Paste** to remove the lameness and make the horse go sound. Money refunded if it ever fails. Easy to use and one to three 45-minute applications cures. Works just as well on Sidebone and Bone Spavin. Before ordering or buying any kind of a remedy for any kind of a blemish, write for a free copy of

**Fleming's Vest-Pocket Veterinary Adviser** Ninety-six pages of veterinary information, with special attention to the treatment of blemishes. Durable bound, indexed and illustrated. Make a right beginning by sending for this book. FLEMING BROS., Chemists, 210 Union Stock Yards, Chicago, Ill.

## BOWSHER

(Sold with or without elevator)  
**CRUSH** ear corn (with or without shocks) and **GRIND** all kinds of small grain. Use Conical Shape Grinders. Different from all others.

### LIGHTEST RUNNING.

Handy to Operate. 7 Sizes—2 to 25 h.p. One size for wind-wheel use.

Also make Sweep Grinders; both Geared and Plain.  
**E. N. P. Bowsher Co.**  
South Bend, Ind.

## FEED MILLS

### The "STAY THERE"

**Aluminum Ear Markers** are the best. Being made of aluminum they are brighter, lighter, stronger and more durable than any other. Fit any part of the ear. Nothing to catch on feed trough or other obstacle. Your name, address and any series of numbers on each tag. Sample tag, catalogue and prices mailed free. Ask for them. Address **WILCOX & HARVEY MFG. CO.**, 107 Lake St., Chicago, Ill.

### EXAMINE A PEERLESS CREAM SEPARATOR

See the many points of superiority it has over all other makes:

The Peerless has a combination hollow and disc bowl. This one feature alone means a saving of the price of the machine over other standard makes.

You cannot afford to use a cheap separator if you can get one for nothing. Write for Special Catalog No. 9.

Waterloo Cream Separator Co.,  
Waterloo, Iowa.

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### CENSUS OF DAIRY SITUATION.

The dairy industry of the United States during the last quarter of a century has had a remarkable growth, increasing over five-fold in the value of its products. That the industry is being condensed is fully shown by the fact that while the number of establishments has increased 127 per cent, the wage earners have increased but 96.9 per cent. Labor-saving machinery has brought about this result.

The average amount of capital invested per establishment has grown from \$2,443 in 1880 to \$5,294 in 1905; the average value of products from \$6,547 to \$18,842, according to the census for 1905 issued by the government director.

The period of greatest relative increase in value of products was from 1890 to 1900 when the centrifugal separator came into general use. During the last five years the number of establishments have decreased nearly 4 per cent, which shows that the business is being still more concentrated since the advent of the cream separator on many farms. This has resulted in a consolidation of creamery interests which absorbed many of the smaller plants.

It stands to reason that the larger creameries and factories are able to manufacture butter and cheese at a less expense, since they can utilize more labor-saving machinery, produce a higher product on account of being able to hire more skilled labor and sell their products at better prices. The demand for cream in the cities is growing so rapidly since the advent of machinery and methods which produce a purer product that a great many factories have abandoned the manufacture of butter and cheese for the sake of engaging in the sale of milk and cream. The average value per pound of cream in 1905 was 8.4 cents.

The great proportionate increase in both the amount and value of condensed milk is a noticeable feature in the latest census. In all, there are something like eighty-one of these factories in operation in the United States. New York leads with twenty-five, Illinois follows with fifteen, California, Michigan and Pennsylvania with six each, Wisconsin four and Ohio three. In Illinois 50 per cent of the value of her dairy products were credited to condensed milk.

The average price paid to patrons for milk used in making butter was eighty-one cents per hundred pounds. In western states the price ran as low as sixty-five cents, while in the east as high as \$1.00. California paid ninety-one cents per hundred to its milk producers for butter making, Wisconsin eighty cents, Minnesota seventy-four cents, Kansas seventy-eight cents and Illinois eighty cents. For making cheese an average

# SHARPLES BUSINESS DAIRYING FREE

Contains all the money-making points of dairying. Among the subjects treated you will find How to Feed, What to Feed, When to Feed, What Foods Produce Most Milk, How to Take Care of Milk-Producing Foods, How to Feed Silage, the Care of the Milch Cow, and many other profitable and practical suggestions that help swell the profits of the dairyman. With the book we will send additional information telling you how and why you can get the most out of you milk by using the

## Sharples Tubular Cream Separator

We guarantee that with a Tubular you can get 50 per cent more cream over the old pan method of skimming, and 6 per cent over any other cream separator made. Sharples Separators get all the cream and the Tubular is the easiest running, easiest cared for, and easiest kept clean. There is just one tiny piece in the bowl, the milk can be low and handy, the bearings are self oiling. Write for the "Business Dairying" at once stating number of cows you keep. Ask for booklet D.121

Mr. S. L. Boyer, Venetia, Pa., says "The Tubular makes me \$255.00 yearly."

### Parasites in the Dairy Herd.

To the Editor of The Homestead:

The average dairy herd has several of these enemies of profit in it. They fasten themselves to the farmers' pocket-books and suck incessantly. They are so cleverly masqueraded that they cannot be picked out with a moment's inspection. The fact is, they look just like real cows. There is just one way known that will rid you of these pernicious critters; the scales and Babcock test.

The patience that the average farmer has with free feeders is indeed very pathetic; such self-sacrifice is seldom equaled. The farmer who has purchased gold bricks is a thing of the past; however, you probably have several gold bricks around your place now, if you would just take the trouble to find them. You are the dupe of some old dumb

brute who boards on your place. You would also find what cows deserve credit for that neat little cream check that comes in so handy every week.

I once heard one of these old free feeders remark, "Actually, I am ashamed to look Farmer Jones in the face when he comes down the feed alley and gives me my supper. He is so easy."

No, you don't have to speculate on the board of trade nor with cheap mining stock to get swindled. Are you going to stand for this forever and ever? The scales and Babcock test are your only salvation. "But it takes so much time and is so much trouble," you say.

Well, "there are no gains without pains" and is it more difficult than to keep cows that are eating up your profits every day? Do you expect the cow to come and tell you that she is not earning her board? A sensible, sober cow that is in her right mind won't do it. Do not leave your purse wide open for those parasites, for they will certainly make your will lean and sad looking.

No matter how hard you work with your cows; how careful you are with their feed and management, if some of them are eating up the profits of the others, what has your care and labor netted you? You simply cannot tell the good cows from the poor ones unless you weigh and test. What you think is your best cow may have her account in red ink and still steadily be over-drawing. Get your neighbor interested in this sort of work. Talk to the creamery man about it. He will be glad to help you in any way that he can. Some arrangement may be made by which he would do your testing for you. He would at least allow you the use of his tester.

There is nothing complex or difficult about this work; just simple, every-day business. If you were in a boat and it should spring a leak, you would certainly find it and plug it up. Now, find the hole through which your profits are leaking little by little, and plug it up with a good cow that has been tested and not "found wanting." "The smallest leak may sink a great ship." Don't be humbugged any longer; get busy; weigh and test.

Ames, Iowa. Herman Hörneman.

### La Rue's Duroc Jersey Sale.

The sale of Mr. E. F. La Rue, at Lyons, Neb., on March 1st, proved a great success, and it deserved to be. He had an excellent lot of sows and they were in good condition. This was his first public sale and he pulled

## How to Judge INVESTMENTS

Before you invest a dollar in anything, send for my book "How to Judge Investments."

This book tells you about everything you should know before making any kind of an investment, either for a large or small amount.

It tells how you may safely start on the road to wealth.

It explains the growth of capital and how small investments have brought wealth and fortune to others.

It tells how others have grown rich.

It tells how to select 5 or 6 per cent security.

It explains how an investment in a development enterprise may pay profits equal to 100, 200 or even 500 per cent on the money originally invested.

Stocks and bonds, both listed and unlisted, real estate, investments of different kinds and financial matters are fully described in simple language.

This book gives good, sound advice and will help you to invest your surplus earnings (if only a few dollars a month) in securities that promise the best possible returns.

A financial critic says of this book, "It is the best guide to successful investing I ever read."

The regular price is \$1, but to introduce my magazine, the "Investor's Review," I will send the book postpaid on receipt of a two-cent stamp and in addition will send you the Review for three months free.

The Investor's Review is of interest to all persons who desire to invest their money safely and profitably. Address Editor,

Investor's Review, 736 Gaff Bldg., Chicago, Ill.

**\$59.50**

Freight  
Prepaid

**30 Days' Free Trial**

**Wagon-Box Manure Spreader**

**Direct From Factory To You**

Backed By \$25,000 Guarantee.

**Fits Any Truck Saves You 50%**

**Only Endless Apron Force Feed Spreader Made.**

JUST that: It's been a long time getting here—but I've got it.

The Only Endless Apron Force Feed Manure Spreader in the World.

The Only Wagon-Box Manure Spreader on the market.

Think of the combination!—Just the two things in a manure spreader the farmer has always wanted.

The wise ones said it couldn't be done. I've disappointed them.

First—they said a wagon-box spreader wouldn't work. My hundreds of well-satisfied customers have already stopped that talk.

Then—when it came to an endless apron force feed machine—they said, "impossible." Did you have free mail delivery, telephone or a cream separator ten years ago? Nothing is impossible! You will say so when you see how simple and how wonderfully effective my great new improvement is.

It is simply turning the spreader business right end to and giving the farmer a chance.

Every farmer can afford a Galloway Wagon-Box Spreader.

I want every farmer in the United States to own one.

That's why I sell it direct to you, saving you every cent. (Tell your neighbors.)

Right at the start I am selling this machine for \$59.50, freight prepaid. At retail it would cost you \$75.00. I also save you tying up \$50.00 to \$70.00 in a spreader truck useless eleven months in the year.

My guarantee is the broadest possible—I back it up to show you that I mean business by a \$25,000 legal bond.

Then to absolutely convince you I say, "try one of my spreaders for 30 days on my free

plan." Let me send you one to take out in the field to use, or abuse if you want to, for 30 days. If it's not worth more than my price—take it to the depot—ship it back—and I'll return your money.

Why not get everything that's coming to you out of your land? That manure heap outside of your barn will buy my spreader twice over for you.

Every farmer has been saying,—"I must own a spreader."

Forty-nine out of fifty say the old style horse-killing machine is too high in price. Isn't that a fact?

Now, I claim the Galloway is right in every particular.

Made in three sizes—capacity 50 to 60 bushels. Fits any truck, narrow or wide tread. Lightest draft and simplest machine made and the work it does under all conditions is perfect.

Why not let me send you a machine—and let you be convinced by the machine itself, without sending me a cent? I'll do it today if you will write me.

I have just this further clincher to offer you. For a limited time I will make a proposition to the first farmer owning a Galloway Spreader in every community whereby he can

partly or entirely pay for his machine without a bit of work done. It's a strictly business proposition and will positively hold good only for the first few farmers buying. Either send in your check pinned to this ad, telling me the style of truck you use, or write me at once, postal or letter, so I can send you by return mail my free booklet. Address me personally.

WILLIAM GALLOWAY, President,

# 100% ON YOUR MONEY EVERY YEAR FOR TWENTY YEARS

★ ★ ★ ★ ★

This is the marvelously good investment that more than 800,000 users have actually found the **DE LAVAL CREAM SEPARATOR** to be.

With the average number of cows a **DE LAVAL** machine saves and earns its whole cost the first year, which it continues to do yearly for its established life of fully twenty years more to come.

There surely isn't another such investment, either on the farm or off it, open to anyone having cream to separate. Why delay making it?

As for the first cost, if you have the ready cash there is a fair discount for it, but if you have not any reputable buyer may secure a **DE LAVAL** machine on such liberal terms that the machine is *actually free of cost, for it will earn its cost and more while you are paying for it.*

Send at once for catalog and full particulars.

### PIG TROUBLES.

Most pig diseases are caused by poor health of the sow. If a sow is only a small degree in bad health the pigs start off slow and soon will be dying. And this is the time of year for this kind of trouble. Many of the most successful breeders say the Snoddy treatment for hogs puts the sow in a fine state of health and the pigs get the benefit of the treatment through the milk. A good healthy start is half the battle. This treatment is very highly recommended as a perfect worm exterminator and as a cure and preventive of cholera and swine plague. Better investigate this thing at once by writing to the Snoddy Remedy Company, Box 852, Des Moines, Iowa. They will send you free a book of valuable information, also pictures and endorsements of some very prominent hog men.

### THE RICE BROS. MANUFACTURING COMPANY.

We wish to call the attention of every reader of this paper to the advertisement of the Rice Bros. Manufacturing Company which will appear in the April 11th issue, and those interested in a good, substantial fence or a self-opening gate should get in touch with these gentlemen at once. They are making one of the best fences ever put on the market by any company. It is an entirely steel rod fence and once properly put up there should be no end to its lasting. They are putting up this fence in any style desired, as you will see by the illustrations which will appear in later issues of this paper. In the meanwhile write for their illustrated catalog which will make everything clear to you. When writing please mention where you saw this notice.

### GOOD FOR SORE EYES.

Dr. Lew Arntz, one of the best-known opticians in the city of Des Moines, and manager of the Arntz Optical Company, has put upon the market a preparation for curing inflamed and granulated eye lids, pink eye, ulcers, wild hairs, etc. For cataracts, floating spots, cob-webs before the eye, there is nothing better. Mr. Arntz will be pleased

## A Money-Maker For You

Works Quicker, Easier  
—Lasts Years Longer  
than Others. Clean Skimming Guaranteed.

Own an Illinois and you'll get more profit from every cow. Experience of thousands of farmers and dairymen proves it. Don't buy a cheap Separator—you'll be sorry. Get the best. The speed mechanism of the Illinois is much heavier than on ordinary separators, yet it runs with less work. It's easy to turn, easy to clean. No vibration. Low down supply can. A handsome illustrated book which explains all about diseases of men such as **Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Piles, Kidney and Bladder Troubles, Etc.** This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. **This book tells** how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. **Those interested should write for the book today.** Same will be sent free in plain sealed envelope. Address,

**DRS. FELLOWS & FELLOWS CO.,**  
323 Rollins Bldg., Des Moines, Iowa.

to send to anyone writing, a book of testimonials, to whom you may refer, because he has the greatest confidence in the preparation. Write today, address the Arntz Optical Company, 145 Sixth Ave., Des Moines, Iowa. Mention this paper.

## The Glass Will Settle It

Wage unremitting war on lice, if you would keep hens with either pleasure or profit. Those little specks so like the color of the feathers, are the gray body lice that suck the very life blood from the hens and make them almost wholly unprofitable.

## Instant Louse Killer

will rid the hens of these dreadful parasites thoroughly, quickly, and with the least trouble to yourself. Kills lice on poultry, horses, cattle, sheep ticks, bugs on cucumber, squash and melon vines, cabbage worms, slugs on rose bushes, etc. It is a perfect disinfectant and deodorizer. Look for the word "INSTANT" on the can—then you have the genuine.

**1 lb. 25c** Except in Canada and Extreme West and South.  
**3 lbs. 60c**

If your dealer cannot supply you, we will forward 1 lb. by mail or express, prepaid, for 35 cents.

Manufactured by  
**DR. HESS & CLARK K., Ashland, Ohio.**

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### POULTRY PARAGRAPHS.

Early maturity for market means considerable in making up the profits.

Felch says the Light Brahma will grow a broiler to weigh two pounds at eight weeks of age.

A pound of naphthalene dissolved in a gallon of coal oil, makes an excellent lice paint for the roosts.

A poorly bred thoroughbred is worse than a scrub. Scrub treatment will make scrubs of thoroughbreds.

The "spring chicken" should be hatched not earlier than February, nor later than May. The market weight is two to three pounds.

Strong parents make strong chicks—strong chicks are active and quick growing—quick growth makes the juicy, meaty broiler and roaster.

It is not the largest turkey that sells the quickest. It is the fat, plump bird, of medium size, for which an extra price can be obtained at all seasons.

The medical fraternity are now ready to prove that pickled, preserved, or storage eggs are not pure food, and therefore subject to action in the courts.

The forerunners of roup are canker, sneezing, distemper, heavy colds, swelled head, ulcers in mouth, discharge from nostrils—but it only becomes a case of roup when a fetid stench accompanies these symptoms.

It is surprising how many people, church goers, and, as a rule good people, are willing to pay for a secret by which summer eggs can be preserved to be sold in winter as fresh. Be above such dishonest practices.

Points in favor of the Indian Runner ducks are: The usual weight is four pounds; they are foragers; they are full grown and ready for the table at seven or eight weeks of age; wonderful egg producers; hardy; delicious eating; and are profitable in every way.

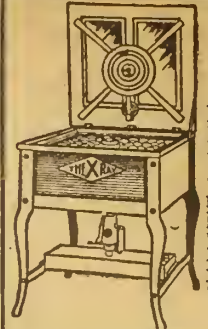

The causes of mortality among young ducks may be summed up as follows: Over-heat, dampness, getting wet, lack of grit, gray head lice, sudden showers, delayed hatches, exposure to sun, lack of fresh water, drinking vessels too shallow, and breeding stock out of condition.

To illustrate how heavy a loss one could endure without failure, Weber, the duck man, says that if only one-half of the eggs put in the incubator hatched, and only one-half of those hatched lived, there would still be enough in it to encourage one to stick to the business, without taking into account the fertilizing value of the vanquished host.

The late William Cook, of England, once said that it is utility that the keeper of farm poultry has in view. His standard is, or should be, one made up of table qualities, laying powers, and constitutional hardness. He may attach more or less weight to table qualities or laying powers, according to circumstances, but both must always be kept in view.

Duston, the well-known poultryman of New England, prefers the White Wyandottes to any other breed for broilers. Even for light weights he found the other breeds unsatisfactory. At fifteen weeks of age the Leghorns weigh one and one-half pounds each, while the cross of White Wyandottes and Brahmas, at the same age, weigh over five pounds each.

So many who have excellent success with a few fowls meet with failure when they increase their numbers, and they are at a loss to know the reason. Generally they fail to increase their accommodations in proportion to the increase in the flock; they fail to recognize the fact that large flocks are difficult to feed so that each individual may secure its allotted share; that various ailments have to be guarded against where large flocks are kept that are comparatively unknown among moder-

## Save 2/3 Expense

More than  $\frac{2}{3}$  saved in oil and time by using the X-Ray Incubator. One filling of lamp makes the entire hatch. Egg tray not removed during the hatch. Glass top, and thermometer in plain sight. Lamp need not be removed during the hatch. Automatic wick trimmer, chimney need not be removed. Flame is turned down automatically when hot enough. Eggs aired and turned by simply lifting the lid. The X-Ray Incubator is entirely different from other incubators. You should know about this before buying. Catalogue free.

**THE X-RAY INCUBATOR CO.**  
28th St., Wayne, Nebraska

**WISCONSIN INCUBATOR CO., Box 71, Racine, Wis.**

ate-sized flocks; that large flocks require constant attention.

So long as the sick fowl is tormented with lice, no remedies will help her.

The duck yards must be partly shaded. Young ducks especially cannot stand the direct rays of a hot sun.

Unless the sick fowl has a great thirst, it is more likely that she is afflicted with indigestion than cholera.

Neglect in the case of a large flock will often be very costly, which with a small flock might not result in any harm. Neglects, however, should not be tolerated in any flock.

Ducklings are easier raised by hand than by hen. If hatched in April or May, they require no heat, but should be placed in a box at night and taken indoors while very young.

When it is noticed that the fowl is breathing heavily, especially while on the roost at night, there is no better remedy than a teaspoonful of glycerine to which are added four drops of turpentine.

There is not as much danger of finding moisture on the walls of old hen houses as there is in new ones. The reason for this is that when lumber is seasoned the grain is closer and less moisture penetrates.

An effective way for preventing lice getting hold of young chickens is to dip a sponge in kerosene, and then squeeze out most of the oil. Rub the sponge well over the feathers of the breast and under the wings of the mother hen. The chicks in huddling under her, get their bodies in contact with this oily substance, which means death to vermin. Repeat once a week.

There are many reasons for disease among the poultry, chief among which are: Lice, filth, no grit, over-fat, sour

## Raise Squabs

Unit birds finest selected stock—properly mated for quick breeding. You are sure of a handsome profit at small expense. There's always a market. No trouble whatever. BARRED PLYMOUTH ROCK and Light Brahma eggs for hatching; from high scoring birds. 15, \$1.50; 30, \$2.50. H. G. Padley, Toledo, Ia.

Mr. Olsson has been winning at central Iowa shows.

—Mr. W. C. Frazier, of Atlantic, Iowa, is quoting prices on Barred Plymouth Rock and White Wyandotte eggs in his advertisement that appears on page 15.

—Eggs from large-boned, vigorous Black Langshans, that have full farm range, are offered for sale by Mr. H. M. McKeen, of Sac City, Iowa, in his advertisement appearing on page 15.

—Quotations on Rose Comb Brown Leghorn eggs are named in the advertisement of Eva D. Tutt, that appears on page 15 of The Homestead. The stock producing these eggs score 91½ to 94½.

—Mr. W. A. Hopkins, of Lamonia, Iowa, breeds Buff Wyandottes exclusively. He has an advertisement on page 15 in which he is offering eggs for sale. His stock is pure bred and correctly mated.

—Mrs. W. R. Cremer, of Reinbeck, Iowa, can supply readers of this paper with Barred and Buff Plymouth Rock eggs of the Hawkins, Thompson and Bradley Bros. strains, at very reasonable prices, as per advertisement which will be found on page 15.

—Mrs. Edith Byggbrood, of Grundy Center, Iowa, writes: "I have a few choice White and Silver Laced Wyandotte cockerels that I will sell at reduced rates for the next few days. They must go to make room." See her advertisement on this page.

—Mr. O. N. Woody, of Newton, Iowa, breeds Buff Plymouth Rocks exclusively. He is offering eggs for hatching and will guarantee them fertile. The prices at which he will furnish them are named in the advertisement on page 15 of The Homestead.

—Mr. H. S. Schehl, of Prophetstown, Ill., breeder of Rouen ducks, has some fine large ones that got first prize at the Henry County (Illinois) fair in 1906. He is offering eggs for sale from this stock in his advertisement on page 15. He guarantees a good hatch.

—Mrs. J. H. Allen, of New Sharon, Iowa, is offering Black Langshan eggs for sale at \$1.50 per fifteen, from pens that have scored very high. Homestead readers should consult her announcement and send for one or more sittings of these eggs as early as possible.

—Prize-winning Light Brahmas and Barred Plymouth Rocks scoring 90 to 93, are for sale by Mr. J. Q. Swallow, of Nodaway, Iowa. Eggs from vigorous birds are also offered at prices given in the notice in the columns for that purpose. Mention The Homestead when you write.

—If any of our readers want some good Barred Plymouth Rock eggs it will pay them to send an order to Mrs. L. C. Reese, of Prescott, Iowa. She offers eggs from high-scoring birds at \$1.50 per fifteen or \$2.50 per thirty. Her fowls are all right and she has just what she advertises.

—Mrs. J. H. Allen, of New Sharon, Iowa, in furnishing copy for her Black Langshan egg advertisement that appears on page 15, writes: "I have four good cockerels left, scoring 91 to 94 points and a few late cockerels, unscored, for sale." Mrs. Allen is quoting prices on eggs from two different pens in her advertisement.

—Mr. Guy W. Offil, of Prairie City, Iowa, has a few extra good Mammoth Bronze toms and hens left. These are sired by a forty-five-pound tom which scored 96 points. He is selling young toms for \$5 and hens for \$3; they are extra good ones, and no one can make a mistake by sending to Mr. Offil for his foundation stock.

—Mr. W. C. Jones, breeder of Single Comb White Leghorn chickens, of Richland, Iowa, has purchased the stock of Mr. Willis Hoskins, a breeder of that variety of fowl for twenty years. Mr. Jones is offering eggs from the Wyckoff and Blanchard strains of this popular breed of fowl, in his advertisement that appears on page 15 of The Homestead.

—"I am better prepared than ever," writes Mr. J. W. Wagner, of Monroe, Iowa, "to supply and satisfy Homestead readers with Barred Plymouth Rocks eggs and my orders will be filled with eggs from extra large stock of the correct type." At the price that he is quoting for eggs no one can afford to set their hens with eggs of doubtful fertility and breeding.

—Mr. James Atkinson, editor of The Homestead, Des Moines, Iowa, is offering eggs from an extra good flock of Barred Plymouth Rocks and from a select flock of Mammoth Bronze turkeys. Mr. Atkinson has been laying a foundation for years and is now ready to transact business with those who want something good at reasonable prices. Read his advertisement.

—Messrs. W. M. Shaw & Co., of Monroe, Iowa, in sending copy for advertisement found on page 15 say they have Barred Rocks second to none in the state, having plenty of size and barred to the skin. They guarantee ten chicks to each sitting. They will also have a few sittings of Toulouse geese and White Holland turkey eggs for sale. Their birds have won wherever shown.

—Mr. O. B. McKeag has something of interest to poultry readers in his advertisement of turkeys, ducks, geese and chickens in the columns devoted to that purpose. Of the chicken breeds he is offering Light Brahmas, Silver Laced and Partridge Wyandottes. He is also offering some vigorous birds from his flocks of turkeys, ducks and geese. Write him for prices of eggs of these different fowls.

—Mr. Orlando Jacobs, breeder of Single Comb Brown Leghorn chickens, of Mediapolis, Iowa, writes: "My flock of Single Comb Brown Leghorns are bred to lay as well as for beauty, and are in good, healthy condition. No birds kept that will score less than 90 and up to 93½. From February eggs I have just hatched 168 live chicks from 225 eggs. Satisfied customers is my motto." See advertisement on page 15.

—Mr. J. D. Smith, of Montezuma, Iowa, in sending new advertisement, says he is booking orders now for eggs from his stock and that he has sold entirely out of breeders. He won premiums at all the shows in which he exhibited the past winter and has a good percentage of the winners of the blue in his yards now, and if in need of first-class eggs he can supply your wants. Write for his new 1907 catalog; it's free

for the asking, and describes the stock in full. See advertisement on page 15.

—Mr. D. N. Boydston, of Nevada, Iowa, has his advertisement in this issue and is naming very moderate prices on eggs from his Single Comb Buff Orpingtons. He has the famous Cook strain and for winter layers they cannot be beat. It will be to the best interest of the readers of The Homestead to send in their orders now before the rush begins. Mr. Boydston's prices are very reasonable and within the reach of all.

—Mrs. L. M. Estes, of Audubon, Iowa, in furnishing copy for her egg advertisement appearing on page 15, writes: "My White Wyandotte hens this season score 95 to 96½ and the price I am asking for eggs is the same as usual. The stock is strictly first class and the prices quoted in my advertisement are within the reach of all. Those who desire eggs should not wait until they want them, but book their orders at once. I guarantee satisfaction."

—Mr. J. H. Howarth, of Moulton, Iowa, is advertising eggs from high-scoring Rouen ducks for sale in his advertisement that appears on page 15 of The Homestead. Mr. Howarth writes: "We have sold every turkey we could spare and had to return a number of orders received since we were sold out. We have a few Rouen drakes left, but our sales on ducks have been many and we have done but little advertising except in The Homestead, which has paid us well."

—The X-Ray Incubator, manufactured by the X-Ray Incubator Company, of Wayne, Neb., is meeting with the best of results and the factory can hardly keep up with the orders now on hand. One of the leading features of their machine is the saving in oil, one filling only being necessary to make the entire hatch. The egg tray is not removed and the thermometer is in plain sight. Readers of The Homestead should write for their illustrated catalog before ordering elsewhere.

—In the advertisement of Messrs. Henry Schlatter & Sons, of Lawler, Iowa, which appeared in this department last week, it was stated that they were offering Barred Plymouth Rock eggs from the "Knight" strain. All breeders of pure-bred Plymouth Rocks will undoubtedly recognize that this was an error; it should have been the "Ringlet" strain. Messrs. Schlatter & Sons' advertisement appears again on page 15, to which we call the attention of the reader.

—Mr. J. Fred Foy, who conducts a very extensive poultry establishment at Redfield, in central Iowa, is now offering eggs for hatching from all kinds of pure-bred poultry, including chickens, ducks, turkeys and geese. Those looking for bees will find him well prepared to satisfy their wants. Some very choice fox hounds are also bred by Mr. Foy and he has a nice kennel to choose from. Write him for catalog. Kindly mention this paper. Remember, the address is Redfield, Iowa.

—Mrs. F. R. McLaughlin, of Manning, Iowa, in furnishing copy for her egg advertisement found on page 15 of The Homestead, writes: "I have had good returns from my winter advertisement. My stock is all sold. My Silver Laced Wyandottes are in fine shape and my stock is of the best. I have cockerels scoring 93½ to 94 at the head of my flock. I can furnish eggs promptly. My Mammoth Pekin ducks are extra large, while my Mammoth Bronze turkeys are headed by a forty-five-pound tom. I will be able to supply only a limited number of turkey eggs. All orders will receive prompt attention."

—Mr. Roy Stacy, of Rochelle, Ill., breeder of Duroc Jersey swine and Barred Plymouth Rock and White Wyandotte chickens, has an announcement on this page which should interest readers of this paper. At the present time he is offering eggs for sale that will hatch good litters, and regarding his poultry he writes: "My Barred Plymouth Rocks are selected stock with free farm range bred to lay, weigh and pay. My White Wyandottes are from the yards that won a first, second and third at the Chicago show this year." Anyone who is in the market for eggs from these breeds will do well to write Mr. Stacy at once. We take pleasure in recommending this gentleman and his stock to our readers. Kindly mention this paper when writing.

—"Poultry for Pleasure and Profit" is the title of a very neat and comprehensive catalog issued by a notable Wisconsin poultry establishment. Poultry diseases are given very careful treatment on a number of its pages. Following this comes some plans for ideal poultry houses. These are described in detail and should be of great interest to poultry breeders. The different breeds of chickens are treated in detail and prices are quoted on singles, pairs and pens, of nearly all the profitable breeds grown. A number of the breeds of turkeys, ducks and geese are also cataloged and actual photographs are shown indicating something of the healthy conditions which surround their breeding, and the actual environment under which they are kept. The various machines necessary for the up-to-date poultry man are also listed and described. This establishment have a reputation of shipping fine fowls to every country on the globe. Their shipments have always been received in good shape. Buyers of poultry will find a choice collection to buy from at this establishment. If it is impossible to visit them write to the Delavan Poultry Farm, Delavan, Wis.

#### CHOICE PLYMOUTH ROCK COCKERELS.

Those of our readers who want a few choice Plymouth Rock cockerels should send their order to the Ferndale Fruit Farm, Harlan, Iowa. They have six very choice birds of the Shellhager strain and they are pricing them at from \$3 to \$5 each. They are good and are worth the money.

#### BUFF ROCK EGGS.

On page 15 will be found the Buff Plymouth Rock egg advertisement of Mrs. J. J. Rink, of Shelby, Iowa, who is offering eggs of the Burdick strain at \$1 per fifteen, \$2.50 per fifty and \$5 per 100. Mrs. Rink has sent eggs all over Iowa, Kansas, Missouri and Nebraska, as well as many of the eastern states. She has a fine flock and her patrons are all satisfied customers. Send her an egg order at once.

#### POULTRY.

##### HAWKINS', FELCH'S AND THOMPSON'S

LINE BRED Barred Plymouth Rocks, 1st premium won wherever shown. Yards headed by high scoring exhibition cockerels. ## FENCE Strongest Made

Made of High Carbon coiled wire. We have no agents. Sell direct to user at factory prices on 30 days free trial. We pay all freight. Catalog shows 37 styles and heights of farm and poultry fence. It's free. Buy direct. Write today.

GOILED SPRING FENCE CO.  
Box 20, WINCHESTER, INDIANA.

## KEELEY CURE.

CURES LIQUOR, Neurasthenia, Drug and Tobacco habits. Send for free booklet. Address

KEELEY INSTITUTE, INC.,  
706 Fourth St., Des Moines, Iowa

## BEST REMEDY FOR SORE EYES

Cure inflammation, granulated lids, pink eye, ulcers, wild hairs, etc. For catarrhs, floating spots, cobwebs before the eyes, there is none better. 50¢ a bottle. Testimonials free. Arnitz Optical Co., 145 6th Ave., Des Moines, Ia.

## A STRONGER FENCE

Can be made of whole wire than of cut wire. That's why Advance is the strongest fence. Our stay wire is NEVER cut, but runs continuously up and down across the fence for many rods without an end. Thus we preserve ALL the strength of the wire, fully half of which is wasted in cut stay fences—sacrificed to convenience and speed in manufacture.

30 DAYS APPROVAL. Let us ship you what fence, etc. you need, on approval. After careful examination and comparison with other makes, if you don't like it, return it at our expense and get your money back. We have sufficient confidence in Advance Fence to make this offer.

WE PREPAY FREIGHT and guarantee safe delivery of your shipment. Write today for our Fence Book and Freight Paid Prices.

ADVANCE FENCE CO.,  
34 Old St., Peoria, Ill.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

### WITH THE EDITOR.

Sometimes it would seem as if a Home Department editor were in some sort a priest. Men and women who are pressed hard by life, those who have heavy burdens to bear and feel the need of sympathy and counsel find it a relief to open their hearts and pour out upon paper the sad story which were they Roman Catholics they would carry to their father confessor. In this way all manner of strange documents come into the possession of a Home Department editor.

Sometimes a troubled soul states a private problem and asks for the favor of a private answer. Sometimes a writer asks for nothing but the favor of a sympathetic hearing and a kindly word. Sometimes a sealed chamber is opened and a skeleton brought to view in the hope that a way may be found to exhibit it and so warn others. Probably a mixture of motives impelled the writing of a certain tragic story which came in the the Home Department mail a couple of months ago.

### DAKOTA SAM'S STORY.

I am well down the stream of life, a little past the half-century post. Away back up the stream is an oasis that I yet love to linger in—in thought.

It was when I was just entering my manhood years. Like most young men I did not look for the companionship of the fairer sex. If I met those termed fast, they were treated as my sisters, and never as lewd or wanton characters, for which to this day I bless my God.

At last I found one so kind, confiding, loving, generous and considerate, our acquaintance soon ripened into pure love. The star of hope was bright in my heart. We enjoyed each other to the fullest extent in a manly and maidenly way, never with a thought of treachery or dishonor. In my daily rounds of duty I often heard young men boast of their achievements in overcoming some lady acquaintance. It made me feel very much ashamed of them. A man who will even kiss a lady is no man at all if he boasts of it, no matter whether the favor was solicited or not.

My love and I were married and for four years I was in the very height of happiness and did my best to make my companion the same. But the blessing was too good for me. One sad day I saw a wee little form lowered into the grave, and three days later my loved companion was laid beside it. Then my life, as it were, ended.

My circumstances were such that in a year I was compelled to seek another helpmeet. I chose a woman that I had been acquainted with for a long time and never had known anything wrong of. She never allowed approaches of any kind, hardly allowing me to touch her when helping her out of the buggy. She came of poor, but respectable parents, had lived in want most of her life and never knew what comforts were. I was a renter on a farm at that time.

We were married, and within twenty-four hours a disappointed feeling came into my heart, and never ceased to grow. Her wants were beyond my capacity to supply. She had no love for anyone but herself. My homecoming greetings of bygone days were turned to scowls and scorns; her sole delight was to nag, nag, everlastingly nag and find fault.

I left the farm—it was too slow for us, by a long way. I took to railroading, so I got more money, but I soon found my wife was a professional gadite. When I hired clerk help she had the clerk do the housework so she might have more time to gad and gossip, even having loud talks with the section men that half the village people could hear. But all the greeting I ever got was scowls and complaints. My load was getting heavy to bear, and the little seed of disappointment spoken of was making quite a tree.

At last I quit the railroad and bought a country newspaper some hundred miles away from our old home, but this did not help matters much. She soon found acquaintances to her liking and the same loud talks and sweetenings were resumed. Her sister died in the West, leaving four children. I had to go and get them and give them a home. Then my burden did seem heavy. From no children—the Lord was good to me in that respect, we never had a child—to four, then good sized, and the way provender got away was a caution.

I changed my vocation many times, trying to get the biggest wages possible to meet all the demands, but to add to my cup of woe she taught the children to pester and nag me, too. Don't think I endured all this meekly. At times the old Adam would come up and I'd clean out the ranch in short order—not with blows or brute violence. I

never struck her in my life, but I did use sulphuric language and would quell the turmoil. Then when my wrath cooled down I got supremely disgusted with myself for allowing such an outbreak and would say not a word to anyone for a long time, but the everlasting nagging would be resumed before long, but again the Lord was good to me. I lost my hearing and could not get all that was meant for me. I also lost my occupation and had to take up woodworking. As that was in a big planing mill where there was lots of noise my deafness did not matter. Then began a tide of suicides. First an old friend of mine got tired of his load and threw it off by the drug route. When I looked on his peaceful sleep it was with envy. I wished for the same release. Soon another went by the pistol route. Here again I wished for release of the same kind. In less than six months five of my acquaintances departed, leaving their troubles behind. In the mill where I worked there was a big saw for cutting up logs. That was the inviting place for me. When I saw the big saw running it was hard work to keep from running onto it. At last I quit the place to get away from it. I got all the money I could raise, paid off all obligations on the home, gave my tormentor all the balance but \$5, bade her good by and went home to mother, after trying for twenty years to stay with a bad bargain. The children, two boys and two girls, were most grown and able to support their aunt. What they do or how they get along is not my concern now.

Shortly after coming back to mother she sold her little home in the East. We journeyed to the new country where I have a homestead and we live in peace. I shave myself now, something I never did for long years before. All trace of the desire for self-destruction is gone. Mother and I are here all alone. It is lonesome, very lonesome, and I often or always wish for my first love, but no desire for the second wretch that has blasted my life and left me a wreck on the shores of time till I am called home.

Some will doubtless wonder why this story is given place in the Home Department. There are several reasons. One is that men sometimes have an idea that a Home Department is a place where unhappy wives complain of their husbands and find misplaced sympathy; another is that good women find it difficult to believe that women are ever in any way responsible for unhappy marriages. A story like this of Dakota Sam ought to appeal to both the men and the women referred to. But there is another and much more important reason for giving it place and prominence here with The Editor.

Dakota Sam's story is a tragedy as real as any immortalized by Shakespeare, but just as the misfortunes and misery of King Lear had their roots in

## Farmers and Stockmen, Attention!

No danger handling barb wire if you use the Stark Combined Wire Reel and Stretcher (patented). It is just the thing for building new barb wire fences and for rolling up barb wire if you wish to remove any old fences. This machine is placed on a wagon box and fastened thereto with clamps by two bolts, without any injury to the box, and one man in the seat driving the team can roll up more barb wire without scratching his hands or tearing his clothes than twenty men could do by hand, and it is rolled up on spools in just as good shape as new wire coming from the factory, and can be used again for building new fences. For building new fences two spools can be placed on the machine and be unrolled at the same time as fast as the team can walk, and the wire is stretched by the same machine. For further information write to

**C. W. STARK, MOUNTAIN LAKE, MINN.**

himself so surely may the sorrows of Dakota Sam be traced to one act of his own. He reveals the secret mainspring of his ruined life in the sentence, "My circumstances were such that in a year I was compelled to seek another helpmeet." Dakota Sam's heart was buried with the wife of his love; what he had to offer the woman to whom he gave his name we are not told, but it is evident that he did not, could not give her the one thing which is the supreme requisite of happy marriage. She was cold to him, but had he any right to expect anything else? He frankly admits he sought a helpmeet; she probably sought a provider, and she may have been no less disappointed than he.

It is no part of our intention, as it is certainly not our business, to seek out the details of this domestic tragedy or to adjudicate blame. What is desired is to draw attention to the fact that without mutual love to lubricate the do-

mestic machinery marriage is likely to be a tragedy; that both partners to it are likely to miss happiness, and one at least—sometimes the man, sometimes the woman—to find misery so keen that life becomes a burden hardly to be borne.

### HOME AND HOMEMAKING.

#### LITTLE HELPS BY THE WAY.

Be systematically heroic in little unnecessary points. Every day do something for no other reason than its difficulty, so that, if an hour of need should come, it may find you trained to stand the test.

There never did, and never will exist anything permanently noble and excellent in a character which was a stranger to the exercise of resolute self-denial.—Sir Walter Scott.

The exercise of patience involves a continual practice of the presence of God, for we may be come upon at any moment for an almost heroic display of good temper; and it is a short road to unselfishness, for nothing is left to self. All that seems to belong

Any lamp—no matter how good—is handicapped if it hasn't the proper chimney.

My business is manufacturing lamp-chimneys that fit perfectly—of clean, clear glass that won't break from heat.

My name—MACBETH—goes on every one.

My Index tells of lamps and their chimneys, fully and interestingly. Let me send it to you—it's free.

Address, MACBETH, Pittsburgh.

### An Only Daughter Cured of Consumption

When death was hourly expected, all remedies having failed, and Dr. H. James was experimenting with the many herbs of Calcutta, he accidentally made a discovery, which cured his only child of consumption. His child is now in this country and enjoying the best of health. He has proved to the world that consumption can be positively and permanently cured. The doctor now gives this recipe free, only asking two two-cent stamps to pay expenses. This herb also cures Nausea at the Stomach, Night Sweats, and will break up a fresh cold in twenty-four hours. Address Craddock & Co., 1032 Race St., Philadelphia, Pa., mentioning this paper.

most intimately to self, to be self's private property, such as time, home and rest, are invaded by these continual trials of patience.—Frederick W. Faber.

#### SHINING EXAMPLE.

Jes' go 'long good natured,  
Dat's de safes' way;  
Sun goes on a-beaming  
An' a-smilin' all de day.  
Keeps de crops a-growin'  
An' de blossoms an' de fruits,  
Untill de storm come 'round an' try  
To lif' 'em by de roots.

Sun goes on a-shinin'  
Up above de cloud;  
Wind it keeps a-blowin'  
An' de thunder rattles loud;  
Sky gits blue an' peaceful,  
Like no storm ain' never bin—  
Sun he stays good-natured  
An' he allus boun' to win.

—W. S.

#### SMILES.

"What is inconsistency?" asked the curious one.

"Well," responded the wise one, "it is that spirit which moves a woman whose sleeves stop at the elbow to scold her husband because he hasn't any cuffs on."

"What will you do when you have discovered the way to the North Pole?"  
"The next step," answered the explorer, "will be to turn around and discover the way back home."

"We don't lynch a mau often, anyhow, remarked the man from Iowa.

"Neither do we," volunteered the man with the southern accent; "never, in fact, but once."

#### HELPFUL HOUSEHOLD HINTS.

Put a bit of camphor away with silver not in use; it will prevent tarnishing.

To keep wooden breadboards in good condition, scrub them with sand instead of soap. Match marks on the kitchen wall, which have been caused by carelessly striking matches on them, will disappear if rubbed first with the cut surface of a lemon, then with a clean cloth dipped in whiting. Afterward wash the surface with warm water and soap, and then quickly wipe with a clean cloth wrung out of clear water.

An ordinary telegraph wire makes a better line to hang clothes on to dry than the hempen one generally used. The wire does not sag, rot or break. It is easily made clean.

To remove bad odors from a room, burn a piece of dried orange peel on a hot shovel or old tin. The odor will disappear, leaving a pleasant one in its place.

To clean brass ornaments, wash them over with strong ammonia. The fancy parts should be well scrubbed with a brush dipped in the ammonia. Rinse in clear water, wipe dry and polish with a wash cloth.

Once a month I wipe up my carpets after sweeping with a cloth wrung out of warm water and ammonia, with a tablespoonful of kerosene mixed in. It is a splendid cleaner, and brightens up colors better than anything I ever tried.

#### SCHOOL LUNCHEONS.

Here are a few luncheon menus for the school children:

Two slices of whole wheat bread, buttered, filled with a thick layer of creamed cheese and seasoned with salt and pepper.

Two slices of whole wheat bread, buttered, filled with chopped chicken, nicely seasoned. The heart of one stalk of celery. An orange.

Two slices of white bread buttered, filled with chopped lean beef, nicely seasoned. A cup of apple tapioca.

Two slices of whole wheat bread, buttered, filled with a mixture of chopped dates, raisins and figs. A tart apple.

Two slices of whole wheat bread, well buttered. Small cup of custard. A ripe banana.

Two slices of whole wheat bread, buttered, filled with hard-boiled yolks of eggs passed through a sieve, nicely seasoned. Small jar of rice pudding.

Two slices of whole wheat bread, buttered. Twelve dates stuffed with pecans. One baked apple. Bottle of milk.

Two slices of white bread, buttered, filled with a mixture of chopped nuts. An orange.

Two thin slices of whole wheat bread, buttered. One large apple. Piece of ginger bread.

#### A NEW FUDGE.

Melt one-fourth cup butter, add two cups sugar, one-half cup milk, one-fourth cup molasses. Boil seven minutes, add two squares bitter chocolate, stir until melted and boil seven minutes longer. Remove from fire and add one cupful chopped nuts and two tablespoonfuls raisins. Beat till creamy and pour out in a buttered pan.

#### BEAN RAREBIT.

Melt in a saucepan two tablespoonfuls of butter, and add one cupful of cold, sifted baked beans, seasoning with salt and paprika. When heated through, mix in a half cupful of rich milk, as much soft cheese cut fine or put through a potato sieve, and a teaspoonful of Worcester sauce. Stir until the cheese is melted, then serve on thin toast or crisped crackers.

#### CHILI CON CARNI.

Cut two pounds of raw steak into small pieces and fry brown in butter or drippings and thicken with a tablespoonful of flour. Add the water in which six red chillies have been boiled and scraped to a pulp, and then stir in a little garlic and thyme. Simmer until the meat is tender and the gravy smooth and thick.

#### AMONG OURSELVES.

There are subjects which will not down. Letters from women who are the happy wives of men twice their age continue to pour in although discussion of the subject of unequal marriages has been closed. As the matter is one of far-reaching interest I have decided to make place for some communications bearing upon it. First let us hear from "A Wisconsin Bachelor":

May I come in, just once? I am so much

## Doing a Week's Washing In 6 Minutes—Read the Proof

THIS woman is using a 1900 Gravity Washer.

All she has to do is keep the washer going.

A little push starts it one way—a little pull

brings it back—the washer does the rest.

The clothes stay still—the water rushes through

and around them—and the dirt is taken out.

In six minutes your tubful of clothes is clean.

This machine will wash anything—from lace

curtains to carpets, and get them absolutely,

spotlessly, specklessly clean.

There isn't anything about a 1900 Gravity

Washer to wear out your clothes.

You can wash the finest linen, lawn and lace

without breaking a thread.

"Tub rips" and "wash tears" are unknown.

Your clothes last twice as long.

You save time—labor—and money.

You wash quicker—easier—more economically.

Prove all this at my expense and risk.

I let you use a 1900 Gravity Washer a full

month FREE.

Send for my New Washer Book.

Read particulars of my offer.

Say you are willing to test a 1900 Gravity Washer.

I will send one to any responsible party, freight

prepaid.

I can ship promptly at any time—so you get your

washer at once.

Take it home and use it a month. Do all your

washings with it.

And, if you don't find the machine all I claim—

if it doesn't save you time and work—if it doesn't

wash your clothes cleaner and better—don't keep it.

I agree to accept your decision without any

back talk—and I will.

If you want to keep the washer—as you surely

will when you see how much time, and work, and

money it will save you—you can take plenty of

time to pay for it.

Pay so much a week—or so much a month—as

suits you best.

Pay for the washer as it saves for you.

I make you this offer because I want you to find

out for yourself what a 1900 Gravity Washer will do.

I am willing to trust you, because you can prob-

ably get trusted at home. And, if your credit is

good in your own town, it is just as good with me.

It takes a big factory—the largest washer fac-

tory in the world—to keep up with my orders.

So far as I know, my factory is the only one ever

devoted exclusively to making washers.

Over half a million of my washers are in use.

Over half a million pleased women can tell

you what my washers will do.

But you don't have to take even their say-so.

You can test a 1900 Gravity Washer yourself.

Then you will know positively.

Write for my book today. It is FREE.

Your name and address on a post card mailed

to me at once, gets you my book by return mail.

You are welcome to the book whether you want

to buy a washer now or not.

It is a big illustrated book, printed on heavy

enameled paper, and has pictures showing exactly

how my washers work.

You will be pleased with this book. It is the

finest even I have ever put out. Write me at once.

Find out just how a 1900 Gravity Washer saves

your time and strength—preserves your health—

and protects your pocketbook.

Write now—Address—R. F. Bieber, Manager

"1900" Washer Co., 323 Henry St., Binghamton,

N. Y. Or, if you live in Canada, write to my

Canadian Branch, 355 Yonge St., Toronto, Ontario.

interested in the June Bug, as I am an old bachelor and expect to marry a lovely girl of about half my age, and if it is wrong I want to know it. I have everything in the home line, both in town and country, and enough money, but I am very lonesome. She has nothing and has to work for a living. Now, as long as she is willing, what is the harm?

Possibly A Wisconsin Bachelor has found replies to his questions during our recent meetings; if not, the story of a typical occurrence noted by An Observer will surely suggest one answer:

A couple married in Ohio, the man twenty-one and the woman eighteen years of age. They came to Kansas with almost nothing in the way of property. Land was cheap and they worked hard. In eighteen years their little fortune was \$35,000 or \$40,000. At this time the wife died. There was a girl in that neighborhood eighteen years of age, good looking and extra good company, with the exception of being rather fresh. Something like two years after this man's wife died there was a wedding of this man forty-one and that girl twenty years old. Possibly he was thinking he was getting a good helpmeet; possibly she had her eye on the \$35,000 or \$40,000; possibly both were fooled.

Probably this "typical case" will provoke a shower of protests. Let us bear in mind that no rule is without exceptions, and let us also bear in mind that it is quite possible for a young woman, especially a friendless young woman, to love a man much older than herself. At the same time let us admit the fact that if a man is rich and old and a girl young and pretty it is possible that she is marketing her charms.

It is not always the woman who is unhappy when marriage turns out badly. If any doubt this let them drop into the editorial sanctum this week and listen to Dakota Sam's story.

Mrs. Custer County's question is bringing out some fine things; whether you are interested in Sunday base-ball or not you will enjoy hearing what Mrs. Laura Hutchison and Mr. W. T. Fitch have to say on the subject:

I have long been an interested reader of this department, but have never ventured to write. Now, however, I feel that my experience justifies me in answering Mrs. Custer County. We are raising a family of children consisting of six boys and five girls, they ranging in age from two years old to twenty-four, but we have never had any trouble about Sunday ball playing but once.

One of our boys, sixteen years old, wanted to go and see them play ball on Sunday. His father told him he could have every Saturday afternoon, but could not go on Sunday. That was the last trouble we had about that. Our children have always gone to Sunday school and church from the time they were babies. The sister says, "Do not tell me I should go and take them." That is just what I think the father and mother should do. What I have done others can do. Our oldest girl at home is sixteen. She helps get the little ones ready and even carries the baby into church and sometimes keeps him during the services. Then I wish to whisper a little secret: Lead your children to yield their hearts and lives to the Blessed One, and they will not care for Sunday ball games.

I have frequently felt like saying a few words in some of the discussions that have taken place in your columns, but have desisted till now. Mrs. Custer County's question furnishes the first pretext. She and her husband cannot go to church because they must work and cannot get ready, but she would like her boys to go. How are they to get ready? Surely the girls could help the mother and the boys help the father and all could get to church. I know the father and mother are tired, for I have for years taught school winters and farmed summers, doing my own chores and driving several miles to school, but I find that to simply sit or lie around Sunday makes me feel worse than to get into my church clothes and go to the place where I can receive some instruction and help. Ball games usually come in the afternoon, and in town church and Sunday school in the forenoon. Why not organize a Sunday school in your nearest schoolhouse, get the neighbors interested, get the minister from town to drive out and assist and after Sunday school have church. The boys will not be ashamed to go if the fathers are there. I have four motherless children to look after and my oldest boy, seven, does not like to go to Sunday school, but when he sees papa getting ready he makes a start and I shall try to furnish him the example so long as I live.

While we are thinking about the principles and practices of parents suppose we listen to a further word from "An Among Ourselves Mother":

I am a mother of three boys and five girls. I will say to all mothers to begin when the baby begins to creep to let it know who is the one that has to mind. Some mothers will put everything about the house up out of the baby's reach. That is a bad way to begin, I think. I never did that with the first one nor any of the rest. I am not saying they never got in mischief, but if you say, "Baby, Baby," or call his name, he will soon learn not to touch that thing again. And after a child can talk and know what you say, then for the good of your child make him mind. I have so often heard children say, when told to do some little thing, "I won't do it," or "Let Mary do it" and

the mother let them go and never said a word or made them go. Now, then is when I say the mother is the one that is doing wrong. I may make you think I am a very hard, strict mother, but I am not. I haven't used a switch but three or four times in ten years and I must say I would rather have taken the whipping myself. I haven't a child from four years up but minds me. Mothers, don't scold and nag, nag all the day long. Be cheerful and a child as near as you can, with the children, and let them be little women with you. My little girls bake little pans of bread and little pans of cookies, too. That doesn't bother me, and oh, the good it does them!

It's such a difficult matter this of training children that it is small wonder so many mistakes are made. The great thing is to be alive to the responsibilities of the position and alert to garner wisdom from those who have it. Little talks such as we have in this circle serve the double purpose of provoking thought and putting experience in circulation. I trust that increasing numbers of parents Among Ourselves will see their duty and avail themselves of their privileges in this direction.

Mrs. Borosky, who is something of a reader, has a word for us:

Speaking of book talk's reminds me that I read something over sixty volumes last year and I wonder if I could say something of interest to book lovers like myself. There, I see some of the members holding up their hands in horror. "How did she get the time? I'll bet she did not make her bed or wash her dishes." Yes, my dear friends, I not only made my beds and washed my dishes, but I cared for five small children, beside the thousand and one things a farmer's wife finds to do. I'll admit I had no ten or twelve-roomed house to take care of; such are scarce in Oklahoma, where I have lived for seven years, but I am "sorta" like Mrs. Wiggs. I couldn't very well be thankful for what I didn't have, so tried to be doubly thankful for what I've got—but where is my book talk? I am going to give you the very richest of cream. I suppose most of you are acquainted with "Pansy" and a few of her books are "Four Girls at Chautauqua," "Chautauqua Girls at Home," and "Judge Burnham's Daughters." The first is a history of the conversion of four girls, and the others of their work as Christian women. Then, there is Ralph Connor's "Sky Pilot," "The Prospector," "The Man From Glengarry," "Glengarry School Days," and "Black Rock." I wish I could give a short sketch of each, but as that will take too much room I will only say they are too good to pass by if one can get them. "The Wide, Wide World," and "Queechy," by Elizabeth Wetherell are, I think, two of the best books I ever read. "Silver Threads," by McKeever, "The Virginian" by Owen Wister, "Gordon Keith" and "Red Rock" by Thomas Nelson Page, "The Right of Way" by Gilbert Parker, "Rose in Bloom" and "Old-Fashioned Girl" by Louisa Alcott, "Prisoners of Hope" by Mary Johnson, "The Colonel's Daughter" and "Foes in Ambush" by General Charles King, and, of course, "Mrs. Wiggs" and "Lovey Mary," and about twelve or fourteen of E. P. Roe's and, oh, ever so many more that I might name, but the ones I have named I can recommend to anyone; they can be put into the hands of young people without fear. You may have guessed I have the advantage of a circulating library, and when I have read a book I write the name and author down and study them and in that way can remember them.

Do none of the friends read anything

but fiction? I am an advocate of good novels, but I believe in a "balanced ration," to use the phrase of teachers of domestic economy. One should read history, philosophy, poetry, biography and travel as well as novels. Mrs. Borosky's list is good as far as it goes, but it does not go far enough. Let us hear from others.

May Flower comes with a remedy for a cranky husband:

A good cure for a cranky husband is a pleasant wife; meet him at the door with a smile when he comes home tired; give him the best chair in the house and talk to him about his and your work. If he answers cross, put your arm around his neck and tell him how sorry you are because he is tired, but by all means keep your temper sweet and you will see you can cure a crank.

Just a few words to open the discussion of dancing and we must adjourn until next week. Murl's Wife believes in dancing as you will hear:

As dancing has been brought up for discussion I desire to give my opinion. For my part I strongly approve of dancing as an amusement for young folks. Not the hall dances, but the country club dance. If not indulged in to excess, dancing is a pleasant and healthful pastime. Young people learn to have more confidence in themselves, walk more gracefully, and are less bashful if they can dance well. I live in the country, am twenty-three years old and have been married three years. My husband and I belong to a dancing club, the same to which we belonged previous to our marriage. Our club meets every two weeks in the homes of the different members, and we have jolly good times. As to harm resulting from the dance it is all bosh; anyone so minded can make harm from any of the amusements. The girls who dance in this part of the neighborhood are just as pure and womanly as those who have never set a foot on the dancing floor. I am the mother of little twin girls, two years of age, and would much prefer when grown they would dance than attend these kissing bees, so popular in some communities. I have "been there" in both cases, and my advice to the girls is dance all you want to, but "turn down" the kissing parties.

#### POLAND CHINA BREEDER.

Mr. A. C. Lanham, breeder of Poland China swine, of Battle Creek, Iowa, in furnishing copy for his advertisement that appears on page 30, writes: "I am completely sold out of bred sows, have shipped them all over Iowa and into several of the adjoining states. Every sow we have sent out has either gone into a pure-bred herd or for the foundation of a herd, and of all that we have sent out, have not had a single complaint. The herd was never in better shape and we have sixty-five little pigs with several sows yet to farrow; among them some of our best ones. L's Sunshine has made a good growth this winter and we believe he will make a better show this fall than he did as a yearling. Everyone that sees him likes him and have booked orders for boar pigs sired by him to be delivered in August. If nothing happens we will be out to the fair this fall with a lot of his get and the boys can see how he breeds. We are booking orders now for boar pigs to be delivered in August."

#### GOING TO CANADA.

During the past few months everything has been Texas and the Panhandle. Never before has such a vast multitude of people flocked to any new country for investments in farm lands. This has been the case to such an extent that we have all lost track of Canada. We must remember that in the North is a class of people who are energetic, thrifty and determined for success. This quality alone means advance in lands in that country. Then, too, it is a place of fine homes, cultivated farms, blooded stock and general thrift. Why not investigate a tract of land in Canada, just over the line from Estevan, northwest to Weyburn. This is renowned for its rich soil, for its good water and enormous wheat crops, a place where land must double in value in five years. Mr. C. C. Pugh, of Des Moines, Iowa, would like to send you information concerning this garden spot. Write him for particulars to the address given in his advertisement on page 22 of this issue.

#### "FACTS FROM FALFURRIAS FERTILE FIELDS."

The above is the title of the most beautiful and instructive book ever printed about the famous gulf coast country of Texas. This book ought to be in the hands of every one of our readers, because it tells of a country that is famous for its big paying crops, its excellent climate, its artesian wells and many other features in which every good farmer is interested. "Facts From Falfurrias Fertile Fields" was published by the Falfurrias Immigration Company, of Kansas City, Mo., and is being sent free to those who write for it. The Falfurrias district of the gulf coast country surely affords great opportunities for the man who wants to make a home for his family and a competence for old age. Land that is selling there now at \$15 per acre will produce crops that bring \$50 to \$300 per acre per year. There is sufficient rainfall for all crops, and then artesian wells furnish a never-failing supply if more should be needed. Thousands of northern farmers have moved to the Falfurrias country in the last few months. They are all satisfied, and more than satisfied. They are making homes for their boys and girls and are looking forward to an old age of peace and plenty in this land of sunshine, flowers and big crops. To those who want to buy land this ought to be interesting. It means the opportunity of a life time. Remember Uncle Sam has no more land to give away, but population is increasing just the same. When you can buy such land as this at \$15 per acre it is time to act if you ever expect to own a home and live in comfort. The Falfurrias Immigration Company is composed of men of high moral character and financial worth. They want good farmers to come to the Falfurrias country and they encourage and help everyone

## WILL YOU TRY THE FAMOUS ESTEY ORGAN THIRTY DAYS FREE?

We will send you any organ which you may select from our catalog, freight prepaid, direct from our factory for 30 DAYS' FREE TRIAL

If you like it after trying it, you buy it.  
If not, return it at our expense.  
If you do buy it, we give you

### A Twenty-five Year Guaranty.

You know what the Estey Organ is. For sixty years it has been the world's standard organ—used and loved by the world's greatest musicians. Its purity and sweetness of tone, has never been equalled by another organ. Today the Estey is better than ever before, because 60 years' experience has taught us more and more about "the mysterious ways of the wind among the reeds," has taught us more and more about clarifying and sweetening the tone has taught us how to make a better organ. You know and your neighbors know the Estey reputation. You know that it is an organ you may well be proud of—and never have to apologize for, as you must constantly do for an organ from an obscure maker or from the "job-lot" of a cheap mail order dealer. Why not get the best—the organ the whole world proclaims the best—especially when you can buy it, direct from the factory, at actual factory prices on a 25 years guaranty, backed by the manufacturer!

The Estey factory is the largest organ factory in the world. It has the best equipment, the finest facilities, the most expert and experienced workmen. More than that, it is backed by a determination to produce only the best possible organ—to maintain and advance the Estey reputation. That's why the Estey organ grows better and better from year to year.

But—let's waste no time talking about it. Try the organ and see and hear for yourself. Remember, we send the organ for a 30 days' trial—and we pay the freight. You don't buy it until you have tried it. We can't be more fair than that. Send today for Catalogue No. 109 and make your selections. Estey Organ Co., Brattleboro, Vt. (Established 1846)

## Great Northern Rates To the Northwest

LOW ONE-WAY RATES DAILY, UNTIL APRIL 30

Seattle, Tacoma, Portland Everett, Bellingham, Vancouver and all Puget Sound Points	\$25 <sup>00</sup>
Spokane, the Kootenai, Wenatchee the Big Bend Country and many points in Eastern Washington	\$22 <sup>50</sup>
Helena, Butte, Havre, Great Falls Kalispell, Whitefish and many Other Montana Points	\$20 <sup>00</sup>

Only \$6.00 to nearly all points in North and South Dakota, Every Tuesday during March & April. Low Rates to points in Canadian Northwest on same dates.

These rates are from St. Paul and Minneapolis—Rates from Chicago, Des Moines and points east and south thereof are proportionately low. Book on Washington, Montana, North Dakota and information regarding rates and routes to any point in the Northwest furnished on request.

#### BETTER THAN A CHINAMAN

is the 1900 Gravity Washing Machine, for the simple reason that it entails certain wonderful improvements in construction that make its manipulation almost child's play. The law of gravity causes all matter to fall to the earth. This principle is made use of, in this improved washer. In the ordinary washer the clothes are moved and the water is thus agitated. In the 1900 Gravity Washer the clothes remain in position and the water is moved. Stands to reason, does it not, that water can be moved easier than water-soaked clothing? Nothing is more awkward and bulky to handle than wet clothes. They eventually break the back of the strongest woman. The Gravity Washer has been well tested in thousands of homes. Its ease of manipulation, its thoroughness in cleansing clothes of the finest or coarsest weave, its durability and lasting qualities all recommend it highly to the farm or city housewife. An offer is now being made whereby every woman can secure this washer

on easy terms. We would advise every woman to investigate the merits of this machine. It does not pay to wear one's life out doing heavy, large washings without the best equipment. Write today to Mr. B. F. Bieber, Mgr., 1900 Washer Company, 382 Henry St., Binghamton, N. Y. On page 19 we show a picture of the washer doing a week's washing in six minutes. Kindly mention this paper when you write this company.

#### THE "ILLINOIS" CREAM SEPARATOR.

One of the strong features in the construction of a dairy separator is the turbine disk bowl. This bowl is free from crevices which are so easily filled with dirt which sours the milk. Neither are there any cups or corrugations in its make-up which are very desirable things to consider in any make of separator. The "Illinois" separator is built for the farmer's use particularly and is made strong throughout. Its efficiency in operation is high and makers claim that it will skim as close as any. Their catalog tells all about it and may be had by addressing your inquiry to the American Hardware Company, Dept. 8, Ottawa, Ill. Write at once if interested.

## WALL PAPER OFFER

BOOK OF SAMPLES FREE

WRITE US  
and say "Send me your new 1907 Wall Paper Offer" and we will at once send you FREE, a big book of 1907 wall papers; immense variety, beautiful patterns, at astonishingly low prices. We own our own big wall paper factory

and sell you direct on factory cost basis, less than one-half price you must pay others. Our new 1907 patterns will delight you, our low prices surprise you. The big free sample book also shows how to hang paper and do the job yourself; anyone can follow our simple directions successfully.

### YOU CAN GET THIS DRESSER

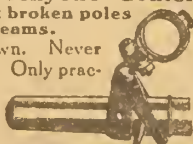

FREE, or a fine couch, Morris chair or choice of hundreds of valuable articles free if you buy from us. Our Profit Sharing Plan, as explained in the free wall paper book, is more liberal than ever. Write at once for our new Wall Paper Sample Book and see for how little money you can paper one room or your entire house and all our great new offers. Address BEARS, ROEBUCK & CO., Chicago.

## GOOD HARNESS

HOW YOU CAN BUY A FINE \$35 SET DIRECT  
FROM THE MAKER FOR \$24.  
ALL SHIPMENTS ON APPROVAL.

I make all my harness in my own factory right here in Waterloo. I buy all the leather and supplies so I know that nothing but genuine oak-tanned leather is used. I know all my men and every last one of them is a skilled harness maker. My expenses here are low—not one-fifth of what they would be in a large city where most of the harness sold by mail-order houses and local dealers is made.

When you buy from me you deal direct with the maker and that means a mighty big saving.

You take no risk either. All goods shipped on approval and if not entirely satisfactory you send them back and get your money and we pay charges both ways. As to our responsibility you can refer to any bank or express company in Waterloo or you can look us up in Dun or Bradstreet.

The harness shown in the cut here is our "leader" for 1907. It's a genuine bargain—a splendidly made 1 1/2-in. team harness—all of the best grade oak-tanned leather.

Just send me the money and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways, if you are not perfectly satisfied.

My big, free Harness Book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address R. M. Knox, Pres., Western Harness & Supply Company, 613 Main St., Waterloo, Iowa.

## PATENTS

If you have a new device which can be patented, it may make you a fortune if properly protected. Send sketch or model of your device for free opinion as to patentability. Among our clients who have made money out of their patents we refer you to the following: Wm. F. Gould, Des Moines, Ia.; Wm. H. George, Dexter, Ia.; H. H. Munson, Truro, Ia.; Franz J. Wood, Des Moines, Ia.; Gould Balance Valve Company, Kellogg, Ia.; P. H. Van Gorp, Pella, Ia.; Stocking & Mendenhall, Audubon, Ia.; Wm. W. Robinson, Des Moines, Ia.; Victor Landholm, West Point, Neb.; Samuel G. Scholz, Billings, Mo.; Benjamin F. Booth, Indianapolis, Ia.; and many others we will name on request. Upon examination of your device we can tell you whether or not you can secure a patent. We have the largest and best equipped patent offices in the west. We also have Washington offices. As reference we can give you The Homestead and many other papers, any bank in Des Moines, a large number of manufacturing concerns throughout the west, and other clients. If you have an idea, write us for full information as to how to protect it fully.

**ORWIG & LANE,**  
408 Crocker Bldg., Des Moines, Ia.

### ADVERTISING NOTES.

Irrigated lands at \$12.50 per acre is the proposition that L. M. Davis, Portland, Ore., is offering to prospective investors. See page 22 and write for further particulars.

A desirable farm, containing 134 acres, is offered for sale by Mr. Louis Benson, of Anoka, Minn., in his advertisement that appears on page 22 of this issue of The Homestead.

For choice Missouri prairie or bottom land in chunks of sections, halves, or quarters and less, write to Mr. John W. Everman, of Gallatin, Mo. See page 22 and kindly mention The Homestead.

Mr. W. P. Coon, who won the \$2,000 Burg wagon on the best seed corn exhibited at the Iowa corn show last year, is now offering seed corn of that same stock. His prices are reasonable and he guarantees satisfaction. Look up his advertisement on page 10. Kindly mention The Homestead when you write.

What is advertised to be one of the finest 400-acre stock farms in central Minnesota is offered for sale by Mr. John P. Fridley, of Grand Rapids, Mich., in his advertisement that appears on page 22 of this issue. The farm will be sold on easy terms. For further information read the advertisement and write the advertiser.

A fifteen-acre fruit farm with all the necessary equipment to carry on the work of planting and gardening is offered by Messrs. Smith & Davis, of Ames, Iowa. This plot is located near the agricultural college, which gives a handy and extensive market for the produce of the farm. See page 22. Mention The Homestead when you write.

Bargains in well drilling machinery and in one, two and a half horse power gasoline engine are being offered by Mr. B. F. Richardson, of Dubuque, Iowa, on page 4. This machinery is represented to be in first-class condition and probably can be purchased at prices that will be very attractive. Mention this paper when making inquiry.

Mr. G. L. Crookham, of Kearney, Neb., is offering alfalfa, wheat and corn lands located in central Nebraska, for sale at \$15 per acre in his advertisement that appears on page 22 of this issue. He has one farm near Kearney, Neb., which contains 4,590 acres, with good improvements, that will be divided if desired and time given to the purchasers. Mr. Crookham desires agents to aid him in the selling of these Nebraska lands.

The Allen County Investment Company, Longton, Kan., makes an interesting announcement in this issue regarding land investments. This company control a grand lot of farms in southeastern Kansas and are prepared to make the very best of terms to buyers. They have some first-class bottom lands listed. Write for prices and descriptions of what you want. Kindly say you saw their advertisement in The Homestead.

The benefits to horses from clipping them in the spring are now so generally recognized that the best means of doing it concerns every reader who has horses. The Chicago Flexible Shaft Company, 234 Ontario St., Chicago, Ill., advertise in this issue a high-grade Stewart clipping machine as low as \$6.75, a price that is not prohibitive to even the owner of one horse. Write this firm for their free new catalog, the world's most complete line of clipping machines.

On page 22 the Colonial Securities Company, of Denver, Colo., make announcements which should be of interest to those having small amounts of money to invest in land claims in that state. This company state that filing charges are only twenty-five cents an acre and unless you have \$500 to invest you will not find it worth your while. The claim reservation opens at Denver, June 1st, this year. Write if interested to the address as given above. Mention The Homestead.

Better corn, more corn, and at less cost are the essential profits to the farmer. He does not plant any kind of corn and wonder why he does not get a fifty to seventy-bushel yield, but he is particular to select the best seed corn obtainable. This must be selected by experts. Such expert selection and finest of seed corn is obtainable from the Nishna Valley Seed Company, Box 12, Hamburg, Iowa. Send for their illustrated catalog, full of information valuable to raisers of pure strains of seed corn. See advertisement on this page.

### EASTERN KANSAS FARM CHEAP.

Do not fail to read the advertisement of Mr. A. D. Washburn, of Topeka, Kan., in this week's Lands and Homes department. Mr. Washburn offers a fine 400-acre farm near Topeka at a very low price. Write him about it.

### A BEAUTIFUL BUSINESS.

One of the most beautiful businesses in this world is that of Macheth, the lamp chimney maker, of Pittsburgh. Beautiful, because it has grown to great proportions and profitability by satisfying the requirements of every lamp in use, whether known to its users or not.

### EASTERN KANSAS FARMS.

Those who are interested in land should not overlook the advertisement of Messrs. Geo. M. Noble & Co., of Topeka, Kan., in the Lands and Homes department this week. This is an old reliable firm and they are selling some fine farms in a "sure crop" country very cheap.

### KANSAS LAND CHEAP.

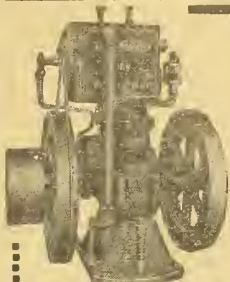

When you can buy Kansas land where the crops have been fine for years at the extremely low price of \$7 per acre, there is certainly no excuse for anyone not owning a farm. Look up the advertisement of Messrs. C. E. Foote & Co., of Topeka, Kan., on page 23 of this issue and read it carefully. Then write this firm for full particulars. This is certainly a snap.

### QUALITY AND PRICE IN ROOFING.

These are two very important things to consider in buying prepared roofing. When quality outweighs the price one considers that a good deal has been made. When quality is poor and price is high it leaves a bad taste. Unfortunately is the dealer who sells such. The Flint-Coat Roofing Company insist on selling only a high grade of product. Quality means wear, which in turn means a roofing that will stand the elements for a

# PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 32-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.

## THE OLD RELIABLE Anti-Friction Four Burr Mills.

DOUBLE THE CAPACITY OF OTHER MILLS.  
TWO-HORSE mill has 25 ft. Grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bu. per hour.

30,000 Bu. With One Set of Burrs.  
I have used a Mogul No. 1 mill for seven years and it has ground with one set of burrs more than 30,000 bu. of corn, and the burrs are still in good condition. F. E. Craig, Mt. Carroll, Ill.  
Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Bavee Grinder & Furnace Works, - - Waterloo, Ia.

## Pure Bred SEED CORN

growing seed corn. It means more bushels to the acre, when such seed is planted, and better corn; it means a bigger profit on your labor, and a corn that is ears—not nubbins. We grade it all by hand; test it; guarantee germination. We are located in best corn section of the world. Write for Catalog and free samples. Free Garden Seed Offer in Catalog. Photographs of real corn as raised.

Box 12 **NISHNA VALLEY SEED CO.** Hamburg, Iowa.

lifetime. You can buy Flint-Coat direct. Write to the Rock Asphalt Roofing Company, Commercial Station, Dept. D., St. Paul, Minn. See page 4 for quotations.

### WYOMING RANCH FOR SALE.

A twelve thousand-acre ranch on the main line of the U. P. R. R. in Wyoming, with two good sets of improvements and a running stream through it is offered for sale by the O'Keefe Real Estate Company, Omaha, Neb. This is one of the greatest bargains as an investment that has ever been made in the West. Write them about prices, etc., at once.

### A GREAT WYOMING BARGAIN.

Ten thousand acres of eastern Wyoming land on the main line of the U. P. R. R. and close to the B. & M. This is nice, smooth land and could be cultivated. Price \$5 per acre, half cash. The adjoining land is being sold to a German colony at more than double the price asked for this. Write O'Keefe Real Estate Company, 1001 N. Y. L. Bldg., Omaha, Neb., and mention The Homestead.

### STOP TRYING TO MAKE MONEY.

Under this heading will be found an advertisement on page 22 that contains something for every land seeker to think about. Over a half million acres of lands in the great Northwest are being offered therein. New lands are being rapidly taken. The opportunity for making small investments will soon be history. In a new country there are hundreds of chances to make money to a half dozen in an old country. Nature is generous to the hand of the tiller first on the ground. She then gives in full measure of her hidden riches. Later it is harder to coax good crops. For the grain farmer, as well as the stock farmer, the Northwest is a land of opportunity. See what is listed by the Stewart & Mathews Co., Ltd., 305 Jackson St., St. Paul, Minn., and if interested write them for propositions.

### THE DANGER OF HANDLING BARBED WIRE

is reduced to a minimum by the use of a good wire stretcher and a reliable, efficient wire reel, such as is now offered in our columns. Fence building is relieved of most of its accidents and dread by this machine. The inventor struck upon the idea after having built many fences himself and has made every part of the device practical. The device will roll up and unroll at the same time, which makes it especially valuable when an old fence is being unplaced, as the old wire can be wound up at the same time that the new wire is put on. One man can do the work of three with this reel. By the illustration you will see how it works. See page 13 and address all inquiries to Mr. C. W. Stark, Mountain Lake, Minn. Mention this paper when writing.

### WHEN THERE'S A BROWN FENCE BETWEEN

your live stock and the rest of the world, you are in a position to enjoy the thought that your neighbor won't be telling you over the telephone to collect your stray stock. An examination of a section of Brown woven wire fence shows a very good principle in the construction of this kind of fence. The stay wires are straight and in one piece from top to bottom. This makes a rigid fence and one that will stand up. The quality of steel used in the construction is of the very best, which further insures the life and usefulness of this make of fence. It has always been the aim of this company to

## Uncle Sam's Sheep Dip

is made according to the U. S. formula. It is the up-to-date dip and disinfectant for general use for progressive stockmen and farmers. It is the most powerful non-poisonous germicide. Not only is it the very best, but is sold cheaper than inferior dips and washes.

Prices—1 gal. can, dips 100 horn sheep, \$1.00; 5 gal. can dips 500 horn sheep, \$4.00; 1 case, (10, 1 gal. cans) dips 1000 horn sheep \$8.50; 50 gal. brl. dips 5000 horn sheep, \$40. net cash prices, f.o.b. Minneapolis. Complete directions for use on sheep, cattle, horses, chickens and for disinfecting purposes furnished free. Booklet of 32 pages, called "Stock Grower's Enemies," sent postpaid for 2 cents. Local Agents Wanted.

No Goods Sold on Credit.  
Send all orders direct to the manufacturers,  
**Northwestern Hide & Fur Co.,**  
MINNEAPOLIS, MINN.

## FREE TO MEN

Sent Positively Without Cost.

This is a bona fide offer to any man suffering from any of the diseases peculiar to men and is made by Dr. Rankin to give every man an opportunity to test, without cost, his superior and original methods. **One Week FREE Treatment**

If you need medical advice, why not get the best? This one week's treatment, absolutely free, will convince you.

**Dr. W. D. Rankin,** Dept. 18, 136 W. 34th St., New York.

supply something that will stand extraordinary abuse. The top and bottom wires are made to keep the fence in place. Dogs, swine or other small stock will find it impossible to crawl under the Brown fence. When you buy this brand the freight is all paid and you know just exactly what your fence is going to cost. Remember, that freight charges add a great deal to the cost of your fence. Send for a booklet explaining

the good points of this fence. Address your inquiry to the Brown Fence and Wire Company, Cleveland, Ohio. Mention The Homestead when you write.

#### HARDING'S SHORT-HORN SALE.

We wish to direct the attention of our readers to the female consignment in the fifth annual Short-horn sale of Mr. F. W. Harding, which will be held on April 10th, at Waukesha, Wis. With the exception of four head, the entire lot of forty either have calves at foot or are safe in calf to Whitehall Sultan, Whitehall King, Anoka Sultan, Red Sultan and other bulls of great note in Short-horn circles. Whitehall Sultan stands today one of the greatest show and breeding bulls the breed has ever produced. The winnings which he and his produce have won in the strongest shows of this country are too well known to require repetition here. The other three bulls in service, Whitehall King, Anoka Sultan and Red Sultan, all sons of Whitehall Sultan, have been selected with a view to improving the herd, and they have the character and individuality of their noted sire. At the head of the Anoka herd good bulls have always been used. The breeder who is in the market for good females sired by or bred to good bulls will find in this offering cattle that will please him and be money makers if properly cared for. Five imported cows are listed, two of them with heifer calves at foot, and the others bred to Anoka Sultan, a first-prize winner the past season in five of the strongest shows. The female offering is practically all Scotch breeding, and collectively we doubt if there are as many good females, individually and breeding considered, in one sale this year as have been listed for this sale. Mr. Harding has drawn on some of the best herds of Canada in order to fill the consignment, and those present sale day will find that the class of cattle which have been selected for this occasion are in keeping with the high character of the previous offerings. Imp. Dum-na-Glass Nonpareil is an unusually good cow and has an extra good heifer calf at foot, by Imp. Butterfly King. This cow was imported by Mr. W. D. Platt and was considered by him one of the best breeding cows he owned. She is now safe in calf to Anoka Sultan, one of the best sons of Whitehall Sultan. The breeder who is in the market for a richly-bred cow with calf at side and rebred to one of the best bulls to be found in any herd, will find a bargain in Imp. Nonpareil Dum-na-Glass. Imp. Missie 159th is a Marr Missie by Spicy Robin and is safe in calf to Anoka Sultan. This cow will fill the requirements of the breeder who wishes to add new blood to his herd. Bred to Anoka Sultan, winner of five first prizes this past season, this cow should produce something worthy of the show ring. Missie of Pine Grove 7th is a beautiful red heifer by Imp. Marquis of Zenda, one of the greatest breeding bulls on the American continent. This heifer has a very attractive head, very level lines, thick fleshed and low and wide, a show heifer in every respect. She is safe in calf to Anoka Sultan. A daughter of Imp. Banker, Bampton Crocus, is a very valuable cow of excellent Cruickshank breeding. Mr. Harding did not intend to put this cow into the sale, but wished to give those present an opportunity to secure cows with calves at side by the noted Whitehall Sultan. Bampton Crocus will calve before sale day to the service of Whitehall Sultan and will do so into any herd. Another daughter of Marquis of Zenda is found in Zoe of Pine Grove 6th. She belongs to the Cruickshank Clipper family and is a splendid thick-fleshed heifer of show-yard merit, very deep and smooth, with good, level lines, and bred to Anoka Sultan she should find a place in some good herd. Lily of Pine Grove 3d is a daughter of the Duthie-bred bull, Village Champion, one of the principal bulls in use in the noted herd of Messrs. W. C. Edwards & Co. This is without doubt one of the best yearling heifers that will go through a sale ring this year. She is safe in calf to Anoka Sultan and will make a noted show cow, and is one of the attractions of the sale. Pine Grove Mildred 11th is a beautiful, thick heifer and is safe in calf to Anoka Sultan. She has been a prize winner in strong classes and will please discriminating buyers. Charity Floss is a heifer of show-yard character. Her dam, Imp. Floss, was one of the best cows in the herd of Mr. W. B. Rigg. Her calves have always commanded good prices, Messrs. H. Cargill & Son, of Ontario, having sold a two-year-old heifer out of her at public sale for \$1,300. The sire of this heifer, Golden Charity Prince, is one of the best breeding bulls of the country, and this heifer is bred to Anoka Sultan. She will do well in any herd. Plainville Lassie is a daughter of Indian Wave, by Imp. Indian Chief. She is one of the attractions of the sale, being bred to Whitehall Sultan and due to calve before sale day. Her dam was one of the best breeding cows ever owned in Anoka herd and this cow is one of the massive, broad-backed sort which are always in demand. Another of the attractions of this sale is Imp. Princess Royal. She is one of the best individuals that has been imported to America. Not until the dispersion of the herd would the owner of this cow allow her to be sold. She is one of those large, smooth, short-

legged kind, thick fleshed and very stylish, and has a beautiful red heifer calf at foot by Imp. Royal Bruce, a very good sire of show cattle. The breeder who is looking for a show yearling will find what he wants in Pine Grove Clipper 11th. She was first-prize junior calf at Toronto last September and was considered one of the most promising things in the show. She belongs to the Cruickshank Clipper family, from which have come some of the most noted bulls of the breed. This heifer is worthy of close inspection. A good, useful helper of Scotch breeding is Nonpareil Maid. She was got by Lord Lovely and is bred to Whitehall Sultan. There are only a limited number of females in the sale bred to Whitehall Sultan and Nonpareil Maid represents one of the best Short-horn families, and is individually good enough to go into any herd. Another Nonpareil heifer bred to Whitehall Sultan is Nonpareil Queen, herself a good heifer and will make a valuable cow. Queen of Gerry and Riverside Queen are two very valuable heifers belonging to the Duchess of Gloster family. Queen of Gerry is bred to Red Sultan, one of the best sons of Whitehall Sultan the writer has seen, and Riverside Queen is in calf to Whitehall Sultan. These two heifers are among the attractions of the sale. In our next issue we will give further particulars regarding these cattle. We want to emphasize the fact that the bull consignment is the strongest ever sent into the sale ring from this herd. Mr. Harding has carefully selected the bulls and they represent some of the best he has ever owned. Full particulars regarding them will be given in our next issue. We urge our readers to write for illustrated catalog, as per the announcement on page 24 of this issue, kindly mentioning The Homestead, and plan to be present sale day.

#### LAST CALL FOR THE SIOUX CITY HEREFORD SALE.

The second annual sale of Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, and the Stanton Breeding Farm Company, of Madison, Neb., will be held at Sioux City, Iowa, on April 3d, and it promises to be the leading Hereford event in the Northwest. These two firms were never known to put their poor stuff in public sales, but on the other hand always send forth the best they have in their herds. They did it last year and they are doing the same this year. It is an offering that we do not hesitate to urge our readers to buy. At the head of these two herds are the most noted bulls of the breed, and the matrons in these same herds are the very best that money will buy, and are daughters of the most noted Hereford sires in America today. There is, therefore, a reason why these two well-known firms are consigning some great cattle to this sale. There will be twenty high-class bulls and twenty very choice heifers in the sale. These are the cream of these two herds. From the Stanton breeding herd comes the great young bull, Don Donald, by the great show and breeding bull, Beau Donald 7th. He is unquestionably the best young bull that will be sold in any sale this season. His dam is Duchess of Bedford 26th, a Wilton-Anxiety-bred cow, and a great breeder. This youngster is only twelve months old and will weigh 1,200 pounds. He is a half-brother to the great bull, Prairie Donald, junior champion at the American Royal and the International in 1903, and afterwards sold in the sale for \$1,500. This bull is even better than was Prairie Donald at the same age, and is a bull of decided herd-heading character. Several other good bulls will come from this same establishment and they are away beyond the average bulls sold in public sales. In females they are selling some good Beau Donald 7th, Climax and Rex Maximus heifers and they are in keeping with the best. One of the good ones they are offering is Donald Climax by Beau Donald 7th, dam by Climax, bred to Rex Maximus. She is very heavy and even from end to end, deep, wide and thick fleshed, a splendid heart girth, with lots of scale and substance. One of the very best things in their offering is a 1,600-pound cow got by Hobart, a half brother to Woods Principle, grand champion steer at the International live stock show, 1903. She is a grand good cow and would make an attraction in any herd. If good cattle will keep up the reputation of a herd, then the Stanton Breeding Farm Company are certainly entitled to a place in the front rank, and we want to say to our readers that a better lot has never been sold off the farm. Messrs. Edmonds, Shade & Co. are also selling their best, and contribute ten cows and heifers and ten young bulls. In every show ring the Shade-land herd has won its share of the premiums, and in every sale ring cattle from this herd have commanded attention of the buyers. Among their females is the well-known show heifer, Columbus Belle by Columbus 35th, and bred August 13th to the great bull, Sir Albany 9th. She is a winner in any company. They also offer two young show cows with calves at foot. One is Rachael Randolph by Imp. Randolph, with heifer calf at foot by Columbus 35th. The other is Columbus Lyrn, by Columbus 35th, with a bull calf at foot by Sir Albany 9th. There will also be several choice heifers bred to the \$6,000 Imp. Albany, one of the greatest show and breeding bulls of two countries, that recently has been put at the head of their herd. Some are bred to the grand old bull, Columbus 35th, considered the best living son of Columbus, also King Edward, sweepstakes bull Interstate Fair, 1906, the undefeated bull in class at South Dakota and Nebraska State Fairs, 1904, and Interstate Fair for four consecutive years, also Imp. Passport, the grand champion bull over all breeds and ages, South Dakota State Fair, 1904. Among their best young bulls is Shadeland King, first-prize bull in under year class at the Interstate Fair in 1906. His sire is the noted bull, King Edward, champion bull at the same fair. He is a bull with great promise, has plenty of scale and lots of finish, and no man will go wrong who buys him. Another good one in the offering is Oakland by Sir Albany 9th by Imp. Albany, and his dam is Delight 3d, second-prize heifer Interstate Fair, 1905-6. Oakland is a prospect for a yearling show bull for next year. Sir Admiral by Sir Albany 9th is another good prospect. His dam, Zephyr, is by Free Lance and is a full sister to the great show cow, Delight. Prince Edward is another of the good ones by King Edward and out of Columbus Locket, second dam Imp. Kenswick Locket. They are also offering three choice grandsons of Corrector, sired by Sir Hesiod

## INDIAN LANDS

### SECURING 10 YEAR 6% BONDS

Interest payable semi-annually. Principal and interest payable in gold.

The Indian Land-Bond Company has been organized for the purpose of buying lands and giving the investor the opportunity of getting a home in the Indian Territory without running any risk.

These lands are being bought by us with a knowledge as to title and value. We have been connected with this business since the allotting of these lands commenced, and are thoroughly acquainted with the situation and absolutely know what a good title is and how same can be had. Hence we have devised this plan to get you interested in this country.

We will sell you a \$500 bond that bears 6 per cent interest and is secured by 40 acres of good agricultural land. This land is deeded to a trustee who is a man of prominence in the commercial world and well versed in land titles and values. The deed is held by the trustee for ten years, or until you desire to take the land in lieu of the bond, or the company calls your bond in for redemption, in which case the company will pay a premium of 10 per cent in addition to the 6 per cent interest. You have the privilege of surrendering your bond at any time and having the land title transferred to yourself from the trustee, you having the right of selection from all the land in series A.

The greater portion of this land is in cultivation or will be put in cultivation and the rents derived therefrom will more than pay all taxes and interest and at the same time make the lands more valuable as a security proposition.

You are not limited as to the number of bonds you can hold. The more bonds you hold the more interest you draw and the larger the tract of land subject to your option.

If you want a foothold in the best state in the Union at the best figures for this class of lands, investigate this proposition.

These lands will surely double in value long before your bond matures.

## THE INDIAN LAND-BOND CO.

Referred to Atoka Nat. Bank, Atoka, I. T.

ATOKA, INDIAN TERRITORY.

## Last Chance to Buy Cheap Land.

Listen! Wouldn't you rather buy land at \$15 per acre that will produce crops that bring from \$50 to \$300 per acre per year than to pay \$100 per acre for land that will not produce crops worth more than \$15? We are selling land in the

### FAMOUS FALFURRIAS DISTRICT

#### In The Gulf Coast Country of Texas

**FALFURRIAS, TEXAS.**  
Shipped the earliest vegetables; Bermuda Onions, Watermelons and Cotton in the U. S. It is 1,000 miles nearer the consuming markets than California. The soils are a rich, sandy loam, alluvial deposits of some pre-historic water course, underlaid by red, sandy clay, with unusual capacity for holding moisture, and in itself, rich in plant food. Rainfall, The U. S. Weather Report states an average rainfall of 28 inches for the last 20 years. The last few years since 1880 have been cultivated, the rainfall has been 30 inches, sufficient to raise all crops, without irrigation. Artesian water, at 500 to 750 feet, either flowing wells of good capacity, or on higher lands rising to about 10 feet of surface, making it an ideal pumping plant through windmills or gasoline engines. Products of all kinds as Corn, Cotton, Forage, Alfalfa, Vegetables, have been raised successfully and profitably for years. Fruits, such as Oranges, Lemons, Olives, Dates, Grapes, Peaches and Pines are making rapid growth. The Climate is Semi-Arid, no excessive rainfall, no malaria. Dry air, cooled by constant gulf breezes; cool nights, no storms. Ideal climate, good for lung trouble, asthma and catarrh.

That is producing crops that pay \$50 to \$300 per acre each year, and there are no Crop Failures, and the land has doubled in value in twelve months. New towns and railroads are being built, the country is developing. If you buy now you get the benefit of low prices, if you wait the prices will be beyond your reach. Don't wait and then pay a higher price for land. This is an opportunity for you and your family. Land is selling now at

### \$15 PER ACRE.

## The CANADIAN West is The Best WEST

THE testimony of tens of thousands during the past year is that the Canadian West is the best West. Year by year the agricultural returns have increased in volume and value and still the Canadian Government offers 160 acres free to every bona fide settler.

### GREAT ADVANTAGES

The phenomenal increase in railway mileage—main lines and branches—has put almost every portion of the country within easy reach of churches, schools, markets, cheap fuel and every modern convenience. The ninety million bushels of wheat crop of this year means \$10,000,000 to the farmers of Western Canada, apart from the results of other grains as well as from cattle.

For literature and information address Superintendent of Immigration, Ottawa, Canada,

or the authorized Canadian Government Agent, W. V. Bennett, 501 N. Y. Life Bldg., Omaha, Neb. E. T. Holmes, 815 Jackson St., St. Paul, Minn.

## Free OUR ILLUSTRATED PAMPHLET OF NORTH DAKOTA...

Containing bonafide letters from actual settlers also statement from commissioner of agriculture—all about the new Rulandis, etc.

All west bound trains are crowded with prospective buyers and actual settlers.

### GO NOW

Excursion rates every Tuesday during March and April.

## FIELD NOTES.

Mr. A. F. Hagar, of Avoca, Iowa, is offering Hereford bulls for sale.

Mr. Carl Hansen, of Herman, Neb., has a few good Duroc Jersey boars for sale.

Mr. N. A. Lind, of Rolfe, Iowa, is offering some excellent young Scotch bulls for sale.

Mr. G. C. Harrison, of Blencoe, Iowa, is offering a few good Percheron stallions for sale.

Ten head of Junior Jim gilts are offered for sale by Mr. Austin Renshaw, of Blair, Neb.

Polled Durham bulls are offered for sale by Messrs. James Wilson & Son, of Avoca, Iowa.

Proud Advance and Orion boars are offered for sale by Mr. F. E. Garrett, of Lohrville, Iowa.

Registered Shropshire rams and ewes are offered for sale by Mr. Willard Miller, of Anita, Iowa.

Three nice young Scotch bulls are offered for sale by Messrs. C. W. Dows & Son, of Harlan, Iowa.

The Ardmore Stock Company, of Holstein, Iowa, have some good Scotch and Scotch-topped Short-horn bulls for sale.

An excellent three-year-old Clydesdale stallion is offered for sale by Mr. Luban Harrison, of Prescott, Iowa. He is a bargain if taken soon.

Mr. Geo. Mutch, of Elroy, Wis., has been a breeder of Short-horns for several years and now has some good Short-horn bulls which he is offering for sale at very low prices in his advertisement on this page of this issue of The Homestead.

Mr. J. W. Briggs, of Alden, Iowa, breeder of Duroc Jersey swine, advises us to discontinue his bred sow advertisement, as he is all sold out and cannot keep the inquiries answered. His new advertisement appears on page 30 of this issue.

Three splendid Clydesdale stallions are offered for sale by Mr. A. Bailcy, of Anita, Iowa. These are first-class horses and can be bought for less money than at any of the large importing firms. If you want a No. 1 Clyde stallion, go and see these horses.

Hereafter when you conduct business with Messrs. Chandler Bros., the noted Shropshire breeding and importing firm of southern Iowa, bear in mind that they now have headquarters at Chariton, Lucas county, Iowa, having moved there from Kellerton, Iowa. They are now in a fine location, with excellent facilities for shipping and are prepared better than ever to satisfy the wants

of their trade. When writing them, kindly remember the change of address.

Short-horn bulls and Duroc Jersey sows are offered for sale by Mr. Jas. T. Dollison, of Sac City, Iowa.

Mr. U. G. Davidson, of Manson, Iowa, has a few good Crimson Wonder 1 Am gilts for sale, and the prices on these are right.

Mr. Ernest Funke, of Greenfield, Iowa, offers four young Scotch bulls for sale. Two are Victorias, one a Miss Ramsden and one an Acanthus. He is pricing these right.

Suffolk fillies are offered for sale by Messrs. Peter Hopley & Son, of Lewis, Iowa. They also have a grand lot of Percheron, Shire, Suffolk, Belgian and German coach stallions for sale.

The Short-horn sale of Mr. A. B. Clark, at Wayne, Neb., is booked for June 19th, at which time he will sell forty head of choice cows, heifers and young hulls. He will put in one of the best lots of bulls in this sale that has ever come from his herd.

Percherons and French draft stallions and mares and Kentucky and Missouri jacks are offered for sale by Mr. C. T. Gollehon, of Blair, Neb. He has some of the best jacks in Nebraska and is making a great reduction in price, when you consider what the same quality will cost elsewhere.

A representative of The Homestead recently called on Mr. W. J. Davis, of Blockton, Iowa. Mr. Davis has a number of good jacks and jennets that will do any one of our readers good who is desirous of securing a good animal. Many of the jacks and jennets are tried and are right in every way; a good bunch throughout.

Messrs. Cookson Bros., of Downling, Iowa, are offering a superior bunch of Scotch Short-horn bulls sired by Young Commodore, the grandest Scotch Short-horn bull they have ever used. An opportunity is offered by Messrs. Cookson Bros. for someone to get a choice herd header of the richest Scotch breeding known to the breed.

Mr. H. S. Allen, of Russell, Iowa, is offering Duroc Jersey fall boars for sale, sired by two of the most noted boars living, Crimson Wonder Again and Top Notcher Again. If in need of a boar containing the bluest blood known to the breed and having size and quality, the reader had better write about these. They will be priced worth the money. See advertisement on this page.

A splendid lot of red Cruickshank Short-horn bulls are advertised on page 29 by Messrs. S. H. Thompson's Sons, of Iowa City, Iowa. This is one of the oldest firms in the state of Iowa breeding high-class Scotch Short-horns. The bulls referred to have been recently inspected by one of our representatives, who pronounces them a good lot and worthy of finding homes and doing service in good herds of Scotch cattle.

Messrs. Allen Bros., of New Sharon, Iowa, have a half-dozen splendid strong-boned, vigorous Aberdeen Angus hulls ready for service, among which is a beautifully-bred Queen Mother that should be doing service in a good Angus herd. This firm will be pleased to make prices on the above bulls which will surprise Homestead readers, considering the quality of the bulls offered. We take pleasure in recommending this firm, whose advertisement will be found on page 28.

Mr. W. H. Jones, breeder of Poland China hogs, of Clemons, Iowa, writes: "I am about sold out of bred gilts, only have two to spare and they are good ones; will weigh about 300 pounds. We are now offering four nice fall boars of August and September farrow that will weigh around 140 pounds and are sired by Standard Perfection and Baraboo, and they are the tops of our fall boars and have the making of fine, large hogs that will do for service now. They have size, not fat, and we are pricing them very low; \$20 will buy them if taken soon."

Mr. C. F. Shafer, the well-known Poland China and Short-horn breeder, of Wellman, Iowa, writes that he has been having a big trade, having shipped stock into thirty-four states and one territory. Recent sales: "Male and sow pig to Mr. M. S. Milne, Leesburg, Ohio; sow pig to Mr. O. M. Spitzer, Grafton, Ohio; sow pig to Mr. W. E. Phillips, Ellendale, N. D.; three sow pigs to Mr. W. A. Mowry, Amsden, Ohio; male pig to Mr. Thos. A. Starrett, Dow City, Iowa; sow pig to Mr. Wm. Flaud, Forest, Ohio; one male and two sow pigs to Mr. Geo. E. Stupfel, Mazomanie, Wis.; male pig to Mr. Clellan A. Finley, Homer, Mich.; two gilts to Mr. H. O. Ward, Lamont, Iowa; two male pigs to Mr. T. C. Faucett, Sanford, Colo.; three sow pigs and one male to Mr. James Smith, Eureka, Wyoming; male pig to Mr. A. Lawson, King City, Mo. Am offering a nice lot of fall pigs at farmers' prices to make room for spring crop. My pigs have nice, black coats of hair, have good length, broad, wide backs, heavy bone with fine head, ear and nose. They are sired by G's Perfection Jr. and Black Chief. If you are looking for a bargain write me, as I can please you. In Short-horns I have a choice lot of low-down,

thick-fleshed, blocky bulls that I am selling at very low prices. Also a select lot of young heifers, all reds."

Mrs. George Tutt, of Marathon, Iowa, in furnishing copy for her advertisement offering Black Langshaan cockerels and eggs for sale, that appears on page 15, writes: "I have been having very good results from my advertisement in The Homestead; have shipped eggs to California, Illinois and all parts of Iowa this season. I have some good cockerels yet for sale at a very reasonable price."

Regarding the stock that will be consigned by the Sugar Grove Farm to the joint Short-horn sale at Savannah, Mo., April 12th, Mr. J. W. Zimmerman, proprietor, writes: "My part consists of good young stuff, ten head in all. The oldest will be three years this spring, and the others are coming two and one year. Their dams are such cows as Fancy Sharon, Goodness of Durham Home, and Verhena 3d, got by Victor 120646. The offering is sired by Pilot (204620) got by Violet's Galahad (139816) and also by Victor (128234) by Combination 2d (114815)." Write for catalog to Mr. R. A. Coffey, Mgr., Savannah, Mo.

Mr. M. V. Leeper, of Redfield, Iowa, in furnishing copy for his advertisement, found on page 15 of The Homestead, writes: "The stock which I am offering includes my breeding pens, which contain all my prize-winning hens and pullets. This last season at Lohrville, Iowa, November 27th to December 1st, with Mr. Warnock as judge, I won first, second, third, fourth and fifth on cockerel; first, second, third and fourth on pullet, first on hen and first on pen. I made this winning on twelve birds in a class of 113 Barred Rocks and against some of the best breeders in north central Iowa. In Bronze turkeys I certainly can please those who wish heavy weight, high-scoring birds. The tom that heads my flock this

# HARDING'S SALE SCOTCH Short-horns

WAUKESHA, WIS.,  
..... APRIL 10, 1907 .....

10 young bulls in sale that are strictly breeders' bulls, combining showyard quality and rich breeding.

5 Imported cows of Cruickshank and Marr families.

20 Scotch cows and heifers, all good ones, 5 with heifer calves at foot and others due before sale.

Also a few bred "straight, crooked and crosswise," Scotch blood predominating.

Nearly all the females in calf to my great bulls, Whitehall Sultan, Whitehall King, Anoka Sultan and Red Sultan. Attend this sale if you are interested in the best class of Short-horns. I am selling show cattle and the blood that is producing a majority of the show cattle. Illustrated catalog on application.

On main line C. B. & Q. R. R.

## PERCHERONS FOR SALE.

IMPORTED and home bred stallions and mares one to seven years old; several match teams of mares. All stock registered in Percheron Society of America record. New importation arrived Oct. 10. Masdam & Wheeler, Fairfield, Iowa.

BACH GROVE STOCK FARM.  
F. M. ZENOR, WOOLSTOCK, IOWA

— Breeder of Short-Horn Cattle. —  
Families represented: Princess Royal, Duchess of Gloster, Mysie, Roan Bess, Lavender, Orange Lass, Nellie Bly's and Pure Bates Cattle. Phone No. 804.

## HELLO! MR. BREEDER

COME and see our Short-horn bull calves at \$50 a piece. You'll take one home sure. Address, GEO. MUTCH, - - - ELROY, WIS.

season weighs forty-five pounds and scored 96 points; pullets and hens weigh seventeen to twenty-four pounds, none of which will score under 95 points."

Eggs from pure-bred White Wyandottes are offered for sale by the Forest Home Poultry Farm, Box 253H, Audubon, Iowa. They also have White Holland turkey and Toulouse geese eggs for sale. You can rely on this firm to do as they say they will. They have the stock and it is all right.

Messrs. Whisler Bros., in continuing their advertisement found on page 15 of The Homestead, write: "We have only five Mammoth Bronze toms left and we will cicee them out at a bargain. They are all scored, scoring 95½, 95, 95¼, 95¾, 94¾, and weigh from twenty-five to thirty pounds. They have large bone and good markings."

Below we print a letter from a well-known stallion importing establishment in Illinois, Messrs. Taylor & Jones, of Williamsville. It indicates something of the popularity of the horses sold by this firm: "We are pleased to say our new importation of horses is doing fine, every horse being on his feed. Mr. T. J. Cummins, of Rose Hill, Ill., the first buyer to come after their arrival, got a show horse in Ware's Warrior, a great winner in England. Mr. J. A. Cowdery, of Lyons, Kan., got a grand good one out of our new importation. This is the fourth stallion Mr. Cowdery has bought of us in six years. He bred 700 mares last year, so it takes a good one to suit him. Mr. Curtis C. Neal, of Allerton, Ill., bought an imported Shire of us last December and in a short time had his hook full for the season at \$25, so he came back last Monday and bought an American-bred Percheron to stand with the Shire. Mr. M. D. Shull, of

## COMPLETELY SOLD OUT BY HOMESTEAD ADVERTISEMENT.

ALL INQUIRIES BUT TWO CAME FROM HOMESTEAD PUBLICITY—  
STOPS HIS INEFFECTIVE MEDIUMS AND WILL REMAIN WITH  
THIS PAPER PERMANENTLY.

Mr. A. C. Lanham, the well known breeder of Poland China swine at Battle Creek, Iowa, writes:

"I am completely sold out of bred sows. I have shipped them all over Iowa and into several of the adjoining states, every animal either going into a pure bred herd or for the foundation of a herd. We had our advertisement in two other papers, but The Homestead did the selling. We received but one inquiry each from the others, so had our advertisement stopped in them. As long as we raise pure bred hogs we shall do business with the old reliable Homestead."

## Public Sale of

**SHORT-HORN  
CATTLE**

TO BE SOLD ON

**Thursday, April 11, 1907,**

At the Fair Ground at

**NEVADA, : : IOWA****40****The undersigned will sell on April 11th,  
40 head well selected Short-horn Cattle****40****:: AS FOLLOWS ::**

E. R. Silliman, of Colo, Iowa, sells 11 head of females, 7 being the Oxford Duchess family. A. J. Graves & Son sell 11 head, 7 cows and 4 bulls. C. E. Klump sells 10 head, 7 cows and 3 bulls. Wilkening & Shaw sell 4 bulls. S. S. Kooser sells one cow and calf, and Patrick Mulcahy sells 2 bulls. This will undoubtedly be an opportunity to buy some good Short-horn cattle cheap. All of the above breeders are residents of Marshall and Story counties and have placed these cattle in the hands of Mr. Silliman, of Colo, Iowa, who will act as sale manager. Al P. Mason, auctioneer. In writing E. R. Silliman for catalogs, kindly mention The Homestead.

Beason, Ill., was here Monday and bought an excellent American-bred Shire."

Mr. M. G. Arnold, breeder of Poland China swine, of Strawberry Point, Iowa, whose advertisement appears on page 30, writes: "Our herd is in fine condition and sows are doing well farrowing. Sales of bred sows continue very good, giving good satisfaction and getting many letters of recommendation. We still have a few extra good sows bred to our great Justice and On Up for sale; will make low price to move them, for we need the room. I will now offer for sale our good herd boar, Justice by Corrector and out of U. S. Lady, she winning first at Illinois and Iowa State Fairs. Justice is a large, smooth hog and a great breeder. He is good enough to win and is the sire of sure winners. We have used him extensively for two years and cannot use him longer to advantage. He is of good disposition and guaranteed all right in every way. He has perfect head and ear, good back and hams, good bone and feet, extra fine smooth coat. Will price him for less than one-half his worth."

**LARGE, IMPROVED ENGLISH YORKSHIRES.**

Anyone wanting large, improved English Yorkshire sows or boars should write Mr. Fred Rabeller, of Leigh, Neb. He has one of the best herds in this country and he can sell you choice sows or boars at very reasonable terms.

**SHORT-HORN BULLS FOR SALE.**

Mr. Alec Campbell, of Botna, Iowa, is one of the well-known Short-horn breeders of Shelby county who has built up an excellent herd of cattle and each year has something good to sell. At the head of his herd is the splendid Scotch bull, Nonpareil Boon, a son of the noted bull, Imp. Nonpareil Victor. The dam of Nonpareil Boon was Viola May, as good a cow as was ever in the state of Iowa. This bull stands today among the few foremost bulls in the state. He is better today than ever before, and he is certainly doing good work in the Campbell herd. He will now weigh over a ton and is a solid red in color. He is a smooth, even bull from end to end. His head and horn are all that could be desired, with a wide open countenance and strong bull character. Behind it all is a body that all breeders are seeking. With a smooth shoulder, a fullness of heart girth, a nice level back and a good spring of rib, he has a right to be classed among the best bulls in the state. He is the sire of most of the young things on the farm, and they do not impair his reputation when you look them over. Just now Mr. Campbell has a few good young bulls for sale, two of which are straight Scotch. One of these

is a Duchess of Gloster and the other is a Secret. He has a splendid Scotch-topped Arabella, sired by Nonpareil Boon, that is also worth looking at. Another he calls Roan Marcus, by a bull called Gladstone and out of a daughter of Imp. True Briton, is also one of the good young bulls that he offers for sale. It will pay anyone wanting Short-horn bulls to go and see Mr. Campbell and at the same time take a look at his herd.

**LAST CALL FOR JAS. A. & S. E. NIBLO'S HORSE SALE.**

On next Tuesday, April 2d, Messrs. Jas. A. & S. E. Niblo, of Milan, Mo., will sell their entire stud of Percheron and Shire stallions and mares. Messrs. Niblo are breeders and as they are leaving the farm they must sell their horses. The man hunting a high-class stallion or brood mares should not overlook this opportunity. See page 31 for their last announcement and arrange to be at Milan on Tuesday if wanting stock of this sort. The sale will be held in Milan. Col. Bob Harriman will do the selling.

**PERCHERON MARES FOR SALE.**

Messrs. L. H. Humbert & Son, of Corn- ing, Iowa, write as follows: "We have done a good horse business so far this year, and still have a few choice stallions and Percheron mares for sale, which we will price right. We have sold horses to go to Idaho, Montana, Wyoming and Nebraska, and they have given the best of satisfaction. We have just sold Mr. Jesse Golder, of Scribner, Neb., a splendid, imported, coming three-year-old stallion. This makes three head we have sold him in four years. This last colt will make a 2,200 to 2,300-pound horse. Just say to Homestead readers that we have some grand good stallions and mares left, and now is the time to buy. We would like to have them come and see our horses."

**THE MINNEAPOLIS, MINN., SHORT-HORN SALE.**

Mr. H. F. Brown, proprietor of the Browndale herd of Scotch Short-horns, at Minneapolis, Minn., announces on this page his sale of grand Scotch-bred males and females to take place in that city April 9th. Sale to commence at one o'clock and no postponement on account of weather. This is the twenty-eighth annual sale held from this herd and it will be safe to say it will be one of the best. The offering is healthy in every way and in splendid shape to take into any herd. Mr. Brown has spared no amount of printer's and artist's skill to put forth the merits of the offering in a way that should appeal to conservative people. Over a score of half-page illustrations taken from actual

**H. F. BROWN, - MINNEAPOLIS, MINN.**  
**COLS. WOODS, BELLOWS AND WALKER, AUCTIONEERS.**

F. W. Harding sells at Waukesha, Wis., April 10th and parties can attend both sales.

**BRIGADIER NO. 109729**

**The Double Anxiety 4th, First Prize Winner at the American Royal.**

At the W. G. Swinney dispersion sale of the famous Clover Leaf Herefords, at Kansas City, Mo., stockyards sale pavilion, next Thursday, April 4th, a splendid lot of sons and daughters of Brigadier will go on the block, also a number of daughters of Beau Brummel and other fashionably-bred females in calf to him. This sale is given in connection with the joint breeders' sale, April 2d to 4th, when 175 head of high-class Hereford and Short-horn cattle will be sold to the highest bidders.

photographs embellish the pages and present in a grand fashion the individual merit of the numbers contained therein. Nine grand cows with calves at foot comprise the most of the offering of mature females. Their breeding should suit the most aristocratic. They include Sinnissippi Rose by Ceremonious Archer, with an October bull calf sired by Gladstone 239313, and Imp. Rosemary 2d got by Beau Ideal (138594) with a white bull calf dropped in January and got by Lord Butterfly 206975. Another, of show type, is Lady Winnifred 3d, tracing to Imp. Lily. She has a young roan bull calf at foot sired by Whitehall Count 209775, and Bessie of Glencoe, a straight Scotch, with a heifer calf at foot to the service of Prize Archer 270695. These few are selected at random. They are not all the best. There will be some cows well along in calf to last fall's service by the herd bull, Young Nominee 168433, got by Nominee 131262. Most of the sale offering is bred to this grand bull, which from the standpoint of breeding and merit stands in high-class company. The heifers are well sired and by such bulls as Whitehall Archer, Imp. Pride of Scotland, Golden Scotchman and others. The bulls are a sappy, blocky bunch from all appearances and many are got by the above mentioned bulls. They are all worthy of a good place and they have the breeding and individual superiority to warrant high hopes for their future. Special inducements are offered to

## Last Call for the Clover Leaf Hereford Dispersion.

On next Thursday, April 4th, at the fine stock sale pavilion at Kansas City, Mo., there will be held the greatest sale of Herefords that has been held for some time. It is the dispersion of the Clover Leaf herd, owned by Mr. W. G. Swinney, of Bois D'Arc, Mo. As we have said before in these columns, the Clover Leaf herd is undoubtedly one of the greatest herds in the country, both from the standpoint of individual excellence and breeding. More daughters and granddaughters of that great sire, Beau Brummel, have not in some time been offered at any price, and another such an opportunity will not soon be found, as the men who own daughters of Beau Brummel are not pricing them. The five that go in the Clover Leaf dispersion are all good and each one is an attraction. In addition to these Beau Brummel cows there will be a great lot got by Brigadier, one of the best sons of Lamplighter and out of an Anxiety cow. Of the twenty-six cows that sell nineteen have calves at foot and all but one or two are rebred. These are mostly bred to Brigadier. The others are bred to Dale Jr., a bull that has made such a good cross on the get of Brigadier. A better opportunity to buy good breeding stock that is bred right and is individually right will not soon be found. It is only at dispersion sales that such stock as is found in the Clover Leaf herd is sold, and now is the time to buy, as these good cattle are just on the verge of a raise that will show the man who has them a nice profit. The bull buyer should not overlook this opportunity, as Mr. Swinney sells eighteen head of as good ones as are often found. They weigh from 1,200 to 1,500 pounds and all but Dale Jr., the herd bull, are yearlings. One, Recorder, a yearling son of Dale Jr. and out of one of the Beau Brummel cows, is a herd header proposition such as is not found every day. In fact Mr. Swinney thinks him the best bull ever raised at the Clover Leaf Farm. Dale Jr. has proven a great sire and some man hunting a proven herd bull should look to him. In conclusion we want to say to every man who is in the market for good Herefords that are bred along such lines that they produce and reproduce, to be on hand at Kansas City, April 4th, as you will not be disappointed. See this page for the last announcement of the Clover Leaf dispersion and arrange to be there.

## Short-horns and Herefords at Kansas City.

Sale Manager D. R. Mills, of Des Moines, Iowa, sends in the last call for the great Hereford and Short-horn sales to be held at the stock yards, Kansas City, Mo., April 2d and 3d, and to be followed April 4th by the dispersion sale of the famous Clover-leaf Herefords, owned by Mr. W. G. Swinney, of Bois D'Arc, Mo. The Short-horns will be sold April 2d, the principal consignors being Messrs. David Jay & Son, Blakesburg, Iowa; C. B. Claypool, Marshall, Ill.; Jason Kinney & Son, Liberty Bell herd, Hamilton, Mo.; Jno. Regier, Whitewater, Kan.; W. A. McMehe, Walnut Grove, Mo.; R. J. Conneway, Elk City, Kan., and others desiring to join. There is yet time to enter a few if communication is at once established with Mr. D. R. Mills, of Des Moines, Iowa, or Union Stock Yards, Kansas City, Mo., after March 29th.

## Herefords.

Following the Short-horn sale of April 2d at the Kansas City Stock Yards, Mr. D. R. Mills, sale manager, of Des Moines, Iowa, will hold an attractive Hereford sale in the same place. The principal consignors are Messrs. Schain & Berg, Atlantic, Iowa; Chas. H. Hartung, Van Horne, Iowa; Clarence Dean, Weston, Mo.; Chas. Feagan, Charleston, Ill.; G. V. Buchanan, Sedalia, Mo.; Holman & Likens, Everton, Mo.; H. L. Libbey, La Plata, Mo., and others. Buyers can arrange to attend this sale and remain over for the Swinney dispersion of the Clover Leaf Herefords in the same place the following day. These sales will take place at the Kansas City Stock Yards and will be the last great sales of the season at Kansas City. For catalogs address Mr. D. R. Mills, at Des Moines, Iowa, up to March 29th, and thereafter in care of the stock yards at Kansas City, Mo. Look up his advertisement on this page.

A Prominent Short-horn Sale May 22d.

In our date claim column will be found

## DeClow's Got 'em

**The Largest and Best  
JACKS  
IN THE WORLD**

 And the largest number  
to select from and at the  
lowest prices.

Please write for photographs of stock.

**CEDAR RAPIDS JACK FARM,  
Cedar Rapids, Iowa**

the name of Mr. R. H. Hadley, of New Providence, Iowa, who has claimed May 22d for the sale of some forty-five Short-horn cattle at his farm adjoining the town of New Providence. We wish to state that Mr. Hadley has associated with him several of his fellow breeders in the community who are contributing from six down to two head each, while Mr. Hadley himself is selling twenty-five head of most excellent Short-horn cattle. With no disposition to enter into detail at this time, we would like to mention the fact that if there is anyone in need of a good Scotch herd bull that has been tried and proven, Mr. Hadley will offer such a bull in his beautiful roan bull, Golfman 2d 247994. This Scotch bull was bred by Mr. Stutzman, of New Sharon, Iowa. He is, of course, sired by the greatest breeding bull in Mahaska county, old Golfman, and is out of Melba 2d, she by Fearless Archer, her dam being Imp. Melba. Mr. Hadley is keeping some of the get of this bull and has been placed under the necessity of securing another Scotch bull to breed these heifers to, and after this sale the herd will be so diminished that the one bull will answer every purpose for the limited number of Short-horns left. In due time particulars relative to this offering will be found in the columns of The Homestead. Mr. Hadley is a thorough gentleman and is conducting a small but practical herd of the useful type of Short-horn cattle. We take this method of introducing him to Homestead readers preparatory to the forthcoming sale.

**Hendershot Will Make Special Prices on  
Good Jacks and Stallions.**

Mr. O. P. Hendershot, of Hebron, Neb., wishes to say to those interested in a good Kentucky-bred jack or a good ton stallion that he has the best offering on hand at present that he has ever owned. His recent public sale was a decided success and those sold went at very satisfactory prices. He still has some extra good individuals left and will be glad to pay any prospective buyer's way to Hebron and return if they are not just as he represents them. He has on hand at present about twenty good jacks that he will price worth the money if taken at once. His present bunch of Percheron stallions are of the ton, wide-as-a-wagon kind, good movers and are as sound as a silver dollar. The offering is of an age that is profitable to buy for the farmer who wants to own his own horse or for the company. We can cheerfully recommend anyone who is in the market for a good jack or stallion to call at Hebron and look this bunch of good ones over, as we feel that Mr. Hendershot can fill the bill for you as good as anyone in this business.

**Poland China Brood Sows at Private  
Sale.**

We wish to call the attention of those interested in good Poland China sows to the advertisement of Mr. E. H. Andrews, of Kearney, Neb. He is offering about forty head of richly-bred sows of the large type at reasonable prices and those interested should get in touch with Mr. Andrews at once. He has several daughters of the great Chief Perfection 2d, and others are by Top Chief, Perfection Grand, Ideal Tecumseh, Chief Tecumseh 3d and other noted boars. These sows are mostly mated with Immense 113111, a prize winner at the Ohio State Fair, and is a hog with much style and finish. Others are bred to his great breeding boar, Perfection Grand 33638. If you are looking for something in this line you might do well by writing Mr. Andrews and find out what he has to offer.

**THE ENTIRE HERD OF**

## Red Polled Cattle

**Owned by W. H. Smith, Chillicothe, Ohio.**

will be sold at public auction at the

**Chicago Union Stock  
Yards, April 4, 1907**

This herd won fourteen prizes at the Chicago International in 1904, including three championships. It contains some of the best females of the breed in this country. Many high records at the fair have been made by its members. Here is a rich opportunity to secure some choice individuals of this breed. Write for catalog to

**GEO. H. SMITH  
CHILLICOTHE, OHIO.**
**CAREY M. JONES, Auct. -:- GEO. B. BUCK, Mgr.**

The Borden Stock Farm Dispersion of Red Polled cattle the day before at the same place.

## PUBLIC SALE OF ABERDEEN-ANGUS 35 HEAD 15 BULLS AND 20 FEMALES

To be held at the residence of S. G. Smith, 2 1/2 miles southeast of Shannon City, Iowa, and 3 1/2 miles northwest of Tingley

**Wednesday, April 3, 1907, at 1:00 O'Clock**

In making this public sale of Angus cattle, we do so with the full assurance that the breeding of the stock is all right and that the quality and merit of the offering will be beyond question. Mr. Smith on his part is closing out on account of his wife's health.

The cattle will all be sold in just nice stock condition, in their every day clothes. We are offering good typical animals chosen from the following families—Trojan Erica, Prides, Minnas, Maggies, Titanias, Belle and Parrothens.

Write T. A. Stevenson for catalog, and come to the sale, where you can buy good cattle at your own price.

Capt. W. W. Stewart, Auct. T. A. Stevenson, S. G. Smith, Shannon City, Iowa

## 15 OCTOBER DUROC BOARS 15

**Prices Range From \$20.00 to \$40.00.**

Write if you mean business.

**COMER & GILLILAND,**
**CARLINVILLE, ILL.**

### The Pike County Jack Farm.

Just 287 miles west of Chicago 202 miles east of Kansas City, ninety-five miles north of St. Louis, thirty-three miles south of Hannibal and ninety-two miles south of Keokuk, Iowa, is the town of Bowling Green, Mo., a nice, thrifty town of 2,500 population. For a quarter of a century the town of Bowling Green has been kept prominently before the jack and mule men of every country on the face of the globe where the mule is raised, through the efforts of just one man, and that man is Col. Luke M. Emerson, of Bowling Green, Mo. Colonel Emerson stands absolutely in a class by himself. All that he is and all that he has are the results of his own efforts. He was born in Pike county, Missouri, of which Bowling Green is the county seat, and from his boyhood days he has shown a degree of independence such as is found in few. At a very early age he engaged in business on his own account. His first attention was to the mule, then to the jack and when practically only a boy he made his first importation of jacks from Spain. It is said that upwards of 3,000 head have been imported by Colonel Emerson. Some time along about the year 1878 Colonel Emerson bought his present Pike County Jack Farm, which is located just four miles south of Bowling Green. A fine pike road—for which this county is noted—leads from the town past Colonel Emerson's home. Just before reaching the farm the visitor passes through the village called "Jack Town," a village that was founded by Colonel Emerson, that he might be able to buy the necessities of life without going to the town of Bowling Green, four miles away. As the visitor passes through "Jack Town" he will see just beyond five large barns, a neat and comfortable house, all surrounded by large trees, and this is the famous Pike County Jack Farm, where the Mammoth jack is given full sway. Perhaps more jacks and mules have been owned here at various times than have ever been owned at one farm. Colonel Emerson has sold jacks to every state and to every country where the mule is raised. He has visited every part of the globe where jacks thrive in hunt of the jack. He even went so far as to establish a jack farm in South Africa and shipped large numbers there, as well as furnishing a great number of mules for the Boer war. This was practically Colonel Emerson's last venture abroad and since then he has devoted his time to handling the Mammoth jack in the United States, selling to every state in the union, to Mexico, Cuba and South America. He has now on hand about seventy-five head of these great big Mammoth jacks and a number of jennets. The jacks run from yearlings up and stand from fourteen and one-half to sixteen hands high. He has yearlings that measure fifteen and one-half and have plenty of bone. Colonel Emerson is a man who takes pleasure in showing prospective customers his jacks and whether you buy or not you will be treated to the best the country affords. He does not do things by halves and anything he attempts he believes in pushing to the limit. He is a man of few words, but these few words speak volumes. Few men know the jack as Colonel Emerson and if you spend a day at his Pike County Jack Farm you can learn much. He did think of holding a public sale, but as his business interests will not allow of his taking the time necessary to prepare and make arrangements for same, he has given up the sale and will sell at private treaty. In his quarter-page advertisement on this page he invites all who are in the market for jacks to visit the Pike County Jack Farm.

### Last Call Daviess County Short-horn Breeders' Sale.

The last advertisement of the Daviess county Short-horns breeders' sale, to be held at Gallatin, Mo., on Friday, April 5th, will be found on page 25. The man who expects to buy Short-horns in the near future should not delay and this sale will be one in which the buyer can get stock that will make him money. Mr. C. J. Feurt, of Pattonsburg, Mo., disperses his entire herd and it is at these dispersion sales that buyers get a chance at the best. Mr. Feurt sells his cattle in order that he and his father may settle their partnership in the herd. Some Scotch cows will be found in the offering, as well as a string of good, reliable Scotch-topped things. Mr. R. E. Maupin, of Pattonsburg, Mo., sells a Scotch bull of the herd header sort. See advertisement for breeding of this bull. Messrs. J. V. and Geo. Goodbar, of Gallatin, Mo., sell two bulls and two cows. The bulls are both yearlings and good sappy fellows ready for service. Mr. Chas. Smiley, of Gallatin, Mo., sells a pair of bulls, one a four-year-old, the other a yearling. The bull consigned by Mr. Maupin will bear inspection and his pedigree is absolutely good. Some man hunting a herd bull should look to him. Mr. Maupin also sells two young heifers, both good and the kind that are money makers. We had hoped to have a catalog of the sale by now in order to give more of the breeding. Those wanting to buy Short-horns should write at once to Mr. R. E. Maupin, of Pattonsburg, Mo., for a catalog and arrange to attend the sale. Gallatin is on the main line of the Rock Island and on the Omaha-St. Louis line of the Wabash.

### Bach Grove Short-horns.

The Homestead is pleased to introduce to its readers a new advertiser in this week's issue. We refer to Mr. F. M. Zenor, of Woolstock, Iowa. While Mr. Zenor is a new advertiser, he is by no means new in the Short-horn business, for he has gathered around him and is breeding a choice class of Short-horn cattle, both Scotch and Scotch-topped American sorts. To show the good judgment of Mr. Zenor in his breeding operations, we would direct attention to the splendid Scotch herd bull at the head of his herd. We refer to the beautiful roan bull, New Year's Day 192962. This is a Princess Royal bull sired by Duke of Oakland 2d, and is to our mind the best Short-horn bull ever bred at Bluff View by Mr. F. A. Edwards. New Year's Day is a large, massive, thick-fleshed bull, a bull built on a larger scale than Duke of Oakland 2d, yet possessed of that same breezy looking head that gained for that old bull so many admirers. The dam of New Year's Day was Princess Mary by Minatour. Her dam was Princess Ontario

Experimental Farm by Field Marshall 64894 and she out of Princess Royal 8th by Ventriquoist. Thus it will be seen that from the standpoint of Scotch breeding, New Year's Day is without a peer, nor do his good qualities stop when his great individual merit is proclaimed. Above all he is a splendid breeder and is siring a superior lot of calves. Mr. Zenor has eighteen Scotch females at the present time of the following families: Mysie, Princess Royal, Duchess of Gloster, Roan Bess, Mary Ann of Lancaster, Athene, Lavender, etc. Aside from the straight Scotch are a choice lot of the famous Blush Nellie Blys and other pure Bates cattle. It will be a pleasure to Mr. Zenor to show his cattle, not only to prospective purchasers, but to anyone who loves the red, white and roan. We are pleased to note that in Mr. Zenor's breeding operations he is broad enough to ignore fads. The color craze has never seized him. He believes in producing the very best Short-horns possible, and is willing to accept them in either of the three standard colors, red, white or roan. Good cattle first, with color as a secondary matter, is the watchword at Bach Grove. At the present writing Mr. Zenor has not a great lot of cattle to offer the public. A few bulls and possibly a half dozen females is all he cares to spare at the present time. It is his aim to make a public sale within the next year or such a matter, at which time he hopes that the lovers of Short-horn cattle throughout the middle West will be in a position to appreciate his efforts and his offering at that time. Mr. Zenor has one of the best and most commodious cattle barns in Iowa, which we hope, at some future time, to illustrate to our 100,000 readers so that they may get some idea and possibly some pointers relative to model barn construction. Among "too late to classify" cards will be found the announcement of Mr. Zenor, who will be pleased to answer all correspondence relative to the Bach Grove Short-horns.

### Last Call for the Anstey Hereford Sale.

One of the important Hereford sales that will be held in the west this spring will be that of Mr. Geo. J. Anstey, of Massena, Iowa, the same to be held at the South Omaha sale pavilion on April 4th. Mr. Anstey is selling a grand good lot of young bulls in this sale, and some choice heifers. The bull offering is a particularly good one and is undoubtedly the best lot that has ever come from the Anstey herd. They are growthy fellows, well developed, with lots of bone, and are ready to go right out and do good service. There are about twenty-five of these and they are sired by Albany 60437, Keep Ahead 107728, Sidney 1st 161307 and Fairview Tom 3d, the latter being a grandson of old Corrector. These bulls will range in age from fifteen to twenty-four months, and the heifers are from eighteen months to two years. The offering is the natural increase from the Anstey herd. There will not be an animal in the sale that has not been bred on the Anstey farm, and Hereford breeders should therefore remember that the cream of the herd will be put into this sale. There are several bulls in the offering that are good enough for herd headers. Duke of Fairview is an eleven-months-old bull and was sired by Sidney 1st. Here is a growthy fellow, well developed, good in the lines and a bull that will round out into a 2,500-pound animal. Sankey 2d is about the same age and is also sired by Sidney. His dam is Sasnae, a granddaughter of Sir Bartle Frere, and one of the best cows in the Anstey herd. He is a low-down, thick fellow and the making of a most excellent bull. Lord Hewer 3d is also a son of Sidney and is out of a granddaughter of old Corrector. He is one of the good bulls in the sale. There are others that are just as good and we can say to bull buyers that they will find some right good ones in the Anstey offering. The heifers are an even lot and are bred to Beau Shadeland, a son of the noted show and breeding bull, Beau Donald 28th, and to Sidney 1st, a grandson of Keep On. These two bulls now stand at the head of the Anstey herd, and are two of the best Hereford bulls in the state. These heifers are very uniform in size and color, and there is not one in the sale that has a bad head or horn. Remember, this sale will be held at the South Omaha sale pavilion on April 4th. The catalog is now ready for distribution. Write for it at once and mention The Homestead.

### Last Call for Shannon City Angus Sale.

On Wednesday, April 3d, at Shannon City, Iowa, Mr. T. A. Stevenson and Mr. S. G. Smith will make a public sale of thirty-five head of Aberdeen Angus cattle. There will be fifteen bulls in the sale and twenty females. Mr. Smith is closing out his herd on account of his wife's health, and he therefore sells his herd bulls and all his foundation stock. There are some well-bred cattle in the sale and there will be some good bargains here for somebody. The bulls are a growthy lot and are well developed. The three-year-old Trojan Erica bull, Elldene 73161, will be sold, also the five-year-old bull, Ben Odell C. V. 55953. Besides these there will be four young Pride bulls offered, as well as several of the other families. They are selling five Pride cows, as well as several of the plainer sorts. The cattle are in good fair condition, and while not show cattle in any sense of the word, are good, useful and money-making Aberdeen Angus. As Mr. Smith is closing out he is therefore putting in all his best cows and heifers, and some of these are bred in the purple. It will be an excellent place to buy Angus and we hope to see a good attendance on the part of farmers and breeders. Write Mr. T. A. Stevenson, Shannon City, Iowa, for catalog and please mention The Homestead.

### Cruikshank Bulls.

Anyone wanting to secure a herd header for their Short-horn herd should lose no time in seeing that veteran breeder, Mr. C. C. Norton, of Corning, Iowa. He has a Duchess of Gloster and a Secret that are fit to head any herd in America, and he has a number of other young bulls that are the making of excellent herd bulls. These are pure Cruikshank, of the richest breeding and individually they are all that could be desired. If any of the readers of this paper are seeking this class of bulls it will certainly pay them to go and see Mr. Norton.

## COMBINATION SALE OF Short-horns

AT SAVANNAH, MO., FRIDAY, APRIL 12TH.

50 HEAD---10 BULLS & 30 FEMALES 50

HERD BULLS & CHOICE BREEDING COWS

The consignors are R. A. Coffey & Son, Savannah, Mo.; J. H. Beattie, Rosendale, Mo.; P. W. Hoshor, Rosendale, Mo.; Andrew Johns, Rosendale, Mo.; Sanford Johns, Rea, Mo.; Chas. Sweet, Filmore, Mo.; J. W. Zimmerman, Savannah, Mo. Each consignor is selling stock that he feels should meet with the approval of the man wanting good, useful Short-horns. We expect to make this an annual event and know that in order to make our sales successful we must offer good breeding stock. There will be herd bulls in the offering, also bulls that will please the farmer or ranchman. Write today for catalog, mentioning this paper.

H. R. COFFER, MANAGER, SAVANNAH MISSOURI

Col. Geo. P. Bellows, Auctioneer.

## The Hereford Event of the Season

THE ANNUAL JOINT OFFERING FROM THE WELL KNOWN HERDS

**STANTON BREEDING FARM CO., Madison, Neb., and  
EDMONDS, SHADE & COMPANY, Kingsley, Iowa, at**

**Sioux City, Iowa, April 3, 1907**

In the New Live Stock Sale Pavillion. Sale Called at 1:00 P. M.

**20 High Class Cows and Heifers**

A few with calf at foot including some of the winners of 1906 and twenty bulls of outstanding merit among which are many herd headers and were first prize winners. This is the greatest offering that the breeders and farmers of the Northwest have had the privilege of attending in late years.

There will be a grand lot of bred heifers by Beau Donald 7th, Columbus 35th, Climax, King Edward, Brick Mason, Imp. Passport and other great bulls.

An excellent lot of young cows with fine type of character and most successful blood lines bred to some of the greatest bulls of the breed—Imp. Albany, Rex Maximus, Climax, Columbus 35th, Beau Donald 7th, and King Edward. A grander lot of young bulls and heifers was never offered to the public at one sale. Every animal is fully guaranteed. Write for catalog to either of the above firms. Cols. F. M. Woods and F. F. Luther, Auctioneers.

**C. R. Thomas, Clerk.**

**J. A. SHADE, Mgr., Kingsley, Iowa.**

### Combination Sale of Short-horn Cattle.

On April 11th, under the management of Mr. E. R. Silliman, of Colo, Iowa, will occur the sale of forty Short-horn cattle at the fair grounds in Nevada, Iowa. These cattle are consigned by Messrs. E. R. Silliman, of Colo, Iowa; Wilkening & Shaw, of Colo; Pat Mulcahy, of Colo; A. J. Graves & Son and S. S. Kooser, of Ames, and C. E. Klump, of Nevada, Iowa. A cordial invitation is extended by these breeders to be present at their third public offering. They present a variety of blood lines, among which are some good cattle. In the selection of this joint stock sale, care has been taken to include only breeding animals. Nothing has been cataloged about which there is any doubt. The cattle will only be in breeding condition and have had no special preparation for the sale. All cows sold with calves at foot, or showing in calf, will be considered breeders, and all cows lately bred or open heifers are guaranteed producers. All bulls are guaranteed breeders under proper care. This is the guaranty that is made by the owners. Mr. Silliman is selling seven head of grand Duchess of Oxford, all tracing to Imp. Grand Duchess of Oxford 40th, a cow that was bred by the Duke of Devonshire and imported in 1881 by Mr. B. C. Rumsey, of Buffalo, N. Y. The Oxfords are considered one of the best branches of the Bates cattle. Mr. Rumsey of late years used the best Scotch bulls that money would buy, not hesitating to put them on the Oxford cattle. Mr. Silliman purchased at the Rumsey dispersion sale two females of this family, and they have been so prolific that he is now enabled to sell seven head of this one family. The remainder of his offering are Josephines, Nellie Blys, etc. Messrs. Graves & Son are selling some well-bred Scotch-topped cattle, including four good young bulls, all red. Mr. C. E. Klump sells seven cows of the Flora, Josephine, Young Mary, Oxford Duchess and Caroline families. Mr. Kooser sells Lady K. with a bull calf at foot that was dropped September 19th. Lady K. belongs to the Booth family of Rosebush, tracing to Imp. Rosebud by Harsley. She was bred by Mr. R. Booth, of Killerby. The bulls consigned by all the breeders are of the good, useful type and are well Scotch topped, including a splendidly-bred Wild Eyes bull consigned by Mr. Mulcahy. The catalog can be had for the asking, and we believe it is worth the while for all lovers of good Short-horns who can use some practical American-bred cattle to attend this sale and buy them worth the money. The quarter-page announcement can be found on page 25.

### Some Bargains in Duroc Boars.

Messrs. Comer & Gilliland, of Carlinville, Ill., are making an extra good offer on Duroc Jersey fall and spring boars in their advertisement on page 26 of this issue. This firm have been breeding Durocs of superior merit for several years, but were heretofore known as individual breeders. They have combined their herds and have on hand a number of very good October pigs. They are sired by Carlinville Chief, he by Chief of Ohio, a litter mate to Ohio Chief. These fall boars are out of some of the best sows which these gentlemen own, and represent the best and most profitable strains of the breed. The sows are sired by such noted boars as Kan't Be Beat, Jay's Onward (a litter mate to Gold Cloud, the noted boar at the head of the good herd of Messrs. Fred Kraschel & Son, of Macon, Ill.), Crimson Chief (one of the herd boars in use in the herd of Mr. J. A. Teter, of Remington, Ind.), Bishop, a grandson of Longfellow. In addition to these fall pigs, this firm are offering for sale an April boar by Proud Advance, and a July pig by Kruger II., he by Kruger, the noted boar in use in the well-known herd of Mr. Ira Jackson, of Ohio. The breeder who is in need of a good fall boar or who wants a son of the noted breeding boar, Proud Advance, will do well to write these gentlemen as per their advertisement on page 26 of this issue. The prices are plainly stated and if you mean business write them at once, kindly mentioning this paper.

### Combination Sale of Short-horns at Savannah, Mo.

On Friday, April 12th, at Savannah, Mo., under the management of Mr. H. R. Coffey, of that place, the following breeders of Short-horns will make a sale of cattle: Messrs. R. A. Coffey & Son, Savannah, Mo.; J. H. Beattie, Rosendale, Mo.; P. W. Hoshor, Rosendale, Mo.; Andrew Johns, Rosendale, Mo.; Sanford Johns, Rea, Mo.; Chas. Sweet, Florence, Mo.; and J. W. Zimmerman, Savannah, Mo. Each of these gentlemen own good

herds and have decided to annually hold a public sale in order to market their surplus breeding stock and get their herds before the people. They have each agreed to sell only such stock as will be a credit to the herds from which they come and stock that they think will do the purchasers good. The bull offering will be found particularly strong, there being both Scotch and Scotch-topped bulls that should be in service in good herds—both breeding herds and farmers' herds. The ages of these are good. Two proven herd bulls of much merit are listed for the sale. Messrs. R. A. Coffey & Son, of Savannah, Mo., sell their five-year-old Scotch herd bull. We regret that a catalog has not reached us so that we might give his breeding. We have seen this bull and his get and the man hunting a breeding bull should see him. He is a roan, a massive fellow with a wonderful constitution, a fine head and front end that is exceptionally good. Over back, loin and through the rear quarters he is good. His get show great promise and Messrs. Coffey & Son would not sell him, but that they are keeping so many of his get. Messrs. Coffey & Son also sell some yearling bulls of much merit. Mr. Chas. Sweet, of Florence, Mo., sells his herd bull and some desirable younger bulls. The cows consigned by each of the contributors are those that they know are good producers and cows that they do not hesitate to stand behind with their personal guarantee. Savannah has been selected as a sale point on account of the excellent railroad facilities. Parties coming via St. Joseph, Mo., can make good connections morning of the sale at St. Joe and return in the evening after the sale. Those coming from the north can take either the C., B. & Q. or the Great Western. Col. Geo. P. Bellows does the selling. If you want to buy Short-horns in advance of the rise that is surely coming, arrange to be at Savannah on April 12th. Manager H. R. Coffey, of Savannah, Mo., will gladly mail catalogs to all who write, and give all information desired. See page 27 for advertisement and kindly mention this paper when writing.

### Geo. Bothwell's Clover Blossom Short-horns at Auction.

On Monday, April 22d, at Hamilton, Mo., the famous Clover Blossom herd of Short-horns owned by Mr. Geo. Bothwell, of Nettleton, Mo., will be dispersed at public auction. Mr. Bothwell sells at Hamilton, Mo., on account of the excellent railroad facilities. This should be an important event in Short-horn circles, as Mr. Bothwell parts with a great herd that would not be sold were it not for the recent death of his father who owned an interest in the herd, and in order to settle the estate the cattle must be sold. There are in the sale a great many daughters of the great herd bulls, Grand Victor and Imp. Nonpareil Victor, sire and grandsire of the champion Nonpareil of Clover Blossom, that was champion junior bull calf in 1900 and champion junior yearling bull in 1901. The followers of the Cruickshank and Scotch tribes will find this an excellent opportunity to buy both imported cows and Scotch cows that are only one, two and three generations removed from the imported cow. The crosses of the two great bulls, Grand Victor and Imp. Nonpareil Victor, on Mr. Bothwell's Rose of Sharon, White Rose, Goodness and Princess tribes has proven an excellent cross and the

## Anstey's Hereford Sale

AT SOUTH OMAHA, NEBRASKA, THURSDAY, APRIL 4, 1907.

**25 YOUNG BULLS - - - - - 20 CHOICE HEIFERS**

THE cream of my herd goes into this sale. Everything is my own breeding, and only the best have been picked for this occasion. These are sired by Albany 60437, Keep Ahead 107728, Sidney 1st 161307 and Fairview Tom 3d 138860. The heifers are bred to Sidney 1st 161307 and my great young bull Beau Shadland 10th 207380, a son of Beau Donald 28th. The best bunch of young bulls that has ever been sold in South Omaha will be found in my sale. Write for catalog at once. Address,

**GEO. J. ANSTEY, MASSENA, IOWA.**

Col. Geo. P. Bellows, Auctioneer.

Please Mention Iowa Homestead.

### POLLED DURHAM CATTLE.

## Botna Valley Herd Double Standard Polled Durhams

SOME splendid young bulls for sale, ranging in age from twelve months to two years; mostly dark red. These bulls are bred right, fed right and prices are right. Public Sale, Oct. 30th, at which time we will sell 50 one, two and three-year-old heifers. Address, JAMES WILSON & SONS, AVOCA, IOWA

### ABERDEEN ANGUS CATTLE.

## Holbrook Aberdeen Angus Breeders.

COMPRISING the allied herds of P. J., M. H. and Mike Donohoe and John and Michael Cash of Holbrook, Iowa. 200 head of choice Dobbies within a radius of two miles of Holbrook. The International Champion Black Wood Lawn 42088 heads the herd. The following families are represented: Prides, Blackbirds, Ericks, Heather Blooms, Barbaras, etc. Other bulls used on the herd are Wood Lawn Blackbird Lad, Homedale Black Jam and Morning Star 21. We can supply any class cattle desired. Come to Holbrook and allow us to convince you of this fact. Address any of the above breeders, mentioning this paper.

## 10 Aberdeen Angus BULLS FOR SALE.

Twelve to Fourteen Months Old.

WILL sell at farmers' prices. \$100 gets a good bull. Prides, Queen Mothers, Heather Blooms, Rothermie Queens, etc. Address,

**John E. Griffith,**

WASHINGTON, IOWA.

(Mention Homestead.)

ABERDEEN-ANGUS bulls for sale, of the fashionable families. Queen Mother, Erica and Drumin Lucy and a few others from 6 months to 2 years old. R. Wilkinson Sons, Mitchellville, Iowa.

man who wants good, reliable American-bred sorts topped off with the best of Cruickshank sires should not miss these. The writer has just been to see the Clover Blossom herd and we advise all of our readers who want good Short-horns, well bred, to be with Mr. Bothwell sale day. Watch these columns for future announcements and write him today to put your name on his mailing list for a catalog so that you will get same in time to study the blood lines that have made the Clover Blossom herd. Kindly mention this paper when writing.

G. A. Fewel, Leeton, Mo., Changes Address.

In a recent communication from Mr. Fewel he tells us that he has moved from Leeton, Mo., to Muskogee, Okla. His old customers will find him ready to fill their wants in his new location, just as satisfactorily as he did at the old stand. The sale which he made February 22d in Missouri was a success in every way and the total amount realized from jacks and horses slightly beat the \$25,000 mark. Mr. Fewel wishes to inform the readers of this paper that he will keep them posted as to what he has for sale through these columns. We trust that in his new location this breeder will meet with the success which he well deserves.

## WHEATLEY AND WARD'S ANGUS CATTLE—Bulls For Sale

HORSES.

# Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

**Watson, Woods Bros. & Kelly Co.,**

LINCOLN HOTEL BUILDING

**Lincoln, Neb.**

## THE LAFAYETTE STOCK FARM

**J. CROUCH & SONS, Props. Lafayette, Ind.**

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 champion-ships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

**J. CROUCH & SON.**

Departments:

**Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.**  
Have just received a large importation of Percheron and Belgian Stallions and Percheron and Belgian Mares.

### BERKSHIRE HOGS.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pumped with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## FOR SALE. Percheron, Clyde Stallions and Mares

At prices all can buy. Also Short-Horn Cattle, Both Sexes.

H. E. PETERSON,

LYONS, NEBRASKA

## HORSES.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 75 Percherons, Belgians and Coachers 75

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and AP-PROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

IKKY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$3,000. Iams sells "TOP NOTCHERS" so good, big and cheap that THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holer." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$3,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. REFERENCES: St. Paul State Bank and Citizen's National Bank.

## ST. PAUL, - NEBRASKA

### OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconceived effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percheron and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landshaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

**OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.**

## TAYLOR & JONES'

New Importation

ARRIVED MARCH 9TH.

Our barns are now filled with imported and home-bred PERCHERON, SHIRE and BELGIAN STALLIONS. Don't you know that PUBLIC SALES of stallions only indicate a cheap lot of trash, or that the sellers are men who CAN'T DO A BARN BUSINESS? Did you ever know a merchant to sell groceries at auction? Would you buy a gold watch at auction? We use no slick salesmen to sell our horses. They are good enough and our reputation so clean that we are selling more horses than ever before, which proves our prices are the lowest, our horses the best and our manner of doing business is satisfactory to our patrons. For catalog address,

## TAYLOR & JONES,

WILLIAMSVILLE,

BOX 68,

ILLINOIS.

VOL. LII. NO. 14.

DES MOINES, IOWA, APRIL 4, 1907.

WHOLE NO. 2594

### OUR GROWING NATIONAL WEALTH.

The western farmer, whose toil of brain and brawn is so fundamental to the whole industrial development of the nation, will feel a thrill of patriotic pride and satisfaction when he reads a special report issued last week by the census bureau on wealth, debt and taxation in the United States. It tells a story in which the farmer plays a leading part, showing that his place in the upbuilding of this great, rich country is one of high honor and usefulness. It also discloses a situation remarkably favorable to the continuation of the unexampled prosperity of recent years, a prosperity shared by all classes.

The total wealth of the American people as estimated in this gratifying bulletin is \$107,104,192,410, or more than one hundred and seven thousand millions of dollars. This represents an increase in the four-year period from 1900 to 1904 now first covered by complete statistics of \$18,586,885,635. The stupendous proportions of this gain will be appreciated when it is remembered that the entire national wealth in 1850 was only \$7,135,780,228. There is every reason to believe that the two years which have since elapsed have exceeded any one of the preceding years in net productiveness; hence it is within reason to say that the years 1905 and 1906 witnessed a gain in national wealth exceeding the entire property of the country in 1850.

American indebtedness is rapidly declining, relatively to population. The total public indebtedness of continental United States in 1902 was \$2,789,990,120, of which only \$925,011,637 was of the national government. Our per capita public indebtedness in the last year ascertained was \$35.50. Great Britain's was 3.93 times greater, Italy's 2.25 times greater and that of France 4.86 times greater.

Of our vast national riches, real property and improvements taxed were \$55,510,228,057, or more than half of the whole; real property and improvements exempt from taxation, \$6,831,244,570. Live stock amounted to \$4,073,791,736 and farm implements and machinery to \$844,989,863. Railroads and their equipment totaled \$11,244,752,000; telegraph systems to \$227,400,000 and telephone systems to more than twice as much, or \$585,840,000.

All of this is good reading for the farmer. It means safe and stable general conditions in the coming years to safeguard his own great industry.

### SOWING FLAX SEED IN SMALL GRAIN

The following communication has been received from a subscriber, Mr. W. P. Reeves:

I would like to know if it is practicable to sow a little flax seed in the small grain crops, particularly among oats and barley. If so, how much would you advise sowing? My thought is to grow something that will lessen the amount of oil meal needed next year for feeding purposes.

We have tried the plan of sowing ten pounds of flax seed per acre with the oat crop and have found the results to be eminently satisfactory. The only precaution that one must take is to sow flax with a rather late maturing variety of oats.

The objection to sowing flax with barley would be that the barley would mature before the flax, and it is doubtful if the flax would thrash out.

A mixture of flax and oats seeded at the rate of ten pounds of the former and three bushels of the latter per acre

makes a splendid feed for any kind of stock, and it is particularly suited to brood sows, and to work horses.

### ENSILAGE FOR BEEF PRODUCTION.

The production of prime beef will always be an important industry if not "the" important industry, in the corn belt. In time past a very large percentage of the meat supply of this country came from the ranges, but in the future the range can do little more than to supply the calves and yearlings to Central West farmers to be fed out in the feed lots of this region on corn.

Of the different methods of handling corn none is of greater interest than the plan of cutting it up, putting it in a silo and feeding it out in the form of ensilage. In the last report of the Wisconsin round-up Institute David Imrie, of Roberts, Wis., makes the following

statement regarding the value of silo for beef production:

I contend (and all of you who have silos will bear me out in this) that we can harvest our corn crop and place it before our stock cheaper in the form of silage than in any other way and with less waste, as it is all consumed. For beef production we want silage that is rich in corn. Do not plant it too close in the drill, about eight inches is right, so that every stalk will have a good ear on it. Put it in the silo at the proper time and you have an ideal food for growing calves, young cattle and fattening steers.

Do not misunderstand me and go away from here with the idea that good corn silage is all you need to make a success of beef production. As soon as the calf will eat coarse food, feed him what silage he will eat up clean twice a day, with whole oats and clover hay. We usually put our steers on the market as two-year-olds. The first winter they get silage, what they will eat twice a day, with ground oats and barley, or oats and corn (two-thirds corn), clover hay and shredded corn fodder. Feed until pasture is good. The next fall commence to feed before pastures begin to fail. Bring them to fall feed

gradually. In fattening, remember you cannot fatten on silage alone. No matter how well eared the corn is, you must have more corn. We feed about like this: In the morning, thirty-five to fifty pounds of silage and a good panful of ground oats and barley, or oats and corn, or bran and corn, or shorts and corn; about ten o'clock they have what shock corn they will eat. Their mangers are also filled with clover hay. At night, they get the same feed of silage with the oats and barley, etc. After this is eaten, they get crushed or snapped corn, what they want; a little oil meal is also beneficial. After they are on full feed we generally feed them from 100 to 120 days.

The trouble with us farmers is, we cannot tell by actual figures just what is gained by the use of silage in producing beef, as we do not weigh the animals nor the feed consumed; the only way we can judge is from one year to another. As we have fed steers on dry feed, on whole corn and on ground corn and with silage, I will say that I have never had as good success as when I fed silage in conjunction with the other feeds mentioned. We allow the steers to run in a yard and feed in the barn, where they can go in and out as they please, with fresh water and salt always before them.
